2.1 編製基準(續)

- 香港會計準則第1號對少數股東權益,應 佔聯營公司稅後業績,以及其他披露之 呈列方式構成影響。
- 根據香港會計準則第21號,各綜合機構 之運作貨幣已按經修訂準則之指引重新 評估。
- 香港會計準則第24號對識別有關連人士 及若干其他有關連人士之披露構成影響。

香港會計準則第27號 綜合及獨立財務報表

在過往年度,在綜合人壽保險附屬公司之賬項後,本集團附屬人壽保險公司的投保人應佔之長期保險業務資產及負債在綜合報表之「其他資產」及「其他負債」項內確認。其長期保險業務之溢利則於收益賬之「其他營運收入」列示。

在採納香港會計準則第27號後,集團人壽業務之業績按賬項基礎綜合。附屬人壽保險公司之資產及負債,將按集團綜合資產負債表所呈列個別不同類別之資產與負債列示。壽險業務之利息收入、淨服務費及佣金收入、淨保費收入、淨買賣收入、保險索償淨額及對保單持有人負債之變動、及營運支出分別於本集團之綜合收益賬內相同類別下列示。

2. Summary of significant accounting policies (Continued)

2.1 Basis of preparation (Continued)

The adoption of new/revised HKASs 1, 7, 8, 10, 16, 21, 24, 28, 33 and HKAS-Ints 12 and 15 did not result in substantial changes to the Group's accounting policies. In summary:

- HKAS 1 has affected the presentation of minority interests, share of net after-tax results of associates and other disclosures.
- In HKAS 21, the functional currency of each of the consolidated entities
 has been re-evaluated based on the guidance in the revised standard.
- HKAS 24 has affected the identification of related parties and some other related-party disclosures.

HKAS 27 Consolidated and Separate Financial Statements

In prior years, on consolidation of the life insurance subsidiary, long-term assurance assets and liabilities attributable to policyholders were recognised in aggregate under "Other assets" and "Other liabilities" respectively. Profit from long-term assurance business was reported as "Other operating income" in the income statement.

On adoption of HKAS 27, the results of the Group's life insurance business are consolidated on a line-by-line basis. Assets and liabilities of the life insurance subsidiary are reported according to individual asset and liability categories as presented in the Group's consolidated balance sheet. Interest income, net fee and commission income, net insurance premium income, net trading income, net insurance claims and movement in policyholders' liabilities, and operating expenses attributable to the life insurance business are shown in the income statement on a basis consistent with the presentation of such income and expenses in the Group's consolidated income statement.

2. 主要會計政策概要(續)

2.1 編製基準(續)

香港會計準則第30號 銀行及類同金融機構財務報表中之披露

採納香港會計準則第30號導致收益賬及資產負債表上某些項目的呈列有所變更。國庫票據及持有存款證已包括在根據香港會計準則第39號之有關類別內。

香港會計準則第39號 金融工具:確認及計量

採納香港會計準則第39號導致有關按公平值列 入損益賬之金融資產及負債及可作出售之金融 資產之分類的會計政策變更。同時,該準則亦 導致衍生金融工具按公平值確認及對沖活動之 確認及計量方法變更。

香港會計準則第40號 投資物業

採納經修訂香港會計準則第40號導致公平值變動於收益賬列示的會計政策變更。在過往年度,投資物業估值收益撥入投資物業重估儲備,然而投資物業估值虧損先抵銷以往之儲備,繼而於收益賬內作支出。

香港財務報告準則第2號 以股份為基礎的支付

採納香港財務報告準則第2號導致以股份為基礎支出之會計政策有所變更。據此,以現金支付並以股份為基礎作報酬負債之公平值須於各申報日期透過期權定價模式(直至交收為止)釐定。其公平值變動列入收益賬內。作為過渡性條文,此準則須追溯應用於二零零五年一月一日仍未償付之負債,據此二零零四年之比較數字已作重列。

2.1 Basis of preparation (Continued)

HKAS 30 Disclosures in the Financial Statements of Banks and similar Financial Institutions

The adoption of HKAS 30 has resulted in a change in the presentation of certain items on the face of the income statement and the balance sheet. Treasury bills and certificates of deposit held are now included in the respective categories of financial instruments under HKAS 39.

HKAS 39 Financial Instruments: Recognition and Measurement

The adoption of HKAS 39 has resulted in a change in the accounting policy relating to the classification of financial assets and liabilities at fair value through profit or loss and available-for-sale financial assets. It has also resulted in the recognition of derivative financial instruments at fair value and the change in the recognition and measurement of hedging activities.

HKAS 40 Investment Property

The adoption of revised HKAS 40 has resulted in a change in the accounting policy as changes in fair values are now recorded in the income statement. In prior years, the increases in fair value were credited to the investment properties revaluation reserve. Decreases in fair values were first set off against increases over earlier valuations on a portfolio basis and thereafter were expensed in the income statement.

HKFRS 2 Share-based Payments

The adoption of HKFRS 2 has resulted in a change in the accounting policy for share-based payments pursuant to which the fair value of the liability on cash-settled share-based transactions is determined at each reporting date by way of an option pricing model until it is settled. The changes in the fair value are taken to the income statement. As a transitional provision, retrospective application to the extent the liability is still outstanding as at 1 January 2005 is made and the corresponding comparatives have been restated.

2.1 編製基準(續)

香港財務報告準則第4號 保險合約

採納香港財務報告準則第4號導致保險合約之會計政策有所變更。根據香港財務報告準則第4號,本集團向另一方(保單持有人)訂立合約,同意在日後發生指定但無法確定之事件時向對方作出賠償,令本集團承受重大保險風險,會分類為保險合約。由本集團發出以轉移金融風險(無附帶重大保險風險)之合約,分類為投資合約,並根據香港會計準則第39號列為金融工具。保險合約之新會計政策詳列附註2.26。

香港會計準則詮釋第21號 收益税 - 收回經重 估之非折舊資產

採納經修訂香港會計準則詮釋第21號導致有關 因重估投資物業而產生的遞延税項計量負債之 會計政策變更。該等遞延税項負債乃按透過使 用該物業而確認的資產賬面值所產生之税項影 響為基礎計算。在過往年度,資產賬面值預期 於出售時回收。

會計政策已根據各準則之過渡性條文作出變 更。本集團所採納之所有準則均需追溯應用, 惟下列者除外:

香港會計準則第39號不容許依據其準則 對金融資產及負債的確認、撤銷或計量 作出追溯應用。本集團繼續應用以往之 會計實務準則第24號「投資證券之會計 方法」於其二零零四年證券投資及對沖關 係之比較資料。會計實務準則第24號與 香港會計準則第39號之間的會計差異所 需之調整已於二零零五年一月一日釐定 及確認。

2. Summary of significant accounting policies (Continued)

2.1 Basis of preparation (Continued)

HKFRS 4 Insurance Contracts

The adoption of HKFRS 4 has resulted in a charge in the accounting policy relating to insurance contracts. In accordance with HKFRS 4, a contract under which the Group accepts significant insurance risk from another party (the policyholder) is classified as an insurance contract whereas a contract issued by the Group that transfers financial risk, without significant insurance risk, is classified as an investment contract, and accounted for as a financial instrument in accordance with HKAS 39. Details of the accounting policies on insurance contracts are set out in Note 2.26.

HKAS-Int 21 Income Taxes-Recovery of Revaluated Non-Depreciated Assets

The adoption of revised HKAS-Int 21 has resulted in a change in the accounting policy relating to the measurement of deferred tax liability arising from the revaluation of investment properties. Such deferred tax liability is measured on the basis of tax consequences that would follow from recovery of the carrying amount of those assets through use. In prior years, the carrying amount of those assets was expected to be recovered through sale.

All changes in the accounting policies have been made in accordance with the transition provisions in the respective standards. All standards adopted by the Group require retrospective application other than:

HKAS 39 does not permit recognition, derecognition and measurement
of financial assets and liabilities in accordance with the standard on a
retrospective basis. The Group continues to apply the previous standard,
SSAP 24 "Accounting for investments in securities" to investments in
securities and also to hedge relationships for the 2004 comparative
information. The adjustments required for the accounting differences
between SSAP 24 and HKAS 39 are determined and recognised at 1
January 2005.

2. Summary of significant accounting policies (Continued)

2.1 Basis of preparation (Continued)

The HKICPA has issued a number of new and revised HKFRSs which are effective for accounting periods beginning on or after 1 January 2006. The Group has not early adopted the following new Standards and Amendments, or Interpretations:

HKAS 39 (Amendment)

Cash Flow Hedge Accounting and Forecast

Intragroup Transactions

HKAS 39 (Amendment)

Financial Guarantee Contracts

HKFRS 7

Financial Instruments: Disclosures

The Group has already commenced an assessment of the impact of these new HKFRSs but is not yet in a position to state whether these HKFRSs would have a significant impact on its results of operations and financial position.

2.2 Consolidation

The consolidated financial statements include the financial statements of the Company and all its subsidiaries made up to 31 December.

2.2.1 Subsidiaries

Subsidiaries are those entities in which the Company, directly or indirectly, controls the composition of the Board of Directors, controls more than half the voting power or holds more than half of the issued share capital.

Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are de-consolidated from the date that control ceases.

The purchase method of accounting is used to account for the acquisition of subsidiaries by the Group. The cost of an acquisition is measured as the fair value of the assets given, equity instruments issued and liabilities incurred or assumed at the date of exchange, plus costs directly attributable to the acquisition. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date, irrespective of the extent of any minority interest. The excess of the cost of acquisition over the fair value of the Group's share of the identifiable net assets acquired is recorded as goodwill. If the cost of acquisition is less than the fair value of the net assets of the subsidiary acquired, the difference is recognised directly in the income statement.

2. Summary of significant accounting policies (Continued)

2.2 Consolidation (Continued)

2.2.1 Subsidiaries (Continued)

Inter-company transactions, balances and unrealised gains on transactions between group companies are eliminated. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

In the Company's balance sheet the investments in subsidiaries are stated at cost less allowances for impairment. The results of subsidiaries are accounted for by the Company on the basis of dividends received and receivable.

2.2.2 Associated companies

Associates are all entities over which the Group has significant influence but not control generally accompanying a shareholding of between 20% and 50% of the voting rights. Investments in associates are accounted for by the equity method of accounting and are initially recognised at cost.

The Group's share of its associates' post-acquisition profits or losses is recognised in the income statement, and its share of post-acquisition movements in reserves is recognised in reserves. The cumulative post-acquisition movements are adjusted against the carrying amount of the investment. When the Group's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the associate.

In the Company's balance sheet, the investments in associates are stated at cost less allowances for impairment. The results of associated companies are accounted for by the Bank on the basis of dividend received and receivable.

2.3 Jointly controlled entities

A joint venture is a contractual arrangement whereby the Group and other parties undertake an economic activity, which is subject to joint control and none of the participating parties has unilateral control over the economic activity.

