## **CHARACTERISTICS OF THE GEM OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE "STOCK EXCHANGE")**

**GEM** has been positioned as a market designed to accommodate small and mid-sized companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of **GEM** mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on **GEM** are generally small and mid-sized companies, there is a risk that securities traded on **GEM** may be more susceptible to higher market volatility than securities traded on the Main Board of the Stock Exchange and no assurance is given that there will be a liquid market in the securities traded on **GEM**.

The principal accounting policies and methods of computation used in the preparation of these accounts are consistent with those adopted in the preparation of the annual report of the Company for the year ended 31 March 2025.

The unaudited condensed consolidated financial statements have been prepared under the historical cost convention, as modified by the revaluation of investment properties and certain financial assets, which are carried at fair values.

The Group has not yet applied new standards and amendments to existing standards that have been issued but not yet effective, and will apply such standards when they become effective. The Group anticipates that the application of the such new standards and amendments to existing standards have no material impact on the results and the financial position of the Group.
