

## About Titan Petrochemicals Group

Titan Petrochemicals Group Limited (Titan) is a unique, fully integrated downstream oil logistics company providing end-to-end sourcing, transportation, storage and wholesale distribution on a single platform. Through this, we help oil companies and oil users such as power utilities make their supply chain more efficient and their businesses more competitive. Titan currently operates in China, Hong Kong, Singapore and Malaysia.

### ANNUAL REPORT THEME

Each of the different coloured drops in our integrated oil services circle represents one of Titan's businesses, pointing outwards in expansion mode.

Each business complements and integrates with the others, providing our customers with a seamless approach to downstream oil services.

Titan has successfully established this unique business model in Singapore, and this motif will appear throughout this Report to highlight the Group's efforts to build integrated oil logistics capabilities in China.
