大新金融集團有限公司(「本公司」)與其附屬公司(統稱「本集團」)在香港,澳門及中國提供銀行、保險、金融及其他相關服務。

## (二) 編制基準及會計政策

自二零零七年一月一日起,持作買賣用途的 資產及負債、指定以公平值計量且其變動計 入損益的金融工具,以及非持作買賣用途之 利率衍生工具,其產生之利息收入或支出 呈列於「利息收入」及「利息支出」項下。 往會計期間,此等收入或支出呈列於「淨買賣 收入/(虧損)」項下。比較數字已予以重新呈 列以符合本期間之呈列方式。修訂分類之原 因主要為抵銷指定以公平值計量且其變動計 入損益之金融負債利息支出和用以對沖該等 負債之利率衍生工具所產生的利息收入及支 出。

除上述修訂外,編製二零零七年中期財務報表所採用之會計政策和計算方法與本集團截至二零零六年十二月三十一日止年度已審核之年度財務報表所採用及所述者一致。本集團並未提早採納香港財務報告準則第7號《金融工具:披露》及香港會計準則第1號(修訂)《財務報表呈列(資本披露)》編製其中期財務報表。本集團已確定此等新準則將會對公平值計量及風險管理有更多性質上及數量上的披露,惟不會對本集團之營運或財務狀況造成任何影響。

除另有註明外,此中期簡明綜合財務報表概 以港幣千元位列示。

#### Note:

#### 1. General information

Dah Sing Financial Holdings Limited (the "Company") and its subsidiaries (together the "Group") provides banking, insurance, financial and other related services in Hong Kong, Macau, and the People's Republic of China.

#### 2. Basis of preparation and accounting policies

With effect from 1 January 2007, interest income or expense arising from trading assets and liabilities, financial instruments designated at fair value through profit or loss, and interest rate derivatives not held for trading purposes are reported under "Interest income" and "Interest expense" instead of "Net trading income/(loss)" in the previous reporting periods. Comparative figures have been restated to conform with the current period's presentation. This revised classification has been made mainly to match interest expense on financial liabilities designated at fair value through profit or loss with the interest income and expense of the interest rate derivatives entered to hedge these liabilities.

With the exception of the restatement described above, the accounting policies and methods of computation used in the preparation of the 2007 interim financial statements are consistent with those used and described in the Group's annual audited financial statements for the year ended 31 December 2006. The Group has not early adopted Hong Kong Financial Reporting Standard No. 7 "Financial Instruments: Disclosure" and the Amendment to Hong Kong Accounting Standard No. 1 "Presentation of Financial Statements – Capital disclosures" in its 2007 interim financial statements. The Group has assessed that the adoption of these new standards will result in more qualitative and quantitative disclosures primarily related to fair value measurement and risk management but they will have no effect on the Group's results of operations or financial position.

The interim condensed consolidated financial statements are presented in thousands of Hong Kong dollars (HK\$'000), unless otherwise stated.

The Notes will mature on 3 June 2016 with an optional redemption date falling on 3 June 2011. Interest rate for the Notes is set on a quarterly basis based on 3-month LIBOR plus 75 basis points from the issue date to the optional redemption date. Thereafter, if the Notes are not redeemed, the interest rate will reset and the Notes will bear interest at 3-month LIBOR plus 100 basis points. DSB may, subject to receiving the prior approval of the HKMA, redeem the Notes in whole but not in part, at par either on the optional redemption date or for taxation reasons on interest payment date.
- This represents US\$200,000,000 Perpetual Subordinated Fixed Rate Notes qualifying as upper Tier 2 capital of DSB issued on 16 February 2007 (the "Notes"), which are listed on the Singapore Stock Exchange Securities Trading Limited. The Notes carry an optional redemption date falling on 17 February 2017. Interest at 6.253% p.a. is payable semi annually from the issue date to the optional redemption date. Thereafter, if the Notes are not redeemed, the interest rate will reset and the Notes will bear interest at 3-month LIBOR plus 190 basis points. DSB may, subject to receiving the prior approval of the HKMA, redeem the Notes in whole but not in part, at par either on the optional redemption date or for taxation reasons on interest payment date. An interest rate swap contract to swap the fixed rate payment liability of the Notes to floating interest rate based on LIBOR has been entered into with an international bank.

The change in the fair value of subordinated notes carried at fair value under fair value hedge, and subordinated notes designated at fair value through profit or loss not attributable to changes in interest rate is minimal. The amount that the Group would be contractually required to pay at maturity to the holders of these subordinated notes is HK\$77 million (31 December 2006: HK\$20 million) higher than the above carrying amount.

