

CORPORATE PROFILE

Gorient (Holdings) Limited (“Gorient”) is a premier supplier of high-tech automobile-related products and electronics components for the growing automotive, telecommunications and consumer electronics products industries in the Greater China region.

Gorient is structured into three business divisions, the Automotive Components Division, the Automotive Telematics Division and the Electronics Components Division. Research and development capabilities, production facilities and distribution networks support all divisions, enabling the Group to deliver innovative solutions and quality products to its customers. Gorient continually enhances its long-term competitive advantages by investing in technical know-how and specific, proprietary products and services.

Gorient, whose shares have been listed on the Main Board of the Stock Exchange of Hong Kong since 1991 and formerly known as Innovative International (Holdings) Limited, underwent a major restructuring in 2002 when all debts were compromised and its controlling interests changed hands. The company has since raised approximately HK\$80m from a number of fund-raising transactions and is now well-positioned to focus on its strategic business model.

Gorient draws from a deep talent pool of forward-looking individuals with vast industry experience. The company currently employs approximately 100 highly qualified individuals in the Hong Kong SAR, Mainland China and Taiwan.
