# Management Discussion and Analysis

## BUSINESS REVIEW AND OUTLOOK

The Group continues to focus on its core business of egg production and distribution in Singapore. The Group operates its own egg laying farm in Singapore and sources fresh chicken eggs from third party suppliers. There have been no changes to its business model.

The Group's revenue has increased by approximately 16% from approximately S\$22.1 million for the three months ended 30 June 2022 to approximately S\$25.7 million for the three months ended 30 June 2023. The higher sales are mainly attributable to more eggs sold to a larger customer base as we consolidate our leading market position in Singapore.

For the three months ended 30 June 2023, the Group's net profit increased by approximately S\$0.4 million from approximately S\$5.3 million for the three months ended 30 June 2022 to approximately S\$5.7 million for the three months ended 30 June 2023. Such increase was due to our ability to pass on the impact of inflation on the input costs through increased selling prices.

The planned expansion of its chicken eggs laying facilities at the current farm and processing facilities continued as planned. The construction of the remaining layer houses continued during the financial period and will be operational in 2024.

Management will continue to focus to complete the construction of all the facilities and to operationalise them to achieve the costs savings and efficiencies. These investments will build resilience in our business model and strengthen our competitive position as a reliable and leading egg supplier in Singapore.

Our operating costs and capital expenditure are likely to be affected by inflationary pressure caused by prevailing uncertainties in the world economies and the conflict in Europe. Our profitability will continue to be affected by our continuing efforts and ability to translate these costs increases into our selling prices.
