Due to the price-raising measures adopted by the Group, the Group experienced an increase of approximately 26.0% in the turnover of its leather care products during the Period as compared with the Last Corresponding Period. On the other hand, the turnover of the Group’s oral care products for the Period witnessed a decrease of approximately 19.1% as compared with the Last Corresponding Period. There are several reasons accountable for the decrease. First of all, the purchase quantity of one of the Group’s five top 5 customers dropped sharply in the past three quarter. Secondly the sales from offline channels was not as ideal as expected.

Business Review and Prospects

PROSPECTS AND OUTLOOKS

The fourth quarter of 2021 will be full of challenges. On one hand, the Delta variant, a highly transmissible strain of COVID-19, has been detected in several cities in mainland China, casting a shadow over the recovery of the offline economies. On the other hand, China's producer price index, which measures the inflation received by manufacturers, rose by 13.5 percent year-on-year in October 2021, marking the highest level since the National Bureau of Statistics of China started to release the numbers in 1996.

The Group will take the following measures to cope with the rising production costs and challenging market environment. Firstly, the Group will take practical measures to prevent epidemic outbreak. Secondly, the Group will strengthen cooperation with suppliers and predict the price trend of raw materials. Thirdly, the Group will further increase kitchen cleaning products and oral care products consumer penetration via live video sales and other kind of new media channels. The Directors believe that these steps will be helpful to improve the results of the Group.

Management Discussion and Analysis

RESULTS OF OPERATION

Our turnover for the Period was approximately RMB204.9 million, representing a decrease of 2.9% as compared to approximately RMB210.9 million for the Last Corresponding Period. During the Period, the Group incurred a net profit of approximately RMB3.4 million, reflecting a decrease of approximately 40.3% as compared to the net profit of RMB5.6 million for the Last Corresponding Period. The basic earnings per share was RMB0.34 cents for the Period, while the basic earnings per share was RMB0.56 cents for the Last Corresponding Period.

Turnover

The Group recorded a total turnover of approximately RMB204.9 million for the Period, representing a decrease of approximately 2.9% as compared to approximately RMB210.9 million for the Last Corresponding Period. The decrease in turnover was mainly resulted from a decrease in the turnover of oral care products by approximately RMB21.0 million or 19.1%, from approximately RMB109.7 million for the Last Corresponding Period to approximately RMB88.8 million for the Period, which was mainly attributable to (i) the purchase quantity of one of the Group's five top 5 customers dropped sharply in the past three quarter; and (ii) the sales from offline channels was not as ideal as expected.

In the meanwhile, the turnover of the Group's household hygiene products increased by approximately RMB12.2 million or 13.5%, from approximately RMB90.5 million for the Last Corresponding Period to approximately RMB102.7 million for the Period. The increase was mainly thanks to the strong performance of the Group's kitchen cleaning products which applied the Group's new patent technology.

The Group's leather care products recorded an increase of approximately RMB2.8 million or 26.0%, from approximately RMB10.6 million for the Last Corresponding Period to approximately RMB13.4 million for the Period. The increase was mainly due to the price-raising measures adopted by the Group.

Cost of sales

Cost of sales increased from approximately RMB120.6 million for the Last Corresponding Period to approximately RMB125.0 million for the Period, representing an increase of approximately RMB4.4 million or 3.6%. The increase in cost of sales mainly due to the rise in the price of raw materials and packing materials in the Period.

Management Discussion and Analysis

Gross profit and gross profit margin

Gross profit declined from approximately RMB90.3 million for the Last Corresponding Period to approximately RMB79.9 million for the Period, representing a decrease of approximately RMB10.4 million or 11.5%. The gross profit margin decreased to 39.0% during the Period, representing a decrease of 3.8 percentage points as compared to 42.8% for the Last Corresponding Period.

The decreases were mainly attributable to the rise in the price of raw materials and packing materials. In addition, another reason is the decreased sales of oral care products, which generate higher gross profit margin compared with the Group's other product segments.

Selling and distribution costs

Selling and distribution costs incurred for the Period were approximately RMB43.4 million, reflecting a decrease of approximately RMB5.1 million or approximately 10.5% as compared to approximately RMB48.5 million for the Last Corresponding Period. The decrease was driven by the reduced costs of temporary sales personnel during the Period.

Administrative expenses

Administrative expenses incurred for the Period were approximately RMB33.7 million, representing a decrease of approximately RMB3.2 million or approximately 8.7% as compared to approximately RMB36.9 million for the Last Corresponding Period. The decrease was mainly resulting from the reduced repair and maintenance costs spent on the workshop, warehouse and office building of the Group compared to the Last Corresponding Period.

Finance costs

Interest expenses incurred for the Period were approximately RMB0.6 million which decreased by approximately RMB1.6 million or approximately 73.3% as compared to approximately RMB2.2 million for the Last Corresponding Period.

The decrease in the Period was driven by the decreased loan amount for the Period as compared to the Last Corresponding Period.

Management Discussion and Analysis

Profit for the Period
