NOTES TO THE CONDENSED FINANCIAL STATEMENTS

For the six months ended 30 September 2003

1. BASIS OF PREPARATION

The condensed financial statements have been prepared in accordance with Statement of Standard Accounting Practice ("SSAP") 25 "Interim Financial Reporting" issued by the Hong Kong Society of Accountants and with the applicable disclosure requirements of Appendix 16 to the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the "Stock Exchange").

2. PRINCIPAL ACCOUNTING POLICIES

The condensed financial statements have been prepared under the historical cost convention, as modified for the revaluation of leasehold properties.

The accounting policies adopted are consistent with those followed in the preparation of the Group's annual financial statements for the year ended 31 March 2003, except for the adoption of SSAP 12 (Revised) "Income Taxes" which becomes effective in the current period.

The principal effect of the implementation of SSAP 12 (Revised) is in relation to deferred tax. In previous years, partial provision was made for deferred tax using the income statement liability method, i.e. a liability was recognised in respect of timing differences arising, except where those timing differences were not expected to reverse in the foreseeable future. SSAP 12 (Revised) requires the adoption of a balance sheet liability method, whereby deferred tax is recognised in respect of all temporary differences between the carrying amount of assets and liabilities in the financial statements and the corresponding tax basis used in the computation of taxable profit, with limited exceptions. In the absence of any specific transitional requirements in SSAP 12 (Revised), the new accounting policy has been applied retrospectively. Comparative amounts for 2002 have been restated accordingly. As a result of this change in policy, the retained earnings at 1 April 2003 has been decreased by HK\$2,185,000 (1 April 2002: HK\$651,000). The balance of the Group's asset revaluation reserve at 1 April 2003 has been decreased by HK\$142,000 (1 April 2002: HK\$453,000). The loss for the six months ended 30 September 2003 has been increased by HK\$906,000 (Six months ended 30 September 2002: increase in profit by HK\$453,000).

3. SEGMENT INFORMATION

The Group reports its primary segment information based on product categories. A new segment, chemical products, arising from the subsidiary previously classified as a jointly controlled entity, is presented in the current period. Turnover and profit from operations for the six months ended 30 September 2003 and 2002, analysed by product category, are as follows:

Interim dividend

The Directors resolved not to pay an interim dividend for the six months ended 30 September 2003 (2002: Nil).

Business review

For the six months ended 30 September 2003, the Group's total turnover was HK\$540,074,000, of which HK\$309,476,000 was from the sales of cable and wire products, HK\$180,679,000 from the sales of copper rods and HK\$45,787,000 from the sales of connectors and terminals. Turnover of the newly-added chemical products was approximately HK\$4,132,000. The global business environment in the first six months of the financial year remained difficult due to the unstable international political situation and the slowdown of global economic activity. Despite these external adversities, the Group's copper rod business and connector and terminal business continued to grow during the period under review. Turnover from these two sectors grew from HK\$135,971,000 and HK\$42,046,000 of the corresponding period last year to HK\$180,679,000 and HK\$45,787,000, representing an increase of approximately 32.9% and 8.9% respectively. Although the copper rod business and connector and terminal business have made positive contribution to the operating results of the Group, the turnover was, however, offset by the unsatisfactory performance of the Group's cable and wire business. Turnover of cable and wire business dropped from HK\$338,577,000 of the corresponding period last year to HK\$309,476,000, representing a decrease of approximately 8.6%.

Cable and wire products and connectors and terminals

The slowdown of global economy since the end of 2002 continued to have an impact on the Group's cable and wire business. In addition, uncertainty in US economic recovery, coupled with the slow economic growth in the Euro region and the weak consumer confidence in these two markets caused by the US- Iraq war have dampened the demand for electronic products. For such, orders from our clients in Europe and the United States decreased in the first half of 2003. Turnover from the US market reduced by 11.6% to HK\$115,708,000, while sales in Europe dropped 33.7% to HK\$21,241,000 due to the high unemployment rate in Euro region and weak consumer confidence.

During the period under review, the price of raw materials remained on the high side, which affected the price and profit margin of our products. This dragged our counterparts in the PRC, particularly those in the Pearl River Delta region, into a state of acute competition for orders with cut-throat prices. Nevertheless, it is encouraging to see that the Group's connector and terminal business in Singapore and Malaysia still recorded satisfactory gains and also growth in turnover.

Copper rod products

The copper rod business is part of our long-term strategic investment. It has commenced operation since 1998 and most of the finished products were initially supplied to the Group's cable and wire sector. As a result of such vertical integration, the Group's cable and wire business managed to maintain a competitive edge. During the period under review, the turnover of copper rod business increased by approximately 32.9% over the corresponding period last year, constituting approximately 33.5% of the Group's total turnover, compared to 26.3% over the corresponding period last year.

Prospects

Owing to the low interest rate policy of the United States and an increase in its non-recurring family income, coupled with a strong economic growth in the PRC, the demand for electronic products has been growing steadily. In view of the keen competition in the cable and wire sector, the Group intends to build another plant in Jiangsu Province of the PRC, in a bid to expand the existing cable and wire business and to develop the copper rod business in northern China. In addition to satisfying the demand in northern China, this plan is also in line with our strategy of enhancing the economies of scale in production. Apart from the above-mentioned, the management of the Group are also determined to focus on the research and development of copper rods and connectors and terminals, and will continue to identify new markets and clients for these businesses.

Looking forward, the business environment will still be difficult with intense competition. It is anticipated that our clients in the cable and wire sector will continue to request for reduction in both price and production lead time. To maintain our competitiveness and to establish a leadership position for our production efficiency, the management of the Group will continue to focus on such strategies as strict cost control, reduction of expenses, enhancement of efficiency, improvement of procurement and research and development of new products. We will also exert the best endeavors to maintain our established relationships with suppliers and clients.

The Group is in a sound financial position, with extensive experience and outstanding goodwill. Leveraging on its strengths and by focusing on its core business, the Group is confident to further increase the market share of its products, thus laying a solid foundation of the Group, with a view to creating value for its investors and shareholders.