#### (b) Group risk function (Continued)

The Group's risk management expertise continues to advance the overall quality of the Group's lending portfolios, and enables the Group to meet the changing regulatory requirements and enter into credit exposures with the confidence that it understands the associated risks and rewards.

The Group is continuing to evolve its risk management capabilities under the aegis of the Head of Group Risk, increasing the focus of its risk strategy on risk and reward and returns on capital. The Group uses a range of risk measurement and analytical tools in its management of the various risks which it faces in its day-to-day businesses and these are continually being enhanced and upgraded to reflect the everchanging business needs and the requirements of the regulators. The Risk Management and Control function is part of Group Risk and reports directly to the Head of Group Risk.

#### (c) Business division credit committees

Each of the operating divisions of the Group has its own credit or risk committee responsible for approving and recommending policies, limits and mandates for risk control within their respective business areas. This is consistent with the Group's approach of devolving responsibility for risk management to the individual business areas under the aegis of the Group Risk function. As such, each business credit risk function reports to both Group Risk and the business area which it supports.

#### (d) Strategy in using financial instruments

The Group accepts deposits from customers at both fixed and floating rates, and for various periods, and seeks to earn positive interest margins by investing these funds in high-quality assets. The Group seeks to increase these margins by consolidating short-term funds and lending for longer periods at higher rates, while maintaining sufficient liquidity to meet all claims that might fall due.

The Group also seeks to raise its interest margins through lending to commercial and retail borrowers with a range of credit standing by charging customers appropriate lending rates and fees, taking into consideration credit risk and market conditions. Such exposures involve not just on-balance sheet loans and advances, as the Group also enters into guarantees and other commitments such as letters of credit and performance, and other bonds.

#### (d) Strategy in using financial instruments (Continued)

The Group also trades in financial instruments where it takes positions in exchange-traded and over-the-counter instruments, including derivatives, to take advantage of short-term market movements in equities and bonds and in currency, interest rate and commodity prices. The Board places trading limits on the level of exposure that can be taken in relation to market positions. Apart from specific hedging arrangements, foreign exchange and interest rate exposures are normally offset by entering into counterbalancing positions (including transactions with customers or market counterparties), or by the use of derivatives, thereby controlling the variability in the net cash amounts required to liquidate market positions.

The Group also uses interest rate swap and other interest rate derivatives to mitigate interest rate risk arising from changes in interest rates that will result in decrease in the fair value of fixed rate assets or increase in the fair value of fixed rate term liabilities. Certain of these financial instruments are designated as fair value hedges, and the terms of hedge including hedged item, amount, interest rates, hedge period and purpose are determined and documented at the inception of each fair value hedge. Hedge effectiveness is assessed at inception on a prospective basis and is reassessed, on an ongoing basis, based on actual experience and valuation. Fair value hedge relationships that do not meet the effectiveness test requirement of hedge accounting are discontinued with effect from the date of ineffectiveness of the fair value hedge.

#### (e) Credit risk

The Group's main credit risk is that borrowers or counterparties may default on their payment obligations due to the Group. These obligations arise from the Group's lending and investment activities, and trading of financial instruments (including derivatives).

The Group has a Group Credit Committee and for each business division a credit committee made up of certain Executive Directors and senior credit officers and chaired by the Chief Executive. Each credit committee has the responsibility for formulating and revising credit policies and procedures for that division within the parameters of the Group Risk Policy and regulatory framework. Credit policies and procedures define the credit assessment and approval criteria and guidelines, use of scoring, review and monitoring process and the systems of loan classification and impairment.

#### (e) Credit risk (Continued)

The Group manages all types of credit risk on a prudent basis, in accordance with the credit approval and review policies, by evaluating the credit-worthiness of different types of customers and counterparties based on assessment of business, financial, market and industry risks applicable to the types of loans, collateral and counterparty dealings including dealing in or use of derivative financial instruments. Credits are extended within the parameters set out in the credit policies and are approved by different levels of management based upon established guidelines. Credit exposures, limits and asset quality are regularly monitored and controlled by management, credit committees and Group Risk. The Group's internal auditors conduct regular reviews and audits to ensure compliance with credit policies and procedures and regulatory quidelines.

The individual business' credit policies also establish policies and processes for the approval and review of new products and activities, together with details of the facility grading, or credit scoring, processes and impairment policies.

To avoid concentration of risk, large exposures to individual customers or related groups are limited to a percentage of the capital base, and exposures to industry sectors and countries/regions are managed within approved limits to achieve a balanced portfolio.