2.4 利息收入及支出

由二零零四年一月一日至二零零四年十二月 三十一日

利息收入及利息支出於應計時按相關合約或票 息利率確認於收益賬內,惟呆賬之利息則暫停 計算並於資產負債表內與及有關結餘抵銷。

由二零零五年一月一日起

所有按攤銷成本計量之工具、可供出售證券及若干以公平值列入損益賬之金融資產/負債的利息收入及支出乃採用實際利率法列入收益賬內。

實際利率法乃是一種用以計算金融資產或金融負債之攤銷成本及其於相關期內攤分利息收入或利息支出的方法。實際利率指可將金融工具在預計有效期間或較短期間(如適用)內之估計未來現金收支折現為該金融資產或金融負債之賬面淨值之適用折現率。在計算實際利率時,本集團按金融工具之所有合約條款(如提早清還之行使權)而估計其現金流量,但不考慮未發生之信貸損失。此計算包括所有合約內交易雙方所收取或支付能構成整體實際利息之費用及利率差價、交易成本及所有其他溢價或折讓。

若一項金融資產或一組金融資產的價值因減值 虧損被調低,其利息收入則按計算有關減值虧 損時所採用以折算未來現金流量之利率來計量 確認。

2.5 服務費及佣金收入及支出

銀團貸款費用於銀團貸款經已完成及本集團並 無自留任何貸款組合部份或按與其他參與者按 相同之實際利率保留一部份時確認為收入。在 某段期間內持續提供的財富管理、財務策劃及 託管服務乃於服務期間按計費方式確認。

2. Summary of significant accounting policies (Continued)

2.4 Interest income and expense

From 1 January 2004 to 31 December 2004

Interest income and interest expense were recognised in the income statement as they accrued using the relative contract or coupon interest rates, except in the case of doubtful debts where interest was suspended and netted off in the balance sheet against the relevant balances.

From 1 January 2005 onwards

Interest income and expense are recognised in the income statement for all instruments measured at amortised cost, available-for-sale financial assets and certain financial assets/liabilities designated at fair value through profit or loss using the effective interest method.

The effective interest method is a method of calculating the amortised cost of a financial asset or a financial liability and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, the Group estimates cash flows considering all contractual terms of the financial instrument (for example, prepayment options) but does not consider future credit losses. The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs and all other premiums or discounts.

Once a financial asset or a group of similar financial assets has been written down as a result of an impairment loss, interest income is recognised using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss.

2.5 Fee and commission income and expense

Loan syndication fees are recognised as revenue when the syndication has been completed and the Group retained no part of the loan package for itself or retained a part at the same effective interest rate for the other participants. Wealth management, financial planning and custody services that are continuously provided over an extended period of time are recognised rateably over the period the service is provided.

2.6 Financial assets

From 1 January 2004 to 31 December 2004

All financial assets were stated at cost or amortised cost, net of impairment allowances, except for investments in securities classified as non-trading securities and trading securities.

(a) Non-trading securities

Non-trading securities were stated at fair value on the balance sheet. Fair value represented the quoted market price for securities that were actively traded in a liquid market. For securities which were not actively traded or were unlisted, fair value was estimated by way of various pricing techniques including discounted cash flow and divided yield analyses.

Changes in the fair value of non-trading securities were recognised in the investment revaluation reserve until the security was sold, or was determined to be impaired, at which time the cumulative gain or loss representing the difference between the net sales proceeds and the carrying amount of the relevant security, together with any surplus/deficit transferred from the investment revaluation reserve, was dealt with in the income statement.

(b) Trading securities

Trading securities were stated at fair value on the balance sheet. Fair value represented the quoted market price for securities that were actively traded in a liquid market. For securities which were not actively traded or were unlisted, fair value was estimated by way of various pricing techniques including discounted cash flow and dividend yield analyses.

Changes in the fair value of trading securities were recognised in the income statement as they arose. Profits and losses on disposal of trading securities, representing the difference between the net sales proceeds and the carrying amounts, were recognised in the income statement as they arose.

2. Summary of significant accounting policies (Continued)

2.6 Financial assets (Continued)

From 1 January 2005 onwards

The Group classifies its financial assets in the following categories: financial assets at fair value through profit or loss, loans and receivables, held-to-maturity investments, and available-for-sale financial assets. The classification depends on the purpose for which the investments were acquired. Management determines the classification of its investments at initial recognition.

(a) Financial assets at fair value through profit or loss

This category has two sub-categories: financial assets held for trading, and those designated at fair value through profit or loss at inception. A financial asset is classified as held for trading if it is acquired principally for the purpose of selling in the short term or if so designated by management. Derivatives are also categorised as held for trading unless they are designated as hedges. Assets in this category are measured at fair value with all holding gains and loss recognised in the income statement.

A financial asset is typically classified as fair value through profit or loss at inception if it meets the following criteria:

- (i) It eliminates or significantly reduces a measurement or recognition inconsistency (sometimes referred to as "an accounting mismatch") that would otherwise arise from measuring assets or recognising the gains and losses on them on different bases; or
- (ii) A group of financial assets is managed and its performance is evaluated on a fair value basis, in accordance with a documented risk management or investment strategy, and this is the basis on which information about the assets is provided internally to the key management personnel such as the Board of Directors and Chief Executive Officer; or
- (iii) Financial assets with embedded derivatives where the characteristics and risks of the embedded derivatives are not closely related to the host contracts.

2.6 Financial assets (Continued)

From 1 January 2005 onwards (Continued)

(b) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Assets in this category are carried at amortised cost less any impairment loss.

(c) Available-for-sale

Available-for-sale financial assets are non-derivatives that are either designated in this category or not classified in any of the other categories. Available-for-sale investments are those intended to be held for an indefinite period of time, which may be sold in response to needs for liquidity or changes in interest rates, exchange rates or equity prices.

(d) Held-to-maturity

Held-to-maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturities that the Group's management has the positive intention and ability to hold to maturity. Assets in this category are carried at amortised cost less any impairment loss.

Purchases and sales of financial assets are recognised on the trade date – the date on which the Group commits to purchase or sell the asset. Financial assets are initially recognised at fair value plus transaction costs. Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the Group has transferred substantially all risks and rewards of ownership.

2.6 金融資產(續)

由二零零五年一月一日起(續)

可供出售之金融資產及以公平值列入損益賬之金融資產其後以公平值列賬。貸款及應收款項及持至到期投資則採用實際利率法以攤銷成本列賬。「以公平值列入損益賬之金融資產」類別之公平值變動所產生之收益及虧損於其產生期間列入收益賬。可供出售金融資產之公平值變動而產生之未變現收益及虧損於權益賬中直接確認,直至有關金融資產被撤銷確認或減值時,以往於權益賬內確認之累積收益或虧損則必須於收益賬中確認。然而,利用實際利率法計算之利息乃於收益賬中確認。可供出售股本工具之股息在本集團確定獲派股息權利時於收益賬確認。

上市投資公平值按現時買價計算。倘金融資產之市場並不活躍(及就非上市證券而言),本集團會採用估值方法訂出公平值,包括採用近期之正常交易,參考其他類同的工具,現金流量折現分析及經改進以反映發行商之特殊情況之期權定價模式。

2.7 金融資產減值

由二零零四年一月一日至二零零四年十二月 三十一日

當董事對其本金或利息最終能否全數收回有所懷疑時,可對特定的貸款和墊款作出準備。因應董事對該等已被認明的貸款及墊款潛在損失作出的評估,而按個別情況作出特殊準備以把資產的賬面值(扣除有關抵押品值)撇減至預期的可變現淨值。對於已收回資產之貸款及墊款,已為收回資產之預期變現所得款項及貸款結欠之虧額作出撥備。

2. Summary of significant accounting policies (Continued)

2.6 Financial assets (Continued)

From 1 January 2005 onwards (Continued)

Available-for-sale financial assets and financial assets at fair value through profit or loss are subsequently carried at fair value. Loans and receivables and held-to-maturity investments are carried at amortised cost using the effective interest method. Gains and losses arising from changes in the fair value of the "financial assets at fair value through profit or loss" category are included in the income statement in the period in which they arise. Unrealised gains and losses arising from changes in the fair value of available-for-sale financial assets are recognised directly in equity, until the financial asset is derecognised or impaired at which time the cumulative gain or loss previously recognised in equity should be recognised in the income statement. However, interest calculated using the effective interest method is recognised in the income statement. Dividends on available-for-sale equity instruments are recognised in the income statement when the Group's right to receive payment is established.

The fair values of quoted investments are based on current bid prices. If the market for a financial asset is not active (and for unlisted securities), the Group establishes fair value by using valuation techniques. These include the use of recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, and option pricing models refined to reflect the issuer's specific circumstances.

2.7 Impairment of financial assets

From 1 January 2004 to 31 December 2004

Provisions were made against specific loans and advances as and when the directors had doubts on the ultimate recoverability of principal or interest in full. Specific provision was made to reduce the carrying value of the asset, net of any collateral, to the expected net realisable value based on the directors' assessment of the potential losses on those identified loans and advances on a case-by-case basis. For loans and advances where assets had been repossessed, provision was made for any shortfall between the expected net realisable value of the repossessed assets and the outstanding advances.

2.7 Impairment of financial assets (Continued)

由二零零四年一月一日至二零零四年十二月 三十一日(續)

From 1 January 2004 to 31 December 2004 (Continued)

倘若不能可靠地估計損失,本集團會根據貸款 分類程序而對貸款及墊款的無抵押部份,按設 定之撥備要求作出準備。本集團內部將貸款和 墊款分類為五種類別,主要是根據對借款人的 償還能力和利息及/或本金的回收能力懷疑度 而決定。利息及/或本金逾期時間的長短乃貸 款回收能力的一項重要指標。倘對利息及/或 本金能否收回存疑時,會對有關貸款及墊款作 出百分之二十五至百分之一百的特殊準備。 Where it was not possible to reliably estimate the loss, the Group applied predetermined provisioning levels to the unsecured portion of loans and advances based on the Group's loan classification procedures. The Group internally classified loans and advances into five broad categories largely based on an assessment of the borrower's capacity to repay and on the degree of doubt about the collectibility of interest and/or principal. One important indicator of collectibility was the period that payments of interest and/or principal had been overdue. A specific provision ranging from 25% to 100% was made against loans and advances where there was doubt about the collectibility of interest and/or principal.

此外,並就呆賬作出一般準備。特殊及一般準備均從資產負債表中之「客戶貸款及墊款」內扣除。

In addition, amounts had been set aside as a general provision for doubtful debts. Both specific and general provisions were deducted from "Advances and other accounts" in the balance sheet.

倘呆賬並無任何實質預期可回收,其餘額將予 以撤銷。

When there was no realistic prospect of recovery, the outstanding debt was written off.

在各結算日,貸款及墊款及持作買賣用途之證券以外之金融資產均被評估,以釐定有否出現任何減值跡象。倘估計資產之可收回金額低於賬面值,則須減值至其可收回金額,其減值虧損在收益賬內確認。對於非持作買賣用途的證券,任何以前曾於投資重估儲備內確認之虧損將撥入收益賬內。

Financial assets, other than loans and advances and trading securities, were reviewed on each balance sheet date to determine whether there was any indication of impairment. If the recoverable amount of the asset was estimated to be less than the carrying amount, the carrying amount of the asset was reduced to its recoverable amount and the impairment loss was recognised in the income statement. For non-trading securities, any loss previously recognised in the investment revaluation reserve was transferred to the income statement.

