- maintenance and repair of passenger cars;
- modification, tuning and grooming of the performance or appearance of passenger cars and trading of spare parts and accessories;
- provision of motor finance services;
- trading of passenger cars; and

2. Basis of preparation

The unaudited condensed consolidated financial statements has been prepared in accordance with International Financial Reporting Standards ("IFRSs") which include all International Financial Reporting Standards, International Accounting Standards ("IASs") and Interpretations issued by the International Accounting Standards Board (the "IASB"), accounting principles generally accepted in Hong Kong and the disclosure requirements of the Hong Kong Companies Ordinance.

The unaudited condensed consolidated financial statements have been prepared under the historical cost convention, except for financial assets at fair value through profit or loss, which has been measured at fair value. The unaudited condensed consolidated financial statements are presented in Singapore dollar ("SGD" or "S\$") and all values are rounded to the nearest thousand ("S\$'000"), except when otherwise indicated.

The basis of preparation and accounting policies adopted in the preparation of the unaudited condensed consolidated financial statements for the three months ended 31 March 2023 are consistent with those adopted in the preparation of the Group's consolidated financial statements for the year ended 31 December 2022 included in the 2022 Annual Report, except for the accounting policy changes that are expected to be reflected in the 2023 annual financial statements.

The Group has not adopted the new and revised IFRSs, which have been issued but are not yet effective.

Basis of Consolidation

The unaudited condensed consolidated financial statements include the financial statements of the Group for the three months ended 31 March 2023. A subsidiary is an entity (including a structured entity), directly or indirectly, controlled by the Company. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee (i.e., existing rights that give the Group the current ability to direct the relevant activities of the investee).

When the Company has, directly or indirectly, less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- (a) the contractual arrangement with the other vote holders of the investee;
- (b) rights arising from other contractual arrangements; and
- (c) the Group's voting rights and potential voting rights.

The financial statements of the subsidiaries are prepared for the same reporting period as the Company, using consistent accounting policies. The results of subsidiaries are consolidated from the date on which the Group obtains control, and continue to be consolidated until the date that such control ceases.

Profit or loss and each component of other comprehensive income are attributed to the owners of the parent of the Group. All intra-group income and expenses relating to transactions between members of the Group are eliminated in full on consolidation.

The Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control described above. A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction.

If the Group loses control over a subsidiary, it derecognises (i) the assets (including goodwill) and liabilities of the subsidiary, (ii) the carrying amount of any non-controlling interest and (iii) the cumulative translation differences recorded in equity; and recognises (i) the fair value of the consideration received, (ii) the fair value of any investment retained and (iii) any resulting surplus or deficit in profit or loss. The Group's share of components previously recognised in other comprehensive income is reclassified to profit or loss or retained profits, as appropriate, on the same basis as would be required if the Group had directly disposed of the related assets or liabilities.

3. Revenue

Revenue represents services rendered to customers and invoiced trading sales for the period.

MANAGEMENT DISCUSSION AND ANALYSIS

Business review

For the three months ended 31 March 2023, the Group recorded an increase in revenue of approximately S\$1.15 million or 20.8% from approximately S\$5.52 million for the three months ended 31 March 2022 to approximately S\$6.67 million for the three months ended 31 March 2023. The increase was mainly due to additional revenue generated from our new business in Mainland China amounted to S\$0.90 million. Whereas our revenue from Singapore operations increased by 5.4% to S\$5.77 million.

For the three months ended 31 March 2023, the Group recorded a profit of approximately S\$0.60 million as compared to a profit of S\$0.29 million for the corresponding period in 2022. The substantial increase in profit was attributed to the overall increase in our group revenue, particularly contribution from our new business operation in Mainland China.

The Group is a leading automotive service provider in Singapore. We have over 18 years of experience in the passenger car service industry and offer a comprehensive range of passenger car services. Our passenger car services in Singapore mainly including (i) maintenance and repair services; and (ii) modification, tuning and grooming services. These two services had contributed approximately 87% of the total revenue for the period ended 31 March 2023 (31 March 2022: 100%) and will be continue to be a key focus of the Group.

We have the capability to maintain and repair a wide range of brands of passenger cars in Singapore and are equipped with diagnostic equipment for carrying out such services. We modify and tune mainly luxury and ultra-luxury passenger cars, providing services ranging from aesthetic modifications including installing body kits, to performance modifications including lowering the suspension of passenger cars and replacing the engine control unit. We also sell passenger car spare parts and accessories in Singapore and export to other countries, such as Malaysia, Indonesia, United Kingdom, China and Thailand.

In 2022, the Group ventured into the new smart kitchen segment in Mainland China, adopting a multiple business development model which includes offline retail stores, food delivery, small vegetable packaging, food and beverage branding incubation, and SaaS+ empowerment. By integrating industry SaaS+ services, the Group will build a complete vertical management system and commercial empowerment system, providing a full range of solutions from procurement, production, sales for channels and traditional enterprises.

