BUSINESS REVIEW AND PROSPECTS

For the six months ended 31st December 2002, the Group recorded a turnover of HK\$452,588,000, representing an increase of 22.7% against the HK\$368,734,000 recorded in the corresponding period in the previous year and made a profit attributable to shareholders of HK\$20,102,000 representing a surge of 64.6% from HK\$12,214,000. Earnings for the period amounted to HK 6.70 cents (2001: HK 4.07 cents) per share. The Board has recommended an interim dividend of HK 3 cents per share (2001: HK 2 cents).

The slow recovery in global market conditions during the review period created significant impact on the overall business environment. Against this backdrop, the Group, riding on its clearly-defined and prudent business strategies as well as its solid business foundation, managed to achieve positive development during the first six-month period. This was attributed to the satisfactory contribution of the colourants and engineering plastics manufacturing business and the plastics trading business of the Group and its implementation of effective and prudent cost controls.

BUSINESS REVIEW AND PROSPECTS (Cont'd)

Compared to the results of previous corresponding period which were adversely affected by the 911 incident, the growth in turnover and profits during the review period demonstrating signs of steady recovery of the Group's business after the incident. Such results were further augmented by the increase in market demand. During this period, the Group's colourants and engineering plastics manufacturing business recorded a significant increase in both turnover and sales volumes. In particular, the manufacturing business, which commanded a higher gross profit margin than the trading business, accounted for a significantly higher portion in the total turnover, contributing to the overall rise in the Group's gross profit margin.

With regard to its plastics trading business, the Group managed to achieve its initial success in penetrating the PRC market. Ngai Hing (GZFTZ) Trading Co., Ltd., commencing business in the Guangzhou Free Trade Zone in May 2002, has established new customer networks in southern China, providing additional source of revenue for the Group. If such encouraging responses persist, the Group will set up additional trading offices in other major cities in the PRC.

With the Group's committed goals in recent years, the manufacturing business continued to deliver satisfactory results. The turnover and sales volumes of the colourants and engineering plastics manufacturing business recorded a promising growth, particularly in the latter. The Group's tailor-made engineering plastics have persistently received overwhelming responses from the market. At the same time, the performances of markets in the eastern and southern parts of the PRC were also improving steadily during the review period. The full commencement of the production lines at the Qingdao plant greatly increased the production capacities, generating further contributions to the revenue of the Group.

The Group also explored new business segments to strengthen its marketing edges. Capitalising on its extensive experience in the colourants business, the Group entered into a cooperation with a sizable building materials company, in which, the Group has provided the know-how for the use and application of colourants in the production of construction materials during the review period. This new market exploration broadened the revenue base of the Group.

BUSINESS REVIEW AND PROSPECTS (Cont'd)

For the growing market demand, the Group has committed resources to raise its production capacity. The construction of the Group's new plant in Shanghai completed at the end of 2002, replacing its previous rented plant. The new plant commenced production in February 2003, enabling the Group to have a more flexible control in its production capacities leading to savings in production costs. Further, the installation of production machineries in its newly leased plant at the Tai Po Industrial Estate in Hong Kong completed in March 2003 and the production has already been commenced thereat.

As the future becomes increasingly promising for the PRC, especially after its accession to the World Trade Organisation, the Group envisages that there are tremendous opportunities for its further development in marketing its products in the PRC. To accelerate its business operations in the PRC, the Group will continue its pursuit of quality products and value-added services. It will also increase its investment in research and development to widen the range of products that it will offer, and to strengthen its technical ability for better serving its customers to meet their needs. At the same time, with the commencement of production of the additional plants, the Group will begin consolidating internal resources in the next half year to optimize overall operating efficiencies.

Finally, the Board would like to express its thankfulness to the Group's suppliers, customers and shareholders for their continuing support, and all the members of the staff for their hard work and contribution.

The Group generally finances its operations with internally generated cashflow and banking facilities provided by its principal bankers.
