主席報告書

CHAIRMAN'S STATEMENT

二零零七年香港經濟環境 順勢向好,本地生產總濟 持續增長,年內失業經濟 告下降。反觀美國 下半年惡化,房產 下半年惡化, 歷愈趨明顯,問題 東廣經濟層面, 金融市 坡幅普遍擴大。

Economic conditions in Hong Kong remained positive with Hang Seng Index closed at above 27,800 points at the 2007 year end.

香港經濟環境順勢向好,於二零零七年底 恆生指數收市超渝27,800點。 Economic conditions in Hong Kong in 2007 remained positive with continuing growth in GDP, as well as a fall in the unemployment rate during the year. In contrast, economic conditions in the US deteriorated in the second half of the year, particularly with more signs of stress in the US housing market, difficulties in the broader economy, and increased volatility in financial markets generally.

The economies of both the Mainland and Macau, our other core areas of business, also performed extremely well during the year, with GDP growth of approximately 11.4% for the Mainland, and of 27% for Macau, although in the second half of the year, various cooling measures were introduced to contain the increasing rate of inflation and the rapid rate of economic growth in the Mainland.

本年度股東應佔溢利報八億港元,較去年下降 百分之三十三。盈利下跌乃由於須就本集團外 部管理之槓桿/結構性投資組合作減值提撥所 致。

撇除減值提撥,本集團之核心銀行業務表現強勁,年度貸款總額增長百分之二十一,而財富管理業務帶來之貢獻亦使非利息收入有所增加。商業銀行業務上承持續多年之強勁增長,年內繼續帶領貸款額之增長;而零售借貸亦有所增長,雖步伐略緩。本集團澳門業務之營運表現亦令人鼓舞。

在取得相關監管機構批准後,本集團於二零零七年四月完成收購重慶市商業銀行(後易名為「重慶銀行」)百分之十七權益。

Profit attributable to shareholders of HK\$800 million decreased by 33% compared with the previous year. The decrease in earnings was attributable to the impairment charge against our externally managed leveraged/structured investment portfolio.

Excluding the impairment charge, our core banking business performed strongly, with total loan growth for the year of 21%, and a stronger non-interest income mainly due to higher wealth management contribution. Commercial banking led loan volume growth again during the year, after a number of years of strong expansion, whilst retail lending also grew, although at a less rapid pace. Our Macau business also reported a strong operating performance.

In April 2007, following the receipt of the relevant regulatory approvals, we completed the acquisition of a 17% shareholding in Chongqing Commercial Bank, which was subsequently renamed as "Bank of Chongqing".

主席報告書

CHAIRMAN'S STATEMENT

董事會

年內,田原啟佐先生獲委任為非執行董事,以接替已辭任之古川弘介先生。彼代表三菱東京 UFJ銀行在本公司之間接權益。

另外,劉雪樵先生於二零零七年三月二十八日 獲委任為本公司執行董事,而邱達宏先生則退 任執行董事,但繼續留任董事會擔當非執行董 事職務,直至彼於二零零七年四月二十日正式 榮休為止。

本人藉此歡迎新晉董事加入董事會,並相信彼 等之專業知識和豐富經驗將為本集團提供莫大 裨益。本人亦在此謹向退任董事在任期間所作 出寶貴貢獻表示深切感謝。

未來前瞻

美國經濟數據已充份反映該全球最大經濟體系 出現明顯放緩。雖然香港及中國內地狀況基於 經濟增長強勁仍然穩健,但美國經濟放緩或萎 縮勢必對全球經濟(包括亞洲)造成影響。同 時,金融市場表現亦相當反覆。

因此,本集團於二零零八年將採取較審慎之業務方針,密切關注經濟及業務環境各方動向。 在中期而言,本集團對業務與遍及市場之經濟 前景仍懷信心,預期業務可繼續取得增長。

Board of Directors

During the year, Mr. Keisuke Tahara, succeeding the resigned Mr. Kosuke Furukawa, was appointed as a non-executive Director to represent the indirect interest of The Bank of Tokyo-Mitsubishi UFJ, Ltd. in the Company.

In addition, Mr. Frederic Suet-Chiu Lau was appointed as an executive Director of the Company on 28 March 2007 whilst Mr. Dennis Tat-Wang Yau stepped down as an executive Director but continued to serve the Board in a non-executive role until his retirement from the Board, which took effect from 20 April 2007.

I would like to welcome the new Directors to the Board and believe their expertise and extensive experience will be of great value to the Group. I would also like to express my gratitude to the departing Directors, for their valuable contribution during their tenure on the Board.

Future Prospects

Economic data from the US is already indicating a significant slowdown in the world's largest economy. Whilst conditions in Hong Kong and Mainland China remain robust, with strong economic growth, it is inevitable that a slowdown or recession in the US will have an impact on the global economy, including Asia. Also, conditions in financial markets remain volatile.

We therefore intend to proceed cautiously in 2008, with due regard to how economic and business conditions develop over the course of the year. In the medium term we remain confident about economic prospects for the markets in which we operate, and look forward to continued growth.

財務回顧

本集團受惠本地經濟於二零零七年大部份時間經歷全面增長以及消費強勁之狀況,中國內地持續暢旺之經濟增長之支持,於是年度錄得強勁之營運業績(扣除減值前)。貸款結餘上升帶動淨利息收入上升。連同淨服務費及佣金收入十分理想之表現,令是年度之扣除貸款減值後之營運溢利得以改善。相對於二零零六年,本集團貸款和存款及業務分項之溢利反映各項業務取到穩健之增長。

二零零七年下半年期間,全球金融市場極為不穩定並大幅波動,而美國經濟亦普遍疲弱。本集團之外部管理投資組合受全球市場環境惡化影響,因應投資組合市價之大幅度下跌,本集團確認合計十億三千八百萬港元之減值撥備。令是年度之應佔溢利下跌百分之三十三。

Financial Review

Against the backdrop of a vibrant local economy with a broad-based economic expansion and strong consumer spending for most part of 2007, and on the back of a continued strong economic growth in Mainland China, The Group reported stronger operating results, pre-impairment, for the year. Higher net interest income, driven mainly by higher loan balances, and a strong performance in net fee and commission income, led to an improved operating profit after loan impairment in the year. All of our business segments achieved solid growth, as reflected in loans and deposits, and business segment profit when compared with 2006.

The second half of 2007 was a period of significant turmoil and volatility in global financial markets, and a weaker US economy generally. The Group's externally managed investment portfolio, was affected by the deterioration in global markets, and in response to the sizeable drop in the market values of the portfolio, we recognized an impairment charge totaling HK\$1,038 million. This resulted in a 33% reduction in the attributable profit in the year.

財務回顧(續)

淨利息收入於年內上升百分之五,至二十億六 千八百萬港元。儘管貸款息差及最優惠利率/ 香港銀行同業拆息之息差收窄,加上資金成本 水平普遍上調,均對本集團淨利息收入增長構 成壓力,但貸款及其他賺息資產結餘上升仍有 助提高利息收入。年內本集團之淨息差收窄至 百分之二點一六,較之二零零六年為百分之二 點三八。

本集團之非利息收入強勁增長。淨收費及佣金收入增加、乃受惠於年內財富管理業務之增長及暢旺之股票及投資市場,從而提高零售單位信託投資及證券經紀營業額,令財富管理收入更可觀。

淨買賣收入大幅增加,主要源自證券與外匯買 賣之收入、金融工具公平值收益有所增加。

由於本集團須支援業務增長及提升營運能力而增加開支,故營運支出增加百分之七點七。增加之開支主要是為薪酬上漲及僱員人數增加而令員工成本上升,加上租金、以及廣告及市場推廣等之一般開支上升所致。縱然營運支出增加,但本年度之成本對收入比率為百分之四十三,仍較二零零六年之百分之四十五點三為低。

扣除減值提撥前之營運溢利為十六億九千萬港 元,較二零零六年上升百分之十九。

雖然減值提撥上升百分之十二至一億八千一百 萬港元,主要為因貸款結餘增加(當中大部份 為無抵押零售借貸及租購融資)而上升之綜合 減值提撥,信貸質素依然理想。年內,整體減 值貸款比率繼續維持在較低水平,為百分之零 點四六(相對二零零六年為百分之零點五六)。 於二零零七年十二月三十一日,逾期及重組貸 款總比率為百分之零點五六(相對二零零六年 底為百分之零點七),反映本集團所有商業及 零售銀行貸款組合之信貸質素依然穩健。

扣除貸款減值提撥後之營運溢利為十五億一千 萬港元,較二零零六年上升百分之十九。

Financial Review (Continued)

Net interest income in the year increased 5% to HK\$2,068 million. A higher loan and other interest earning asset balance contributed to boost interest income, although tighter loan spread, narrower Prime/HIBOR spread and a generally higher level of funding cost exerted pressure to curb the growth of our net interest income. Our net interest margin tightened to 2.16%, compared with 2.38% in 2006.

We achieved a much stronger increase in non-interest income. Our net fee and commission income benefited from the growth in our wealth management business and more buoyant stock and investment markets in the year contributed to boost retail unit trust investment and securities brokerage turnover, which led to a much stronger wealth management income.

Net trading income increased significantly, boosted largely by much higher gains on securities and foreign exchange trading, and fair value gains on financial instruments.

Operating expenses rose 7.7%, as the Group increased its spending to support business growth and strengthen operational capabilities. The growth was due mainly to increased staff costs, both through higher salaries and increased headcount, as well as increased rental, and general expenses such as advertising and marketing. Despite these increases, cost income ratio for the year was 43.0%, lower than 45.3% in 2006.

Operating profit before impairment charges was HK\$1,690 million, up 19% relative to 2006.

Credit quality remained solid, although impairment charges increased by 12% to HK\$181 million, mainly resulting from the increase of collective impairment allowances provided on larger loan balances especially in unsecured retail lending, and hire purchase financing. Credit quality in all of our commercial and retail banking loan portfolios remained robust, as reflected in the continuing low overall impaired loan ratio at 0.46% (vs. 0.56% for 2006), and a total overdue and rescheduled loan ratio of 0.56% as of 31 December 2007, against 0.70% at the end of 2006.

Operating profit after loan impairment charges was HK\$1,510 million, 19% higher than 2006.

