

NOTES TO THE FINANCIAL STATEMENTS

for the year ended 31 December 2004

1. GENERAL

The Bank is a listed public limited company incorporated in Hong Kong and is engaged in the provision of banking and related financial services.

2. POTENTIAL IMPACT ARISING FROM THE RECENTLY ISSUED ACCOUNTING STANDARDS

In 2004, the Hong Kong Institute of Certified Public Accountants (the “HKICPA”) issued a number of new or revised Hong Kong Accounting Standards (“HKASs”) and Hong Kong Financial Reporting Standards (“HKFRSs”) (herein collectively referred to as “new HKFRSs”) which are effective for accounting periods beginning on or after 1 January 2005. The Group has not early adopted these new HKFRSs in the financial statements for the year ended 31 December 2004.

The Group has commenced considering the potential impact of these new HKFRSs but is not yet in a position to determine whether these HKFRSs would have a significant impact on how its results of operations and financial position are prepared and presented. These HKFRSs may result in changes in the future as to how the results and financial position are prepared and presented.

3. SIGNIFICANT ACCOUNTING POLICIES

The financial statements have been prepared under the historical cost convention as modified for the revaluation of certain properties and investments in securities.

The financial statements have been prepared in accordance with accounting principles generally accepted in Hong Kong. The principal accounting policies adopted are set out below:

Basis of consolidation

The consolidated financial statements incorporate the financial statements of the Bank and its subsidiaries made up to 31 December each year.

The results of subsidiaries acquired or disposed of during the year are included in the consolidated income statement from the effective date of acquisition or up to the effective date of disposal, as appropriate.

Goodwill

Goodwill arising on consolidation represents the excess of the cost of acquisition over the Group’s interest in the fair value of the identifiable assets and liabilities of a subsidiary, associate or jointly controlled entity at the date of acquisition.

Goodwill arising on acquisitions prior to 1 January 2001 continues to be held in reserves, and will be charged to the income statement at the time of disposal of the relevant subsidiary, associate or jointly controlled entity, or at such time as the goodwill is determined to be impaired.

Goodwill arising on acquisitions after 1 January 2001 is capitalised and amortised on a straight-line basis over its useful economic life. Goodwill arising on the acquisition of an associate or a jointly controlled entity is included within the carrying amount of the associate or jointly controlled entity. Goodwill arising on the acquisition of subsidiaries is presented separately in the balance sheet.

3. SIGNIFICANT ACCOUNTING POLICIES - continued

Negative goodwill

Negative goodwill represents the excess of the Group's interest in the fair value of the identifiable assets and liabilities of a subsidiary at the date of acquisition over the cost of acquisition.

Negative goodwill is presented as a deduction from assets. To the extent that such negative goodwill is attributable to losses or expenses anticipated at the date of acquisition, it is released to income in the period in which those losses or expenses arise. The remaining negative goodwill is recognised as income on a straight-line basis over the remaining average useful life of the identifiable acquired depreciable assets. To the extent that such negative goodwill exceeds the aggregate fair value of the acquired identifiable non-monetary assets, it is recognised in income immediately.

Investments in subsidiaries

Investments in subsidiaries are included in the Bank's balance sheet at cost less any identified impairment loss.

Interest in an associate

The consolidated income statement includes the Group's share of the post-acquisition results of its associate for the year. In the consolidated balance sheet, interest in an associate is stated at the Group's share of the net assets of the associate, less any identified impairment loss.

The results of associate are accounted for by the Bank on the basis of dividends received and receivable during the year. In the Bank's balance sheet, investment in an associate is stated at cost, as reduced by any identified impairment loss.

Interests in jointly controlled entities

Joint venture arrangements which involve the establishment of a separate entity in which each venturer has an interest are referred to as jointly controlled entities.

The Group's interests in jointly controlled entities are included in the consolidated balance sheet at the Group's share of the net assets of the jointly controlled entities less any identified impairment loss. The Group's share of the post-acquisition results of its jointly controlled entities is included in the consolidated income statement.

The Bank's investments in jointly controlled entities are stated at cost, as reduced by any identified impairment loss. The results of jointly controlled entities are accounted for by the Bank on the basis of dividends received and receivable.

3. SIGNIFICANT ACCOUNTING POLICIES - continued

Advances and other accounts

Advances to customers, banks and other financial institutions and accrued interest and other accounts are stated in the balance sheet after deducting provision for estimated losses.

Provision for bad and doubtful debts is made, having regard to both specific and general risks.

The specific element of the provision relates to those loans that have been individually reviewed and specifically identified as bad or doubtful. Factors which are considered include expected cashflows, financial condition of the borrower and current economic conditions. The general element of the provision relates to those losses that, although not yet specifically identified, are known from experience to be present in the Group's portfolio of loans and advances. In determining the level of the provision required, management considers numerous factors including, but not limited to, domestic and international economic conditions, the composition of the loan portfolio and prior loan loss experience.

Provisions are applied to write off advances when all security has been realised and further recoveries are considered unlikely.

Loans with a specific due date are classified as overdue when the principal or interest is overdue and remains unpaid as at the year-end date. Loans repayable by regular instalments are treated as overdue when an instalment payment is overdue and remains unpaid as at the year-end date. Loans repayable on demand are categorised as overdue either when a demand for repayment has been served on the borrower but repayment has not been made in accordance with the instruction or, the loan has remained continuously outside the approved limit that was advised to the borrower for more than three months.

Rescheduled advances refer to those loans that have been restructured or renegotiated due to the deterioration in the financial position of the borrower or the inability of the borrower to meet the original repayment schedule. Rescheduled advances which have been overdue over three months under the revised repayment terms are classified as overdue advances and not as rescheduled advances.

Assets held through repossession of collateral for realisation continue to be treated as securities for loans and advances. In this regard, provision has been made on the shortfall between the carrying amount of the loans and advances and the expected net sales proceeds from realisation of the repossessed assets.

Foreign currencies

Transactions in foreign currencies are initially recorded at the rates of exchange prevailing on the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies are re-translated at the rates prevailing on the balance sheet date. Profits and losses arising on exchange are included in net profit or loss for the period.

On consolidation, the assets and liabilities of the Group's overseas branches and subsidiaries are translated at the exchange rates prevailing on the balance sheet date. Income and expense items are translated at the average exchange rates for the period. Exchange differences arising, if any, are classified as equity and transferred to the Group's translation reserve. Such translation differences are recognised as income or as expenses in the period in which the operation is disposed of.