In order to mitigate the credit risk and where appropriate, the Group will obtain collateral to support the credit facility. To control credit risk exposure to counterparty arising from derivative positions, the Group limits its derivative dealings with approved financial institutions, and uses established market practices on credit support and collateral settlement to reduce credit risk exposure to derivative counterparties. Overall credit risk limit for each financial institution counterparty, including valuation limit for derivatives, is approved by the Group Credit Committee with reference to the financial strength and credit rating of each counterparty. The acceptable types of collateral and their characteristics are established within the credit policies, as are the respective margins of finance.

Irrespective of whether collateral is taken, all credit decisions are based upon the customer's or counterparty's cashflow position and ability to repay.

### (e)(i) Derivatives

The Group maintains strict control limits on net open derivative positions (i.e., the difference between purchase and sale contracts), by both amount and term. At any one time, the amount subject to credit risk is limited to the current fair value of instruments that are favourable to the Group (i.e., assets where their fair values are positive), which in relation to derivatives is only a small fraction of the contract, or notional values used to express the volume of instruments outstanding. This credit risk exposure is managed as part of the overall lending limits with customers, together with potential exposures from market movements. Collateral or other security is not usually obtained for credit risk exposures on these instruments, except where the Group requires margin deposits from counterparties.

#### (e)(ii) Master netting arrangements

The Group further restricts its exposure to credit losses by entering into master netting arrangements with counterparties with which it undertakes a significant volume of transactions. Master netting arrangements do not generally result in an offset of balance sheet assets and liabilities, as transactions are usually settled on a gross basis. However, the credit risk associated with favourable contracts is reduced by a master netting arrangement to the extent that if an event of default occurs, all amounts with the counterparty are terminated and settled on a net basis.

#### (e)(iii) Credit-related commitments

The primary purpose of these instruments is to ensure that funds are available to a customer as required. Guarantees and standby letters of credit – which represent irrevocable assurances that the Group will make payments in the event that a customer cannot meet its obligations to third parties – carry the same credit risk as loans. Documentary and commercial letters of credit – which are written undertakings by the Group on behalf of a customer authorising a third party to draw drafts on the Group up to a stipulated amount under specific terms and conditions – are normally collateralised by the underlying shipments of goods to which they relate and therefore carry less risk than a direct borrowing.

#### (e) Credit risk (Continued)

(e)(iii) Credit-related commitments (Continued)

Commitments to extend credit represent unused portions of authorisations to extend credit in the form of loans, guarantees or letters of credit. With respect to credit risk on commitments to extend credit, the Group is potentially exposed to loss in an amount equal to the total unused commitments. However, the likely amount of loss is less than the total unused commitments, as most commitments to extend credit are contingent upon customers maintaining specific credit standards. The Group monitors the term to maturity of credit commitments because longer-term commitments generally have a greater degree of credit risk than shorter-term commitments.

An analysis on the breakdown of the Group's principal credit risk, as reflected in the Group's loan portfolio by industry sector, is set out in Note 16.

#### (f) Market risk

Market risk is the risk of losses in assets, liabilities and offbalance sheet positions arising from movements in market rates and prices. Generally, the Group's market risk is associated with its positions in foreign exchange, debt securities, equity securities and derivatives in the trading book.

Market risk exposure for different types of transactions is managed within risk limits and guidelines approved by the Board, Executive Committee ("EXCO") and Treasury Risk Committee ("TRC"). Risk limits are set by products and by different risk types. Limits comprise a combination of notional, stop loss, sensitivity and value-at-risk ("VaR") controls. All trading positions are subject to daily mark-to-market valuation. Risk Management and Control Department ("RMCD") in Group Risk Division, as an independent risk management and control unit, identifies, measures, monitors and controls the risk exposures against approved limits and initiates specific action to ensure the overall and the individual market risks are managed within an acceptable level. Any exceptions have to be reviewed and sanctioned by the appropriate level of management of TRC or by EXCO.

The Group's Internal Audit function performs regular independent review and testing to ensure compliance with the market risk policies and procedures by Treasury, RMCD and other relevant units.

Banco Comercial de Macau, S.A. ("BCM"), a subsidiary of the Company, runs its treasury functions locally under its own set of limits and policies and within the overall market risk limits set by Dah Sing Bank, Limited ("DSB"). RMCD of DSB oversees and controls the market risk arising from BCM's treasury operation.

