# 1 Basis of preparation

The unaudited condensed consolidated interim financial statements ("Interim Financial Statements") are prepared in accordance with the applicable disclosure provisions of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited, including compliance with Hong Kong Accounting Standard ("HKAS") 34, "Interim Financial Reporting", issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA").

The Interim Financial Statements are prepared on a basis consistent with the accounting policies adopted in the 2007 annual financial statements.

# 2 Discontinued operations

In December 2006, the Group announced that it was in negotiations with independent third parties in respect of a possible disposal of the Group's assets. On 10 January 2007, Kingsway Asset Management Limited ("KAM"), a wholly-owned subsidiary of the Company, entered into a memorandum of understanding with a third party buyer to dispose of its entire shareholding interest in Kingsway Fund Management Limited ("KFM"). KFM was a subsidiary principally engaging in the wealth management business. The disposal was completed and the Group's wealth management business segment was discontinued on 31 March 2007, when control of KFM was passed.

The assets and liabilities of the wealth management business segment have been classified as held for sales and carried at their carrying amounts since their carrying amounts were recovered principally through a sales transaction rather than through a continuing use in accordance with HKFRS 5 "Non-current assets held for sales and discontinued operations" issued by the HKICPA. The results, cash flows and the segment information in respect of the wealth management business segment have been presented as discontinued operations.

An analysis of the results and cash flow statement of the wealth management business segment are set out below:

### 20 Financial instruments

The Group's activities expose it to a variety of financial risks: credit risk, liquidity risk, market risk and interest rate risk. These risks are limited by the Group's financial management policies and practices described below.

#### (A) CREDIT RISK

Credit risk arises from a number of areas. These include the possibility that a counter-party in a transaction may default during the settlement process. It also arises from lending, settlement, treasury, market making, proprietary trading, and other activities undertaken by the Group.

The Group's Finance and Credit Committees are responsible for establishing the credit approval and monitoring procedures, which are in accordance with sound business practices, the requirements and provisions of the relevant ordinances, and where applicable, the codes or guidelines issued by the Securities and Futures Commission.

Day-to-day credit management is performed by the Operations department with reference to the aforementioned criteria including creditworthiness, collateral pledged, and risk concentration of the counterparties. The Finance Committee and Credit Committee are responsible for review of guidelines on credit limits on a regular basis and approval of specific loans or advances if the amount exceeds our pre-set guideline.

#### (B) LIQUIDITY RISK

The Group manages its liquidity position to ensure the Group maintains a prudent and adequate liquidity ratio, in strict accordance with statutory requirements. This is achieved by the management, comprising the Chief Financial Officer and relevant senior managers, monitoring the liquidity position of the Group on a daily basis to ensure the availability of sufficient liquid funds to meet all obligations and compliance with statutory requirements such as the Hong Kong Securities and Futures (Financial Resources) Rules which apply to various licensed subsidiaries.

#### (C) MARKET RISK

Proprietary trading activities across the Group are subject to limits approved by management. The Board has set up the Investment Monitoring Committee ("IMC") for the purposes of independently monitoring the positions of its proprietary trading activities involving equities and derivatives. In addition to the IMC, the Group's exposures are closely monitored by the Finance department and senior management on a daily basis and are measured on a "mark-to-market" basis. The Group's various proprietary trading activities are reported monthly to senior management for review.

(Expressed in Hong Kong dollars)

### **20** Financial instruments (Continued)

#### (D) FOREIGN EXCHANGE RISK

Foreign exchange risk is the risk to earnings or capital arising from movements of foreign exchange rates. The Group's foreign exchange risk primarily arises from currency exposures originating from its proprietary investments. Foreign exchange risk is monitored by the Finance department and senior management on a daily basis. Monetary assets are measured daily on a "mark-to-market" basis. Non-current assets are revalued regularly using the market exchange rates. Overall positions are reported monthly to senior management for review. Principal brokerage and lending operations are carried out in local currency to obviate foreign exchange risk. Accordingly, the Group has no significant exposure to foreign exchange fluctuations on accounts and loan receivables.

#### (E) INTEREST RATE RISK

Interest rate risk primarily results from timing differences in the re-pricing of interest bearing assets, liabilities and commitments. The Group's interest rate risk exposure arises mainly from margin financing and other lending activities undertaken. The Group has the legal capacity to quickly recall such loans or re-price its loans to an appropriate level. Interest rates paid by the Group are managed by the Finance department with the aim of maximising the spread of interest consistent with liquidity and funding obligations.

