

# Corporate Profile

V.S. International Group Limited (“Company”) and its subsidiaries (collectively referred to as the “Group”) are principally engaged in the manufacturing and sales of plastic moulded products and parts, assembling of electronic products and moulds design and fabrication. The Group commenced its business in June 1997 in Shenzhen, the People’s Republic of China (“PRC”) by way of processing arrangements. In December 1998, the Group started its assembling of electronic products business. With the expertise in plastic and injection moulding business, the Group had also ventured into the design and development of moulds. Since then, the Group gradually evolved from a supplier of plastic moulded products and parts to a provider of integrated manufacturing solutions to its customers.

The Group had been aggressively strengthening its competitive advantage by expanding scope of services and enhancing its technical know how through formation of joint ventures with established corporations. The Group and its associates currently operate production facilities in three cities in the PRC, namely Zhuhai, Qingdao and Shenzhen, as well as Hanoi, Vietnam. The Group would continue promoting its integrated manufacturing solutions to its customers and is confident in achieving its ultimate goal of becoming a leading integrated electronics manufacturing service provider in the PRC.