本集團會於各個結算日評估是否存在客觀證據證明某項金融資產或一組金融資產組別出現減值。惟當有客觀證據證明於首次確認資產後發生一宗或多宗事件導致減值出現(「虧損事件」),而該宗(或該等)虧損事件對該項或該組金融資產之估計未來現金流量構成可合理估計的影響,有關的金融資產才算出現減值及產生減值虧損。證明某項或某組金融資產已減值的客觀證據包括集團察覺到有關以下虧損事件的明顯證據:

- (i) 發行人或承擔人出現重大財政困 難:
- (ii) 違反合約如逾期支付或拖欠利息 或本金;
- (iii) 本集團因借款人的財政困難及有關的經濟或法律理由,給予借款 人一項集團在其他情況下不會考 慮的優惠:
- (iv) 借款人有可能會破產或進行其他 財務重組;
- (v) 因為財政困難而導致某金融資產 失去活躍市場;或
- (vi) 明顯的資料顯示一組金融資產自 首次確認入賬後,其估計之未來 現金流量出現重大的跌幅,儘管 尚未能認明有關跌幅是來自組別 內哪項個別金融資產,包括:
 - 組別內借款人的付款狀況出現逆轉;或
 - 組別內資產拖欠情況與有關的國家或當地經濟狀況配合。

2.7 Impairment of financial assets (Continued)

From 1 January 2005 onwards (Continued)

(a) Assets carried at amortised cost

The Group assesses at each balance sheet date whether there is objective evidence that a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is impaired and impairment losses are incurred if, and only if, there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated. Objective evidence that a financial asset or group of assets is impaired includes observable data that comes to the attention of the Group about the following loss events:

- (i) significant financial difficulty of the issuer or obligor;
- (ii) a breach of contract, such as a default or delinquency in interest or principal payments;
- (iii) the Group granting to the borrower, for economic or legal reasons relating to the borrower's financial difficulty, a concession that the lender would not otherwise consider;
- (iv) it becoming probable that the borrower will enter into bankruptcy or other financial reorganisation;
- (v) the disappearance of an active market for that financial asset because of financial difficulties; or
- (vi) observable data indicating that there is a measurable decrease in the estimated future cash flows from a group of financial assets since the initial recognition of those assets, although the decrease cannot yet be identified with the individual financial assets in the group, including:
 - adverse changes in the payment status of borrowers in the group; or
 - national or local economic conditions that correlate with defaults on the assets in the group.

由二零零五年一月一日起(續)

甲) 以攤銷成本列賬之資產(續)

本集團首先評估是否有客觀證據證明個別重大的金融資產出現減值,或非個別重大的金融資產個別或整體上出現減值。若集團認為不存有任何客觀證據證明個別評估的金融資產(不論是否屬重大)出現減值,有關資產將撥入具類同信貸風險特徵的一組金融資產內,由集團綜合評估該組資產的減值。綜合的減值評估不包括已進行個別減值評估並已確認或持續確認減值虧損的資產。

計算有抵押之金融資產的預計未來現金 流量的現值反映收回抵押品可能產生的 現金流量減除出售抵押品(不論抵押品是 否可能被沒收)的成本。

進行綜合減值評估時,金融資產按類同信貸風險特性(即集團考慮資產類別、抵押品類別、過往逾期情況及其他相關因素)分類。對估計該等組別資產的未來現金流量而言,能夠反映債務人按此等被評估資產的合約條款償還全部債務能力的特質將會被考慮。

2. Summary of significant accounting policies (Continued)

2.7 Impairment of financial assets (Continued)

From 1 January 2005 onwards (Continued)

(a) Assets carried at amortised cost (Continued)

The Group first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, and individually or collectively for financial assets that are not individually significant. If the Group determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes that asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment. Assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognised are not included in a collective assessment of impairment.

If there is objective evidence that an impairment loss on loans and receivables or held-to-maturity investments carried at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognised in the income statement. If a loan or held-to-maturity investment has a variable interest rate, the discount rate for measuring any impairment loss is the current effective interest rate determined under the contract. As a practical expedient, the Group may measure impairment on the basis of an instrument's fair value using an observable market price.

The calculation of the present value of the estimated future cash flows of a collateralised financial asset reflects the cash flows that may result from foreclosure less costs for obtaining and selling the collateral, whether or not foreclosure is probable.

For the purposes of a collective evaluation of impairment, financial assets are grouped on the basis of similar credit risk characteristics (i.e. on the basis of the Group's grading process that considers asset type, collateral type, overdue status and other relevant factors). Those characteristics relevant to the estimation of future cash flows for groups of such assets by being indicative of the debtors' ability to pay all amounts due according to the contractual terms of the assets are considered.

2.7 金融資產減值(續)

由二零零五年一月一日起(續)

甲) 以攤銷成本列賬之資產(續)

一組共同進行減值評估的金融資產的未來現金流量乃按該組資產的合約現金流量及與該組資產具相若信貸風險特質的資產之過往虧損經驗計算。過往虧損經驗乃按現時可見的數據作出調整,以反映現有狀況,及消除於過往期間出現但現時並不存在的條件之影響。

估計某些資產組別之未來現金流量的改變,應反映期間相關顯示數據的改變(如失業率、物業價格、付款情況,或其他可顯示該組別損失機會及程度的改變)及一致的趨勢。集團定期檢討用作估計未來現金流量的方法及假設,以減少預計虧損及實際虧損的差異。

當貸款未能償還時,將與其有關之貸款減值準備抵銷。該貸款在完成所有必須程序及能確定虧損金額後撤銷。如日後收回過往已撤銷之款項,將可減低收益賬內的貸款減值撥備。

倘於繼後期間,減值虧損金額減少,同時客觀地與減值獲確認後發生的事項相關(例如債務人信貸評級改善),則透過調整調撥賬項將過往確認的減值虧損撥回。撥回的金額於收益賬中確認。

2. Summary of significant accounting policies (Continued)

2.7 Impairment of financial assets (Continued)

From 1 January 2005 onwards (Continued)

(a) Assets carried at amortised cost (Continued)

Future cash flows in a group of financial assets that are collectively evaluated for impairment are estimated on the basis of the contractual cash flows of the assets in the group and historical loss experience for assets with credit risk characteristics similar to those in the group. Historical loss experience is adjusted on the basis of current observable data to reflect the effects of current conditions that did not affect the period on which the historical loss experience is based and to remove the effects of conditions in the historical period that do not exist currently.

Estimates of changes in future cash flows for groups of assets should reflect and be directionally consistent with changes in related observable data from period to period (for example, changes in unemployment rates, property prices, payment status, or other factors indicative of changes in the probability of losses in the group and their magnitude). The methodology and assumptions used for estimating future cash flows are reviewed regularly by the Group to reduce any differences between loss estimates and actual loss experience.

When a loan is uncollectable, it is written off against the related allowances for loan impairment. Such loans are written off after all the necessary procedures have been completed and the amount of the loss has been determined. Subsequent recoveries of amounts previously written off decrease the amount of the allowances for loan impairment in the income statement.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised (such as an improvement in the debtor's credit rating), the previously recognised impairment loss is reversed by adjusting the allowance account. The amount of the reversal is recognised in the income statement.

2.7 Impairment of financial assets (Continued)

From 1 January 2005 onwards (Continued)

(b) Assets carried at fair value

The Group assesses at each balance sheet date whether there is objective evidence that a financial asset or a group of financial assets is impaired. In the case of equity investments classified as available-forsale, a significant or prolonged decline in the fair value of the security below its cost is considered in determining whether the assets are impaired. If any such evidence exists for available-for-sale financial assets, the cumulative loss measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognised in profit or loss is removed from equity and recognised in the income statement. Impairment losses recognised in the income statement on equity instruments are not reversed through the income statement. If, in a subsequent period, the fair value of a debt instrument classified as available-for-sale increases and the increase can be objectively related to an event occurring after the impairment loss was recognised in profit or loss, the impairment loss is reversed through the income statement.

Financial liabilities, except trading securities short positions, were carried at cost or amortised cost. Trading securities short positions were carried at fair value and any gains and losses from changes in fair value were recognised through the income statement.

All financial liabilities are classified at inception and recognised initially at fair value.

此等工具之記賬方法乃視乎進行該等交易的目的而定。

持作買賣用途之交易按其公平值重新計量。公 平值乃定期取自不同之合適渠道,包括市場報 價、現金流量折現模式及期權定價模式。買賣 外匯工具產生之損益已包括在收益賬內之「外 匯買賣淨收益/(虧損)」。

買賣利率及其他金融工具所產生之損益已包括 在收益賬之其他營運收入。本集團在評估用作 買賣用途的衍生工具公平值所採用之主要方法 及假設已列於附註23。

按市價計量之交易未變現收益列賬於資產負債表內之「貸款及其他賬目」。按市價計量之交易未變現收益則列賬於資產負債表內之「其他賬目及預提」。

在訂立衍生工具合約當日,本集團或會指定某些交易為對沖交易。被分類為對沖交易的衍生工具,必須與被對沖的項目有正式的聯繫,並在交易發生時已被清楚地認明及記錄。集團風險部不時檢討及監控對沖工具對減免風險的有效性。指定為對沖交易的衍生工具是根據其所對沖之資產、負債或持倉淨額之相同基準計算價值。而所產生之盈虧亦按與相關資產、負債或持倉淨額相同基準計入收益賬內。

當衍生工具交易不再符合以上作為對沖的條件 時,則此等衍生工具將被視為持作買賣用途, 並循以上所述方法入賬。

2. Summary of significant accounting policies (Continued)

2.9 Derivative financial instruments and hedge accounting

From 1 January 2004 to 31 December 2004

Off-balance sheet financial instruments arise from futures, forward, swap and option transactions undertaken by the Group in the foreign exchange, equity, interest rate, and other markets.

Accounting for these instruments is dependent upon the purpose for which the transactions are undertaken.

Transactions undertaken for trading purposes are re-measured to their fair value. Fair values are obtained periodically from various sources, including quoted market prices, discounted cash flow models and option pricing models as appropriate. The gains and losses arising from trading in foreign exchange instruments are recognised in the income statement account as "Net gain/ (loss) arising from dealing in foreign currencies".

The gains and losses arising from trading in interest rate and other financial instruments are recognised in the income statement account and included as part of other operating income. The major methods and assumptions used by the Group in estimating the fair value of trading derivatives are set out in note 23 to the financial statements.

Unrealised gains on transactions which are marked to market are included in "Advances and other accounts" in the balance sheet. Unrealised losses on transactions which are marked to market are included in "Other accounts and accruals".

On the date a derivative contract is entered into, the Group may designate certain derivative transactions as hedges. Derivatives are classified as a hedge when a formal linkage between the hedging instruments and the hedged items is clearly identified and documented at the inception of the hedging transactions. The risk mitigation effectiveness of the hedging instruments is reviewed by the Group Risk Division and is monitored on an on-going basis. Transactions designated as hedges are valued on an equivalent basis to the assets, liabilities or net positions that they are hedging. Any profit or loss is recognised on the same basis as that arising from the related assets, liabilities or net positions.

If the derivative transaction no longer meets the criteria for a hedge set out above, the derivative is deemed to be held for trading purposes and is accounted for as set out above.

