CHAIRMAN'S STATEMENT

To all shareholders,

On behalf of the board (the “**Board**”) of Directors of Dowway Holdings Limited (the “**Company**”, and together with its subsidiaries, the “**Group**”), I am pleased to present the Group’s unaudited third quarterly results for the nine months ended 30 September 2022 (the “**Period**”).

As an integrated exhibition and event management service providers in the People’s Republic of China (“**PRC**”), the Group is mainly engaged in design, planning, coordination and management services for exhibitions and events across more than 50 cities in the PRC. Since 2009, the Group has been providing integrated exhibition and event management services to domestic and overseas world-renowned automobile brands, primarily for facilitating showcases, promotion and/or sales of their brands. The Group also undertakes projects related to exhibitions and events from non-automobile companies. Through its dedicated efforts and reliable services, the Group has established a strong reputation in this field and a solid and loyal customer base.

In the first three quarters of 2022, faced with complex and challenging domestic and international environment and multiple shocks from factors beyond expectation, China’s government adhered to the general principle of pursuing progress while maintaining stability, effectively coordinated the efforts of COVID-19 prevention and control and economic and social development, and accelerated the implementation of the policy package for stabilizing the economy and the follow-up measures based on the requirements of ensuring effective COVID-19 containment, economic stability and development security. As a result, the national economy sustained recovery against the pressure and showed sound momentum in the third quarter, notably better than the second quarter. The production and demands continued to improve, employment and prices were generally stable and people’s livelihood was strongly and effectively safeguarded. The national economy was generally performing within an appropriate range. According to recently released data by the National Bureau of Statistics, the gross domestic product (GDP) in the first three quarters reached RMB87,026.9 billion, up by 3.0 % year on year at constant price, or 0.5 percentage points ahead than that in the first half year. By quarter, the GDP grew by 4.8 % year on year in the first quarter, 0.4 % in the second quarter and 3.9 % in the third quarter.

In the first three quarters of 2022, the value added of services went up by 2.3% year on year, 0.5 percentage points ahead than that in the first half year. In September, the Business Activity Index for Services stood at 48.9%. From the perspective of market expectation, the Business Activity Expectation Index for Services was 56.1%.

During the Period, the Group has managed and coordinated 69 exhibition and event projects, 11 exhibition showroom projects and 7 advertisement projects, among which 44 projects had been completed, which collectively generated a revenue of approximately RMB100.82 million, representing a period-on-period decrease of RMB14.22 million or approximately 12.36%. The Group recorded a gross profit of approximately RMB4.34 million, a decrease of approximately RMB9.21 million period-on-period, which was mainly due to the adverse impacts on the exhibition and event management services industry caused by the outbreak of COVID-19 pandemic (the “**Pandemic**”) in the PRC in the second and third quarters of 2022. The Group recorded a net loss attributable to the owners of the Company of approximately RMB9.11 million during the Period. The Board does not recommend the payment of dividend for the Period.

CHAIRMAN'S STATEMENT

Looking ahead, we should be aware that the foundation for sustainable and steady recovery of the economy is yet to be consolidated due to: externally, the risk of stagflation in the world economy is rising, the policies of major economies tend to be tightened, and external instabilities and uncertainties are increasing significantly; and domestically, the impact of the Pandemic is lingering, shrinking demand intertwines with disrupted supply, structural problems combines with cyclical problems and market entities still face operational difficulties. The Group will continue to uphold the “customer-oriented” service philosophy and adhere to the principle of “high quality and efficiency; cooperation with a view to achieve a win-win situation” and will closely monitor the development trends of the PRC exhibition and related services industries. It will dig into the needs of its core customers in order to provide more dedicated services. Meanwhile, the Group will horizontally develop the advertising and other exhibition and promotion businesses to improve their business layout. It will also grasp all potential opportunities that arise within the market so as to further promote the development of the Group’s exhibition and event management and exhibition showroom services businesses, in a bid to maintain the Group’s leading position in the industry, thrive in an increasingly competitive environment and generate long term value for the Company’s shareholders and investors.

Finally, on behalf of the Board, I would like to extend my sincere gratitude to the shareholders, customers and business partners who have always supported the Group, as well as all my colleagues who have dedicated and worked hard for the Group.

Chairman, Chief Executive Officer and Executive Director

Huang Xiaodi

MANAGEMENT DISCUSSION AND ANALYSIS

MARKET REVIEW

In 2021, the global economic recovery continued as economic performance accelerated amid the lifting of most Pandemic restrictions and deployment of COVID-19 vaccines. According to the International Monetary Fund (IMF), global growth reached 5.9% during the year. Benefited from the effective anti-pandemic measures and a series of economic support and stimulus policies implemented by the Chinese Government, China sustained steady recovery of the national economy and maintained the leading position in economic growth and pandemic prevention and control in the world. China's economy showed a strong rebound in 2021. GDP expanded 8.1%, beating the government's own target of "expected above 6%", despite the complex international environment, resurgent COVID-19 cases, and severe flooding in Henan province. Consumption remained as one of the key drivers for China's economic growth. Retail sales grew by 12.5%, in which retail sales of automobiles exceeded RMB4 trillion to RMB4.4 trillion, up 7.6% year-on-year, according to the China Association of Automobile Manufacturers (CAAM).