財務回顧(續)

本集團於年內錄得主要源自出售物業及行產重 估減值回撥收益一億三千五百萬港元和投資物 業重估收益一億四千一百萬港元。年內,本集 團把握上半年之利好市況,變現若干可供出售 證券而錄得淨收益八千五百萬港元,稍低於二 零零六年。

因應市況變化,本集團就外部管理之槓桿/結 構性投資組合確認十億三千八百萬港元之減值 虧損,於年底將有關投資現值由二億美元撇減 至六千七百萬美元,減幅為百分之六十七。

本集團於二零零七年四月底完成收購重慶銀行百分之十七權益。隨可參與重慶銀行董事會及 其事務,本集團認為將重慶銀行作聯營公司處理,並按權益會計基準將本集團所佔重慶銀行 業績綜合入賬至為合適。本集團於二零零七年 所佔聯營公司業績反映本集團所佔重慶銀行溢 利為七千二百萬港元。

於二零零七年十二月三十一日,本集團之貸款 及墊款總額為六百一十三億港元,較二零零六 年底上升百分之二十一。受商業貸款、物業借 貸、設備融資及銀團貸款所帶動,商業銀行業 務貸款錄得強勁增長。個人銀行業務整體貸款 總額面對激烈競爭下,錄得溫和增長。令人感 到鼓舞的是,年內本集團之無抵押信用卡及個 人貸款取得可觀增長。

客戶存款合共為七百九十一億港元,較二零零六年上升百分之十八。已發行之存款證總額為八十八億港元,其中零售存款證三十三億港元。其他已發行之債務證券合共為二十八億港元。貸款對存款比率由二零零六年十二月三十一日之百分之六十六點五上升至二零零七年十二月三十一日之百分之六十九點七。

為鞏固本集團之資本基礎,大新銀行於二零零 七年第一季度發行合資格被列作附加資本且可 於二零一七年贖回之二億美元無期限後償債 券。

Financial Review (Continued)

Gains of HK\$135 million arising from the disposal of properties and reversal of revaluation deficit of premises, and a gain of HK\$141 million relating to revaluation of our investment properties, were recorded in the year. During the year, we were able to take advantage of favourable market conditions in the first half to realise certain available-for-sale securities at a net gain of HK\$85 million, which was slightly lower than 2006.

In response to market conditions, we recognised HK\$1,038 million impairment charge against our externally managed leveraged/structured investment portfolio, writing down the amount of these investments by 67% from US\$200 million to US\$67 million at the end of the year.

We completed the acquisition of a 17% interest in the Bank of Chongqing ("BOCQ") in late April 2007. With our participation in BOCQ at its board level and involvement, we consider it appropriate to treat BOCQ as an associate company and consolidate our share of BOCQ results on an equity accounting basis. The share of results of an associate in 2007 reflected our share of BOCQ profit at an amount of HK\$72 million.

As at 31 December 2007, the Group's total gross loans and advances amounted to HK\$61.3 billion, up 21% relative to the end of 2006. Stronger growth was recorded in the Commercial Banking sector, led by commercial loans, property lending, equipment finance and syndicated loans. The overall Personal Banking loan portfolio achieved a modest growth amidst keen competition, and it was encouraging to note that our unsecured credit card and personal loans achieved a reasonable growth in the year.

Customers' deposits totaled HK\$79.1 billion, an increase of 18% over 2006. Issued certificates of deposit amounted to HK\$8.8 billion of which retail certificates of deposit accounted for HK\$3.3 billion. Other issued debt securities totaled HK\$2.8 billion. The loan to deposit ratio increased from 66.5% as at 31 December 2006 to 69.7% as at 31 December 2007.

Dah Sing Bank issued in the first quarter of 2007 US\$200 million perpetual subordinated debt callable in 2017 qualifying as supplementary capital to strengthen our capital base.

REVIEW OF OPERATIONS

個人銀行

本集團之個人銀行業務專注於香港及澳門之零售銀行業務、顯客理財及私人銀行服務,二零零七年除税前溢利錄得百分之三十增長。營運業績強勁,是由於貸款、存款、淨利息收入及尤其是強勁的財富管理費用及佣金收入之增長所致。貸款減值提撥維持於二零零六年水平。

本集團個人銀行業務之貸款組合在過去兩年增 長穩定,使二零零七年之平均貸款結餘較二零 零六年上升,有助提供較高之淨利息收入。持 續專注於建立本集團之零售存款基礎及顯客理 財,使個人銀行業務之存款基礎錄得令人鼓舞 之增長。

在是年度利好之股票市場及投資環境中,本集 團除擴展顯客理財及投資服務外,更繼續積極 推出業務宣傳及致力於市場推廣,以擴大本集 團之信用卡及無抵押個人貸款業務。

值得令人鼓舞的是本集團之信用卡發展及推廣活動受到業內之認同,二零零七年本集團獲得多個獎項。當中包括VISA頒發之「最佳專營聯辦新卡項目」,及萬事達卡頒發之「卓越營銷(地區)獎」。本集團亦欣然得悉澳門之全資附屬公司澳門商業銀行於是年度獲VISA頒發「最高發卡量增長」獎項。

於香港依然穩健之經濟增長與有所改善之失業 率的利好之營商環境下,本集團個人銀行業務 之貸款資產質素仍然非常良好,撇賬率及減值 虧損仍維持在二零零六年相近水平。

本集團之私人銀行業務於年內盈利能力上升, 是受惠客戶之投資買賣及資產管理規模增加, 及本集團私人銀行團隊之逐步建立。

於二零零七年底,本集團之分行網絡包括於香港以大新銀行及豐明銀行經營之四十八間零售分行、以澳門商業銀行於澳門經營之十四間分行,以及於海峽群島格恩西島之一間主要提供私人銀行服務之附屬私人銀行。

Personal Banking

Our Personal Banking business, serving the retail banking, VIP banking and private banking market segments of Hong Kong and Macau, recorded an increase of 30% in profit before tax in 2007. The strong operating results arose from growth in loans, deposits, net interest income and particularly strong wealth management fee and commission income. Loan impairment charges were flat on 2006.

The steady growth in the loan portfolio of our Personal Banking business over the past two years led to a higher average loan balance in 2007 when compared with 2006, which contributed to generate a higher net interest income. The continued emphasis on building our retail deposit base and VIP banking led to an encouraging growth in the deposit base of Personal Banking division.

We continued to actively pursue business promotions and focused marketing to expand our credit card and unsecured personal loan portfolios, in addition to the development of our VIP banking and investment services amidst the favourable stock market and investment conditions in the year.

We were encouraged that our card development and promotion efforts in the year were recognised by industry bodies, with several awards received in 2007 including recognition by VISA as "The Most New Visa-Exclusive Cobrand & Affinity Card Programs", and by MasterCard for "Good Operational Performance (regional award)". We were also pleased to see that Banco Comercial de Macau, our wholly-owned subsidiary bank in Macau, was recognised by VISA as having "The Largest Card Growth" in the year.

Against a benign operating environment with a continued robust economic growth and improvement in the unemployment rate in Hong Kong, our Personal Banking division's loan asset quality remained very sound, with charge offs and impairment charges maintained at similar levels to 2006.

Our private banking business achieved a higher profitability in the year as a result of higher clients' investment trading and assets under management, and the gradual build-up of our private banking team.

As of the end of 2007, our branch network includes 48 retail branches in Hong Kong under the name of Dah Sing Bank and MEVAS Bank, and 14 branches in Macau under Banco Comercial de Macau, and one subsidiary private bank in Guernsey, Channel Islands providing mainly private banking services.

REVIEW OF OPERATIONS

商業銀行

商業銀行包括貿易融資、商業借貸、銀團貸款、設備融資及車輛融資,除稅前溢利較二零零六年錄得輕微升幅。

是年度貸款增長特別強勁,並廣泛分佈在所有 主要業務分項,然而主要集中於物業借貸、銀 團貸款、設備及車輛融資方面。是年度之存款 增長亦強勁。

然而,此類業務之營運表現受到淨息差普遍收 窄所影響,淨息差收窄是由於資金成本上漲及 貸款利率差距收窄,尤其是佔較高定息貸款比 率之設備及車輛融資業務,及貸款減值提撥之 增加。

除因過去兩年因貸款快速增長而引致貸款減值 提撥上升外,所有主要業務範圍錄得之商業借 貸個別減值提撥持續理想,而整體上則低於二 零零六年。由於預期二零零八年中國及全球經 濟放緩,以及美國次按及信貸危機所帶來之不 明朗因素,本集團自二零零七年最後數月起已 加強信貸控制及監控本集團之商業、貿易融資 及製造商客戶。

本集團持續推廣企業信用卡服務,亦獲得表 揚,榮獲萬事達卡國際頒發「二零零七年全港 商務卡持卡人消費最高市場佔有率(季軍)」。

財資業務

倘不包括投資證券減值,本集團之財資業務於 二零零七年之溢利略高於二零零六年。本集團 財資業務證券投資總額與二零零六年大致相 約。本集團於年內經重新調整組合後,大幅提 高投資所賺取之淨利息收入。由於市況波動 (尤其在下半年),本集團財資業務之買賣收入 及出售證券收益較二零零六年為低。

Commercial Banking

Commercial Banking, which includes trade finance, commercial lending, syndicated lending, equipment finance and vehicle finance, reported a slightly higher profit before tax relative to 2006.

Loan growth in the year was particularly strong, and was broadbased for all key business sectors, but was particularly strong in property lending, syndicated loans, equipment and vehicle finance. A strong growth in deposits was also achieved in the year.

The operating performance of this line of business was however affected by the generally tighter net interest margin caused by higher funding cost and tighter loan spread particularly for the equipment and vehicle finance businesses with a higher proportion of fixed rate loans, and higher loan impairment charges.

Other than the increase of loan impairment charges due to the rapid loan growth in the past two years, individual impairment charges recorded on commercial lending in all the key business lines remained benign, and as a whole was lower than 2006. With the expected slowdown in China's and the global economies in 2008, and the uncertainties arising from the US subprime and credit crisis, we had stepped up our credit control and monitoring of our commercial, trade finance and manufacturing customers since the last few months in 2007.

We continued to promote our corporate card service, and were recognized by MasterCard International as "The Highest Market Share in 2007 Cardholder Spending for Commercial Products In Hong Kong (2nd Runner Up)".

Treasury

Our Treasury division generated a slightly higher profit in 2007 relative to 2006, excluding the impairment on investment securities. The overall level of investment in securities was broadly similar with 2006. With a rebalancing of our portfolio during the year, we were able to significantly increase the net interest income earned on our investments. Due to the volatile market environment especially in the second half year, our Treasury's trading income and securities disposal gains were lower than 2006.

財資業務(續)

本集團於可供出售證券之投資中包括由外部之第三方投資經理人管理之槓桿式/結構性投資工具,合計二億美元(十五億六千一百萬港元)。本集團持有之投資工具之價值因自年中起債券價格下跌結合槓桿效應而減少。因此,本集團評定該等投資已出現減值,而確認十億三千八百萬港元之減值虧損。在扣除減值虧損後,本集團於槓桿式/結構性投資工具之投資之價值於二零零七年十二月三十一日撇減至五億二千三百萬港元。

中國銀行業務之發展

本集團之深圳分行主要集中於泛珠江三角洲之 商業銀行業務,於本年度再錄得穩健增長。本 集團欣然此分行在二零零七年底前獲得監管機 構批准經營人民幣業務。本集團相信此發展將 為本集團發展中國業務帶來額外之商機。

本集團正作好各項準備,以符合監管規定,使 本集團可取得在深圳當地註冊成立附屬銀行之 批核。

Treasury (Continued)

The Group's investment in available-for-sale securities included externally managed leveraged/structured investment vehicles managed by third party portfolio managers totaling US\$200 million (HK\$1,561 million). Falls in the prices of bonds since mid year, coupled with the leverage effect on the Group's holdings resulted in a decrease in their values. As a result, the Group assessed that the investments have suffered impairment, and an impairment loss amounting to HK\$1,038 million was recognized, and consequently the value of the Group's investment in leveraged/structured investment vehicles was written down to HK\$523 million at 31 December 2007.

