FIRST QUARTERLY REPORT
2023

* for identification purposes only

CHARACTERISTICS OF GEM (“GEM”) OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

GEM has been positioned as a market designed to accommodate small and mid-sized companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration.

Given that the companies listed on GEM are generally small and mid-sized companies, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board of the Stock Exchange and no assurance is given that there will be a liquid market in the securities traded on GEM.

Hong Kong Exchanges and Clearing Limited and the Stock Exchange take no responsibility for the contents of this report, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this report.

*This report, for which the directors (the “**Directors**”) of Xi’an Haitian Antenna Technologies Co., Ltd.* (the “**Company**”) collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on GEM (the “**GEM Listing Rules**”) for the purpose of giving information with regard to the Company. The Directors, having made all reasonable enquiries, confirm that, to the best of their knowledge and belief, the information contained in this report is accurate and complete in all material respects and not misleading or deceptive, and there are no other matters the omission of which would make any statement herein or this report misleading.*

20. EARNINGS PER SHARE

The calculation of basic earnings per share is based on the unaudited net profit attributable to owners of the parent company for the three months ended 31 March 2023 of RMB(5,185,226.15) (2022: RMB(5,878,713.84)) and the weighted average number of 1,897,629,000 shares (2022: 1,897,629,000 shares) in issue during the period. The weighted average number of ordinary shares is the number of shares in issue at the beginning of the period, adjusted by the number of shares issued during the period multiplied by a time-weighting factor.

The diluted earnings per share is equal to the basic earnings per share as calculated above since the Company does not have any potential shares outstanding for the both periods.

21. DIVIDENDS

The Board does not recommend the payment of a dividend for the three months ended 31 March 2023 (2022: nil).

MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS REVIEW

Total Operating Income

The unaudited total operating income for the three months ended 31 March 2023 was approximately RMB4.17 million, representing approximately 59% of the unaudited total operating income for the corresponding period in 2022.

During the period, due to the impact of the COVID-19, the delayed construction projects of domestic communication network operators were not yet fully resumed, which affected the operating income of mobile communication products. For agricultural products, due to the increase in the purchase price of live chicken feed, the increase in the cost of artificial breeding and the instability of the COVID-19, the operation of live chicken farming was temporarily suspended from the third quarter of 2022, and the existing facilities were leased to other operators. The operating income from sales of relevant agricultural and sideline products was only recorded.

Artificial dielectric lens antenna products (the “**Dielectric Lens Antennas**”) of the Company were introduced to the market since 2019, after which the Company concentrated all available resources to develop and promote the Dielectric Lens Antennas. Approximately RMB3.11 million was generated from sales of the Dielectric Lens Antennas, which accounted for approximately 77% of main business operating income of the Group in the first quarter of 2023.

The Group carried out the production and sales of agricultural products, mainly live chicken, chicken meat and related non-staple foods, since 2016 in order to actively respond to the national policy on poverty alleviation and fulfil its social responsibilities. Approximately RMB0.94 million was generated from sales of agricultural products, which accounted for approximately 23% of main business operating income of the Group in the first quarter of 2023.

No operating income was recorded for both operating segments of sales of underwater surveillance and related products, and sales of aircraft products in the first quarter of 2023 as the Group did not actively carry out any promotion.

Gross Profit

During the three months ended 31 March 2023, an unaudited gross profit of approximately RMB1.79 million was recorded which represented gross profit margin of approximately 43%, compared to the unaudited gross profit margin of approximately 31% for the corresponding period in 2022. The increase in gross profit margin was attributable to the increase in the sales scale of communication products and the difference in the types of communication products sold.

Segment Performance

Segment performance was evaluated after considering gross profit, selling expenses, depreciation and amortisation expenses under administrative expenses, research and development expenses, credit and assets impairment loss of each operating segment.

Selling expenses decreased from approximately RMB1.79 million for the corresponding period in 2022 to approximately RMB0.72 million for the three months ended 31 March 2023, which represents the remuneration and travel expenses of sales force.

Research and development expenses amounted to approximately RMB1.69 million for the three months ended 31 March 2023 which were basically flat with that for the corresponding period in 2022 and were solely used for further development of the Dielectric Lens Antennas and related products.

No material impairment loss was recognised for receivables and assets for the three months ended 31 March 2023.

