

## CORPORATE PROFILE ◀◀ ▶ ▶▶

New World Infrastructure Limited (NWI) has played a leading role in the TMT sector since 1996, with investments in a variety of wireless, broadband and multimedia technologies and services. In January 2003, New World Group completed a major corporate reorganization. Within this reorganization NWI divested traditional infrastructure assets to become the Telecommunications, Media and Technology (TMT) flagship of New World Group.

The NWI corporate strategy is to support the evolution of the Personalized Digital Information (PDI) world. Shareholder value is created through the formation of a profitable and responsible business that develops global PDI technologies with applications for the Greater China market.