Development of Banking Operations in China

Our Shenzhen branch, focussing on the commercial banking business in the Pan Pearl River Delta Area, achieved another year of solid growth. We are pleased that this branch received regulatory approvals to conduct RMB business before the end of 2007. We believe this development will provide us additional opportunities to grow our business in China.

We are continuing our preparation to meet regulatory requirements to procure the required approvals for establishing our locally incorporated subsidiary bank in Shenzhen.

REVIEW OF OPERATIONS

澳門商業銀行(「澳門商業銀行」)

收購澳門商業銀行為本集團於二零零五年之主 要策略性業務拓展,令本集團可進入發展迅 速、日益富裕之澳門市場,並使本集團可於澳 門之銀行、一般保險及人壽保險業務取得顯著 的之市場佔有率。

於二零零七年,受惠於娛樂及旅遊業急速發展,以及消費、物業投資及建造增長帶動下, 澳門維持其快速增長,達致國內生產總值百分 之二十七增長。澳門商業銀行之營運溢利為一 億五千九百萬澳門幣,較二零零六年增加百分 之二十一。

豐明銀行

豐明銀行是銀行集團旗下以獨立品牌經營之香港銀行附屬公司。於二零零七年,銀行錄得淨溢利五千三百萬港元,收益較二零零六年之二千萬港元大幅增加。年內強勁表現是由於貸款結餘增加及營運收入(淨利息收入及服務費用收入)大幅增加,以及貸款減值提撥減少所致。

重慶銀行

大新銀行於二零零七年四月取得監管機構批准,並完成其收購重慶銀行百分之十七權益, 代價為六億九千四百萬人民幣(七億三百萬港元)。

重慶銀行為中國西部最大之城市重慶市之主要城市商業銀行,營運包括六十九間分行之分行網絡。重慶銀行於二零零七年十二月三十一日之資產總值主要由貸款增長帶動,達四百四十六億人民幣,較二零零六年增加百分之三十七。截至二零零七年十二月三十一日止年度之淨溢利為五億五千七百萬人民幣,所得淨溢利超過二零零六年一倍之多。

大新銀行作為策略投資者對重慶銀行有重大影響,故本集團應用權益會計法在綜合業績內反映本集團應佔重慶銀行之業績。由二零零七年四月至十二月底期間,本集團應佔重慶銀行淨溢利為七千二百萬港元。

Banco Comercial de Macau ("BCM")

The acquisition of BCM in 2005 was a significant strategic expansion for the Group, as this provided the Group entry into the fast growing and increasingly affluent Macau market, and allowed the Group to gain significant market share in each of the banking, general insurance and life assurance businesses in Macau.

In 2007, Macau sustained its record of rapid growth and achieved a GDP growth of 27%, underpinned by the rapid expansion of its gaming and tourism industry, and growth in consumption and property investment and construction, and BCM reported operating profit of MOP159 million, an increase of 21% over 2006.

MEVAS Bank

MEVAS Bank ("MEVAS"), the separately branded Hong Kong banking subsidiary under the Group, recorded a net profit in 2007 of HK\$53 million, up significantly compared with HK\$20 million earned in 2006. The stronger performance in the year was the result of higher loan balances and significantly higher operating income (both net interest income and fee income) and lower loan impairment charges in the year.

Bank of Chongqing

Dah Sing Bank received regulatory approvals and completed its acquisition of a 17% interest in Bank of Chongqing ("BOCQ") in April 2007 at a cost of RMB694 million (HK\$703 million).

BOCQ is the leading city commercial bank in Chongqing, the largest city in Western China, and is operating with a branch network of 69 branches. BOCQ's total assets, as of 31 December 2007, driven mainly by loan growth, reached RMB44.6 billion, up 37% relative to 2006. Net profit for the year ended 31 December 2007 was RMB557 million, more than double the net profit earned in 2006.

The Group, on the basis that Dah Sing Bank as the strategic investor has significant influence on BOCQ, had elected to use equity accounting to reflect its share of BOCQ results in its consolidated results. For the period from April to the end of December 2007, the Group's share of BOCQ net profit amounted to HK\$72 million.

風險管理及合規監督

為於競爭及需求日益熾烈之金融服務市場有效競爭,並在本集團持續擴展其業務、規模及地區營運時符合不斷提高標準之監管要求,加強及提升風險管理成為倍受重視之工作及持續之投資。此等工作及投資需要董事會及高級管理層之監督、清楚界定及結構分明之風險管理架構,政策及風險控制程式,明確理解健全之風險及回報平衡,加上分配充足資源以提升可應付業務擴展及風險增加之風險管理之專門知識及技術。

本集團自二零零七年一月起開始就新監管及資本制度,以巴塞爾資本協定II之標準化計演算法作出報告,並持續致力準備發展本身之資率充足評估程式,以協助本集團提升其風險管理、風險與回報平衡及資本分配方式。以上至項對提升至採納更為複雜之巴塞爾資本協定II內部評級基準計算法及對風險及資本更有效管理之發展甚為重要。基於本集團於二零零經經報之發展甚為重要。基於本集團於二零零經經報之發展甚為重要。基於本集團於二零零繼續致力及投放額外資源在執行風險管理及資育等,這將有助本集團提升資產及負債管理、風險對據模型及統計方法評分,從而改善本集團之信貸風險分析,包括風險區分及違約概率等。

本集團持續加強其所有主要業務及營運之合規 功能,並推廣額外合規意識及最佳慣例。本集 團年內舉行一個集團上下共同參與之合規會 議,以進一步加強集團上下對合規重要性之認 識。加上本集團越加重視合規監控及培訓,以 及加強本集團之內部監控,本集團相信在妥善 監控之情況下,有助本集團長期發展及增長。

Risk Management and Compliance

To compete effectively in the increasingly competitive and demanding financial services market, and to meet higher standards of regulatory requirements whilst the Group continues to expand its businesses, scale and geographical operations, strengthening and upgrading risk management is an ongoing emphasis and continuing investment. These require oversight at the Board and senior management level, well defined and structured risk management framework, policies and risk control processes, clear understanding of sound risk and return balance, allocation of sufficient resources to upgrade risk management expertise and technologies to be commensurate with business expansion and increases in risk exposures.

We started to report on Basel II standardized approach basis for the new regulatory and capital regime since January 2007, and continued our efforts and preparation on the development of our capital adequacy assessment process to upgrade our risk management, risk and return balance, and capital allocation practices, which are crucial for the progression toward the adoption of the more sophisticated requirements of Basel II internal-ratings based ("IRB") approach for risk and capital management. Building on our evaluation results and system selections made in late 2006, we continued our efforts and put in extra resources on the implementation of risk management and IT solutions that will assist us to upgrade our asset and liability management, risk assessment and control, market risk monitoring and analysis, risk data model and statistical scoring to improve our credit risk analysis including risk differentiation and default probabilities.

We continued to strengthen our compliance function, and promoted added compliance awareness and best practices in all our key businesses and operations. We organized a group-wide compliance conference in the year to further elevate the significance of compliance throughout the Group. Together with the added emphasis on compliance monitoring and training, and the efforts to strengthen our internal control, we believe we are progressing in pursuing long-term development and growth in a sound and controlled manner.

Human Resources (Continued)

In 2007, in addition to promoting service excellence, teamwork, caring and trust culture, we also placed additional focus on compliance, including the first group-wide compliance conference to promote communication and sharing of our Group's increased emphasis on compliance.

Our staff social club continued to promote staff and family wellbeing, and organized different social and sports activities to help promote staff benefits, affinity, friendship and health.

The Group's headcount continued to increase as a result of our business growth and increasing demand for human resources to strengthen our capabilities in both business units and support functions. The total number of employees of our Group, including our staff in Macau and China, increased from 1,701 at the end of 2006 to 1,828 at the end of 2007.

Information Technology

During 2007, our major developments in the information technology area were the launch of a new securities trading system, upgrade of our treasury back-office system to a new system, and an upgrade of our call centre system, in addition to the successful implementation of an enterprise middleware system to support and connect multi-channel, and multiple system and platform interactions. We were greatly encouraged that this system architecture project won the "All Stars Award" from the regional IT magazine, Network World Asia, in 2007.

We had commenced the implementation work on Basel II credit risk management system and retail credit scoring system, and had completed the finalization on the selection of a new integrated asset and liability, market risk, and risk management system targeting to achieve solid upgrade in our risk management capabilities in the coming few years.

With our operations in Macau, and our plan to achieve meaningful developments in China, we anticipate we will need to continue investing in IT application systems and infrastructure to achieve more alignment and synergy, and to upgrade our capabilities to meet both business needs and increasing regulatory requirements.

(2) Board composition and meetings (Continued)

Directors may, upon reasonable request, seek independent professional advice in appropriate circumstances, at the Company's expense. In circumstances where directors believe that independent advice is needed, they should approach the Company Secretary or the Chief Executive in the first instance with their request. No such request will be unreasonably denied, and the Company Secretary or the Chief Executive will endeavour to identify and engage an appropriate professional adviser at the expense of the Company.

All directors appointed to fill a casual vacancy should be subject to election by shareholders at the first general meeting after their appointment. Every director, including those appointed for a specific term, should be subject to retirement by rotation at least once every three years.

The Board has delegated the day-to-day responsibility of running the Group to the executive management, and has delegated responsibility for certain matters to a number of committees, which are described more fully in the following sections. There are a number of matters which require the deliberation of the full Board, and may not be delegated to the committees of the Board or the executive management. These reserved matters include:

主席及行政總裁

本公司認為其企業管理包括兩個主要層面:董事會之管理及其業務之日常管理。董事會應清晰區分責任以確保權力及權限之平衡,而不致使任何個人擁有不受制約之決策權。因此,主席王守業先生與行政總裁黃漢興先生之角色及權責已予分開,並已通過董事會之審批。主席主要在董事會中擔當領導角色,以確保董事會有效運作及履行其責任,使所有關鍵及相關事宜得以獲董事會及時處理。行政總裁則負責本公司之日常管理,為本集團業務之利益指導業務方向及領導業務經營,提高股東價值及確保內部監控健全。

Corporate Governance (Continued)

Chairman and Chief Executive

The Company acknowledges that there are two key aspects of its management – the management of the Board and the day-to-day management of its business, and that there should be a clear division of these responsibilities at the Board level to ensure a balance of power and authority, so that no one individual should have unfettered powers of decision. The roles and objectives of the Chairman, Mr. David Shou-Yeh Wong, and the Chief Executive, Mr. Hon-Hing Wong (Derek Wong), are therefore separated and have been approved by the Board. The Chairman mainly provides leadership for the Board to ensure that the Board works effectively and discharges its responsibilities, and all key and appropriate issues are discussed by the Board in a timely manner. The Chief Executive is responsible for the day-to-day management of the Company to provide business direction and operational leadership for the benefit of the Group's businesses, enhance shareholder value and ensure sound internal control.