本集團承擔的利率風險,主要是源於 以浮動利率存款來融資定息貸款及固 定收入證券投資。當利率上升或下降 時,利率差距及淨利息收入將會因定 息貸款或證券所賺取的利息不會改變 而受影響。市場利率的波動除影響盈 利外,亦會影響集團的資產、負債表 資產負債表外持倉的經濟價值,繼而 影響集團的資產淨值。

#### (i) 流動資產風險

本集團審慎地管理流動資產以確保流動資金比率於是年度內均能保持高於法定最低要求的流動資金比率。本集團內之銀行附屬公司期內之平均流動資金比率遠高於香港銀行業條例最低要求的百分之二十五。

本集團的資產及負債管理委員會定期 檢討現行貸款和存款的組合及變化、 融資需求及預測、對到期錯配狀況及 流動資金比率作出持續監控。本集團 亦對流動資金比率及到期錯配定下適 當的限額並持有充足的流動資產以確 保能應付所有短期資金需求。

本集團的資金主要包括客戶存款、已 發行的存款證及中期票據。發行存款 證及中期票據有助延長融資年期及減 少到期錯配,在少數情況下,亦會吸 納短期銀行同業存款。本集團乃銀行 同業市場的淨放款人。

按結算日有關合約到期日之剩餘時間 分類對本集團資產及負債之分析詳列 於附註二十九。

#### A. Banking Group (Continued)

#### (g) Currency risk

The Group has limited net foreign exchange exposure (except for USD) as foreign exchange positions and foreign currency balances arising from customer transactions are normally matched against other customer transactions or transactions with the market. The net exposure positions, both by individual currency and in aggregate, are managed by the Treasury of the Group on a daily basis within established foreign exchange limits.

Long-term foreign currency funding, to the extent that this is used to fund Hong Kong dollar assets, is normally matched using foreign exchange forward contracts to reduce exposure to foreign exchange risk.

#### (h) Interest rate risk

The Group's interest rate risk mainly arises from the funding of fixed-rate loans and investments in fixed income securities by floating rate deposits. When interest rates rise or fall, the interest spread and net interest income will be affected as interest income generated by the existing fixed-rate loans or securities will not change. In addition to changes in earnings, the variations in market interest rates will also affect the economic values of the Group's assets, liabilities and off-balance sheet positions, which can, in turn affect the net worth of the Group.

#### (i) Liquidity risk

The Group manages its liquidity on a prudent basis to ensure that a sufficiently high liquidity ratio relative to the statutory minimum is maintained throughout the year. The average liquidity ratio of the banking subsidiaries of the Group during the period was well above the 25% minimum ratio set by the Hong Kong Banking Ordinance.

The Group's Asset and Liability Management Committee regularly reviews the Group's current loan and deposit mix and changes, funding requirements and projections, and monitors the liquidity ratio and maturity mismatch on an ongoing basis. Appropriate limits on liquidity ratio and maturity mismatch are set and sufficient liquid assets are held to ensure that the Group can meet all short-term funding requirements.

The Group's funding comprises mainly deposits of customers, certificates of deposit and medium term notes issued. The issuance of certificates of deposit and medium term notes helps lengthen the funding maturity and reduce the maturity mismatch. Short-term interbank deposits are taken on a limited basis and the Group is a net lender to the interbank market.

Details of the Group's assets and liabilities analysed into relevant maturity groupings based on the remaining period at balance sheet date to the contractual maturity date are shown in Note 29.

#### (甲) 集團銀行系(續)

#### (i) 流動資產風險 (續)

資產與負債期限及利率的相配和受控的錯配對集團管理層十分重要。由於進行的業務交易經常有不確定的期限及不同類別,對銀行而言,完全相配的情況並不普遍。不相配的持倉既可能提高盈利能力,但也會增加虧損風險。

資產與負債的到期日及以合理的成本 替代到期之計息負債的能力,是評估 集團流動資金及其因利率及匯率變動 所承擔風險的重要因素。

因集團一般不預期第三方會根據有關協議全數動用資金,應付擔保和備用信用證項下所需款項的流動資金需求遠少於承諾的金額。由於很多信貸承諾於到期或終止日毋須動用資金,因此用於提供信貸之信貸承擔的未償付合約總金額未必等同日後的現金需求。

# (j) 營運風險

本集團在各業務之部門層級及管理營 運風險,並由營運處負責架構協調, 然後向高級管理層匯報。自二零零三 年起,本集團展開營運風險事件匯報 及記錄營運損失數據。

本集團已成立專責營運風險管理之功 能,負責推動和執行本集團之營運風 險管理項目,目的為改善營運水平、 內部監控程序和符合巴塞爾協議II之 規定。該功能負責推廣營運風險控制 文化,以及在各部門執行及遵守營運 風險管理政策及規定上提供支援。

# (k) 聲譽風險

聲譽風險是指由於本集團之商業慣例、營運誤差或營運表現之負面宣傳可能帶來之風險。這些負面因素不論是否屬實,均可能令客戶產生憂慮或負面看法,削弱客戶基礎及市場佔有率或導致龐大耗費之訴訟或減少收入。