2.9 衍生金融工具及對沖會計處理(續)

由二零零四年一月一日至二零零四年十二月 三十一日(續)

衍生工具交易只會在本集團有能力堅持以淨額 方式結算時(如訂立整體性的對銷協議或其他 具有法律效力的安排),才互相對銷。要求淨 額結算的或然性權利的確認,只有在本集團有 能力於交易對手有違約的情況下(包括合約中 任何一方資不抵債)堅持以淨額結算,並對行 使此等權利毫不存疑時方被考慮。

除非相關的結算貨幣均相同,或交易以在活躍 市場中能夠提供自由兑換貨幣作價,否則衍生 工具交易不作互相抵鎖。

由二零零五年一月一日起

衍生工具最初於訂立衍生工具合約之日按公平 值確認,其後按公平值重新計量。公平值乃根 據活躍市場的報價釐定,包括最近市場交易及 估值方法(包括現金流量折現模式及期權定價 模式,倘適用)。當衍生工具的公平值為正數 時,均作為資產入賬:當公平值為負數時,則 作為負債入賬。

首次確認衍生工具的公平值以其交易價格(即 所支付或所收取之代價的公平值)為最佳方 法。

倘當其他金融工具之內含某些衍生工具(例如可換股債券內之兑換期權)的經濟性質及風險與主合約並無密切關係時,而主合約並非以公平值列入損益賬,則作為個別衍生工具處理。此等內含之衍生工具按公平值計算,其公平值的變動於收益賬內確認。

確認公平值收益或虧損的方法取決於該衍生工 具是否被指定為對沖工具,如屬者則須取決其 對沖項目之性質。本集團指定若干衍生工具為 已確認資產公平值的對沖工具(公平值對沖)。 以此方法指定並符合若干條件的衍生工具採用 對沖會計處理。

2. Summary of significant accounting policies (Continued)

2.9 Derivative financial instruments and hedge accounting (Continued)

From 1 January 2004 to 31 December 2004 (Continued)

Derivative transactions are offset only when the Group has the ability to insist on net settlement such as by means of entering into a master netting agreement or other legally enforceable arrangements. Any right to insist on a net settlement that is contingent is only taken into account when the Group is able to enforce net settlement in all situations of default by the other party or parties including insolvency of any parties to the contract, and the ability to insist on a net settlement is assured beyond doubt.

Derivative transactions are not offset unless the related settlement currencies are the same, or are denominated in freely convertible currencies for which quoted exchange rates are available in an active market.

From 1 January 2005 onwards

Derivatives are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at their fair value. Fair values are obtained from quoted market prices in active markets, including recent market transactions, and valuation techniques, including discounted cash flow models and option pricing models, as appropriate. All derivatives are carried as assets when fair value is positive and as liabilities when fair value is negative.

The best evidence of the fair value of a derivative at initial recognition is the transaction price (i.e., the fair value of the consideration given or received).

Certain derivatives embedded in other financial instruments, such as the conversion option in a convertible bond, are treated as separate derivatives when their economic characteristics and risks are not closely related to those of the host contract and the host contract is not carried at fair value through profit or loss. These embedded derivatives are measured at fair value with changes in fair value recognised in the income statement.

The method of recognising the resulting fair value gain or loss depends on whether the derivative is designated as a hedging instrument, and if so, the nature of the item being hedged. The Group designates certain derivatives hedges of the fair value of recognised assets (fair value hedge). Hedge accounting is used for derivatives designated in this way provided certain criteria are met.

甲) 公平值對沖

已指定並符合條件作公平值對沖的衍生 工具的公平值變動,連同與對沖風險相關的對沖資產或負債的任何公平值變動,均於收益賬內入賬。

倘該對沖不再符合對沖會計處理的標準,則採用實際利率法釐定該被對沖項 目賬面值的調整數,按到期前期間於收 益賬內攤銷。

乙) 不符合作對沖會計處理的衍生工具

若干衍生工具並不符合作對沖會計處 理。任何不符合作對沖會計處理的衍生 工具的公平值變動即時於收益賬內確 認。

2.10 抵銷金融工具

倘有可執行法律權利抵銷某些已確認金額及有 意以淨額基準結算或變現資產以同時清償負債 時,金融資產及負債將互相抵銷,有關之淨款 項於資產負債表內呈報。

2. Summary of significant accounting policies (Continued)

2.9 Derivative financial instruments and hedge accounting (Continued)

From 1 January 2005 onwards (Continued)

The Group documents, at the inception of the transaction, the relationship between hedging instruments and hedged items, as well as its risk management objective and strategy for undertaking various hedge transactions. The Group also documents its assessment, both at hedge inception and on an ongoing basis, of whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in fair values of hedged items.

(a) Fair value hedge

Changes in the fair value of derivatives that are designated and qualify as fair value hedges are recorded in the income statement, together with any changes in the fair value of the hedged asset or liability that are attributable to the hedged risk.

If the hedge no longer meets the criteria for hedge accounting, the adjustment to the carrying amount of a hedged item for which the effective interest method is used is amortised to profit or loss over the period to maturity.

(b) Derivatives that do not qualify for hedge accounting

Certain derivative instruments do not qualify for hedge accounting. Changes in the fair value of any derivative instrument that does not qualify for hedge accounting are recognised immediately in the income statement.

2.10 Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

2.11 Repossessed assets

Repossessed collateral assets are reported under "Other assets" and the relevant loans are derecognised. The repossessed collateral assets are measured at lower of carrying amount and net realisable value.

2.12 Segment reporting

In accordance with the Group's internal financial reporting policy, the Group has determined that business segments be presented as the primary reporting format, as over 90% of the Group's revenues and close to 90% of the Group's assets are originated from business operations based in Hong Kong.

2.13 Foreign currency translation

(a) Functional and presentation currency

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates ('the functional currency"). The consolidated financial statements are presented in HK dollars, which is the Group's presentation currency and the functional currency of the major part of the Group.

(b) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the income statement.

Translation differences on non-monetary items, such as investment in equity instruments held at fair value through profit or loss, are reported as part of the fair value gain or loss. Translation difference on certain other non-monetary items, such as equities classified as available-for-sale financial assets, are included in the fair value reserve in equity.

(c) Group companies

The results and financial position of all the group entities (none of which has the currency of a hyperinflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- (i) assets and liabilities for each balance sheet presented are translated at the closing rate at the date of that balance sheet;
- (ii) income and expenses for each income statement are translated at average exchange rates (unless this average is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the dates of the transactions); and
- (iii) all resulting exchange differences are recognised as a separate component of equity.

On consolidation, exchange differences arising from the translation of the net investment in foreign entities are taken to shareholders' equity. When a foreign operation is sold, such exchange differences are recognised in the income statement as part of the gain or loss on sale.

Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing rate.

2.14 行產及其他固定資產

租賃物業包括樓宇及其所在土地。當不能可靠地估量及分割該樓宇及其所在土地應佔之賬面值時,則當作融資租賃處理及按公平值(公平值乃根據外聘獨立估值師定期(至少三年一次)之估值減累積折舊得出)列示。於重估日期,資產之賬面淨值與任何累積折舊抵銷,其淨額重列作資產之重估值。所有其他物業、廠房及設備按歷史成本減除折舊及減值虧損載列。歷史成本包括收購該等項目之直接應佔支出。成本亦可包括來自以外幣購買物業、廠房及設備之合資格現金流量對沖所產生轉撥自權益賬之任何盈利/虧損。

只有當與該項目可能給本集團帶來相關連之未來經濟利益,以及該項目之成本可以可靠地釐定時,後期成本列於資產之賬面值中或作為個別資產確認(視乎適合而定)。所有其他維修開支均於產生之財政期間於收益賬內扣除。

因重估行產產生之賬面增值計入股東權益賬下 之其他儲備賬項內。用作抵銷同一資產過往增 值之減值,乃直接於權益賬內之公平值儲備抵 銷;所有其他減值則於收益賬內扣除。每年, 以資產之重估賬面值為基準計量及於收益賬內 扣除折舊與以該資產之最初成本為基準計量之 折舊差額將由重估儲備轉撥到保留盈利內。

行產及其他固定資產之折舊採用直線法計算, 並按下列所示之可使用年期分攤其成本餘值或 重估值:

一 行產 於剩餘租賃年期一 傢俬、裝置、 於估計使用年期 設備及汽車 (一般在五至十年之間)

資產之剩餘價值及使用年期於每年結算日將被 評估,並在合適之情況下作出調整。

2.14 Premises and other fixed assets

Leasehold properties comprising land and buildings held on which a reliable estimate is not available on the split of the carrying value attributable to each of the land and building elements are accounted for as finance leases and shown at fair value, based on periodic, and at least triennial, valuations by external independent valuers, less subsequent depreciation. Any accumulated depreciation at the date of revaluation is eliminated against the gross carrying amount of the asset and the net amount is restated to the revalued amount of the asset. All other property, plant and equipment are stated at historical cost less depreciation and impairment losses. Historical cost includes expenditure that is directly attributable to the acquisition of the items. Cost may also include transfers from equity of any gains/losses on qualifying cash flow hedges of foreign currency purchases of property, plant and equipment.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. All other repairs and maintenance are expensed in the income statement during the financial period in which they are incurred.

Increases in the carrying amount arising on revaluation of premises are credited to other reserves in shareholders' equity. Decreases that offset previous increases of the same asset are charged against fair value reserves directly in equity; all other decreases are expensed in the income statement. Each year the difference between depreciation based on the revalued carrying amount of the asset expensed in the income statement and depreciation based on the asset's original cost is transferred from the revaluation reserve to retained earnings.

Depreciation of premises and other fixed assets is calculated using the straightline method to allocate cost or revalued amounts to their residual values over their estimated useful lives, as follows:

Premises
 Furniture, fittings, equipment and motor vehicles
 Over the remaining period of lease
 Over the estimated useful lives
 generally between 5 and 10 years

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each balance sheet date.

2.15 投資物業

持作收取長期租金收益或獲取資本增值或兩者 兼得且並非由集團旗下公司所佔用之物業被歸 類為投資物業。

投資物業包括根據經營租約持有之土地及根據 融資租賃持有之樓宇。

當根據經營租約持有之土地符合投資物業其餘定義之條件,該等土地將歸類為投資物業及據此進行會計處理。經營租約當作融資租賃進行會計處理。

投資物業最初以成本值(包括相關交易費用)計量。

經初步確認後,投資物業按公平值列賬。公平值乃以活躍市場之價格為基礎,於需要時就特定之資產性質、地點或狀況之任何差異作出調整。倘該等資料無法得到,本集團則採用替代估值法,例如按次活躍市場最近之價格或折現現金流量預測進行估值。該等估值每年由外聘估值師進行。重建並持續用作投資物業之投資物業,或其市場活躍度下降之投資物業繼續按公平值計量。

投資物業之公平值反映(其中包括)現時租賃之租金收入及按現行市況預期之未來租金收入。

只有當與該項目可能給本集團帶來關連之未來 經濟利益及該項目之成本可被可靠地計量時, 後期開支才會計入該資產之賬面值。所有其他 維修支出於其產生之相關財政期間記入收益賬 內。

2.14 Premises and other fixed assets (Continued)

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount (Note 2.7).

2.15 Investment properties

Property that is held for long-term rental yields or for capital appreciation or both, and that is not occupied by the companies in the consolidated Group, is classified as investment property.

Investment property comprises land held under operating lease and buildings held under finance lease.

Land held under operating lease is classified and accounted for as investment property when the rest of the definition of investment property is met. The operating lease is accounted for as if it were a finance lease.

Investment property is measured initially at its cost, including related transaction costs.

After initial recognition, investment property is carried at fair value. Fair value is based on active market prices, adjusted, if necessary, for any difference in the nature, location or condition of the specific asset. If this information is not available, the Group uses alternative valuation methods such as recent prices on less active markets or discounted cash flow projections. These valuations are reviewed annually by external valuers. Investment property that is being redeveloped for continuing use as investment property, or for which the market has become less active, continues to be measured at fair value.