Non-executive Directors

The Company has one non-executive director and four independent non-executive directors. Each of the independent non-executive directors has provided to the Company confirmation of independence as required by Rule 3.13 of the Listing Rules.

Non-executive directors are appointed for a specific term, subject to re-election. The term of appointment of non-executive directors is normally for a term which coincides with their expected dates of retirement by rotation at least once every three years.

Non-executive directors, as equal Board members, give the Board and any committees on which they serve the benefit of their skills, expertise and varied backgrounds and qualifications through regular attendance and active participation. They attend regular and special Board meetings, and are encouraged to attend the general or special meeting of the shareholders of the Company. The non-executive directors make a positive contribution to the development of the Company's strategy and policies through independent, constructive and informed comments.

The Board has delegated to management the responsibility to develop and maintain a sound internal control system. However, it should be recognized that the Group's internal control procedures can only provide reasonable, not absolute, assurance against material errors, losses or fraud.

The key procedures that the Group has established to maintain an effective internal control system are as follows:

- A clear management organizational structure is set up with welldefined lines of authority, accountability and responsibilities.

2. 主要會計政策概要(續)

2.1 編製基準(續)

編製符合香港財務報告準則之財務報表須使用若 干重要之會計估計,亦須管理層在應用本集團會 計政策之過程中作出判斷。對涉及高度判斷力或 較複雜之範疇,或對綜合財務報表影響重大之假 設及估計,乃於附註4中披露。

- 甲) 自二零零七年起生效的對現有準則之修訂及計釋
- 香港財務報告準則第7號《金融工具:披露》 及香港會計準則第1號(修訂)《財務報表呈 列(資本披露)》自二零零七年一月一日或其 後之會計年度起生效。香港財務報告準則 第7號引入了一些有關金融工具新的披露規 定及包括許多有關在香港會計準則第32號 《金融工具:披露及呈列》的要求。香港財 務報告準則第7號取代香港會計準則第30號 《銀行及同類金融機構財務報表中之披露》 及香港會計準則第32號之披露要求。本集 團已採納香港財務報告準則第7號及香港會 計準則第1號(修訂),其主要影響為對公平 值計量及風險管理在性質上及數量上有更 多的披露要求。因此採納此準則將不會對 本集團之營運或財務狀況造成任何影響。
- 香港(國際財務報告詮釋委員會)詮釋第8號《香港財務報告準則第2號之範圍》(自二零零六年五月一日或其後之年度起生效)。香港(國際財務報告詮釋委員會)詮釋第8號要求確定對涉及發行權益性工具之交易(如收取之可認明代價少於該發行權益性工具之公平值)是否在香港財務報告準則第2號之範圍。本集團除已根據香港財務報告準則第2號處理授予董事及僱員認股權外並無發行其他權益性工具。因此香港(國際財務報告詮釋委員會)詮釋第8號並不適用於本集團之財務報表。

(Expressed in thousands of Hong Kong dollars)

- 2. Summary of significant accounting policies (Continued)
- 2.1 Basis of preparation (Continued)

The preparation of financial statements in conformity with HKFRSs requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements, are disclosed in Note 4.

- (a) Amendments and interpretations to existing standards effective in 2007
- HKFRS 7, Financial Instruments: Disclosures and the Amendment to the HKAS 1, Presentation of Financial Statements Capital Disclosures, are effective for annual accounting periods beginning on or after 1 January 2007. HKFRS 7 introduces certain new disclosures relating to financial instruments while incorporating many of the requirements in HKAS 32, Financial Instruments: Presentation and Disclosure. HKFRS 7 supersedes HKAS 30, Disclosures in the Financial Statements of Banks and Similar Financial Institutions, and the disclosure requirements of HKAS 32. The Group has adopted HKFRS 7 and the amendment to HKAS 1 and the key impact is more qualitative and quantitative disclosures primarily related to fair value measurement and risk management. Accordingly the adoption of this standard has no effect on the Group's results of operations and financial position.
- HK(IFRIC) INT 8, Scope of HKFRS 2 (effective for annual periods beginning on or after 1 May 2006). HK(IFRIC) INT 8 requires consideration of transactions involving the issuance of equity instruments where the identifiable consideration received is less than the fair value of the equity instruments issued in order to establish whether or not they fall within the scope of HKFRS 2. The Group conducts no such transactions other than the issue of share options to directors and employees which are already accounted for in accordance with HKFRS 2. As such, HK (IFRIC) INT 8 is not relevant to the Group's financial statements.

2. 主要會計政策概要(續)

2.1 編製基準(續)

- 甲) 自二零零七年起生效的對現有準則之修訂 及詮釋(續)
- 香港(國際財務報告詮釋委員會)詮釋第9號 《重新評估內嵌衍生工具》(自二零零六年六 月一日或其後之年度起生效)。香港(國際 財務報告詮釋委員會)詮釋第9號要求機構 於其初成為合約的一方時評定是否須要分 開該合約內的內嵌衍生工具為獨立衍生工 具。除卻因合約條款變更而作重大更改合 約的現金流須重新評估外,繼後之重新評 估為不准許。本集團於二零零七年一月一 日起應用香港(國際財務報告詮釋委員會) 詮釋第9號,該詮釋對本集團之財務報表並 無任何影響。
- 香港(國際財務報告詮釋委員會)詮釋第10 號《中期財務報告及減值》(自二零零六年十 一月一日或其後之年度起生效)。香港(國際財務報告詮釋委員會)詮釋第10號不准許 已於中期業績確認之商譽、權益性工具投 資及以成本值列示的金融資產投資減值虧 損於繼後之結算日回撥。本集團於二零零 七年一月一日起應用香港(國際財務報告詮 釋委員會)詮釋第10號,該詮釋對本集團之 財務報表並無任何影響。
- 乙) 自二零零七年起生效惟對本集團之營運並 不適用之準則、修訂及詮釋

下列準則、修訂及詮釋須應用於自二零零七年一月一日起或其後之會計期,惟並未對本集團之會計政策帶來重大改變或並不適用於本集團之營運。

• 香港(國際財務報告詮釋委員會) 詮釋第7號 《應用重列處理方法編制香港會計準則第29 號在超通貨膨脹經濟下之財務報告》(於二 零零六年三月一日起生效)。香港(國際財 務報告詮釋委員會) 詮釋第7號對機構在過 往期間經濟體系並未出現過度通貨膨脹, 惟在報告期內發現其功能貨幣呈現過度通 貨膨脹時,提供指引如何執行香港會計準 則第29號之規定。由於本集團並無任何機 構持有之貨幣為超通貨膨脹經濟體系之功 能貨幣,香港(國際財務報告詮釋委員會) 詮釋第7號與本集團之營運無關。

- 2. Summary of significant accounting policies (Continued)
- 2.1 Basis of preparation (Continued)
- (a) Amendments and interpretations to existing standards effective in 2007 (Continued)
- HK(IFRIC) INT 9, Reassessment of Embedded Derivatives (effective for annual periods beginning on or after 1 June 2006). HK(IFRIC) INT 9 requires an entity to assess whether an embedded derivative is required to be separated from the host contract and accounted for as a derivative when the entity first becomes a party to the contract. Subsequent reassessment is prohibited unless there is a change in the terms of the contract that significantly modifies the cash flows that otherwise would be required under the contract, in which case reassessment is required. The Group has applied HK(IFRIC) Int 9 from 1 January 2007, and it has no impact on the Group's financial statements.
- HK(IFRIC) INT 10, Interim Financial Reporting and Impairment (effective for annual periods beginning on or after 1 November 2006). HK(IFRIC) – INT 10 prohibits the impairment losses recognised in an interim period on goodwill, investments in equity instruments and investments in financial assets carried at cost to be reversed at a subsequent balance sheet date. The Group has applied HK(IFRIC) – INT 10 from 1 January 2007, and it has no impact on the Group's financial statements.
- (b) Standards, amendments and interpretations effective in 2007 but not relevant to the Group's operations

The following standards, amendments and interpretations are mandatory for accounting periods beginning on or after 1 January 2007 but either did not result in substantial changes to the Group's accounting policies or are not relevant to the Group's operations:

• HK(IFRIC) – INT 7, Applying the Restatement Approach under HKAS 29, Financial Reporting in Hyperinflationary Economies (effective from 1 March 2006). HK(IFRIC) – INT 7 provides guidance on how to apply the requirements of HKAS 29 in a reporting period in which an entity identifies the existence of hyperinflation in the economy of its functional currency, when the economy was not hyperinflation in the prior period. As none of the Group's entities have a currency of a hyperinflationary economy as its functional currency, HK(IFRIC) – INT 7 is not relevant to the Group's operations.

HKFRS 8 will supersede HKAS 14, Segment Reporting, under which segments were identified and reported on risk and return analysis. Under HKFRS 8, segments are components of an entity regularly reviewed by management. The adoption of this standard will have no effect on the Group's results of operations or financial position.
- HK(IFRIC) INT 11 HKFRS 2 Group and Treasury Share Transactions (effective for annual periods beginning on or after 1 March 2007). HK(IFRIC) INT 11 clarifies that certain types of transactions are accounted for as equity-settled or cash-settled transactions under HKFRS 2. It also addresses the accounting for share-based payment transactions involving two or more entities within one group. The Group will apply HK(IFRIC) INT 11 for annual periods beginning on or after 1 January 2008, but it is not expected to have any impact on the Group's financial statements.
- HKAS 23 (Revised) Borrowing Costs (effective for annual periods beginning on or after 1 January 2009). This revised standard removes the option of recognising as an expense borrowing costs relating to assets that take a substantial period of time to get ready for its intended use or sale (i.e. qualifying assets). This revised standard applies to borrowing costs relating to qualifying assets for which the commencement date for capitalisation is on or after 1 January 2009 (unless an earlier date is designated instead by the entity). The adoption of this revised standard is not expected to have significant impact on the Group's financial statements.

- HK(IFRIC) INT 12 Service Concession Arrangements (effective for annual periods beginning on or after 1 January 2008). HK(IFRIC) INT 12 applies to companies that participate in service concession arrangements and provides guidance on the accounting by operations in public-to-private service concession arrangements. As the Group has not involved in service concession arrangements, HK(IFRIC) INT 12 is not relevant to the Group's operations.

2.2 Consolidation

The consolidated financial statements include the financial statements of the Company and all its subsidiaries made up to 31 December.

(a) Subsidiaries

Subsidiaries are those entities in which the Company, directly or indirectly, controls the composition of the Board of Directors, controls more than half the voting power or holds more than half of the issued share capital.

Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are de-consolidated from the date that control ceases.

The purchase method of accounting is used to account for the acquisition of subsidiaries by the Group. The cost of an acquisition is measured as the fair value of the assets given, equity instruments issued and liabilities incurred or assumed at the date of exchange, plus costs directly attributable to the acquisition. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date, irrespective of the extent of any minority interest. The excess of the cost of acquisition over the fair value of the Group's share of the identifiable net assets acquired is recorded as goodwill. If the cost of acquisition is less than the fair value of the net assets of the subsidiary acquired, the difference is recognised directly in the income statement.

