

Our Core Competencies

Vision Century Corporation Limited, with its main business focus in Mainland China, specialises in providing business and real estate solutions, and complementary technology services. We create work-live-play environments where businesses can thrive, and people can excel, in vibrant, connected communities.

Our Key Success Factors

- Strong major shareholders with unsurpassed regional expertise in business park and residential development, enhanced with technology services
- Experienced and committed management team
- Extensive business networks in Mainland China and Asia Pacific markets
- Successful business model based on a proactive and synergistic approach to delivering customer value
- Integrated one-stop solutions to address all real estate needs of businesses and individuals
- A customer-first philosophy serving a strong customer network of multinational and technology-based corporations
- A growth-oriented approach to developing major markets in Mainland China

Our Core Competencies

Business Park Development and Management

We develop and manage quality business park projects in Mainland China, providing a full array of integrated services from business development, financial planning, project and property management and operations to international marketing. Currently we are driving to build a pan-China network of business parks complete with world-class infrastructure and technology services.

Integrated Real Estate Solutions

We deliver not just bricks and mortar but quality and convenience, creating value in real estate by providing a full range of community facilities and property management services. In Mainland China, where growing affluence is raising living standards, we aim to build a major presence in residential sectors of major cities like Beijing, Shanghai, Dalian and Shenzhen.

Complementary Technology Services

We design, market and deliver technology services, translating advanced technologies into value for our customers in Mainland China. What we offer is a complete menu of business-enabling technology services, including data centres, hosting and network services, and system integration.

One-stop Business-enabling Services

We facilitate business start-ups and operations in Mainland China by providing multinational companies with a suite of support services to help establish distribution channels, fulfil government regulatory requirements and localise content.
