Unless with the approval of the shareholders in general meeting, the maximum number of shares issued and to be issued upon the exercise of the options granted to each participant (including both exercised and outstanding options) under the Share Option Scheme and any other share option schemes of the Company in any twelve – month period shall not exceed 1 per cent. of the shares in issue.

An option must be exercised in accordance with the terms of the Share Option Scheme at any time during a period to be determined and notified by the Directors to each grantee, which period may commence from the date of the offer for the grant of the option is made, but shall end in any event not later than 10 years from the date on which the offer for the grant of the option is made, subject to the provisions for early termination thereof. The amount payable on acceptance of the grant of an option is HK\$1.

Unless otherwise determined by the Directors and stated in the offer for the grant of options to a grantee, there is neither any performance target that needs to be achieved by a grantee before an option can be exercised nor any minimum period for which an option must be held before it can be exercised.

The subscription price in respect of each share issued under the Share Option Scheme shall be a price solely determined by the Directors but shall not be less than the highest of:

	-	13,500,000	-	-	13,500,000	

Notes:

- (1) The share options were granted on 27 September 2006 with an exercisable period of two years from 27 September 2006 to 26 September 2008. There are no vesting periods for these share options. The closing market price per share at the date preceding the date on which the share options were granted was HK\$1.13.
- (2) Subsequent to 31 December 2006, an aggregate of 2,499,000 share options were exercised by certain employees. The weighted average closing market price per share immediately before the date on which the share options were exercised was HK\$3.00.

The value of the options granted during the year is HK\$1,614,000, based on the Black-Scholes valuation model. The significant inputs into the model were share price of HK\$1.10 at the grant date, exercise price shown above, standard deviation of expected share price returns of 20.50%, expected life of options of 2 years, expected dividend paid out rate of 3.18% and annual risk-free interest rate of 3.70%. The volatility measured as the standard deviation of expected share price returns is based on statistical analysis of daily share prices over one year prior to the grant date. The Black-Scholes model is developed to estimate the fair value of European share options. The fair values calculated are inherently subjective and uncertain due to the assumptions made and the limitations of the model used. The value of an option varies with different variables of certain subjective assumptions. Any change in variables so adopted may materially affect the estimation of the fair value of an option.