在本公司之資產負債表內,附屬公司投資 是按成本扣除減值撥備列賬。附屬公司之 業績由公司按已收及應收之股息入賬。

(乙) 與少數股東權益之交易

就與少數股東權益之交易而言,本集團採納之政策乃對待與其之交易如同與外界人士之交易處理。出售予少數股東權益而令本集團產生之溢利及虧損於收益賬記錄。向少數股東權益之收購可產生商譽,此乃所有支付之代價與所購入附屬公司有關股權之淨資產賬面值之差額。

(丙) 聯營公司

聯營公司是指本集團可對其發揮重大影響但不能控制的公司,一般而言,擁有其介乎20%至50%投票權的股份。聯營公司投資以權益會計法處理,最初按成本入賬。本集團之聯營公司投資包括收購時認明之商譽(扣除任何累計減值虧損)(請參閱附註27)。

本集團應佔聯營公司收購後的溢利或虧損在收益賬中確認,本集團應佔其在收購後儲備的變化在本集團的儲備確認。投資的賬面值按累計收購後的變化作調整。除非本集團有為聯營公司提供責任承擔或支款,否則當本集團應佔聯營公司的虧損達至或超過本集團在聯營公司的權益(包括其他無抵押應收款)時,本集團不再確認額外的虧損。

2. Summary of significant accounting policies (Continued)

2.2 Consolidation (Continued)

(a) Subsidiaries (Continued)

Inter-company transactions, balances and unrealised gains on transactions between group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

In the Company's balance sheet the investments in subsidiaries are stated at cost less allowances for impairment. The results of subsidiaries are accounted for by the Company on the basis of dividend received and receivable.

(b) Transactions with minority interests

The Group applies a policy of treating transactions with minority interests as transactions with parties external to the Group. Disposals to minority interests result in gains and losses to the Group that are recorded in the income statement. Purchases from minority interests could result in goodwill, being the difference between any consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiary.

(c) Associates

Associates are all entities over which the Group has significant influence but not control, generally accompanying a shareholding of between 20% and 50% of the voting rights. Investments in associates are accounted for using the equity method of accounting and are initially recognised at cost. The Group's investment in associates include goodwill (net of any accumulated impairment loss) identified on acquisition (see Note 27).

The Group's share of its associates' post-acquisition profits or losses is recognised in the income statement and its share of post-acquisition movements in reserves is recognised in reserves. The cumulative post-acquisition movements are adjusted against the carrying amount of the investment. When the Group's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the associates.

2.3 Interest income and expense

Interest income and expense are recognised in the income statement for all instruments measured at amortised cost, available-for-sale securities and certain financial assets/liabilities designated at fair value through profit or loss using the effective interest method.

The effective interest method is a method of calculating the amortised cost of a financial asset or a financial liability and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, the Group estimates cash flows considering all contractual terms of the financial instrument (for example, prepayment options) but does not consider future credit losses. The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs and all other premiums or discounts.

Once a financial asset or a group of similar financial assets has been written down as a result of an impairment loss, interest income is recognised using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss.

2.4 Fee and commission income and expense

Fees and commissions are generally recognised on an accrual basis when the service has been provided. Loan syndication fees are recognised as revenue when the syndication has been completed and the Group retained no part of the loan package for itself or retained a part at the same effective interest rate for the other participants. Wealth management, financial planning and custody services that are continuously provided over an extended period of time are recognised rateably over the period the service is provided.

2.5 金融資產

本集團將其金融資產歸為以下類別:以公平值計量且其變動計入損益的金融資產、貸款及應收款項、持至到期投資及可供出售金融資產。該分類取決於購入該投資之目的。各項分類於管理層作出投資時被確認。

(甲) 以公平值計量且其變動計入損益的金融資產

此類別可細分為兩小類:持作買賣用途之 金融資產及於購入時指定以公平值計量且 其變動計入損益的金融資產。倘所購入之 金融資產主要持作短期買賣用途或倘由管 理層於購入時如此指定,則歸類為持作買 賣用途。衍生工具除非指定作為對沖用 途,否則亦歸類為持作買賣用途。此分類 之資產按公平值計量,而所有因持有而產 生之收益及虧損均於收益賬內確認。

符合下列條件之金融資產一般於購入時指 定歸類為以公平值計量且其變動計入損 益:

- (i) 能消除或大幅地減低以不同基礎計量 或確認資產、或確認其損益而出現不 一致之情況(或稱為「會計錯配」);
- (ii) 根據列明之風險管理或投資策略管理 一組金融資產,並以公平值為基礎評 估其表現,及按相同基準向主要管理 層(如董事會及行政總裁)提供有關資 產的內部資料;或
- (iii) 內嵌衍生工具的金融資產而該內嵌衍 生工具之特性及風險與主合約並非緊 密關連的。

(乙) 貸款及應收款項

貸款及應收款項為沒有活躍市場報價並具 固定或可確定收款金額的非衍生金融資 產。此類資產按扣除減值虧損後之攤餘成 本列示。

2. Summary of significant accounting policies (Continued)

2.5 Financial assets

The Group classifies its financial assets in the following categories: financial assets at fair value through profit or loss, loans and receivables, held-to-maturity investments, and available-for-sale financial assets. The classification depends on the purpose for which the investments were acquired. Management determines the classification of its investments at initial recognition.

(a) Financial assets at fair value through profit or loss

This category has two sub-categories: financial assets held for trading, and those designated at fair value through profit or loss at inception. A financial asset is classified as held for trading if it is acquired principally for the purpose of selling in the short term or if so designated by management. Derivatives are also categorised as held for trading unless they are designated as hedges. Assets in this category are measured at fair value with all holding gains and loss recognised in the income statement.

A financial asset is typically classified as fair value through profit or loss at inception if it meets the following criteria:

- (i) It eliminates or significantly reduces a measurement or recognition inconsistency (sometimes referred to as "an accounting mis-match") that would otherwise arise from measuring assets or recognising the gains and losses on them on different bases;
- (ii) A group of financial assets is managed and its performance is evaluated on a fair value basis, in accordance with a documented risk management or investment strategy, and this is the basis on which information about the assets is provided internally to the key management personnel such as the Board of Directors and Chief Executive Officer; or
- (iii) Financial assets with embedded derivatives where the characteristics and risks of the embedded derivatives are not closely related to the host contracts.

(b) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Assets in this category are carried at amortised cost less any impairment loss.

可供出售金融資產乃被指定為此類者或並無歸入任何其他類別之非衍生金融資產。 可供出售投資乃指有意作無期限持有但可 因應流動資金所需或利率、匯率或股票價 格變動而可出售的投資。

(丁) 持至到期

持至到期投資乃具固定或可釐定付款額及 固定到期日,而本集團管理層有明確意向 及能力持至到期之非衍生金融資產。此類 資產按扣除減值虧損後之攤餘成本列示。

金融資產之買賣於交易日(本集團承諾買賣該資產之日)按公平值加交易費用確認。當該等金融資產之收取現金流之權利已失效或已轉讓及本集團已轉讓所有風險及回報時,則撤銷對該等金融資產之確認。

可供出售之金融資產及以公平值計量且其變動計入損益之金融資產其後以公平值列賬。貸款及應收款項及持至到期投資則應用實際利率法以攤餘成本列賬。「以公平值計量且其變動計入損益的金融資產」類別之公平值變動所產生之收益及虧損於其產生期間列入收益賬。可供出售金融資產之公平值變動而產生之未變現收益及虧損於權益賬中直接確認,直至有關金融資產被撤銷確認或減值時,以往於權益賬內確認之累積收益或虧損則必須於收益賬中確認。然而,利用實際利率法計算之利息乃於收益賬中確認。可供出售股本工具之股息在本集團確定獲派股息權利時於收益賬確認。

2. Summary of significant accounting policies (Continued)

2.5 Financial assets (Continued)

(c) Available-for-sale

Available-for-sale financial assets are non-derivatives that are either designated in this category or not classified in any of the other categories. Available-for-sale investments are those intended to be held for an indefinite period of time, which may be sold in response to needs for liquidity or changes in interest rates, exchange rates or equity prices.

(d) Held-to-maturity

Held-to-maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturities that the Group's management has the positive intention and ability to hold to maturity. Assets in this category are carried at amortised cost less any impairment loss.

Purchases and sales of financial assets are recognised on the trade date – the date on which the Group commits to purchase or sell the asset. Financial assets are initially recognised at fair value plus transaction costs. Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the Group has transferred substantially all risks and rewards of ownership.

Available-for-sale financial assets and financial assets at fair value through profit or loss are subsequently carried at fair value. Loans and receivables and held-to-maturity investments are carried at amortised cost using the effective interest method. Gains and losses arising from changes in the fair value of the "financial assets at fair value through profit or loss" category are included in the income statement in the period in which they arise. Unrealised gains and losses arising from changes in the fair value of available-for-sale financial assets are recognised directly in equity, until the financial asset is derecognised or impaired at which time the cumulative gain or loss previously recognised in equity should be recognised in the income statement. However, interest calculated using the effective interest method is recognised in the income statement. Dividends on available-for-sale equity instruments are recognised in the income statement when the Group's right to receive payment is established.

2.5 Financial assets (Continued)

The fair values of quoted investments are based on current bid prices. If the market for a financial asset is not active (and for unlisted securities), the Group establishes fair value by using valuation techniques. These include the use of recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, and option pricing models refined to reflect the issuer's specific circumstances.

2.6 Impairment of financial assets

(a) Assets carried at amortised cost

The Group assesses at each balance sheet date whether there is objective evidence that a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is impaired and impairment losses are incurred if, and only if, there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated. Objective evidence that a financial asset or group of assets is impaired includes observable data that comes to the attention of the Group about the following loss events:

- (i) significant financial difficulty of the issuer or obligor;
- (ii) a breach of contract, such as a default or delinquency in interest or principal payments;
- (iii) the Group granting to the borrower, for economic or legal reasons relating to the borrower's financial difficulty, a concession that the lender would not otherwise consider:
- (iv) it becoming probable that the borrower will enter into bankruptcy or other financial reorganisation;
- (v) the disappearance of an active market for that financial asset because of financial difficulties; or

- (a) Assets carried at amortised cost (Continued)
- (vi) observable data indicating that there is a measurable decrease in the estimated future cash flows from a group of financial assets since the initial recognition of those assets, although the decrease cannot yet be identified with the individual financial assets in the group, including:
 - adverse changes in the payment status of borrowers in the group; or
 - national or local economic conditions that correlate with defaults on the assets in the group.

The Group first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, and individually or collectively for financial assets that are not individually significant. If the Group determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes that asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment. Assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognised are not included in a collective assessment of impairment.

If there is objective evidence that an impairment loss on loans and receivables or held-to-maturity investments carried at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognised in the income statement. If a loan or held-to-maturity investment has a variable interest rate, the discount rate for measuring any impairment loss is the current effective interest rate determined under the contract. As a practical expedient, the Group may measure impairment on the basis of an instrument's fair value using an observable market price.