The fair value of investment property reflects, among other things, rental income from current leases and assumptions about rental income from future leases in the light of current market conditions.

Subsequent expenditure is charged to the asset's carrying amount only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. All other repairs and maintenance costs are expensed in the income statement during the financial period in which they are incurred.

2.16 商譽及無形資產

2.15 Investment properties (Continued)

Changes in fair values are recognised in the income statement.

If an investment property becomes owner-occupied, it is reclassified as property, plant and equipment, and its fair value at the date of reclassification becomes its cost for accounting purposes.

If an item of premises and other fixed assets becomes an investment property because its use has changed, any difference resulting between the carrying amount and the fair value of this item at the date of transfer is recognised in equity as a revaluation of premises and other fixed assets under HKAS 16. However, if a fair value gain reverses a previous impairment loss, the gain is recognised in the income statement.

2.16 Goodwill and intangible assets

Goodwill represents the excess of the cost of an acquisition over the Group's share of the net fair value of the identifiable assets and liabilities of the acquiree as at the completion of an acquisition. It is tested annually for impairment losses and carried at cost less any accumulated impairment losses. It is allocated to cash-generating units for the purpose of impairment testing.

Intangible assets arising from an acquisition are recognised separately from goodwill when they are separable or arise from contractual or other legal rights, and their value can be measured reliably. They include core deposits, contracts and customer relationships intangible assets, and trade names. Intangible assets are stated at cost less amortisation based on estimated useful lives, and/or accumulated impairment losses.

2.17 Impairment of goodwill and intangible assets

Goodwill and intangible assets that have an indefinite useful life are not subject to amortisation, but are tested annually for impairment and are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. Intangible assets that have a finite life are subject to amortisation and reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount.

2.18 Deferred income tax

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, if the deferred income tax arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit nor loss, it is not accounted for. Deferred income tax is determined using tax rates that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred income tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Deferred income tax is provided on temporary differences arising on investments in subsidiaries, associates and jointly controlled entities, except where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future.

Income tax payable on profits, based on the applicable tax law in each jurisdiction, is recognised as an expense in the period in which profits arise. The tax effects of income tax losses available for carry forward are recognised as an asset when it is probable that future taxable profits will be available against which these losses can be utilised.

Deferred tax related to fair value re-measurement of available-for-sale investments, which is charged or credited directly to equity, is also credited or charged directly to equity and is subsequently recognised in the income statement upon the realisation of relevant investments.

2.19 Employee benefits

(a) Pension obligations

The Group offers a mandatory provident fund scheme and a number of defined contribution plans, the assets of which are generally held in separate trustee-administered funds. These pension plans are funded by payments from employees and by the relevant Group companies.

The Group's contributions to the mandatory provident fund schemes and defined contribution retirement schemes are expensed as incurred. Other than mandatory provident fund contribution, the Group's contributions may be reduced by contributions forfeited by those employees who leave prior to vesting fully in the contributions.

(b) Share-based compensation

The Group operates a cash-settled, share-based compensation plan, which requires the Group to pay the intrinsic value of the share option to a grantee at the date of exercise. The total amount to be expensed over the vesting period is determined by reference to the fair value of the options granted. At each balance sheet date, the Group will re-measure the fair value of the option and any change is recognised in the income statement.

(c) Employee leave entitlements

Employee entitlements to annual leave and long service leave are recognised when they accrue to employees. An accrual is made for the estimated liability for annual leave and long service leave as a result of services rendered by employees up to the balance sheet date.

(d) Bonus plans

Liabilities for bonus plans due wholly within twelve months after the balance sheet date are recognised when the Group has a present or constructive obligation as a result of services rendered by employees and a reliable estimate of the obligation can be made.

2.20 撥備

倘本集團因過往事件而產生即時法律或推定責任:可能須就解除責任而導致經濟資源流失之可能性高於不會導致資源流失之可能性:及可就責任之款額作出可靠估計時,則需確認重組成本及法律索償之撥備。重組撥備包括終止租約罰金及終止聘約付款。未來經營虧損則不會確認為撥備。

倘有多項類同之責任時,解除該等責任導致損失之可能性按責任之類別作整體釐定。即使在 同一類別責任內任何一項目導致損失之可能性 可能會很小,亦需就此確認撥備。

2.21 租約

甲)經營租約

出租人仍保留重大風險及回報之租約歸 類為經營租約。經營租約內之支出(經扣 除收取自出租人之任何優惠),於租約期 間以直線法在收益賬中支銷。

根據經營租約,倘本集團為出租人時, 訂約出租之資產在資產負債表列為固定 資產。該等資產按類同之自有固定資產 之基準,於其預計使用年期內折舊。租 金收入扣除給予承租人之任何優惠後以 百線法於租約期限內確認。

乙)融資租賃

倘本集團重大地保留擁有權之所有風險 及回報,有關資產租約則歸類為融資租 賃。融資租賃在租約開始時按租賃物業 之公平值及最低租賃付款之現值中較低 者作資產化。每項租賃付款在負債及融 資支出間作出分配以達致未償融資餘額 反映固定息率。扣除融資支出後相應之 租約責任則包括於負債內。根據融資租 賃而收購之投資物業按其公平值列值。

2.20 Provisions

Provisions for restructuring costs and legal claims are recognised when: the Group has a present legal or constructive obligation as a result of past events; it is more likely than not that an outflow of resources will be required to settle the obligation; and the amount has been reliably estimated. Restructuring provisions comprise lease termination penalties and employee termination payments. Provisions are not recognised for future operating losses.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

2.21 Leases

(a) Operating leases

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are expensed in the income statement on a straight-line basis over the period of the lease.

Where the Group is a lessor under operating leases, assets leased out are included in fixed assets in the balance sheet. They are depreciated over their expected useful lives on a basis consistent with similar owned fixed assets. Rental income (net of any incentives given to lessees) is recognised on a straight-line basis over the lease term.

(b) Finance leases

Leases of assets where the Group has substantially retained all the risks and rewards of ownership are classified as finance leases. Finance leases are capitalised at the lease's commencement at the lower of the fair value of the leased property and the present value of the minimum lease payments. Each lease payment is allocated between the liability and finance charges so as to achieve a constant rate on the finance balance outstanding. The corresponding rental obligations, net of finance charges, are included as liabilities. The investment properties acquired under finance leases are carried at their fair value.

2.24 Contingent liabilities and contingent assets

A contingent liability is a possible obligation that arises from past events and whose existence will only be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Group. It can also be a present obligation arising from past events that is not recognised because it is not probable that an outflow of economic resources will be required or the amount of obligation cannot be measured reliably.

A contingent liability is not recognised but is disclosed in the notes to the financial statements. When a change in the probability of an outflow occurs so that outflow is probable, it will then be recognised as a provision.

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain events not wholly within the control of the Group.

A contingent asset is not recognised but is disclosed in the notes to the financial statements when an inflow of economic benefits is probable. When such inflow is virtually certain, an asset is recognised.

2.25 Cash and cash equivalents

For the purposes of the cash flow statement, cash and cash equivalents comprise balances with less than three months' maturity from the date of acquisition, including: cash, balances with banks and other financial institutions, treasury bills, other eligible bills and certificates of deposit and investment securities which are readily convertible to cash and are subject to an insignificant risk of changes in value.

2.26 Insurance contracts

The Group issues contracts that contain insurance risk or both insurance and financial risks. Contracts under which the Group retains significant risk from another party by agreeing to compensate the beneficiary on the occurrence of a specified uncertain future event (the insured event) are classified as insurance contracts. 2.26 Insurance contracts (Continued)

Insurance contracts are accounted for as follows:

(i) Premiums

Premiums for long-term insurance business are recognized as revenue when they become due. Premiums for general insurance business are accounted for in the period in which the risk commences. Unearned premium is provided and is calculated on a time-apportioned basis as the proportion of the business underwritten in the accounting year relating to the period of risk after the balance sheet date. Reinsurance premiums are accounted for on the same basis as gross premiums.

3.1 採用金融工具策略

本集團接受定息或浮息及不同年期之客戶存款,並透過投資所收取之資金於高質素資產以 賺取息差。本集團尋求透過整合短期資金及按 較高利率借出較長期之款項以增加此等息差收 入,同時並保持足夠之流動資金以應付可能須 付之所有債務。

集團亦透過向多家不同信貸級別之商業及零售借款人貸款,以獲取減除撥備後高於平均之息差,藉此提高息差。此等活動風險不單涉及資產負債表內之貸款及墊款,亦涉及本集團訂立擔保及其他承擔,例如信用證及其他承諾。

本集團亦通過交易所及場外交易買賣包括衍生工具之金融工具,藉著證券、債券、貨幣、利率及商品價格之短期波動賺取利潤。董事會制定交易限額以監控不同程度之市場持倉風險。除指定對沖安排外,有關外匯及利率之風險一般以訂立對銷持倉(包括與客戶及市場對手之交易)或利用衍生工具作對沖,藉此控制有關市場持倉套現之現金淨值。

本集團亦應用利率掉期及其他利率衍生工具以減輕因利率變動令定息資產公平值下降或定息有期負債公平值上升之利率風險。當若干金融工具被用作公平值對沖時,對沖項目之細節,包括被對沖項目、金額、利率、對沖期及目的,皆於各公平值對沖項目開始時被確定和記錄,亦於開始對沖時按預期基礎評估及不時根據實際經驗及估價重新評估對沖有效性。倘公平值對沖關係不符合對沖會計的有效性測試標準,則對沖會計方法將於此公平值對沖變失效日起停止。

3. Financial risk management

3.1 Strategy in using financial instruments

The Group accepts deposits from customers at both fixed and floating rates, and for various periods, and seeks to earn positive interest margins by investing these funds in high-quality assets. The Group seeks to increase these margins by consolidating short-tem funds and lending for longer periods at higher rates, while maintaining sufficient liquidity to meet all claims that might fall due.

The Group also seeks to raise its interest margins by obtaining above-average margins, net of allowances, through lending to commercial and retail borrowers with a range of credit standing. Such exposures involve not just on-balance sheet loans and advances, as the Group also enters into guarantees and other commitments such as letters of credit and performance, and other bonds.

The Group also trades in financial instruments where it takes positions in traded and over-the-counter instruments, including derivatives, to take advantage of short-term market movements in equities and bonds and in currency, interest rate and commodity prices. The Board places trading limits on the level of exposure that can be taken in relation to market positions. Apart from specific hedging arrangements, foreign exchange and interest rate exposures are normally offset by entering into counterbalancing positions (including transactions with customers or market counterparties), or by the use of derivatives, thereby controlling the variability in the net cash amounts required to liquidate market positions.

The Group also uses interest rate swap and other interest rate derivatives to mitigate interest rate risk arising from changes in interest rates that will result in decrease in the fair value of fixed rate assets or increase in the fair value of fixed rate term liabilities. Certain of these financial instruments are designated as fair value hedges, and the terms of the hedge including hedged item, amount, interest rates, hedge period and purpose are determined and documented at the inception of each fair value hedge. Hedge effectiveness is assessed at inception on a prospective basis and is reassessed, on an ongoing basis, based on actual experience and valuation. Fair value hedge relationships that do not meet the effectiveness test requirement of hedge accounting are discontinued with effect from the date of ineffectiveness of the fair value hedge.

