THIRD QUARTERLY REPORT 2023

# CHARACTERISTICS OF GEM OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE "STOCK EXCHANGE")

GEM has been positioned as a market designed to accommodate small and mid-sized companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration.

Given the companies listed on GEM are generally small and mid-sized companies, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board of the Stock Exchange and no assurance is given that there will be a liquid market in the securities traded on GEM.

Hong Kong Exchanges and Clearing Limited and the Stock Exchange take no responsibility for the contents of this report, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this report.

This report, for which the board (the "Board") of directors (the "Directors") of Yunhong Guixin Group Holdings Limited (the "Company") collectively and individually accepts full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on GEM of the Stock Exchange (the "GEM Listing Rules") for the purpose of giving information with regard to the Company. The Directors, having made all reasonable enquiries, confirm that to the best of their knowledge and belief: (1) the information contained in this report is accurate and complete in all material respects and not misleading or deceptive; (2) there are no other matters the omission of which would make any statement herein or this report misleading; and (3) all opinions expressed in this report have been arrived at after due and careful consideration and are founded on bases and assumptions that are fair and reasonable.

## **RESULTS**

The Board announces the unaudited results of the Company and its subsidiaries (the "**Group**") for the nine months ended 30 September 2023, together with comparative unaudited figures for the corresponding period in 2022 as follows:

#### 10. SEGMENT REPORTING

The Group manages its businesses by business operations in a manner consistent with the way in which information is reported internally to the Group's chief operation decision maker for the purposes of resource allocation and performance assessment. The Group's reportable and operating segments are as follows:

- fiberglass business: research and development, production and sales of fiberglass reinforced plastic products in the PRC; and
- silica sand business: sales of industrial silica sand materials in the PRC.

The following is an analysis of the Group's revenue and results from operations:

	For the nine months ended 30 September 2023			
	Fiberglass business	Silica sand business	Unallocated	Total
	RMB'000	RMB'000	RMB'000	RMB'000
Reportable segment revenue	36,252			36,252
Reportable segment profit (loss)	2,187		(3,789)	(1,602)

For the nine months ended 30 September 2022, the Group is solely engaged in the research and development, production and sales of fiberglass reinforced plastic products in the PRC. Management reviews the operating results of the business as one segment to make decisions about resources to be allocated. Therefore, the executive directors of the Company regard that there is only one segment which is used to make strategic decisions. Revenue and profit before taxation are the measures reported to the executive directors of the Company for the purpose of resources allocation and performance assessment.

#### **MANAGEMENT DISCUSSION AND ANALYSIS**

### **Review and Prospect**

The Group is principally engaged in (i) the research and development, production and sales of FRP products; and (ii) sales of industrial silica sand material in the PRC. During the nine months ended 30 September 2023, the Group produced two major products: (i) FRP grating products; and (ii) epoxy wedge strip products.

The applications for FRP are quite wide, including building and construction field, electrical and telecommunications engineering. The product is characterized by its lightweight, high strength, toughness, anti-slippery, anti-erosion, flame retardant, insulation and easy to colour as well as its artistic features. It also offers good and comprehensive economic benefits. As a result, FRP is widely applied in industries including petrochemical, electrical, marine engineering, plating, vessel, metallurgy, steel, papermaking, brewing and municipal industries. It is mainly used in operating platform, equipment platform, stair treads, trench covers, filter plates, etc., which indicates that FRP is an ideal component for corrosive environment.

Given that FRP delivers outstanding performance as a relatively new type of material and serves as a substitute for traditional materials such as wood, concrete and metal, along with the potential application of products made of FRP composites in a wide range of fields such as aerospace, energy and transportation industries, the management expects that the overall FRP market in China will grow at a steady pace in the coming years. The growth is anticipated due to the gradual maturity and better understanding of the FRP market.

The Group continues to enhance product recognition by improving production technology in order to maintain effective cost control and strengthen the competitiveness. The Board believes that research and development capabilities are essential to the future growth of the Group. The Group will further enhance its research and development capabilities by controlling material sourcing, purchasing new equipment and engaging professionals and technicians for research and development in order to offer more competitive and high-quality products.

Leveraging on market trend information gathered by the sales and marketing team and participation in drafting the PRC industry standards, the Group constantly keeps track of developments and trends in the FRP industry worldwide. Over the past years, the Group closely followed up with the PRC government's macroeconomic stimulus when carrying out the research and development works. Moreover, the Group adheres to the policy in promoting its products in countries along the "Belt and Road Initiatives". With all these efforts, the Groups is hopeful that performance of the Group's FRP products would be further enhanced in the coming years.