2.6 Impairment of financial assets (Continued)

(a) Assets carried at amortised cost (Continued)

The calculation of the present value of the estimated future cash flows of a collateralised financial asset reflects the cash flows that may result from foreclosure less costs for obtaining and selling the collateral, whether or not foreclosure is probable.

For the purposes of a collective evaluation of impairment, financial assets are grouped on the basis of similar credit risk characteristics (i.e. on the basis of the Group's grading process that considers asset type, collateral type, overdue status and other relevant factors). Those characteristics relevant to the estimation of future cash flows for groups of such assets by being indicative of the debtors' ability to pay all amounts due according to the contractual terms of the assets are considered.

Future cash flows in a group of financial assets that are collectively evaluated for impairment are estimated on the basis of the contractual cash flows of the assets in the group and historical loss experience for assets with credit risk characteristics similar to those in the group. Historical loss experience is adjusted on the basis of current observable data to reflect the effects of current conditions that did not affect the period on which the historical loss experience is based and to remove the effects of conditions in the historical period that do not exist currently.

Estimates of changes in future cash flows for groups of assets should reflect and be directionally consistent with changes in related observable data from period to period (for example, changes in unemployment rates, property prices, payment status, or other factors indicative of changes in the probability of losses in the group and their magnitude). The methodology and assumptions used for estimating future cash flows are reviewed regularly by the Group to reduce any differences between loss estimates and actual loss experience.

When a loan is uncollectible, it is written off against the related allowances for loan impairment. Such loans are written off after all the necessary procedures have been completed and the amount of the loss has been determined. Subsequent recoveries of amounts previously written off decrease the amount of the allowances for loan impairment in the income statement.

2.6 Impairment of financial assets (Continued)

(a) Assets carried at amortised cost (Continued)

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised (such as an improvement in the debtor's credit rating), the previously recognised impairment loss is reversed by adjusting the allowance account. The amount of the reversal is recognised in the income statement.

(b) Assets carried at fair value

The Group assesses at each balance sheet date whether there is objective evidence that a financial asset or a group of financial assets is impaired. In the case of equity investments classified as available-for-sale, a significant or prolonged decline in the fair value of the security below its cost is considered in determining whether the assets are impaired. If any such evidence exists for available-for-sale financial assets, the cumulative loss measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognised in profit or loss is removed from equity and recognised in the income statement. Impairment losses recognised in the income statement on equity instruments are not reversed through the income statement. If, in a subsequent period, the fair value of a debt instrument classified as availablefor-sale increases and the increase can be objectively related to an event occurring after the impairment loss was recognised in profit or loss, the impairment loss is reversed through the income statement.

2.7 金融負債

金融負債歸類為兩個類別:以公平值計量且其變動計入損益的金融負債及其他金融負債。所有金融負債均於產生時分類,並初步以公平值確認。

(甲) 以公平值計量且其變動計入損益的金 融負債

此類別細分為兩個小類別:持作買賣用途 之金融負債及於產生時指定以公平值計量 且其變動計入損益的金融負債。

倘金融負債主要為短期持有作購回用途, 則歸類為持有作買賣用途。此分類之負債 按公平值列示,而任何因公平值變動而產 生之收益及虧損均於收益賬內確認。

符合下列條件之金融負債一般歸類為於產 生時以公平值計量且其變動計入損益:

- (i) 能消除或大幅地減低以不同基礎計量 或確認負債、或確認其損益而出現不 一致之情況(或稱為「會計錯配」);
- (ii) 根據列明之風險管理或投資策略管理 一組金融負債,並以公平值為基礎評 估其表現,及按相同基準向主要管理 層(如董事會及行政總裁)提供有關負 債的內部資料;或
- (iii) 內嵌衍生工具的金融負債而該內嵌衍 生工具之特性及風險與主合約並非緊 密關連的。

指定以公平值計量且其變動計入損益的金融負債(包括發行的債務證券及若干內嵌衍生工具的客戶存款),於開始時或新香港財務報告準則之過渡期內確定。以公平值計量且其變動計入損益的金融負債按公平值列示,而任何因公平值變動而產生之收益及虧損均於收益賬內確認。

2.7 Financial liabilities

Financial liabilities are classified into two categories: financial liabilities at fair value through profit or loss and other financial liabilities. All financial liabilities are classified at inception and recognised initially at fair value.

(a) Financial liabilities at fair value through profit or loss

This category has two sub-categories: financial liabilities held for trading, and those designated at fair value through profit or loss at inception.

A financial liability is classified as held for trading if it is incurred principally for the purpose of repurchasing in the short term. It is carried at fair value and any gains and losses from changes in fair value are recognised in the income statement.

A financial liability is typically classified as fair value through profit or loss at inception if it meets the following criteria:

- (i) It eliminates or significantly reduces a measurement or recognition inconsistency (sometimes referred to as "an accounting mis-match") that would otherwise arise from measuring liabilities or recognising the gains and losses on them on different bases:
- (ii) A group of financial liabilities is managed and its performance is evaluated on a fair value basis, in accordance with a documented risk management or investment strategy, and this is the basis on which information about the liabilities is provided internally to the key management personnel such as the Board of Directors and Chief Executive Officer; or
- (iii) Financial liabilities with embedded derivatives where the characteristics and risks of the embedded derivatives are not closely related to the host contracts.

Financial liabilities designated as at fair value through profit or loss, including the Group's own debt securities in issue and deposits received from customers that are embedded with certain derivatives, are designated as such at inception or date of transition to the new HKFRS. Financial liabilities designated at fair value through profit or loss are carried at fair value and any gains and losses from changes in fair value are recognised in the income statement.

(乙) 其他金融負債

其他金融負債以攤餘成本列賬。扣除交易 費用後所得款項與贖回價值兩者之差額, 按實際利率法於其他有關負債期間內於收 益賬確認。

倘本集團購買其本身債項,該債項將會自 資產負債表中剝離,而負債的賬面值與已 支付價格的差額包括於淨買賣收入。

2.8 衍生金融工具及對沖會計處理

衍生工具最初於訂立衍生工具合約之日按公平值確認,其後按公平值重新計量。公平值乃根據活躍市場的報價釐定,包括最近市場交易及估值方法(包括現金流量貼現模式及期權定價模式,倘適用)。當衍生工具的公平值為正數時,均作為資產入賬;當公平值為負數時,則作為負債入賬。

首次確認衍生工具的公平值以其交易價格(即所支付或所收取之代價的公平值)為最佳方法。

倘當其他金融工具之內嵌某些衍生工具(例如可換股債券內之兑換期權)的經濟性質及風險與主合約並無密切關係時,而主合約並非以公平值計量且其變動計入損益賬,則作為個別衍生工具處理。此等內嵌之衍生工具按公平值計算,其公平值的變動於收益賬內確認。

確認公平值收益或虧損的方法取決於該衍生工具是否被指定為對沖工具,如屬者則須取決其對沖項目之性質。本集團指定若干衍生工具為已確認資產公平值的對沖工具。以此方法指定並符合若干條件的衍生工具應用對沖會計處理。

2. Summary of significant accounting policies (Continued)

2.7 Financial liabilities (Continued)

(b) Other financial liabilities

Other financial liabilities are carried at amortised cost. Any difference between proceeds net of transaction costs and the redemption value is recognised in the income statement over the period of the other financial liabilities using the effective interest method.

If the Group purchases its own debt, it is removed from the balance sheet, and the difference between the carrying amount of a liability and the consideration paid is included in net trading income.

2.8 Derivative financial instruments and hedge accounting

Derivatives are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at their fair value. Fair values are obtained from quoted market prices in active markets, including recent market transactions, and valuation techniques, including discounted cash flow models and options pricing models, as appropriate. All derivatives are carried as assets when fair value is positive and as liabilities when fair value is negative.

The best evidence of the fair value of a derivative at initial recognition is the transaction price (i.e. the fair value of the consideration given or received).

Certain derivatives embedded in other financial instruments, such as the conversion option in a convertible bond, are treated as separate derivatives when their economic characteristics and risks are not closely related to those of the host contract and the host contract is not carried at fair value through profit or loss. These embedded derivatives are measured at fair value with changes in fair value recognised in the income statement.

The method of recognising the resulting fair value gain or loss depends on whether the derivative is designated as a hedging instrument, and if so, the nature of the item being hedged. The Group designates certain derivatives as hedges of the fair value of recognised assets. Hedge accounting is used for derivatives designated in this way provided certain criteria are met.

若干衍生工具並不符合作對沖會計處理。 任何不符合作對沖會計處理的衍生工具的 公平值變動即時於收益賬內確認。

2.9 抵銷金融工具

倘有可執行法律權利抵銷某些已確認金額及有意 以淨額基準結算或變現資產以同時清償負債時, 金融資產及負債將互相抵銷,有關之淨款項於資 產負債表內呈報。

2.10 出售及回購協議

有關出售附有回購協議(「回購協議」)之證券所引致之對交易對手負債已適當地包含在「對其他銀行之結欠」、「銀行存款」或「其他賬目及預提」中之結餘。按再售協議(「反向回購協議」)而購入之證券已記錄在「貸款及墊款予其他銀行」或「客戶貸款及墊款」中。出售價與回購價之差額當作利息處理及應用實際利率法在該協議期限內計提。借予交易對手之證券則保留在財務報表內。

2. Summary of significant accounting policies (Continued)

2.8 Derivative financial instruments and hedge accounting (Continued)

The Group documents, at the inception of the transaction, the relationship between hedging instruments and hedged items, as well as its risk management objective and strategy for undertaking various hedge transactions. The Group also documents its assessment, both at hedge inception and on an ongoing basis, of whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in fair values of hedged items.

(a) Fair value hedge

Changes in the fair value of derivatives that are designated and qualify as fair value hedges are recorded in the income statement, together with any changes in the fair value of the hedged asset that are attributable to the hedged risk.

If the hedge no longer meets the criteria for hedge accounting, the adjustment to the carrying amount of a hedged item for which the effective interest method is used is amortised to profit or loss over the period to maturity.

(b) Derivatives that do not qualify for hedge accounting

Certain derivative instruments do not qualify for hedge accounting. Changes in the fair value of any derivative instrument that does not qualify for hedge accounting are recognised immediately in the income statement.

2.9 Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

2.10 Sale and repurchase agreements

The counterparty liability in respect of securities sold subject to repurchase agreements ("repos") is included in amounts due to other banks, deposits from banks, or other accounts and accruals, as appropriate. Securities purchased under agreements to resell ("reverse repos") are recorded as loans and advances to other banks or customers, as appropriate. The difference between the sale and repurchase price is treated as interest and accrued over the life of the agreements using the effective interest method. Securities lent to counterparties are also retained in the financial statements.

(Expressed in thousands of Hong Kong dollars)

Securities borrowed are not recognised in the financial statements, unless these are sold to third parties, in which case the purchases and sales are recorded with the gain or loss included in trading income. The obligation to return them is recorded at fair value as a trading liability.

2.11 Repossessed assets

Repossessed collateral assets are reported under "Other assets" and the relevant loans are derecognised. The repossessed collateral assets are measured at lower of carrying amount and net realisable value.