本集團透過維持以下一系列措施管理 聲譽風險:以強調內部監控、風險管 理和合規的重要性來提升企業管治風險 管理層監察達至高水平,以及維持有 效政策及程序;提供適當之員工培 及監督;妥善處理客戶之投訴或不 滿;以及沿用穩當之商業慣例。本集 團就所有範疇設定標準並制訂政策及 程序,以減低聲譽風險或受損之機 會。

#### 33. Risk management (Continued)

#### A. Banking Group (Continued)

#### (i) Liquidity risk (Continued)

The matching and controlled mismatching of the maturities and interest rates of assets and liabilities are fundamental to the management of the Group. It is unusual for banks to be completely matched, as businesses transacted are often of uncertain term and of different types. An unmatched position potentially enhances profitability, but also increases the risk of losses

The maturities of assets and liabilities and the ability to replace, at an acceptable cost, interest-bearing liabilities as they mature are important factors in assessing the liquidity of the Group and its exposure to changes in interest rates and exchange rates.

Liquidity requirements to support calls under guarantees and standby letters of credit are considerably less than the amount of the commitment because the Group does not generally expect the third parties to fully draw funds under the agreement. The total outstanding contractual amount of commitments to extend credit does not necessarily represent future cash requirements, as many of these commitments will expire or terminate without being funded.

#### (j) Operational risk

The Group manages operational risk at department level under respective businesses within a structure coordinated by the Operations Division with reporting to senior management. Since 2003, the Group has started the operational risk incident reporting and tracking of operational loss data.

A dedicated operational risk management function has been established to drive and implement the operational risk project of the Group with the objective to improve operations quality, internal control process and to meet the Basel II requirements. The function is responsible for promoting the operational risk control culture, and providing support to various departments in implementing and complying with the operational risk management policy and requirements.

# (k) Reputation risk

Reputation risk is the risk arising from the potential that negative publicity regarding the Group's business practices, operational errors or operating performance, whether true or not, could cause customer concerns or negative view, decline in the customer base or market share, or lead to costly litigation or revenue reductions.

The Group manages reputation risk through upholding a high standard of corporate governance and management oversight, maintenance of effective policies and procedures with emphasis on internal control, risk management and compliance; proper staff training and supervision; proper handling of customer complaints or dissatisfaction; and adherence to sound business practices. Standards are set and policies and procedures are established by the Group in all areas, which operate to reduce vulnerability to reputation risk.

#### (l) 策略性風險

策略性風險泛指由於差劣之策略性決定、不良之財務表現、施行失當之策略以及對於市場轉變欠缺有效應變而可能對集團財務及市場狀況有即時或日後重大負面影響之企業風險。

董事會在高級管理層之協助下直接負責管理策略性風險。董事制訂本集團之策略性目標以及主要方針,確保制訂業務策略以實踐該等目標,監督實際發展及執行以確保其與本集團之策略性目標一致,並檢討業務表現,與協能資源以達成本集團之目標,以及授權管理層人員採取適當措施以減低風險。

#### (m) 執行巴塞爾II資本協議

經修訂之資本充足框架(即巴塞爾協議II)於二零零七年一月起對所有在香港之本地註冊財務機構生效。香港金融管理局於二零零六年底頒佈最終版本之《銀行業資本規則》及《銀行業披露規則》以實施巴塞爾協議II。

巴塞爾協議II之架構環繞三大支柱。 第一支柱除修訂了巴塞爾協議I對信貸風險及市場風險之處理方法外,並 , 如人了銀行對營運風險之最低資完善 , 的一支柱要求銀險(包括該資元 , 按照其風險)之至在第一支柱之風險)之全 。 , 及監察人員應當對此程序進行管理 度。第三支柱透過要求銀行對理 度。第三支柱透過要求 題合 數 類 , 以補助第一支柱及第二支柱。

#### (I) Strategic risk

Strategic risk generally refers to the corporate risk that may bring significant immediate or future negative impact on the financial and market positions of the Group because of poor strategic decisions, unacceptable financial performance, improper implementation of strategies and lack of effective response to the market changes.

The Board of Directors, assisted by senior management, is directly responsible for the management of strategic risk. Directors formulate the strategic goals and key direction of the Group, ensure business strategies are developed to achieve these goals, oversee the strategic development and implementation to secure compatibility with the Group's strategic goals, review business performance, deploy proper resources to achieve the Group's objectives, and authorise management to take appropriate actions to mitigate risks.

#### (m) Implementation of the Basel II Capital Accord

The revised capital adequacy framework known as Basel II has come into force for all locally incorporated authorized institutions in Hong Kong from January 2007. To implement Basel II, the Hong Kong Monetary Authority published the final Banking (Capital) Rules and Banking (Disclosure) Rules at the end of 2006.

