

## **PROSPECT**

Notwithstanding the unfavorable economic climate, the Directors aim to improve the profitability of the EMS Division this year. The Directors are also optimistic that the factories in Mexico and Suzhou will benefit the Group's business in the long term.

As for BroadMax, while shipments to the U.S. have picked up and quantity deliveries to China have started, due to the unfavorable market conditions at present and the price pressure in the market as a result of fierce competition, the Directors do not expect it to benefit the Group's results in the current financial year. The Directors remain optimistic, however, as to BroadMax's ability to contribute positively to the Group's results in the long-term.

On behalf of the Directors, I would like to thank our employees for their loyalty and devotion to the Group. I would also like to thank our customers, suppliers and business partners of their continued confidence in and support for the Group.
