

The Group produces over 200 different types of products, representing a broad range of petroleum products, petrochemical and organic chemical products, dyestuff and dye intermediates, synthetic rubber products, chemical fertilizers and inorganic chemical products. As a result of the Group's high degree of integration, some of its products are used primarily in producing its downstream products.

The following table sets out the turnover of the Group's major products in 2000 as a percentage of total turnover calculated in accordance with IAS, together with their typical uses.

Major products	Percentage of 2000 turnover	Typical uses
<b>Petroleum products</b>		
Diesel oil	17.96	transportation fuels
Gasoline	13.68	transportation fuels
Solvent oil	1.33	for the production of paint and dyestuff
Others ( <i>Note</i> )	<u>7.42</u>	
Subtotal:	<u><u>40.39</u></u>	
<b>Petrochemical &amp; organic chemical products</b>		
Ethylene	12.39	for the production of polyethylene, ethylene glycol and other chemical products
Propylene	5.13	for the production of polypropylene, acrylonitrile and other chemical products
Acetic acid	3.48	for the production of acetic anhydride and other chemical products
Ethanol	1.01	for the production of formaldehyde and other chemical products
Ortho-xylene	2.74	for the production of pharmaceuticals, pesticides, phthalic anhydride and other chemical products
Acetic anhydride	2.06	for the production of cellulose acetates, dyestuff and other chemical products
Octanol	1.67	for the production of plasticiser
Xylene	1.14	for the production of pharmaceuticals, pesticides, paint and other chemical products
PVC	1.18	for the production of films, plates, pipes, electrical insulation, and wire and cable protection
Others ( <i>Note</i> )	<u>8.74</u>	
Subtotal:	<u><u>39.54</u></u>	

## Principal Products

Major products	Percentage of 2000 turnover	Typical uses
<b>Dyestuff and dye intermediates</b>		
Aniline	1.77	for the production of dyes and pharmaceuticals
H-acid	0.72	for the production of acid, reactives, and direct dyes
Others ( <i>Note</i> )	<u>1.49</u>	
Subtotal:	<u><u>3.98</u></u>	
<b>Synthetic rubber products</b>		
Styrene-butadiene rubber	3.81	for the production of rubber products, such as tyres
Others ( <i>Note</i> )	<u>2.75</u>	
Subtotal:	<u><u>6.56</u></u>	
<b>Chemical fertilizers and Inorganic chemical products</b>		
Ammonium nitrate	0.90	a common chemical fertilizer, used in agriculture
Urea	0.41	a common chemical fertilizer, used in agriculture
Inorganic chemical products	2.01	for the production of other chemical products
Others ( <i>Note</i> )	<u>0.10</u>	
Subtotal:	<u><u>3.42</u></u>	
Other products and services ( <i>Note</i> )	<u>6.11</u>	
Total:	<u><u>100</u></u>	

*Note:* No single chemical product in these categories comprised more than 1.0% of the Group's turnover in 2000.