Meanwhile, China's exhibition industry saw rapid expansion in 2021 against the backdrop of severe challenges brought by the Pandemic to offline exhibitions across the world. As a result of the swift economic recovery and effective control of the virus within the border, China has emerged as a haven for global businesses.

During the first three quarters of 2022, China's economic development was extremely unusual. Major economic indicators plunged in April. China's government rolled out a package of pro-stability policy measures on maintaining stable macroeconomic performance and the economy. The decline of major economic indicators narrowed in May, and in June registered a stable recovery. The economy in the third quarter showed sound momentum with the GDP up by 3.9% year on year. Even though the Pandemic is still spreading globally and the international landscape is complicated with high uncertainties and instabilities, the foundation for economic recovery and development will be consolidated, and the economy running will be kept within an appropriate range to achieve the best results for the full year of 2022.

BUSINESS REVIEW

The Group is an integrated exhibition and event management service provider in the PRC. It mainly serves as a project manager and provides comprehensive and related services to customers, including design, planning, coordination and management of exhibitions and events, ranging from themes, stage, site design and master planning, feasibility studies, procurement of construction materials and equipments, project management, and coordination of suppliers and/or staff and on-site supervisors in respect of construction of settings, stage and exhibition booth, and installation of audiovisual and lighting facilities. The Group offers one-stop service and provides customers with customized themes for their exhibitions or events, and collaborates with different suppliers to plan, coordinate and manage the related plans.

The Group engages principally in offering assistance to display, promotion and sales of automobiles. With more than ten years of rich business experience, the Group has established an extensive customer base, including internationally renowned automobile companies such as premium German and Italian car brands. In addition, the Group also accepts requests from non-automobile related companies to run exhibitions and events for them.

MANAGEMENT DISCUSSION AND ANALYSIS

Led by an experienced and competent management team with shrewd market acumen and rich business experience, the Group has actively leveraged its advantages to strengthen its strategic partnership with world-renowned automobile companies, expanded its supplier network and continuously implemented stringent service quality control, and hence successfully achieved steady growth in a highly dispersed market.

During the Period, the outbreak of the Pandemic in the PRC in the second quarter of 2022 caused extremely adverse impacts on the exhibition and event management services industry. The Group completed 42 exhibition and event projects and 2 advertisement projects, with aggregate revenue decreasing to approximately RMB100.82 million by approximately 12.36%.

FINANCIAL REVIEW

The Group generates revenue mainly from the provision of design, planning, coordination and management services of exhibitions and events in the PRC. The following table sets forth the breakdown of revenue from business operations for the nine months ended 30 September 2021 and 2022.

	For the nine months ended 30 September			
	2022		2021	
	RMB'000	%	RMB'000	%
	(Unaudited)		(Unaudited)	
Revenue from automobile related exhibitions and events related services	54,459	54.02%	50,255	43.69%
Revenue from non-automobile related exhibitions and events related services	4,095	4.06%	22,331	19.41%

Revenue from advertisement related services	36,949	36.65%	22,053	19.17%
Total	100,817	100%	115,036	100%

Revenue decreased from approximately RMB115.04 million for the nine months ended 30 September 2021 to approximately RMB100.82 million for the Period, representing a period-on-period decrease of approximately 12.36% or approximately RMB14.22 million. The decrease was primarily due to the exhibition industry started to recover for the nine months ended 30 September 2021 but was adversely impacted by the Pandemic from March to May 2022. It resulted in the suspension of exhibition events and decrease of revenue achieved by the Group during the Period.

MANAGEMENT DISCUSSION AND ANALYSIS

During the Period, revenue from automobile related exhibitions and events related services increased from approximately RMB50.26 million for the nine months ended 30 September 2021 to approximately RMB54.46 million for the Period, representing a slight period-on-period increase of approximately 8.37% or approximately RMB4.20 million and accounting for 54.02% of the total revenue for the Period.

Revenue from non-automobile related exhibitions and events related services decreased from approximately RMB22.33 million for the nine months ended 30 September 2021 to approximately RMB4.10 million for the Period, representing a period-on-period decrease of approximately 81.66% or approximately RMB18.23 million and accounting for 4.06% of the total revenue for the Period.