Basel II is structured around three "pillars". Pillar 1 sets out the minimum capital requirements for a bank's operational risk, in addition to revising the "Basel I" treatment of credit risk and market risk. Pillar 2 requires that banks should have in place sound internal processes to assess the adequacy of their capital, based on a thorough assessment of their risks including those risks not covered under Pillar 1, and that supervisors should carry out supervisory review of this process. Pillar 3 complements Pillar 1 and Pillar 2 through enhanced market transparency and market discipline by requiring banks to make public disclosure of information on their risk profiles, capital adequacy and risk management.

Starting January 2007, Dah Sing Bank and MEVAS Bank adopt the standardised approach for credit risk and market risk, and the basic indicator approach for operational risk. These are the default approaches as specified in the Banking (Capital) Rules. Accordingly, the Group has overhauled its systems and controls in order to meet the standards required for these approaches. As a step forward, the Group is preparing for the use of the more advanced approach i.e. foundation internal ratings-based ("FIRB") approach for the calculation of credit risk. This will enable the Group to enhance significantly its risk management capabilities in identifying, assessing, monitoring, controlling and mitigating risks. The Group also targets to advance to the standardised approach in calculating its operational risk.

#### (m) Implementation of the Basel II Capital Accord (Continued)

A dedicated Basel II team has been set up with the responsibility to provide an overall direction to and co-ordinate with relevant business divisions and support units in revamping the infrastructure and operations for meeting the compliance imperative. The team will continue to expand and upgrade its capabilities in the coming years to meet the requirements of Pillar 2 and Pillar 3, and to build the foundation for migration to the FIRB approach.

#### (n) Fair value of financial assets and liabilities

The fair value of financial instruments traded in active markets (such as publicly traded derivatives, trading and available-forsale securities) is based on quoted market prices at the balance sheet date. The quoted market price used for financial assets held by the Group is the current bid price; the appropriate quoted market price for financial liabilities is the current ask price.

The fair value of financial instruments that are not traded in an active market (for example, over-the counter derivatives) is determined by using valuation techniques. The Group uses a variety of methods and makes assumptions that are based on market conditions existing at each balance sheet date. Quoted market prices or dealer quotes for similar instruments are used for long-term debt. Other techniques, such as estimated discounted cash flows, are used to determine fair value for the remaining financial instruments. The fair value of interestrate swaps is calculated as the present value of the estimated future cash flows. The fair value of forward foreign exchange contracts is determined using forward exchange market rates at the balance sheet date.

The fair value of financial assets and financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the Group for similar financial instruments.

# (o) Fiduciary activities

The Group provides custody, trustee, wealth management and advisory services to third parties, which involve the Group making allocation and purchase and sale decisions in relation to a variety of financial instruments. Those assets that are held in a fiduciary capacity are not included in the Group's financial statements. These services could give rise to the risk that the Group will be accused of mal-administration.

#### B. Insurance Group

### CORPORATE AND BUSINESS OVERVIEW

#### **HIGHLIGHTS**

Against a backdrop of a generally positive operating environment, growing economies in Hong Kong and Macau, extremely robust economic growth in the Mainland, and driven by a higher operating income (net of insurance claims) rising from HK\$1.42 billion in the same period last year to HK\$1.65 billion in the period, our profit attributable to shareholders increased by 23% from HK\$539 million in the first half of 2006 (excluding the exceptional gain on disposal of shares in Dah Sing Banking Group ("DSBG")) to HK\$664 million in the first six months of 2007. Earnings per share increased by 24% to HK\$2.66 if the exceptional gain on the disposal of DSBG shares in 2006 was excluded in calculating the normalised earnings per share for the first half of 2006. The Board of Directors has declared an interim dividend of HK\$0.75 per share.

Our key businesses all performed well during the period, with the contribution from our banking business increasing by 9% to HK\$616 million, and our insurance business reporting extremely strong growth in earnings of 57% to HK\$151 million for the period.

Loan growth was particularly strong, with an increase of 22% year on year, and 13% since 31 December 2006, driven mainly by our commercial lending business. Deposit growth was also significant, with an increase of 16% year on year, and 5% since the end of 2006.

Non-interest income grew strongly by 41% to HK\$560 million, boosted by a particularly strong performance from our insurance business as well as good performance from our banking business, particularly related to wealth management businesses.

Operating expenses increased by around 15% year on year, reflecting the costs of the expansion of our businesses, in the Hong Kong, Macau and Mainland markets.

During the period under review, we completed our acquisition of 17% of Chongqing Commercial Bank, and contracted to acquire a further 3%, subject to regulatory approval, to take our total investment to 20%. Dah Sing Bank also issued US\$200 million perpetual subordinated debt callable in 2017 qualifying as Upper Tier 2 capital to strengthen its capital base and to prepare for the further expansion of our banking business, which assisted our banking group to achieve a capital adequacy ratio of 17.1% at the mid-year.