3.2 信貸風險

本集團之主要信貸風險為借貸人或交易對手未 能履行對本集團之償款責任。此等責任乃源自 本集團之貸款及交易活動、及買賣金融或衍生 工具活動。

本集團設有集團信貸委員會,每部門均設有信貸委員會,由若干執行董事及高級信貸人員組成,並由行政總裁擔任主席。每個信貸委員會負責按集團風險部政策所訂下之範圍內,制訂及修訂其部門之信貸政策及程序。信貸政策及程序界定提供貸款之條件及指引、信貸批核及評分、檢討及監察過程,以及貸款分類及減值之制度。

本集團根據業務、財務、市場及行業風險,評估不同類型的客戶及交易對方的信貸風險值,並按信貸批核及檢討政策而審慎地管理各類型的信貸風險。不同的管理階層會基於已制定的指引而批核各種信貸產品、客戶或交易對手及信貸額。管理層、信貸委員會及集團風險部會定期監察及控制信貸風險、信貸限額及資產質素。本集團內部審核師會作定期審核及檢查以確保信貸政策,程序及規管指引得以遵從。

為避免風險過份集中,對個別客戶或其有關集團之大額風險均被規限於資本基礎的某個百分比。對各行業、國家及地區的貸款亦規管於批准限額內以求組合達致平衡。

3. Financial risk management (Continued)

3.2 Credit risk

The Group's main credit risk is that borrowers or counterparties may default on their payment obligations due to the Group. These obligations arise from the Group's lending and investment activities, and trading of financial or derivative instruments.

The Group has a Group Credit Committee and for each business division a credit committee made up of certain Executive Directors and senior credit officers and chaired by the Chief Executive. Each credit committee has responsibility for formulating and revising credit policies and procedures for that division within the parameters of the Group Risk Policy and regulatory framework. Credit policies and procedures define the credit assessment and approval criteria and guidelines, use of scoring, review and monitoring process and the systems of loan classification and impairment.

The Group manages all types of credit risk on a prudent basis, in accordance with credit approval and review policies, by evaluating the credit-worthiness of different types of customers and counterparties based on assessment of business, financial, market and industry risks applicable to the types of loans, collateral and counterparty dealings including dealing in or use of derivative financial instruments. Credits are extended within the parameters set out in the credit policies, and are approved by different levels of management based upon established guidelines. Credit exposures, limits and asset quality are regularly monitored and controlled by management, credit committees and Group Risk. The Group's internal auditors conduct regular reviews and audits to ensure compliance with credit policies and procedures and regulatory guidelines.

The individual business' credit policies also establish policies and processes for the approval and review of new products and activities, together with details of the facility grading, or credit scoring, processes and provisioning policies.

To avoid concentration of risk, large exposures to individual customers or related groups are limited to a percentage of the capital base, and exposures to industry sectors and countries/regions are managed within approved limits to achieve a balanced portfolio.

3. 財務風險管理(續)

3.2 信貸風險(續)

在適當的時候,為減低信貸風險,本集團會收取抵押品作為信貸額的擔保。為控制因衍生工具淨盤而產生之交易對手信貸風險,本集團限制其衍生工具買賣對手為核准之財務機構,應用市場建立之慣例於信貸支援及抵押品之結算,減低對衍生工具對手之信貸風險。本集團信貸委員會參考個別對手之財務能力及信貸部價,訂立個別財務機構之信貸總額,包括其於衍生工具之市值額度及認可之抵押品類別及其特性和各類貸款與估值比率皆確定於信貸政策內。

所有信貸,無論有否收取抵押品,皆取決於客 戶或交易對手的現金流量情況及其還款能力。

甲) 衍生工具

本集團嚴格控制未平倉衍生合約淨額(即買賣合約的差額)之金額及期限。於任何時間,承受信貸風險之金額按有利於本集團之工具現行公平價值(即公平值為正數之該等資產)為限,此就衍生工具而言僅佔合約之一個少部分,或用以表達未償還工具數量之名義金額。信貸風險作為整體客戶借貸限度之一部分連同潛在市場變動風險一併予以管理。此等工具之信貸風險並不是經常獲得抵押品或其他抵押,惟本集團要求對手方提供保證按金之情況除外。

3. Financial risk management (Continued)

3.2 Credit risk (Continued)

In order to mitigate the credit risk and where appropriate, the Group will obtain collateral to support the credit facility. To control credit risk exposure to counterparty arising from derivative positions, the Group limits its derivative dealings with approved financial institutions, and uses established market practices on credit support and collateral settlement to reduce credit risk exposure to derivative counterparties. Overall credit risk limit for each financial institution counterparty, including valuation limit for derivatives, is approved by the Group Credit Committee with reference to the financial strength and credit rating of each counterparty. The acceptable types of collateral and their characteristics are established within the credit policies, as are the respective margins of finance.

Irrespective of whether collateral is taken, all credit decisions are based upon the customer's or counterparty's cashflow position and ability to repay.

(a) Derivatives

The Group maintains strict control limits on net open derivative positions (i.e., the difference between purchase and sale contracts), by both amount and term. At any one time, the amount subject to credit risk is limited to the current fair value of instruments that are favourable to the Group (i.e., assets where their fair values are positive), which in relation to derivatives is only a small fraction of the contract, or notional values used to express the volume of instruments outstanding. This credit risk exposure is managed as part of the overall lending limits with customers, together with potential exposures from market movements. Collateral or other security is not usually obtained for credit risk exposures on these instruments, except where the Group requires margin deposits from counterparties.

3.2 信貸風險(續)

乙) 淨額結算整體安排

集團與進行大量交易的交易對方訂立淨 額結算整體安排,藉此進一步減少信貸 風險。淨額結算整體安排不一定會導致 資產負債表上資產及債務的對銷,原因 是交易通常按總額結算。然而,有利合 約之相關信貸風險會借著淨額結算整體 安排而降低,於拖欠發生時交易對方所 有借貸將被停止及按淨額結算。

丙) 信貸承諾

該等工具之主要目的乃確保資金足夠供應給客戶在有需要時提取。擔保及備用信用證乃不可撤回的保證,表示本集團將會在客戶未能向第三方履行責任時代出償付。該等工具帶有與貸款相同之信貸風險。跟單及商業信用證為本集團者可承諾代表客戶授權第三方按訂明之條款及條件向本集團提取某一訂明金額之款項,並一般以相關之付運貨物作為抵押,因此較直接借貸之風險為低。

授出信貸承諾為以貸款、擔保書及信用 證等形式授權授出之信貸未動用部分。 有關授出信貸承擔之信貸風險,本集團 所承擔之潛在損失風險相當於未動用承 諾之總額。然而,可能虧損之金額乃低 於未動用承諾,因為授出之信貸大部分 承諾須視乎客戶之特定信貸水平而定。 本集團會控制信貸承諾之到期年期,因 較長年期之承諾比一般較短期承諾存在 較大程度的信貸風險。

反映本集團主要信貸風險之按行業分類之客戶 貸款已列於補充財務資料內之附註1。

3. Financial risk management (Continued)

3.2 Credit risk (Continued)

(b) Master netting arrangements

The Group further restricts its exposure to credit losses by entering into master netting arrangements with counterparties with which it undertakes a significant volume of transactions. Master netting arrangements do not generally result in an offset of balance sheet assets and liabilities, as transactions are usually settled on a gross basis. However, the credit risk associated with favourable contracts is reduced by a master netting arrangement to the extent that if an event of default occurs, all amounts with the counterparty are terminated and settled on a net basis.

(c) Credit-related commitments

The primary purpose of these instruments is to ensure that funds are available to a customer as required. Guarantees and standby letters of credit – which represent irrevocable assurances that the Group will make payments in the event that a customer cannot meet its obligations to third parties – carry the same credit risk as loans. Documentary and commercial letters of credit – which are written undertakings by the Group on behalf of a customer authorising a third party to draw drafts on the Group up to a stipulated amount under specific terms and conditions – are normally collateralised by the underlying shipments of goods to which they relate and therefore carry less risk than a direct borrowing.

Commitments to extend credit represent unused portions of authorisations to extend credit in the form of loans, guarantees or letters of credit. With respect to credit risk on commitments to extend credit, the Group is potentially exposed to loss in an amount equal to the total unused commitments. However, the likely amount of loss is less than the total unused commitments, as most commitments to extend credit are contingent upon customers maintaining specific credit standards. The Group monitors the term to maturity of credit commitments because longer-term commitments generally have a greater degree of credit risk than shorter-term commitments.

An analysis on the breakdown of the Group's principal credit risk, as reflected in the Group's loan portfolio by industry sector is set out in Note 1 of the Supplementary Financial Information.

3.3 市場風險

市場風險乃指由市場上利率及價格變化而引致 對資產、負債及資產負債表外持倉之虧損風 險。本集團之市場風險一般只涉及作買賣交易 並在外匯、債務證券、權益性證券及衍生工具 之持倉。

各類交易之市場風險均在資產及負債管理委員會及財資風險委員會所制定之風險限額及指引內處理。整體風險限額包含利率、外匯及股票價格之不同風險類別的細分限額。風險管理及監察是透過持倉上限、止蝕限額、名義金額及本金金額、敏感限額及運用市場風險數值之各種風險管理方法執行。所有涉及市場風險的實理方法執行。所有涉及市場風險管理方法執行。所有涉及市場風險管理方法執行。所有涉及市場風險管理方法執行。所有涉及市場區於實理及監察、價值評估、檢查及確認交易均由本集團風險部之中的風險管理及監控部分,該部門獨立於財資部。風險管理及監控部透過每日的風險監控過程,比較風險和已時級被限制在可接受水平內。

本集團之內部審核部則會進行定期的獨立檢查 及查核,以確保財資部和有關負責部門遵從市 場風險限額與指引。所有不符合核准限額之情 況均須經適當管理層或資產及負債管理委員會 審查及批准。

3.4 外匯風險

除美元及澳元外,本集團承擔的淨外匯風險十分有限,因為由客戶交易引致的外匯持倉及外匯結存,通常會與其他的客戶交易或市場交易互相抵銷。淨風險持倉,無論是個別貨幣或總體而言,每日皆由本集團財資部控制在已制定的外匯限額內。

若用長期外幣資金融資港元資產,通常會透過 貨幣掉換或遠期外匯合約對沖以減低外匯風 險。

3. Financial risk management (Continued)

3.3 Market risk

Market risk is the risk of losses in assets, liabilities and off-balance sheet positions arising from movements in market rates and prices. Generally, the Group's market risk is associated with its positions in foreign exchange, debt securities, equity securities and derivatives in the trading book.

Market risk exposure for different types of transactions is managed within risk limits and guidelines approved by the Group's Asset and Liabilities Management ("ALCO") and the Treasury Risk Committee. The overall risk limits comprise sub-limits for each of the different risk categories which are, interest rate, foreign exchange and equity prices. Exposures are managed and monitored by a combination of risk management techniques including position limits, stop-loss limits, notional and principal amounts, sensitivity limits and value-at-risk ("VaR") limits. All market risk trading positions are subject to daily mark-to-market valuation, monitored and managed by Treasury. Independent monitoring, valuation, checking and trade confirmation are undertaken by the Risk Management and Control Department ("RMCD"), which as part of Group Risk, is independent of the Treasury Division. RMCD, through the daily risk monitoring process, measures risk exposures against approved limits and initiates specific action to ensure the overall and the individual market risks are managed within an acceptable level.