Revenue from exhibition room related services decreased from approximately RMB20.40 million for the nine months ended 30 September 2021 to approximately RMB5.31 million for the Period, representing a period-on-period decrease of approximately 73.95% or approximately RMB15.09 million and accounting for 5.27% of the total revenue for the Period.

Revenue from advertisement related services for the Period increased from approximately RMB22.05 million for the nine months ended 30 September 2021 to approximately RMB36.95 million for the Period, representing a period-on-period increase of approximately 67.55% or approximately RMB14.90 million and accounting for 36.65% of the total revenue for the Period.

The cost of exhibition and event related services provided by suppliers decreased from approximately RMB94.13 million for the nine months ended 30 September 2021 to approximately RMB87.64 million for the Period, representing a period-on-period decrease of approximately 6.89% or approximately RMB6.49 million, accounted for 90.84% of the total cost of service for the Period.

Gross Profit and Gross Profit Margin

For the Period, the Group recorded a gross profit approximately RMB4.34 million, representing a period-on-period decrease of approximately RMB9.21 million as compared with approximately RMB13.55 million for the nine months ended 30 September 2021. The decrease in gross profit was mainly due to the decline of sales revenue resulted by the severe adverse impacts on exhibition and event management services industry caused by the outbreak of Pandemic in the PRC in the second quarter of 2022 and the growth of the Group's costs for the Period.

For the Period, the Group's gross profit margin was approximately 4.30%. The Group's gross profit margin recorded a decrease primarily due to (i) the decline of the Group's revenue in non-automobile related exhibitions and events related services and exhibition showroom services; and (ii) the growth of the cost of service for the Period.

PRINCIPAL RISKS AND UNCERTAINTIES

The Group faces the following principal risks and uncertainties that may materially and adversely affect its business, financial status and operating results:

1. The exhibition services industry in the PRC has relatively low entry barriers and competition is keen within the industry.
2. The Group's business depends heavily on the provision of exhibition and event management services in the automobile industry.
3. The majority of the Group's customers are automobile companies and there is no assurance that it can successfully diversify its customer base.
4. There is no assurance that the demand for integrated exhibition and event management services the Group provides can continue or increase.
5. There may be fluctuations in the Group's cost of service which it may not be able to pass on to customers.
6. The Group may face cash flow problems if it is unable to receive payments from customers on time and in full under the current pricing policy.
7. The Group may be exposed to litigation risk as a result of the engagement of suppliers without obtaining written consent from customers.
8. The Group relies on suppliers for the provision of construction services, leasing of equipment and logistics and transportation services, hence may have to bear the consequences should these suppliers deliver substandard services on its own capacity.

MANAGEMENT DISCUSSION AND ANALYSIS

9. The Group relies on its senior management and other key personnel and may not be able to retain these staff to provide services.
10. The Group may not be able to implement its business strategies and its future growth could be limited.
11. The control and prevention of the Pandemic around the world are still challenging and risky and may continue to influence on the recovery of exhibition industry in PRC to normal, which may in turn have a material and adverse effect on the Group's business, financial position and results of operations.

The cost of exhibition and event related services provided by suppliers makes up a significant portion of the Group's cost of service. The following uncertainties may affect the Group's efforts to implement cost control measures:

1. As human resources and costs of construction materials and equipments are the major components of the cost of exhibition and event related services, increase in salary of employees of suppliers and average consumer prices may push up the lump sum cost of exhibition and event related services provided by suppliers.

Major risks and uncertainties relating to the implementation of business strategies

1. The Group expects to tender proposals to potential new customers with lower profit margins in the short run in connection with its future expansion to new segments in the market and such expansion could exert great pressure on allocation of resources.
2. The Group cannot guarantee that it will have sufficient resources to support future development. Its future growth is also subject to the preferences of potential clients and the overall market situation. Failure to execute expansion strategy effectively may lead to higher costs, inefficient operation flow and decline in profitability.

FUTURE PLANS FOR MATERIAL INVESTMENTS, ACQUISITIONS AND CAPITAL ASSETS

The Group did not have other plans for material investments, acquisitions and capital assets during the Period.

MATERIAL ACQUISITIONS AND DISPOSALS RELATED TO THE SUBSIDIARIES AND ASSOCIATED COMPANIES

During the Period, the Group did not have any material acquisitions and disposals related to the subsidiaries and associated companies.

CONTINGENT LIABILITIES

As at 30 September 2022, the Group had no significant contingent liabilities (as at 30 September 2021: nil).

MANAGEMENT DISCUSSION AND ANALYSIS

HUMAN RESOURCES

As at 30 September 2022, the Group employed a total of 55 employees, among which 9 of them were at management level, all stationed in the PRC. For the Period, the staff costs (including Directors' emoluments) were approximately RMB9.52 million (for the nine months ended 30 September 2021: approximately RMB8.82 million). The Group conducts periodic performance review with employees and determines their salaries, benefits and discretionary bonuses based on factors including qualifications, contributions, years of experience and performance.