# 業務及財務回顧

本集團銀行業務強勁的貸款增長主要為物業借貸、銀團貸款、設備及汽車融資及證券買賣融資。相較二零零六年同期,雖然本集團零售借貸業務增長迅速,確令人鼓舞,惟貸款增長迅速,確令人鼓舞,惟貸款增長主要由商業借貸業務所帶動。較之二零零七年上半年淨息差輕微下降至百分之二點二七,主要由於最優惠利率與香港銀行同業拆息之息款增長足以抵銷微降之息差,令本集團強勁之貸款增長足以抵銷微降之息差,令本集團強勁之貸款增長足以抵銷微降之息差,令本集團於期間之淨利息收入錄得百分之六之增長,至十億八千六百萬港元。

本集團澳門銀行業務表現尤其理想,溢利按年增長百分之二十五,主要由穩健之貸款增長及 穩定之淨息差所帶動。

相較於二零零六年上半年,淨收費及佣金收入 上升百分之十八點九,主要源自強勁之財富管 理業務收入。受惠於暢旺之投資環境及高企之 證券成交量,本集團之財富管理業務從其投資 服務與增加之單位信託銷售,而令經紀收費及 佣金收入得以提高。

由於壽險業務之股本投資收益激增,帶動證券 買賣收入冒升,令期內之淨證券買賣收入較之 去年首六個月之虧損有明顯之升幅。於首六個 月期內,全球股市表現強勁,債券市場則相對 靠穩,令本集團保險系業務之投資組合估值提 升,其公平值之變更已於收益賬內確認。

期內,保險業務表現非常理想,淨保費收入及其他收入增長百分之一百五十二,反映保險經紀隊伍擴大,令保單銷售增加,以及銀行保險業務銷售平台成績理想(包括單一保費產品之銷售)。同樣受惠於更強勁之新銷售量,內內人長期壽險業務之價值(或內含價值)於期內上長期壽險業務之價值可獻則因估值利率改變造成不利影響而下降三千二百萬港元。列入損益賬之保險業務的內含價值貢獻漸次改善,令期內之保險業務盈利有百分之五十四之增加。

期內,保險索償淨額及對保單持有人負債之變動大幅上升,反映較高的索償支出、佣金及收購成本,以及因壽險銷售額上升而須撥備較高精算儲備。

#### **BUSINESS AND FINANCIAL REVIEW**

The key drivers of the strong loan growth in our banking business were property lending, syndicated loans, equipment and vehicle financing and financing for securities trading. Growth was driven primarily by our commercial lending business, although it was encouraging to note that the speed of growth in our retail lending business has accelerated over the same period last year. Net interest margin weakened slightly to 2.27% in the first half of 2007, compared with 2.46% in the first half of 2006, due mainly to a tighter Prime/ HIBOR margin and increased funding cost. Our strong loan growth was more than sufficient to offset the slightly weaker margin, allowing us to report an increase in net interest income of 6% for the period to HK\$1,086 million.

Our Macau banking business performed particularly well, with a 25% year on year increase in profit, driven by healthy loan growth, as well as a steady net interest margin.

Net fee and commission income increased by 18.9% relative to the first half of 2006, largely contributed by stronger wealth management income. Boosted by the buoyant investment environment and higher securities turnover, our wealth management business recorded higher brokerage fees and commission income generated from investment services and stronger unit trust sales.

Net trading income increased significantly when compared with the net trading loss in the first six months last year, boosted largely by a much higher trading income generated by our insurance business, mainly contributed by much higher gains on the equity investments of our life business. The stronger global equity market performance and relatively stable bond market in the first six months period led to a higher valuation of our insurance group's investment portfolio, with fair value changes recognised in our income statement.

Our insurance business performed very well during the period. Net insurance premium income and other income grew by 152% during the period, reflecting increased sales from our expanded agency force, as well as good results from our bancassurance platform, including sales of single premium product. The increase in the value of in-force long-term life assurance business (or embedded value) in the period also benefited from the stronger new sales and amounted to HK\$35 million, compared to the net decrease of HK\$32 million in the first half of 2006 when the changes in valuation interest rate adversely affected the embedded value contribution. A much improved investment performance, reflected in the positive mark to market appreciation of the insurance investment portfolio through the profit and loss account, as well as an improved embedded value contribution from our insurance business all contributed to the 54% increase in insurance earnings for the period.