# **Management Discussion and Analysis**

### The Market

2007 was a record year for the Hong Kong financial market. However, the second half of the calendar year was dominated by high volatility unseen during the last few years. The market sentiment was affected by the US sub-prime issues and the timing of the implementation of the new policy to allow PRC individual investors to invest in the Hong Kong securities market. In addition, the US Federal Reserve started the interest rate reduction cycle in August in reaction to the deterioration in the macro economic environment in the US. Nevertheless, China still enjoys double digit expansion and is implementing various measures to slow down its rapid economic growth. Hong Kong is in the midst of all these changes and the financial market has become very sensitive to these developments.

The Hang Seng Index closed at 27,813 at the end of December 2007, compared with 21,773 at the end of June 2007 and 19,965 at the end of 2006. Turnover reached record high and funds raised from primary markets were also at peak levels. Average monthly turnover on the Main Board during the six months ended 31 December 2007 was over HK\$2,401 billion, as compared to HK\$1,183 billion for the first half of 2007. Funds raised from IPOs on the Main Board in the second half of 2007 amounted to HK\$191 billion.

## **Financial Highlights**

The profit for the six months ended 31 December 2007 (the "Period") was HK\$43 million, as compared to HK\$10 million for the same period in the last fiscal year. Profit attributable to shareholders for the Period was HK\$27 million, as compared to HK\$13 million for the same period of the last fiscal year. Commission and fee income from the Client Services Group increased from HK\$34 million to HK\$72 million. This was due to the increase in brokerage turnover and income from our clients resulting from the bull run in the Hong Kong market. In addition, income from corporate finance and capital markets increased as a result of the increase in transactions completed. Interest income and related finance costs increased as a result of a very active IPO financing market. The increase in general and administrative costs was mainly due to higher discretionary staff costs in line with the good performance of the Client Services Group.

# **Brokerage**

Total revenue of the division was HK\$72.0 million during the period under review, representing a 159% increase over the same period last year.

The division benefited from the bull run in the Hong Kong market. The commission and interest income increased due to the large number of IPOs and the resultant increase in market activities. The institutional sales team was successful in diversifying its client portfolio which has resulted in higher trading volume. The division is working continuously to update its services delivery standard through better hardware and software to fend off the competition from banks and other services providers.

Kingsway ranked in the top three in the category of Best Broker in Hong Kong by the Asiamoney Brokers Poll announced in November 2007. Kingsway has enjoyed this honour for the last three consecutive years.

# **Corporate Finance and Capital Markets**

Total revenue of the division was HK\$24.3 million, representing a 58% increase over the same period last year.

The market continued to focus on big cap companies. However, the division was able to secure more advisory work and also benefited from the secondary placings done for a few small cap companies. The division is working on a number of projects, including IPOs, which should boost income from corporate finance and capital markets in 2008.

## **Asset Management**

The division contributed revenues of HK\$5.7 million, representing a 49% increase over the same period last year.

Sinochem Kingsway Capital Inc., a private equity fund co-sponsored with Sinochem Group is looking for suitable investment opportunities. Kingsway SBF Investment Company Limited, another private equity fund co-sponsored with Softbank AM Corporation, disposed of some listed shares investments and temporarily returned surplus capital to the shareholders. Further fund raising will be arranged if there are new investment opportunities.

#### **Investment in Securities and Structured Investment**

These divisions had negative turnover of HK\$3.6 million. This is compared with a turnover of HK\$19.5 million for the same period last year.

The first fiscal half year was characterised by high volatility. With substantial gains recorded in the fiscal year ended June 2007, one of the objectives of the investment managers was to increase the liquidity of the portfolio. This will help the Group to quickly adjust its investment strategy to accommodate new opportunities. Despite the market adjustments at end of 2007 and the beginning of 2008, investment managers were confident in the underlying fundamentals of the Greater China region and the Group remains fully invested.

The investment properties held by the jointly controlled entities are now being marketed to the expatriate communities in Beijing. With the Olympics approaching, the Group plans to organise more publicity events in order to boost occupancy rates.

#### **Outlook**

The Federal Reserve in the US reduced the interest rate by 1.25% within 10 days at the end of January 2008. The huge losses reported by major US and European banks left investors wondering whether this was the beginning or the end of the subprime crisis. We expect the market to remain volatile in the coming year. We believe that with our strengthened services dealing capability, Kingsway will be able to partner and grow with our valued clients in good or bad times.

# **Liquidity and Financial Resources**

Total assets as at end of December 2007 were HK\$1,093 million, of which approximately 77% was current in nature. Net current assets were HK\$612 million which accounted for approximately 72% of the net assets of the Group as at end of December 2007.