2.12 Segment reporting

In accordance with the Group's internal financial reporting policy, the Group has determined that business segments be presented as the primary reporting format and geographical segment information as the secondary reporting format.

Business segments are distinguishable business divisions of the Group that provide products and services to customer base or dealing with the market that are different to those of other business segments.

Geographical segments are grouped by the location of the principal operations of the subsidiaries or in the case of banking subsidiaries, of the location of the branches responsible for reporting the results including assets and liabilities.

For the purpose of segment reporting, revenue derived from customers, products and services directly identifiable with individual business or geographical segments are reported directly under respective segment, while revenue and funding cost arising from inter-segment funding operation and funding resources are allocated to the business segments by way of transfer pricing mechanism with reference to market interest rates. Transactions within segments are priced based on similar terms offered to or transacted with external parties. Inter-segment income or expenses are eliminated on consolidation.

All direct costs incurred by different segments are grouped under respective segments. Indirect costs and support functions' costs are allocated to various business segments and products based on effort and time spent as well as segments' operating income depending on the nature of costs incurred. Costs related to corporate activities that cannot be reasonably allocated to business segments, products and support functions are grouped under unallocated items.

2.13 Foreign currency translation

(a) Functional and presentation currency

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates ("the functional currency"). The consolidated financial statements are presented in HK dollars, which is the Group's presentation currency and the functional currency of the major part of the Group.

(b) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the income statement.

Translation differences on non-monetary items, such as investment in equity instruments held at fair value through profit or loss, are reported as part of the fair value gain or loss. Translation difference on certain other non-monetary items, such as equities classified as available-for-sale financial assets, are included in the fair value reserve in equity.

(c) Group companies

The results and financial position of all the group entities (none of which has the currency of a hyperinflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- assets and liabilities for each balance sheet presented are translated at the closing rate at the date of that balance sheet;
- (ii) income and expenses for each income statement are translated at average exchange rates (unless this average is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the dates of the transactions); and

On consolidation, exchange differences arising from the translation of the net investment in foreign entities are taken to shareholders' equity. When a foreign operation is sold, such exchange differences are recognised in the income statement as part of the gain or loss on sale.

Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing rate.

2.14 Premises and other fixed assets

Leasehold properties comprising land and buildings held on which a reliable estimate is not available on the split of the carrying value attributable to each of the land and building elements are accounted for as finance leases and shown at fair value, based on periodic, and at least triennial, valuations by external independent valuers, less subsequent depreciation. Any accumulated depreciation at the date of revaluation is eliminated against the gross carrying amount of the asset and the net amount is restated to the revalued amount of the asset. All other property, plant and equipment are stated at historical cost less depreciation and impairment losses. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. All other repairs and maintenance are expensed in the income statement during the financial period in which they are incurred.

Increases in the carrying amount arising on revaluation of premises are credited to premises revaluation reserve in shareholders' equity. Decreases that offset previous increases of the same asset are charged against fair value reserves directly in equity; all other decreases are expensed in the income statement.

自二零零七年一月一日起,按行產之經重估賬面值計算並於損益賬支出之折舊與按行產原值計算之折舊的差額,已由行產重估儲備轉撥至保留盈利項下。此乃一項會計政策改變並已被追溯應用。保留盈利及行產重估儲備之期初餘額及其相關比較數額已相應地重列,且對股東權益總額並無影響。

資產之剩餘價值及使用年期於每年結算日將被評估,並在合適之情況下作出調整。

投資物業最初以成本值(包括相關交易費用)計量。

2. Summary of significant accounting policies (Continued)

2.14 Premises and other fixed assets (Continued)

Depreciation of premises and other fixed assets is calculated using the straight-line method to allocate cost or revalued amounts to their residual values over their estimated useful lives, as follows:

- Premises Over the remaining period of lease

- Furniture, fittings, equipment Over the estimated useful lives and motor vehicles generally between 5 and 10 years

With effect from 1 January 2007, the difference between depreciation based on the revalued carrying amount of premises charged to the income statement and depreciation based on the premises' original cost is transferred from premises revaluation reserve to retained earnings. This represents a change in accounting policy which has been applied retrospectively. The opening balances of retained profit and premises revaluation reserve and the corresponding comparative figures have been restated accordingly and there is no net impact to the total shareholders' equity.

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each balance sheet date.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount (Note 2.17).

2.15 Investment properties

Property that is held for long-term rental yields or for capital appreciation or both, and that is not occupied by the companies in the consolidated Group, is classified as investment property.

Investment property comprises land held under operating lease and buildings held under finance lease.

Land held under operating lease is classified and accounted for as investment property when the rest of the definition of investment property is met. The operating lease is accounted for as if it were a finance lease.

Investment property is measured initially at its cost, including related transaction costs.

2.15 投資物業(續)

在初始確認後,投資物業按公平值列賬。公平值 乃以活躍市場之價格為基礎,於需要時就特定之 資產性質、地點或狀況之任何差異作出調整。倘 該等資料無法得到,本集團則應用替代估值法, 例如按次活躍市場最近之價格或貼現現金流量預 測進行估值。該等估值乃依照國際估值準則委員 會頒佈之指引完成。該等估值每年由外聘估值師 進行。重建並持續用作投資物業之投資物業,或 其市場活躍度下降之投資物業繼續按公平值計 量。

投資物業之公平值反映(其中包括)現時租賃之租 金收入及按現行市況預期之未來租金收入。

只有當與該項目可能給本集團帶來關連之未來經濟利益及該項目之成本可被可靠地計量時,後期開支才會計入該資產之賬面值。所有其他維修支出於其產生之相關財政期間記入收益賬內。

公平值變動於收益賬內確認。

倘投資物業由本集團旗下公司所佔用,則重新歸類為行產及其他固定資產,其於重新歸類日期之公平值將成為其成本值。

倘某些行產及其他固定資產因其用途改變而轉為 投資物業,根據香港會計準則第16號,該資產於 轉讓日之賬面值與公平值間任何差額,將當作行 產及其他固定資產之重估而確認於權益賬內。然 而,倘該公平值增值抵銷過往之減值虧損,該增 值則於收益賬內確認。

2. Summary of significant accounting policies (Continued)

2.15 Investment properties (Continued)

After initial recognition, investment property is carried at fair value. Fair value is based on active market prices, adjusted, if necessary, for any difference in the nature, location or condition of the specific asset. If this information is not available, the Group uses alternative valuation methods such as recent prices on less active markets or discounted cash flow projections. These valuations are performed in accordance with the guidance issued by the International Valuation Standards Committee. These valuations are reviewed annually by external valuers. Investment property that is being redeveloped for continuing use as investment property, or for which the market has become less active, continues to be measured at fair value.

The fair value of investment property reflects, among other things, rental income from current leases and assumptions about rental income from future leases in the light of current market conditions.

Subsequent expenditure is charged to the asset's carrying amount only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. All other repairs and maintenance costs are expensed in the income statement during the financial period in which they are incurred.

Changes in fair values are recognised in the income statement.

If an investment property becomes owner-occupied, it is reclassified as property, plant and equipment, and its fair value at the date of reclassification becomes its cost for accounting purposes.

If an item of premises and other fixed assets becomes an investment property because its use has changed, any difference resulting between the carrying amount and the fair value of this item at the date of transfer is recognised in equity as a revaluation of premises and other fixed assets under HKAS 16. However, if a fair value gain reverses a previous impairment loss, the gain is recognised in the income statement.

2.16 商譽及無形資產

商譽指收購之成本超逾本集團應佔被收購者於收 購日期之可認明資產及負債公平值淨值之金額。 商譽按成本減所有累積虧損列示。商譽將每年進 行減值測試。商譽的減值虧損不能回撥,出售實 體之收益及虧損包含該出售實體之商譽賬面值。

商譽須被分配至各現金產生單位以作為其減值測 試。所分配之單位為預期可受惠於產生該商譽之 業務合併之各現金產生單位或各組現金產生單 位。

倘因收購而產生之無形資產可與商譽獨立確認, 或倘因合約或其他法律權利而產生之無形資產, 及其價值可以可靠地估計,則無形資產與商譽分 開確認。無形資產包括核心存款、合約及客戶關 係無形資產,以及商標。無形資產根據預計使用 年期按成本減攤銷及/或累積減值虧損列示。

2.17 商譽、無形資產及非金融資產之減值

具無使用期限或未能使用之資產將不會被攤銷,但每年須作減值測試。倘出現某些事件或環境變化顯示其賬面值可能不可收回時,該等須作攤銷之資產將作減值檢查。資產賬面值超逾可收回金額之數額被確認為減值虧損。可收回金額乃扣除出售費用後之資產公平值及使用價值之較高者。該等資產按最原始類別分類從而分別認明其現金流(現金產生單位),藉以用作減值評估用途。除商譽外,減值資產於各報告期就其減值之回撥可能性作出審閱。

2.16 Goodwill and intangible assets

Goodwill represents the excess of the cost of an acquisition over the Group's share of the net fair value of the identifiable assets and liabilities of the acquire as at the date of acquisition. Goodwill is carried at cost less any accumulated impairment losses. Goodwill is tested annually for impairment. Impairment losses on goodwill are not reversed. Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold.

Goodwill is allocated to cash-generating units for the purpose of impairment testing. The allocation is made to those cash-generating units or groups of cash-generating units that are expected to benefit from the business combination on which the goodwill arose.

Intangible assets arising from an acquisition are recognised separately from goodwill when they are separable or arise from contractual or other legal rights, and their value can be measured reliably. They include core deposits, contracts and customer relationships intangible assets, and trade names. Intangible assets are stated at cost less amortisation based on estimated useful lives, and/or accumulated impairment losses.

2.17 Impairment of goodwill, intangible assets and non-financial assets

Assets that have an indefinite useful life or are not yet available for use are not subject to amortisation, but are tested annually for impairment. Assets that are subject to amortisation are reviewed for impairment whenever events or changes in circumstances indicated that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cashgenerating units). Assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at each reporting date.

遞延税項乃根據資產及負債的税基值及其於綜合 財務報表內賬面值之暫時差異按負債法全面撥 備。然而,倘遞延税項乃來自初步確認資產或負 債交易(並非業務合併),且交易時並不影響會計 盈虧及應課税溢利或虧損,則另作別論。遞延税 項應用於結算日已經或基本已經實施及預計於相 關遞延稅項資產變現或遞延稅項負債清償時將適 用之稅率釐定。

倘暫時差異可用以對銷日後有可能出現之應課稅 溢利時,應列作遞延所得稅資產入賬。

除非暫時差異之撥回由本集團控制及該暫時差異 很可能不會在可見未來撥回,本集團已就投資於 附屬公司、聯營公司及共同控制實體而產生之暫 時差異作出撥備。

2.18 Deferred income tax

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, if the deferred income tax arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit nor loss, it is not accounted for. Deferred income tax is determined using tax rates that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred income tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Deferred income tax is provided on temporary differences arising on investments in subsidiaries, associates and jointly controlled entities, except where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future.