Net insurance claims and movement in liabilities to policyholders also rose significantly in the period, reflecting higher claim expenses, commission and acquisition costs, and higher transfer to actuarial reserves arising from the much higher life policy sales.

# 業務及財務回顧(續)

期內營運支出增加,主要由於因薪酬上漲及僱 員人數增多而令員工成本上升,加上租金及廣 告及市場推廣等之一般開支上升所致。

本集團把握上半年之利好市況,於期內出售可供出售證券而錄得淨收益九千八百萬港元,較去年同期增加百分之五十二。在二零零六年,本集團受惠於一項投資減值回撥二千六百萬港元,惟二零零七年同期,則並無重覆此等回撥。

雖然減值支出上升百分之十七至八千八百萬港元,主要為本集團之零售銀行業務(特別是信用卡及個人貸款業務)貸款額增加,須予提高綜合減值支出,整體信貸質素依然理想。從工借貸業務之信貸質素在上半年仍然穩健。從二零零七年六月三十日錄得百分之零點四持續低水平的減值貸款比率,以及百分之零點六之逾期及重組貸款總比率,反映整體信貸質素維持在可接受水平。

於二零零七年六月三十日,本集團之貸款及墊款總額為五百六十二億港元,較去年年底上升百分之十二點七。商業銀行業務分項錄得強勁增幅,由銀團貸款、商業貸款及物業借貸所帶動。個人銀行業務整體貸款總額在激烈競爭下錄得溫和增長,主要為按揭貸款及證券相關融資。

客戶存款(包括結構性存款)合共為為六百九十七億港元,較二零零六年年底上升百分之四。已發行之存款證上升至一百零一億港元,較二零零六年年底上升百分之十四點八。貸款對存款比率由二零零六年六月三十日之百分之六十六點八上升至二零零七年六月三十日之百分之七十點五。

# 前瞻

本集團依然相信,中國內地之經濟前景將於未來年間提供本集團重要發展機會。除在重慶市商業銀行之投資外,本集團亦已遞交申請,在中國深圳設立於當地註冊之附屬銀行,令本集團進一步駐足內地市場。

本集團預計香港及澳門經濟於下半年能持續穩健發展,為本集團之保險及銀行業務帶來商機。然而,預期市場競爭仍然熾熱,加上近期全球金融市場情況反覆(尤其是全球信貸市場正處於迅速調整),對經濟可能帶來影響,意味著下半年經營環境將挑戰滿途。

# **BUSINESS AND FINANCIAL REVIEW** (Continued)

The growth in operating expenses during the period was due mainly to increased staff costs, both through higher salaries and increased headcount, as well as increased rental, and general expenses such as advertising and marketing.

We were able to take advantage of favourable market conditions in the first half of the year to realise a net gain on disposal of available-for-sale securities of HK\$98 million, an increase of 52% relative to the same period last year. In 2006, we benefited from a write-back of HK\$26 million impairment allowance on an investment which has not been repeated in 2007.

Credit quality remained solid, although impairment charges increased by 17% to HK\$88 million, mainly relating to higher collective impairment charges from our retail banking business, particularly our credit card and personal loan businesses, reflecting higher business volumes. Credit quality in our commercial lending business remained robust in the first half. Overall credit quality remained acceptable, as demonstrated by the continuing low impaired loan ratio of 0.4%, and a total overdue and rescheduled loan ratio of 0.6% as of 30 June 2007.

As at 30 June 2007, the Group's total gross loans and advances amounted to HK\$56.2 billion, up 12.7% relative to the end of last year. Strong growth was recorded in the Commercial Banking sector, led by syndicated loans, commercial loans and property lending. The overall Personal Banking loan portfolio achieved a modest growth amidst keen competition, and was mainly driven by mortgage loans and securities related financing.

Customers' deposits including structured deposits totalled HK\$69.7 billion, an increase of 4.0% relative to the end of 2006. Issued certificates of deposit rose to HK\$10.1 billion, 14.8% higher than 2006 year end. The loan to deposit ratio increased from 66.8% as at 30 June 2006 to 70.5% as at 30 June 2007.

#### **PROSPECTS**

We continue to believe that the economic prospects in Mainland China will present an important opportunity for growth in the coming years. In addition to our investment in Chongqing Commercial Bank, we have also submitted an application for the opening of a Mainland locally incorporated subsidiary bank, based in Shenzhen, to further develop our presence in that market.

We expect that the Hong Kong and Macau domestic economies will continue to develop positively in the second half of the year, providing opportunities for the growth of both our banking and insurance businesses. However, competition in these markets is expected to remain intense, and this coupled with the possible impact on the economy of the recent volatile conditions in global financial markets, and particularly in global credit markets where a rapid correction has been taking place, is likely to mean that the second half of the year will be challenging.