The Group generally finances its operations from internal resources. Total borrowings of approximately HK\$8 million at the end of December 2007 comprised of mortgage loans secured by the Company's office premises in Beijing and Shenzhen of approximately HK\$6 million and finance lease obligations for office equipment of approximately HK\$2 million. They were mainly denominated in HK\$ or US\$ to match the future cash flows of our business operations. The Group's properties with a carrying value of HK\$20.4 million were pledged as security against bank loans granted to the Group. At the period end, the Group's gearing ratio, calculated as a percentage of bank borrowings over shareholders' fund, was approximately 1%.

## **Foreign Exchange Exposure**

The Group's assets are mainly in Hong Kong and the PRC and most of the monetary assets and liabilities of the Group are denominated in HK\$. Financial assets denominated in foreign currencies, including equity and debt investments, are monitored on a daily basis, as well as the changes in market value of these investments as part of our investment monitoring process. Hedging instruments may be used as part of the overall investment strategy if deemed necessary by the investment managers. The Group has purchased properties in the PRC for its own use and holds properties in the PRC through jointly controlled entities for investment purposes. These assets are financed by internal resources and loans denominated in either HK\$ or US\$. In view of the gradual and steady appreciation in the exchange rate of RMB against both HK\$ and US\$, the Group considers that there is no need to hedge these assets denominated in RMB. Management will monitor the situation closely and introduce suitable hedging measures if there are any adverse changes. The Group does not have other material exposure to fluctuation in exchange rates and no hedging instruments are used.

### **Risk Disclosure**

The Group's business, financial conditions and results of operations may be affected by risks and uncertainties pertaining to the Group's business. The factors set out below are those that the Company believes could result in the Group's financial condition or results of operations differing materially from expected or historical results. Please refer to the note "Financial instruments" on page 17 for a more detailed discussion of specific risks. There may be other risks in addition to those mentioned in the Interim Report that are unknown to the Group or which may not be material now but could become material in the future.

The Group's results are affected by trends in the industry that it operates, particularly, investment, brokerages and capital markets. Income from these operations is dependent upon the interest rates, conditions of global investment and money markets and therefore there can be no assurance that changes in these conditions will not adversely affect the Group's financial conditions and results of operations.

The Group operates in highly competitive and rapidly changeable markets. New market entrants, the intensification of price competition by existing competitors, product innovation or technical advancement could adversely affect the Group's financial conditions and result of operations.

The introduction of new legislation and rules by the Stock Exchange, SFC and other regulatory bodies in Hong Kong and overseas may influence market conditions and adversely affect the operating results of the Company.

# **Risk Management Policies and Procedures**

The Group has established policies and procedures for risk management which are reviewed regularly by the management, to ensure the proper monitoring and control of all major risks arising from the Group's activities at all times. The Group's Legal and Compliance Department, together with the Finance and Accounts Department and other control committees, also perform regular reviews to supplement the various internal control measures adopted by the management and various divisions within the Group, to ensure compliance with policies and procedures.

On behalf of the Board

William, Wai Leung Wu

Chief Executive Officer

#### TO THE BOARD OF DIRECTORS OF

**SW Kingsway Capital Holdings Limited** 

(Incorporated in Bermuda with limited liability)

#### Introduction

We have reviewed the interim financial report set out on pages 6 to 18 which comprises the consolidated balance sheet of SW Kingsway Capital Holdings Limited as of 31 December 2007 and the related consolidated income statement, and consolidated statement of changes in equity and condensed consolidated cash flow statement for the six month period then ended and explanatory notes. The Rules governing the Listing of Securities on The Stock Exchange of Hong Kong Limited require the preparation of an interim financial report to be in compliance with the relevant provisions thereof and Hong Kong Accounting Standard 34 "Interim financial reporting" issued by the Hong Kong Institute of Certified Public Accountants. The directors are responsible for the preparation and presentation of the interim financial report in accordance with Hong Kong Accounting Standard 34.

Our responsibility is to form a conclusion, based on our review, on the interim financial report and to report our conclusion solely to you, as a body, in accordance with our agreed terms of engagement, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

## **Scope of Review**

We conducted our review in accordance with Hong Kong Standard on Review Engagements 2410, "Review of interim financial information performed by the independent auditor of the entity" issued by the Hong Kong Institute of Certified Public Accountants. A review of the interim financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Hong Kong Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters than might be identified in an audit. Accordingly we do not express an audit opinion.

#### Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the interim financial report as at 31 December 2007 is not prepared, in all material respects, in accordance with Hong Kong Accounting Standard 34 "Interim financial reporting".
