#### **MANAGEMENT DISCUSSION AND ANALYSIS**

#### **Review and Prospects**

The Group is principally engaged in (i) the research and development, production and sales of FRP products; and (ii) sales of industrial silica sand material in the PRC. For the six months ended 30 June 2023, the Group's major products consisted of: (i) FRP grating products; and (ii) epoxy wedge strip products.

FRP is widely applied in areas including building and construction field, electrical and telecommunications engineering. The product is characterized by its light weight, high strength, toughness, anti-slippery, anti-erosion, flame retardant, insulation and easy to colour as well as its artistic features. It also offers good and comprehensive economic benefits. As a result, FRP is widely applied in industries including petrochemical, electrical, marine engineering, plating, vessel, metallurgy, steel, papermaking, brewing and municipal industries. It is mainly used in operating platform, equipment platform, stair treads, trench covers, filter plates, etc., which indicates that FRP is an ideal component for corrosive environment.

Given that FRP delivers outstanding performance as a relatively new type of material and serves as a substitute for traditional materials such as wood, concrete and metal, along with the potential application of products made of FRP composites in a wide range of fields such as aerospace, energy and transportation industries, the management expects that the overall FRP market in China will grow at a steady pace in the coming years. The growth is anticipated due to the gradual maturity and better understanding of the FRP market.

The Group continues to enhance product recognition by improving production technology in order to maintain effective cost control and strengthen the competitiveness. The Board believes that research and development capabilities are essential to the future growth of the Group. The Group will further enhance its research and development capabilities by controlling material sourcing, purchasing new equipment and engaging professionals and technicians for research and development in order to offer more competitive and high-quality products.

Leveraging on market trend information gathered by the sales and marketing team and participation in drafting the PRC industry standards, the Group constantly keeps track of developments and trends in the FRP industry around the world. Over the past years, the Group has kept abreast of the PRC government's macroeconomic stimulus when carrying out the research and development works. Moreover, the Group adheres to the policy in promoting its products in countries along the "Belt and Road Initiatives". With all these efforts, the Groups is hopeful that performance of the Group's FRP products would be further enhanced in the coming years.

With the extensive experience and market recognition of products that the Group has accumulated for more than a decade, as well as the expanding customer base, the Board is of the view that the Group is more well-positioned than other domestic enterprises in the industry to further develop and expand its markets and products in order to capture the moderate growth of the FRP grating products market in the future.

The Group is currently constructing a new production site located in Inner Mongolia for the preparation of silica sand business segment. With the development of domestic glass, building material, petroleum and silicon chemical industries in the PRC over the years, the demand of the silica sand materials in domestic market is growing continuously. FRP grating products Epoxy wedge strip products

FRP grating products were mainly sold to corporate customers in the PRC who are generally end-users of such products, as well as to distributors in the United States of America and the United Kingdom who generally purchase the products on per purchase order basis with no distribution arrangement. The revenue derived from sales of FRP grating products increased by approximately RMB0.6 million or 7.1% from approximately RMB9.3 million for the six months ended 30 June 2022 to approximately RMB9.9 million for the six months ended 30 June 2023. This was mainly attributed to the increase in domestic sales orders as a result of the lifting of the COVID-19 pandemic related restriction in the PRC since December 2022. The gross profit margin increased by approximately 1.2 percentage points from 29.2% for the six months ended 30 June 2022 to 30.4% for the six months ended 30 June 2023, which was mainly attributable to the decrease in revenue from the overseas markets with lower gross profit margin.

Epoxy wedge strip products were developed and targeted for manufacturers of wind turbine blades in the PRC. The revenue derived from sales of epoxy wedge strip products increased by approximately RMB1.6 million or 11.5% from approximately RMB14.1 million for the six months ended 30 June 2022 to approximately RMB15.7 million for the six months ended 30 June 2023. The gross profit margin decreased by approximately 7.3 percentage points from 21.3% for the six months ended 30 June 2022 to 14.0% for the six months ended 30 June 2023. The decrease in gross profit margin was attributable to the sharp increase in costs of raw materials.

Administrative expenses decreased by approximately RMB1.4 million, or 24.3% to approximately RMB4.3 million for the six months ended 30 June 2023 from approximately RMB5.7 million for the six months ended 30 June 2022.