Despite ever-increasing sales orders for the Dielectric Lens Antennas, the production capacity was operated below normal level in the first quarter of 2023 due to temporary control measures and greater working capital requirement. The operating segment of sales of antenna products and the provision of related services recorded a segment loss of approximately RMB2.33 million.

The supply and sales price of agricultural products was affected by sales scale, the operating segment of sales of agricultural products recorded a segment loss of approximately RMB0.06 million.

Since no operating income was generated from the operating segments of sales of underwater surveillance and related products, and sales of aircraft products, segment losses were recorded.

Other Expenses, Expenditure, Gain and Income

Administrative expenses amounted to approximately RMB4.52 million for the three months ended 31 March 2023 which were basically flat with that for the corresponding period in 2022.

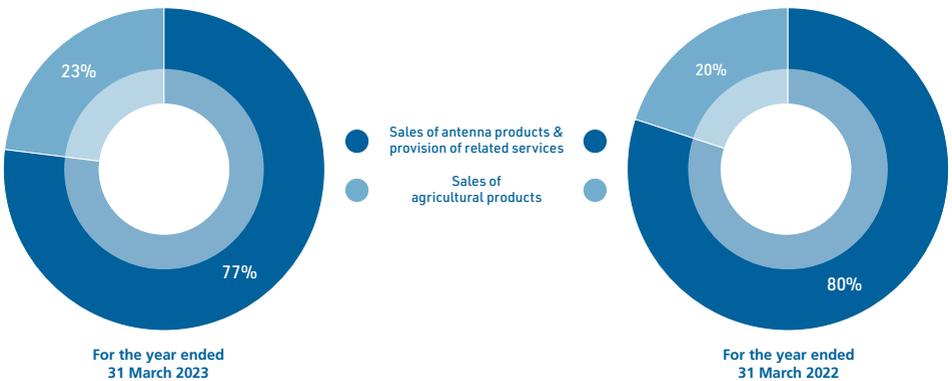

Financial expenses decreased from approximately RMB0.20 million for the corresponding period in 2022 to approximately RMB0.09 million for the three months ended 31 March 2023 which was due to the decrease in the principal of short-term borrowings of the same term and the decrease in the interest rate of borrowings during the period.

No gain was recognised as financial assets measured at fair value through profit or loss for the three months ended 31 March 2023.

Net Loss

The Group recorded an unaudited net loss of approximately RMB5.23 million for the three months ended 31 March 2023, compared to the unaudited net loss of approximately RMB5.94 million for the corresponding period in 2022. The decrease in loss was attributable to the increase in gross profit and the decrease in expenses during the period.

Composite of the Group's main business income by reportable and operating segments for the three months ended 31 March 2023, together with the comparative figures for the corresponding period in 2022 are as follows:

PROSPECTS

In the first quarter of 2023, on the one hand, the Group proactively fulfilled the orders signed in 2022 which had not yet been requested to be shipped, and at the same time it also proactively participated in the bidding and procurement projects of various operators for lens antennas. As of now, the Group has won bidding for projects in Southwest China, Northwest China, South China and North China. In addition, the Group also proactively carried out market promotion and sales of series products including Super WiFi and Super CPE with metamaterial technology as the core.

As an inevitable trend of in-depth development of informatization, the construction of smart cities is booming everywhere. Relying on the focusing characteristics of the metamaterial communication series products, Xi'an Haitian will leverage on the advantageous performances including increasing the wireless radiation power by several times, stronger receiving sensitivity, ultra-low transmission loss, high antenna efficiency, increasing the coverage area by several times, and significant decrease in construction costs and operation and maintenance costs, to adjust measures to local conditions based on "global coverage, sharing and interconnection, information fusion, and unified operation and maintenance" to build a more efficient, more convenient and more comprehensive basic network for smart city construction projects, and put forward a new construction plan with lower price and more value for its application and construction.

In the future, the Group will still focus on metamaterial technology and products, fully absorb, utilize and integrate resources, and proactively explore its application in mobile communications, smart cities, remote sensing technology, automotive detection radar, UAV data transmission, Internet of Things, smart metasurfaces, and many other fields to continuously enrich and improve the series of metamaterial products to build the core competitiveness of the Group.

The Group will focus on the business segments of mobile communication products and related services in development, and will pay close attention to the relevant working capital requirements. The Group will also consider further financing through bank borrowing, issuance of shares, issuance of bonds and other channels to ensure smooth operation and development.