With the extensive experience and market recognition of products that the Group has accumulated for more than a decade, as well as the expanding customer base, the Board is of the view that the Group is more well-positioned than other domestic enterprises in the industry to further develop and expand its markets and products in order to capture the moderate growth of the FRP grating products market in the future.

The Group is currently constructing a new production site located in Inner Mongolia for the preparation of silica sand business segment. With the development of domestic glass, building material, petroleum and silicon chemical industries in the PRC over the years, the demand of the silica sand materials in domestic market is growing continuously. The Group plans to commence the production and sales of industrial silica sand materials in the second half of 2024, which is expected to bring remarkable economic benefits to the Group.

#### **Sales Performance**

The Group recorded a consolidated revenue of approximately RMB36.3 million for the nine months ended 30 September 2023, representing a decrease of approximately RMB3.4 million or 8.5% as compared to the corresponding period in 2022. The decrease in revenue was primarily driven by the decrease in sales of both FRP grating products and epoxy wedge strip products. Moreover, sales for the domestic market decreased by approximately 4.1% to approximately RMB29.9 million for the nine months ended 30 September 2023 from approximately RMB31.1 million for the corresponding period in 2022. The domestic market contributed approximately 82.3% of total sales for the nine months ended 30 September 2023, which has increased by 3.7 percentage points in comparison with that of approximately 78.6% for the nine months ended 30 September 2022. Sales for the overseas markets decreased by approximately 24.5% to approximately RMB6.4 million for the nine months ended 30 September 2023 from approximately RMB8.5 million for the corresponding period in 2022.

Details of the Group's revenue and gross profit margin by product categories are as follows:

	For the ni	ne months	For the nine months		
	ended 30 Sep	otember 2023	ended 30 Sept	ended 30 September 2022	
	Sales	<b>Gross profit</b>	Sales	Gross profit	
	revenue	margin	revenue	margin	
	RMB'000	%	RMB'000	%	
FRP grating products	15,425	29.2	18,346	32.3	
Epoxy wedge strip products	20,827	12.8	21,259	20.0	
	36,252	19.8	39,605	26.2	

FRP grating products were mainly sold to corporate customers in the PRC who are generally end-users of such products, as well as to distributors in the United States of America and the United Kingdom who generally purchase the products on per purchase order basis with no distribution arrangement. Revenue derived from sales of FRP grating products decreased by 15.9% from approximately RMB18.3 million for the nine months ended 30 September 2022 to approximately RMB15.4 million for the nine months ended 30 September 2023. This was mainly attributed to the decrease in both domestic and overseas sales orders as a result of the drop in demands for the FRP grating products due to the rising prices caused by the increase in the costs of raw materials and transportation. The gross profit margin decreased by 3.1 percentage points from 32.3% for the nine months ended 30 September 2022 to 29.2% for the nine months ended 30 September 2023. This was mainly attributable to the increase in the costs of raw materials and transportation.

Epoxy wedge strip products were developed and targeted for manufacturers of wind turbine blades in the PRC. The revenue derived from sales of epoxy strip products slightly decreased by approximately RMB0.4 million or 2.0% from approximately RMB21.3 million for the nine months ended 30 September 2022 to approximately RMB20.8 million for the nine months ended 30 September 2023. The gross profit margin dropped by 7.2 percentage points from 20.0% for the nine months ended 30 September 2022 to 12.8% for the nine months ended 30 September 2023. The decrease in gross profit margin was attributable to the sharp increase in costs of raw materials.

# **Operating Costs and Expenses**

Distribution costs increased by approximately RMB0.5 million or 32.8% to approximately RMB2.0 million for the nine months ended 30 September 2023 from approximately RMB1.5 million for the nine months ended 30 September 2022. The increase was mainly attributable to the increase in wages and salaries.

The administrative expenses decreased by approximately RMB2.7 million or 30.5% to approximately RMB6.1 million for the nine months ended 30 September 2023 from approximately RMB8.8 million for the nine months ended 30 September 2022. The decrease was mainly attributable to the decrease in rental expense which was classified to cost of sales in this period.

# **Operating Results**

The Group recorded a net loss of approximately RMB1.6 million for the nine months ended 30 September 2023 compared to a net profit of approximately RMB0.8 million for the nine months ended 30 September 2022. This was largely attributed to the decrease in sales of FRP grating products and the absence of the rental income from investment property, which was disposed in November 2022.