The Group's Internal Audit function performs regular independent review and testing to ensure compliance with the market risk limits and guidelines by Treasury and other relevant units. All exceptions to approved limits have to be reviewed and sanctioned by the appropriate level of management or ALCO.

3.4 Currency risk

The Group has limited net foreign exchange exposure (except for USD and AUD) as foreign exchange positions and foreign currency balances arising from customer transactions are normally offset against other customer transactions or transactions with the market. The net exposure positions, both by individual currency and in aggregate, are managed by the Treasury of the Group on a daily basis within established foreign exchange limits.

Long-term foreign currency funding, to the extent that this is used to fund Hong Kong dollar assets, is normally hedged using currency swaps or forward exchange agreements to reduce the foreign exchange risk.

3.5 利率風險

本集團承擔的利率風險,主要是源於以浮動利率存款來融資定息貸款及固定收入證券投資。當利率上升或下降時,利率差距及淨利息收入將會因定息貸款或證券所賺取的利息不會改變而受影響。市場利率的波動除影響盈利外,亦會影響集團的資產、負債及資產負債表外持倉的經濟價值,繼而影響集團的資產淨值。

下表概列本集團之利率風險。表內包括本集團 按賬面金額計算之帶息資產及負債,並按重定 息率日或到期日(以較早者為準)分類。

3. Financial risk management (Continued)

3.5 Interest rate risk

The Group's interest rate risk mainly arises from the funding of fixed-rate loans and investments in fixed income securities by floating rate deposits. When interest rates rise or fall, the interest spread and net interest income will be affected as interest income generated by the existing fixed-rate loans or securities will not change. In addition to changes in earnings, the variations in market interest rates will also affect the economic values of the Group's assets, liabilities and off-balance sheet positions, which can, in turn affect the net worth of the Group.

The table below summarises the Group's exposure to interest rate risks. Included in the table are the Group's interest-bearing assets and liabilities at carrying amounts, categorised by the earlier of contractual repricing or maturity dates.

3. Financial risk management (Continued)

3.6 Liquidity risk

The Group manages its liquidity on a prudent basis to ensure that a sufficiently high liquidity ratio relative to the statutory minimum is maintained throughout the year. The average liquidity ratio of the Group during the year was well above the 25% minimum ratio set by the Banking Ordinance.

The Group's ALCO regularly reviews the Group's current loan and deposit mix and changes, funding requirements and projections, and monitors the liquidity ratio and maturity mismatch on an ongoing basis. Appropriate limits on liquidity ratio and maturity mismatch are set and sufficient liquid assets are held to ensure that the Group can meet all short-term funding requirements.

The Group's funding comprises mainly deposits of customers, certificates of deposit and medium term notes issued. The issuance of certificates of deposit and medium term notes helps lengthen the funding maturity and reduce the maturity mismatch. Short-term interbank deposits are taken on a limited basis and the Group is a net lender to the interbank market.

The table on the following page analyses the Group's assets and liabilities into relevant maturity groupings based on the remaining period at balance sheet date to the contractual maturity date.

3. 財務風險管理(續)

3.6 流動資產風險(續)

資產與負債期限及利率的相配和受控的錯配對 集團管理層至為重要。由於進行的業務交易經 常期限不定,且類型也不盡相同,因此銀行做 到完全相配的情況並不普遍。不相配的情況既 可能提高盈利能力,也會增加虧損風險。

資產與負債的到期日相配和以合理的成本替代 到期之計息負債的能力,是評估集團流動資金 狀況及其利率及匯率變動風險的重要因素。

應付擔保和備用信用證項下所需款項的流動資金需求遠少於承諾的金額,因為集團一般不預期第三方會根據該協議全數動用資金。由於很多信貸承諾毋須動用資金即告期滿或終止,因此提供信貸承擔的未償付合同總金額未必等同日後的現金需求。

3.7 金融資產及負債之公平值

於活躍市場買賣之金融工具(例如公開買賣之衍生工具、以及持作買賣用途的證券及可供出售之證券)於結算日之公平值於乃根據市場價格入賬。本集團所持金融資產所用之報價為當時買入價:金融負債之適用報價為當時賣出價。

並非於活躍市場買賣之金融工具(例如場外衍生工具)之公平值乃使用估值技術釐定。本集團使用多種方法,並基於各結算日存在之市況作出假設。長期債項乃使用類同工具之市場價或交易商之報價。釐定其餘金融工具之公平值時則使用其他技術,例如預計貼現現金流量。利率掉期之公平值按估計未來現金流量之現值計算。遠期外匯合約之公平值則採用於結算日期外匯市場遠期匯率釐定。

3. Financial risk management (Continued)

3.6 Liquidity risk (Continued)

The matching and controlled mismatching of the maturities and interest rates of assets and liabilities is fundamental to the management of the Group. It is unusual for banks to be completely matched, as transacted business is often of uncertain term and of different types. An unmatched position potentially enhances profitability, but also increases the risk of losses.

The maturities of assets and liabilities and the ability to replace, at an acceptable cost, interest-bearing liabilities as they mature are important factors in assessing the liquidity of the Group and its exposure to changes in interest rates and exchange rates.

Liquidity requirements to support calls under guarantees and standby letters of credit are considerably less than the amount of the commitment because the Group does not generally expect the third parties to fully draw funds under the agreement. The total outstanding contractual amount of commitments to extend credit does not necessarily represent future cash requirements, as many of these commitments will expire or terminate without being funded.

3.7 Fair values of financial assets and liabilities

The fair value of financial instruments traded in active markets (such as publicly traded derivatives, and trading and available-for-sale securities) is based on quoted market prices at the balance sheet date. The quoted market price used for financial assets held by the Group is the current bid price; the appropriate quoted market price for financial liabilities is the current ask price.

The fair value of financial instruments that are not traded in an active market (for example, over-the counter derivatives) is determined by using valuation techniques. The Group uses a variety of methods and makes assumptions that are based on market conditions existing at each balance sheet date. Quoted market prices or dealer quotes for similar instruments are used for long-term debt. Other techniques, such as estimated discounted cash flows, are used to determine fair value for the remaining financial instruments. The fair value of interest-rate swaps is calculated as the present value of the estimated future cash flows. The fair value of forward foreign exchange contracts is determined using forward exchange market rates at the balance sheet date.

4. Critical accounting estimates, and judgements in applying accounting policies

4.1 Critical accounting estimates and assumptions

The Group makes estimates and assumptions that affect the reported amounts of assets and liabilities within the next financial year. Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

(a) Impairment allowances on loans and advances

The Group reviews its loan portfolios to assess impairment at least on a quarterly basis. In determining whether an impairment loss should be recorded in the income statement, the Group makes judgments as to whether there is any observable data indicating that there is a measurable decrease in the estimated future cash flows from a portfolio of loans before the decrease can be identified with an individual loan in that portfolio. This evidence may include observable data indicating that there has been an adverse change in the payment status of borrowers in a group, or economic conditions that correlate with defaults on assets in the group. Management uses estimates based on historical loss experience for assets with credit risk characteristics and objective evidence of impairment similar to those in the portfolio when estimating its future cash flows of recoverable amounts. The methodology and assumptions used for estimating both the amount and timing of future cash flows are reviewed regularly to reduce any differences between loss estimates and actual loss experience.

(b) Fair value of financial instruments

The fair value of financial instruments that are not quoted in active markets are determined by using valuation techniques. Where valuation techniques (for example, statistical models) are used to determine fair values, they are validated and periodically reviewed by qualified personnel independent of the area that created them. All models are subject to proper validation before they are used, and models are calibrated to ensure that outputs reflect actual data and comparative market prices. To the extent practical, models use only observable data, however areas such as credit risk (both own and counterparty), volatilities and correlations require management to make estimates. Changes in assumptions about these factors could affect reported fair value of financial instruments.

4.1 重要會計估計及假設(續)

丙) 持至到期證券

本集團遵循香港會計準則第39號之指引分類具有固定或可予釐定付款及固定到期日之非衍生金融資產為持至到期證券。此一分類須作出重大判斷。在作出判斷時,本集團評估其持有該等資產至到期之意向及能力。倘本集團未能持有此等投資至到期(不包括特別情況,例如在接近到期時出售少量部分),整個類別則須重新分類為可供出售證券。該等投資將因而按其公平值而非按攤銷成本計量。

丁) 商譽及無形資產之評估

在業務合併倘一些被收購企業之無形資產可明確及公平地被計量。本集團按香港財務報告準則第3號確認被收購企業可分別認明的無形資產。在本集團認明可計量之無形資產和評估有關因素及檢閱其過往之業績及變化支持被收購企之業績及變化支持被收購企之業績及變化支持被收購企之業績及變化支持被收購企之業績不不實值後,本集團針對此無形資產之之業與於資產之之,訂下若無假設。收購之代價與收購資產(包括無形資產)公平值之差異被分類為商譽。於評估無形資產之變更將影響包括於的金額。

繼最初確認商譽及無形資產後,任何有關用於評估無形資產未來可產生之收益假設之重大變動,包括被收購之企業之未來收益現金流量,或貼現率因市場環境及前景的重大改變,將對此資產之場,實值作出調整。倘在某些情況下較其順面價值低,該可能因重大市場環境及前景改變而引致之資產減值需被確認。

4. Critical accounting estimates, and judgements in applying accounting policies (Continued)

4.1 Critical accounting estimates and assumptions (Continued)

(c) Held-to-maturity securities

The Group follows the guidance of HKAS 39 on classifying non-derivative financial assets with fixed or determinable payments and fixed maturity as held-to-maturity. This classification requires significant judgment. In making this judgment, the Group evaluates its intention and ability to hold such investments to maturity. If the Group fails to keep these investments to maturity other than for the specific circumstances – for example, selling an insignificant amount close to maturity – it will be required to reclassify the entire class as available-forsale. The investments would therefore be measured at fair value, not amortised cost.

(d) Goodwill and intangible asset valuation

For business combinations, the Group follows the requirements of HKFRS 3 to recognise separately identifiable intangible asset of the acquired entity at the acquisition date if the fair value of the intangible assets can be measured reliably. Based on the Group's assessment of relevant factors and review of historical performance or behavior supporting the values of the acquired entity and after the Group had identified measurable intangible assets, the Group made certain assumptions in relation to future performance of the intangible assets, the future benefit to be derived from these intangible assets and appropriate discount rates used in arriving at the value of the intangible assets. The difference between cost of combination and the fair value of the net asset acquired including the intangible asset is classified as goodwill. The change in assumptions used in valuing intangible assets might affect the amount of intangible assets and goodwill included in the consolidated balance sheet.

Subsequent to initial recognition of goodwill and intangible assets, any major change in the assumptions in relation to future benefits to be generated from the intangible assets, including future cash flow of benefits to be generated from the acquired entities, or discount rates which could be caused by major changes in market conditions and outlook, could result in adjustments to the carrying values of such assets. In the event that the expected recoverable amounts of goodwill and intangible assets are significantly lower than their carrying values, impairment of such assets would have to be recognised.

4.1 Critical accounting estimates and assumptions (Continued)

(e) Value of long-term life assurance business

Estimates are made in calculating the value of long-term life assurance business.