Outlook

The reopening of Singapore's border and the influx of high-net-worth individuals and family offices resulted in increasing demand for new car sales. The Certificate of entitlement (COE) premiums ended the year at an all-time high in December 2022, driven by increasing demand for larger and more powerful electric vehicles (EV) against the tight supply of COEs. Under the government's zero-growth policy for cars, this means that the number of COE quotas issued is constrained by the number of old COEs deregistered. Pursuant to the statistics from the government of Singapore, as at 31 December 2022, the total number of motor vehicle population stood at 995,746 of which 650,667 are cars and private hire cars.

Further, under the Singapore Green Plan 2030, all new cars and taxi registrations will be of cleaner-energy models from 2023 and a comprehensive EV Roadmap to drive EV adoption has been set out. A target of 60,000 EV charging points to be installed by 2030 to ensure accessibility of charging infrastructure to encourage EV adoption. This includes 40,000 charging points in public carparks and 20,000 charging points in private premises. Every HDB town will also be an EV-Ready Town, with approximately 2,000 carparks to be equipped with charging points by 2025. The EV Early Adoption Incentive (EEAI), Vehicular Emissions Scheme (VES), and EV Common Charger Grant (ECCG) were introduced to incentivise and encourage motorists to switch to EVs. The Government's initiatives to gradually phase out internal combustion engines car to electric car by 2040 is unlikely to have a significant impact on the Group's business in the next 5 years as petrol-driven cars still make up the majority of cars on the road. Despite aforesaid, in preparation for the market developments, the Group will continue to pursue technological advancement in both repair equipment and new vehicle types to ensure that our technicians continuously improve their skills and technical knowledge in order for them to be able to service a wide range of brands of passenger cars. The Group is also constantly looking for new business opportunities to widen their product range and service offerings in Singapore and overseas.

In relation to the new smart kitchen segment, the Group will implement a multiple business development model, including offline retail stores, food delivery, small vegetable packaging, food and beverage branding incubation, and SaaS+ empowerment. By integrating industry SaaS+ services, the Group will build a complete vertical management system and commercial empowerment system, providing a full range of solutions from procurement, production, sales for channels and traditional enterprises. Moving forward, the company's business scope will continue to expand, with the aim of becoming a leading platform for global prefabricated vegetable industry SaaS+ services.

Moving forward, against a backdrop of a weaker global economic outlook in 2023, hampered by inflation hikes and aggressive monetary policy tightening by major central banks, our Group remains cautious and will continue to focus on customer service and retention and acquire new customers through new products and services.

Financial review

Revenue

For the three months ended 31 March 2023, the Group recorded an increase in revenue of approximately S\$1.15 million or 20.8% from approximately S\$5.52 million for the three months ended 31 March 2022 to approximately S\$6.67 million for the three months ended 31 March 2023. The increase was mainly due to additional revenue generated from our new business in Mainland China amounted to S\$0.90 million. Whereas our revenue from Singapore operations increased by 5.4% to S\$5.77 million.

Cost of material

Although there was a 20.8% increase in revenue, our cost of materials only rose by approximately S\$0.05 million or 1.4% for the three months ended 31 March 2023. Consequently, our gross profit margin saw a substantial improvement of approximately 9.6%, rising from around 40.2% for the three months ended 31 March 2022 to around 49.8% for the three months ended 31 March 2023. This improvement was primarily due to the better gross profit margin contributed from our new food and kitchen appliances trading business in Mainland China.

Employee benefits expense

Employee benefits expense increased by approximately S\$0.40 million or 30% from approximately S\$1.33 million for the period ended 31 March 2022 to approximately S\$1.73 million for the period ended 31 March 2023. The increase in staff costs was in tandem with the growth in revenue, and it reflects the Group's decision to expand its workforce to support business growth and new business operations in Mainland China.

Depreciation of property, plant and equipment

Depreciation of property, plant and equipment decreased by approximately S\$0.26 million or 71.0% from approximately S\$0.37 million for the period ended 31 March 2022 to approximately S\$0.11 million for the period ended 31 March 2023. The decrease was mainly due to more assets being full depreciated at the beginning of the year.

Other expenses

Other expenses increased by approximately S\$0.56 million or 330% from approximately S\$0.17 million for the period ended 31 March 2022 to approximately S\$0.73 million for the period ended 31 March 2023. The increase was as a result of higher professional fee incurred by the Company and additional operating expenses incurred by the new subsidiary of the Group in Mainland China.

Profit for the period

For the three months ended 31 March 2023, the Group achieved a profit of approximately S\$0.60 million as compared to a profit of S\$0.29 million for the corresponding period in 2022. The substantial increase in profit was primarily attributed to the overall increase in our group revenue, particularly contribution from our new business operation in Mainland China.