In accordance with the applicable PRC laws and regulations, the Group has made contributions to social security insurance and housing provident funds for all eligible staff. For the Period, the total amount contributed in these areas by the Group was approximately RMB2.54 million. The Group has complied with all the requirements about social security insurance and housing provident fund obligations applicable under the PRC laws and regulations.

In order to continually maintain the quality, knowledge and skills of employees, the Group has provided various training opportunities, which include on-the-job training, technical training and professional training.

The Group has maintained a good working relationship with its employees. During the Period, the Group has not experienced any significant labor disputes which are likely to have an adverse material impact on business, financial conditions and results of operations.

The Company's policies concerning emoluments of Directors are (i) the amount of emoluments is determined on the basis of the relevant Director's experience, responsibility, workload and the time devoted to the Company; and (ii) non-cash benefits may be provided to the Directors under their remuneration package.

FOREIGN EXCHANGE RISK

The Group is not exposed to any significant foreign exchange risk in the normal course of business, as it operates in the PRC with the majority of the transactions being conducted and settled in RMB.

CREDIT RISK

Credit risk exposures arise principally in cash and cash equivalents, trade and other receivables, notes receivables and contract assets shown on consolidated balance sheets.

The Group takes on exposure to credit risk, which is the risk that a customer or counterparty will cause a financial loss for the Group by failing to discharge an obligation. Credit risk is one of the most significant risks for the Group's business.

For cash at bank the Group manages the credit risk by placing its domestic deposits in reputable nationwide financial institutions with good credit ratings in the PRC and overseas' deposits in reputable international financial institutions. The Group believes those banks and financial institutions are of high-credit-quality without significant credit risk. Thus it considers its cash at bank are not at high credit risk.

The Group's trade receivables arise from exhibition and event marketing services fees, over 70% of which are in turn derived from main customers that are renowned automobile companies. Should there be change in the strategic relationships with these main customers that might cause change in the cooperative arrangements; or if they experience financial difficulties themselves which in turn causes difficulties in their settling payables to the Group, the Group's revenue from those automobile companies might be adversely affected due to deterioration in recoverability of trade receivables from them.

MANAGEMENT DISCUSSION AND ANALYSIS

To manage this risk, the Group's management team maintains frequent communications with their contacts at those automobile companies to ensure the Group captures the most updated understanding about relevant customer's business status and assesses their credibility. In view of the smooth cooperation history with these automobile companies and the sound collection history of receivables due from them, management believes that the credit risk inherent in the Group's outstanding trade receivable balances due from those automobile companies is low. As for new customers, the management is responsible for managing and analysing the credit risk for each of them before such new customers will be offered standard payment and delivery terms and conditions. To perform such assessment, various factors including their financial position and other factors about these new customers would be considered.

The Group's other receivables comprise of deposits, staff advance and loans to employees, which have a low risk of default, thus the Group considers its other receivables are not at high credit risk.

The notes receivables are bank acceptance bills which have a low risk of default; thus the Group considers its notes receivables are not at high credit risk.

LIQUIDITY RISK

The Group regularly monitors current and expected liquidity demand to ensure that it maintains sufficient cash reserves to meet related demand in the short and long run. The Group monitors liquidity position through rolling forecasts of liquidity requirements in order to ensure that it has sufficient cash on hand to satisfy operational needs.

PROSPECTS

In the first three quarters of 2022, China's government applied a series of policies and the follow-up measures based on the requirements of ensuring effective COVID-19 containment, economic stability and development security to achieve notable results. The national economy has overcome the adverse impact of unexpected factors, demonstrating the momentum of a stable recovery in the third quarter, notably better than the second quarter. The services industry was impacted adversely by the Pandemic in the second quarter grew with the value added up by 2.3% year on year, and 0.5 percentage points ahead than that in the first half of the year 2022.

It should be aware that with the external environment becoming increasingly complicated and severe, the foundation for domestic economic recovery is still not solid. At the next stage, China's government will continue to ensure stability on six key fronts (employment, the financial sector, foreign trade, foreign investment, domestic investment, and expectations) and security in six key areas (job security, basic living needs, operations of market entities, food and energy security, stable industrial and supply chains, and the normal functioning of primary level governments). The implementation of relevant policies will be enhanced and the policy effectiveness will be further unleashed to shore up the market entities, stabilise employment and prices, expand effective demand, promote reform and stimulate vitality, so as to consolidate the foundation for economic recovery and development, keep the economy running within an appropriate range and endeavor to achieve the best results.

Looking forward, the Group will effectively improve the level of co-ordination and management of exhibitions and events through the implementation of the above business strategies, improve customer service and experience in an all-round way, actively seek reformation with a view to continuing to create sustainable returns for shareholders.