Key assumptions are summarised below:

- (i) Mortality. An appropriate base table of standard mortality is chosen with adjustment for the Company's own experience.
- (ii) Discount rate. A discount rate of 10.25% being the risk free rate plus an appropriate equity risk premium is applied.
- (iii) Investment return. Investment return assumption ranges from 4.95% to 7% per annum depending on risk characteristics of investments matching the liabilities of different plans.
- (iv) Renewal expenses. Renewal expenses based on actual experience and with reference to future business plan are adopted.

Change in assumptions

Assumptions are reviewed on a regular basis and adjusted with the actual experience and new forecasts.

4.2 採用集團會計政策之重大判斷

投資物業與自用物業之區別

本集團自行釐定物業是否符合列作投資物業的 資格。在作出有關判斷時,本集團須考慮該物 業是否在不受本集團所持其他資產協助下提供 現金流量。業主自用物業所提供之現金流量不 僅來自物業本身,亦因在生產或供應過程使用 其他資產而產生。

本集團若干物業之一部份乃用作賺取租金或資本增值用途,而另一部份則為提供服務或用作行政用途。倘這一部份可個別出售(或根據一項融資租賃分開出租),本集團則就不同部份分開入賬。倘不同部份不能分開出售及該物業用作提供服務或行政用途之部份極小,其將以投資物業入賬。本集團將對確定有關服務用途之部份之重要性而導致相關物業不符合為投資物業作判斷,亦會在作出判斷時,分開考慮每項物業。

4.2 Critical judgments in applying the Group's accounting policies

Distinction between investment properties and owner-occupied properties

The Group determines whether a property qualifies as an investment property. In making its judgment, the Group considers whether the property generates cash flows largely independently of the other assets held by an entity. Owner-occupied properties generate cash flows that are attributable not only to property but also to other assets used in the production or supply process.

Some properties comprise a portion that is held to earn rentals or for capital appreciation and another portion that is held to supply services or for administrative purposes. If these portions can be sold separately (or leased out separately under a finance lease), the Group accounts for the portions separately. If the portions cannot be sold separately, the property is accounted for as investment property only if an insignificant portion is held to supply services or for administrative purposes. Judgment is applied in determining whether ancillary services are so significant that a property does not qualify as investment property. The Group considers each property separately in making its judgment.

以公平值列入損益賬之金融資產(包括持作買賣用途的證券)按發行機構類別分析如下:

22. Trading securities and financial assets at fair value through profit or loss (Continued)

Securities pledged under repurchase agreements with the Hong Kong Monetary Authority are Exchange Fund debt securities with a market value at 31 December 2005 of HK\$4,234,810,000 (2004: HK\$1,765,407,000). Other non-government bonds are also pledged under repurchase agreements with a market value of HK\$257,073,000 (2004: HK\$272,698,000).

Included in financial assets at fair value through profit or loss are primarily structured notes with embedded derivatives. The market risk of the structured notes is substantially offset by deposits from customers designated at fair value through profit or loss.

The Group has adopted HKAS 39 in 2005. Under the prospective adoption requirement of HKAS 39, certain financial assets and financial liabilities were re-designated as financial assets/liabilities at fair value through profit or loss on 1 January 2005. There was no such re-designation in 2004.

Financial assets at fair value through profit or loss (including trading securities) are analysed by categories of issuer as follows:

23. 衍生金融工具

本集團在正常之業務中,進行一系列之衍生工 具交易,包括在利率、外匯及股票市場進行之 遠期、期貨、掉期及期權交易。衍生工具交易 乃因為買賣及對沖目的而進行。本集團使用衍 生工具之目的包括以中介人身份滿足客戶之要 求,管理本集團涉及之風險,及在可接受的規 限內進行買賣產生收入。

(i) 持有或發行作買賣用途的衍生工具

本集團替客戶進行衍生工具合約交易或應客戶 的要求安排合適的衍生工具。本集團亦進行本 身的交易。本集團使用的持作買賣用途的衍生 工具主要為有關利率、外匯、信貸及股票價格 之場外交易的衍生工具。

(ii) 持有或發行作對沖用途的衍生工具

持作對沖用途的衍生工具主要包括用作管理利 率風險的衍生工具或合約。此等工具全為場外 交易的衍生工具。

本集團應用以下衍生工具作對沖與買賣用途:

貨幣遠期指購買外匯及本地貨幣(包括無交收之現貨交易)之承擔。外匯及利率期貨為因應匯率或利率之變動而收取或支付淨額之合同責任,或於未來以指定價格於有系統之金融市場,購買或出售外匯或某些金融工具。當期貨合約以現金及可變現之證券作抵押品,及期貨合約價值之變動每天與交易所交收,其信貸風險則非常低。

23. Derivative financial instruments

In the normal course of business, the Group enters into a variety of derivative transactions including forwards, futures, swaps and options transactions in the interest rate, foreign exchange and equity markets. Derivative transactions are conducted for both trading and hedging purposes. The Group's objectives in using derivative instruments are to meet customers' needs by acting as an intermediary, to manage the Group's exposure to risks and to generate revenues through trading activities within acceptable limits.

(i) Derivatives held or issued for trading purposes

The Group transacts derivative contracts on behalf of customers or to address customer demands in structuring tailored derivatives. The Group also takes proprietary positions for its own accounts. Trading derivative products used by the Group are primarily over-the-counter derivatives transacted based on interest rates, foreign exchange rates, credit spread and the prices of equities.

(ii) Derivatives held or issued for hedging purposes

Derivatives held for hedging purposes primarily consist of derivative instruments or contracts used to manage interest rate risk. All of these are over-the-counter derivatives.

The Group uses the following derivative instruments for both hedging and trading purposes:

Currency forwards represent commitments to purchase foreign and domestic currency, including undelivered spot transactions. Foreign currency and interest rate futures are contractual obligations to receive or pay a net amount based on changes in currency rates or interest rates or to buy or sell foreign currency or a financial instrument on a future date at a specified price, established in an organised financial market. The credit risk is negligible, as futures contracts are collateralised by cash or marketable securities, and changes in the futures contact value are settled daily with the exchange.

23. 衍生金融工具(續)

貨幣掉換及利率掉期為以一列現金流量換取另外一列現金流量之承擔。掉換產生自貨幣或利率(例如:定息交換成浮息)或這些之組合(例如:貨幣交叉盤掉期)之經濟交換。除若干貨幣掉換外,本金並無交換。本集團之信貸風險為倘交易對手未能履行其責任而所需替代該掉換合約可能產生之成本。本集團不時參考合約現時之公平值,合約本金之一部份及市場之流通性,持續監管該風險。本集團應用與借貸業務相同之方法,評估交易對手,以便控制所承受之信貸風險之水平。

外匯及利率期權為賣方授予買方權利(但非責任)於或在某個日子或某一段期間按一個預先釐定的價格,購買(認購期權)或出售(認沽期權)一特定金額之外匯或金融工具。作為承擔外匯及利率風險之回報,賣方向買方收取一些費用。期權可能是於期權市場交易或本集團與客戶協商所訂立。本集團之信貸風險僅限於認購期權之賬面價值,即其公平值。

若干金融工具之名義金額提供一個與確認在資產負債表中之工具相比的基礎,但並不顯示該工具之未來現金流量或其現時之公平值,故並不代表本集團所需面對之信貸或價格風險。該衍生工具因市場利率或匯率波動,而按其條款成為有利(資產)或不利(負債)之工具。持有之衍生工具之合約或名義總額,及其有利或不利之程度,能令金融衍生工具資產及負債之公平總值不時大幅波動。

23. Derivative financial instruments (Continued)

Currency and Interest rate swaps are commitments to exchange one set of cash flows for another. Swaps result in an economic exchange of currencies or interest rates (for example, fixed rate for floating rate) or a combination of all these (i.e., cross-currency interest rate swaps). No exchange of principal takes place, except for certain currency swaps. The Group's credit risk represents the potential cost to replace the swap contracts if counterparties fail to perform their obligation. This risk is monitored on an ongoing basis with reference to the current fair value, a proportion of the notional amount of the contracts and the liquidity of the market. To control the level of credit risk taken, the Group assesses counterparties using the same techniques as for its lending activities.

Foreign currency and interest rate options are contractual agreements under which the seller (writer) grants the purchaser (holder) the right, but not the obligation, either to buy (a call option) or sell (a put option) at or by a set date or during a set period, a specific amount of a foreign currency or a financial instrument at a predetermined price. The seller receives a premium from the purchaser in consideration for the assumption of foreign exchange or interest rate risk. Options may be either exchange-traded or negotiated between the Group and a customer. The Group is exposed to credit risk on purchased options only, and only to the extent of their carrying amount, which is their fair value.

The notional amounts of certain types of financial instruments provide a basis for comparison with instruments recognised on the balance sheet but do not necessarily indicate the amounts of future cash flows involved or the current fair value of the instruments and, therefore, do not indicate the Group's exposure to credit or price risks. The derivative instruments become favourable (assets) or unfavourable (liabilities) as a result of fluctuations in market interest rates or foreign exchange rates relative to their terms. The aggregate contractual or notional amount of derivative financial instruments on hand, the extent to which instruments are favourable or unfavourable, and thus the aggregate fair values of derivative financial assets and liabilities, can fluctuate significantly from time to time.

- (1) 預期波幅是按股價於計算日之前過往一年的 波幅而計算。並假設過往大新銀行集團與大 新金融股價之波幅,與上表用於認股權之使 用期之預計波幅,並無重大的差異。二零零 四年之大新銀行集團與大新金融股價之波幅 按過往九十日之波幅計算,此因大新銀行集 團乃於二零零四年六月上市,故按大新金融 過往一年的波幅計算二零零四年之波幅被視 為不治當。
- (2) 無風險利率是根據有關年期之香港外匯基金 票據之收益率。
- (3) 預期股息率乃按過往股息而訂。

Notes:

- 1. Expected volatility is determined by calculating the historical volatility of the share price during the one year period immediately preceding the measurement date and is based on the assumption that there is no material difference between the expected volatility over the whole life of the options and the historical volatility of the shares in DSBG and DSFH set out above. 90 days historical volatility was used in 2004 for both DSBG and DSFH shares since DSBG was newly listed in June 2004 and using one year DSFH's share price volatility is not considered appropriate for 2004.
- Risk free rate is the Hong Kong Exchange Fund Notes yield of relevant time to maturity.
- 3. Expected dividend rates are based on historical dividends.

收購恰泰富財務(香港)有限公司,澳門商業銀行有限公司,澳門保險有限公司及澳門人壽保險有限公司之綜合賬目及會計方法,包括因此收購而產生之商譽及無形資產的評估,乃按香港財務報告準則第3號「業務合併」所許可之暫時性基礎而確定。有關收購公司之無形資產之若干重要假設將可於二零零五年初步被確認後,進一步調整。本集團預料此調整對二零零五年業務合併之初步會計之處理並不重大,亦將於二零零六年六月三十日前完成。

The accounting and consolidation of the acquisition of Pacific Finance (Hong Kong) Limited, Banco Commercial de Macau, S.A., Macau Insurance Company Limited and Macau Life Insurance Company Limited including the valuation of goodwill and intangible assets arising from these acquisitions, are determined on a provisional basis as permitted by HKFRS 3 "Business Combinations". A number of key assumptions in respect of the valuation of intangible assets in the acquired companies could be further adjusted after their initial recognition in 2005. It is currently expected that adjustments to the initial accounting for the 2005 business combinations are not material and will be completed by 30 June 2006.