Income tax payable on profits, based on the applicable tax law in each jurisdiction, is recognised as an expense in the period in which profits arise. The tax effects of income tax losses available for carry forward are recognised as an asset when it is probable that future taxable profits will be available against which these losses can be utilised.

Deferred income tax related to fair value re-measurement of availablefor-sale investments, which is charged or credited directly to equity, is also credited or charged directly to equity and is subsequently recognised in the income statement upon the realisation of relevant investments.

2.19 Employee benefits

(a) Pension obligations

The Group offers a mandatory provident fund scheme and a number of defined contribution plans, the assets of which are generally held in separate trustee-administered funds. These pension plans are funded by payments from employees and by the relevant Group companies.

The Group's contributions to the mandatory provident fund schemes and defined contribution retirement schemes are expensed as incurred. Other than mandatory provident fund contribution, the Group's contributions may be reduced by contributions forfeited by those employees who leave prior to vesting fully in the contributions.

(b) Share-based compensation

The Group operates a cash settled, share-based compensation plan, which requires the Group to pay the intrinsic value of the share option to a grantee at the date of exercise. The total amount to be expensed over the vesting period is determined by reference to the fair value of the options granted. At each balance sheet date, the Group will re-measure the fair value of the share options and any change is recognised in the income statement.

(c) Employee leave entitlements

Employee entitlements to annual leave and long service leave are recognised when they accrue to employees. An accrual is made for the estimated liability for annual leave and long service leave as a result of services rendered by employees up to the balance sheet date.

(d) Bonus plans

Liabilities for bonus plans due wholly within twelve months after the balance sheet date are recognised when the Group has a present or constructive obligation as a result of services rendered by employees and a reliable estimate of the obligation can be made.

2.20 撥備

倘本集團因過往事件而產生即時法律或推定責任:可能須就解除責任而導致經濟資源流失之可能性高於不會導致資源流失之可能性;及可就承擔之款額作出可靠估計時,則需確認重組成本及法律索償之撥備。重組撥備包括終止租賃罰金及終止聘約付款。未來經營虧損則不會確認為撥備。

倘有多項同類責任時,解除該等責任導致損失之可能性按責任之類別作整體釐定。即使在同一類 別責任內任何一項目導致損失之可能性可能會很小,亦需就此確認撥備。

2.21 租賃

(甲) 經營租賃

出租人仍保留重大風險及回報之租賃歸類 為經營租賃。經營租賃內之支出(經扣除收 取自出租人之任何優惠),於租賃期間以直 線法在收益賬中支銷。

根據經營租賃,倘本集團為出租人時,訂 約出租之資產在資產負債表列為固定資 產。該等資產按自有同類固定資產之基 準,於其預計使用年期內折舊。租金收入 扣除給予承租人之任何優惠後以直線法於 租賃期限內確認。

(乙) 融資租賃

倘本集團重大地保留擁有權之所有風險及 回報,有關資產租賃則歸類為融資租賃。 融資租賃在租賃開始時按租賃物業之公平 值及最低租賃付款之現值中較低者作資產 化。每項租賃付款在負債及融資支出間作 出分配以達致未償融資餘額反映固定息 率。扣除融資支出後相應之租賃責任則包 括於負債內。根據融資租賃而收購之投資 物業按其公平值列值。

2.20 Provisions

Provisions for restructuring costs and legal claims are recognised when: the Group has a present legal or constructive obligation as a result of past events; it is more likely than not that an outflow of resources will be required to settle the obligation; and the amount has been reliably estimated. Restructuring provisions comprise lease termination penalties and employee termination payments. Provisions are not recognised for future operating losses.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

2.21 Leases

(a) Operating lease

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are expensed in the income statement on a straight-line basis over the period of the lease.

Where the Group is a lessor under operating leases, assets leased out are included in fixed assets in the balance sheet. They are depreciated over their expected useful lives on a basis consistent with similar owned fixed assets. Rental income (net of any incentives given to lessees) is recognised on a straight-line basis over the lease term.

(b) Finance lease

Leases of assets where the Group has substantially retained all the risks and rewards of ownership are classified as finance leases. Finance leases are capitalised at the lease's commencement at the lower of the fair value of the leased property and the present value of the minimum lease payments. Each lease payment is allocated between the liability and finance charges so as to achieve a constant rate on the finance balance outstanding. The corresponding rental obligations, net of finance charges, are included as liabilities. The investment properties acquired under finance leases are carried at their fair value.

2.22 受託業務

2.21 Leases (Continued)

(b) Finance lease (Continued)

Where the Group is a lessor under finance leases, the amounts due under the leases, net of unearned finance income, are recognised as a receivable and are included in "Advances and other accounts". Finance income implicit in rentals receivable is credited to the income statement over the lease period so as to produce a constant periodic rate of return on the net investment outstanding for each accounting period.

2.22 Fiduciary activities

The Group commonly acts as trustees and in other fiduciary capacities that result in the holding or placing of assets on behalf of individuals, trusts and other institutions. These assets are excluded from the Group's financial statements, as they are not assets of the Group.

2.23 Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax, from the proceeds.

2.24 Cash and cash equivalents

For the purposes of the cash flow statement, cash and cash equivalents comprise balances with less than three months' maturity from the date of acquisition, including: cash, balances with banks and other financial institutions, treasury bills, other eligible bills and certificates of deposit and investment securities which are readily convertible to cash and are subject to an insignificant risk of changes in value.

2.25 Financial guarantee contracts

Financial guarantee contracts are contracts that require the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payments when due, in accordance with the terms of a debt instrument. Such financial guarantees are given to banks, financial institutions and other bodies on behalf of customers to secure loans, overdrafts and other banking facilities, and to other parties in connection with the performance of customers under obligations related to contracts, advance payments made by other parties, tenders, retentions and the payment of import duties.

或然資產不會被確認,但會於經濟收益有可能獲 得時在財務報表附註中披露。若實質確定有收益 獲得時,則被確認為資產。

2. Summary of significant accounting policies (Continued)

2.25 Financial guarantee contracts (Continued)

Financial guarantees are initially recognised in the financial statements at fair value on the date the guarantee was given. Subsequent to initial recognition, the Group's liabilities under such guarantees are measured at the higher of the amount determined in accordance with HKAS 37 Provisions, Contingent Liabilities and Contingent Assets and the amount initially recognised less cumulative amortisation recognised. Any changes in the liability relating to financial guarantees are taken to the income statement.

2.26 Contingent liabilities and contingent assets

A contingent liability is a possible obligation that arises from past events and whose existence will only be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Group. It can also be a present obligation arising from past events that is not recognised because it is not probable that an outflow of economic resources will be required or the amount of obligation cannot be measured reliably.

A contingent liability is not recognised but is disclosed in the notes to the financial statements. When a change in the probability of an outflow occurs so that outflow is probable, it will then be recognised as a provision.

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain events not wholly within the control of the Group.

A contingent asset is not recognised but is disclosed in the notes to the financial statements when an inflow of economic benefits is probable. When such inflow is virtually certain, an asset is recognised.

3. 財務風險管理

本集團之營運業務承受著不同之財務風險,該等業務活動涉及分析、評估、接受及管理若干程度之風險或組合風險。須承擔風險乃金融業務之核心部份,而操作風險乃從事業務不可避免之後果。因此,本集團之目標為適當地平衡風險與回報,並將對本集團財務表現所潛在的不良影響減至最低。

本集團之風險管理政策旨在認明及分析此等風險,設定合適之風險額度和控制,監控風險及使用可靠和先進之資訊系統以嚴守額度。本集團定期審視其風險管理政策及系統以反映市場、產品及最佳慣例之變化。

3. Financial risk management

The Group's activities expose it to a variety of financial risks and those activities involve the analysis, evaluation, acceptance and management of some degree of risk or combination of risks. Taking risk is core to the financial business, and operational risks are an inevitable consequence of being in business. The Group's aim is therefore to achieve an appropriate balance between risk and return and minimise potential adverse effects on the Group's financial performance.

The Group's risk management policies are designed to identify and analyse these risks, to set appropriate risk limits and controls, and to monitor the risks and adherence to limits by means of reliable and upto-date information systems. The Group regularly reviews its risk management policies and systems to reflect changes in markets, products and emerging best practice.

風險管理乃遵循董事會批准之整體策略和政策而 執行。董事會授權行政委員會監督及指導不同風 險之管理,並由集團風險部及不同之功能委員會 專責管理和處理。此外,內部審核處負責獨立審 查風險管理及控制狀況。

最主要之風險類別為信貸風險、流動資金風險、 市場風險和操作風險。市場風險包括外匯風險、 利率風險及定價風險。

3.1 應用金融工具策略

本集團接受定息或浮息及不同年期之客戶存款, 並透過投資所收取之資金於高質素資產以賺取息 差收入。本集團尋求透過整合短期資金及按較高 利率借出較長期之款項以增加此等息差收入,同 時並保持足夠之流動資金以應付可能須付之所有 到期債務。

集團亦按信貸風險及市場情況,透過向不同信貸級別之商業及零售借款人貸款,以合理利率及服務費用,提高息差。此等活動風險不單涉及資產負債表內之貸款及墊款,亦涉及本集團提供擔保及其他承擔,例如信用證及其他承諾。

本集團亦通過交易所及場外交易買賣包括衍生工 具之金融工具,藉著證券、債券、貨幣、利率及 商品價格之短期波動賺取利潤。董事會制定交易 限額以控制不同程度之市場持倉風險。除指定對 沖安排外,有關外匯及利率之風險一般以訂立對 銷持倉(包括與客戶及市場對手之交易)或利用衍 生工具作對沖,藉此控制有關市場持倉套現之現 金淨值。

3. Financial risk management (Continued)

(Expressed in thousands of Hong Kong dollars)

Risk management is carried out pursuant to the overall strategy and policies approved by the Board of Directors. The Executive Committee under the authority delegated by the Board oversees and guides the management of different risks which are more particularly managed and dealt with by the Group Risk and different functional committees. In addition, Internal Audit is responsible for the independent review of risk management and the control environment.

The most important types of risk are credit risk, liquidity risk, market risk and operational risk. Market risk includes currency risk, interest rate and other price risk.

3.1 Strategy in using financial instruments

The Group accepts deposits from customers at both fixed and floating rates, and for various periods, and seeks to earn positive interest margins by investing these funds in high-quality assets. The Group seeks to increase these margins by consolidating short-term funds and lending for longer periods at higher rates, while maintaining sufficient liquidity to meet all claims that might fall due.

The Group also seeks to raise its interest margins through lending to commercial and retail borrowers with a range of credit standing by charging customers appropriate lending rates and fees, taking into consideration credit risk and market conditions. Such exposures involve not just on-balance sheet loans and advances, as the Group also enters into guarantees and other commitments such as letters of credit, performance and other bonds.

The Group also trades in financial instruments where it takes positions in exchange-traded and over-the-counter instruments, including derivatives, to take advantage of short-term market movements in equities and bonds and in currency, interest rate and commodity prices. The Board places trading limits on the level of exposure that can be taken in relation to market positions. Apart from specific hedging arrangements, foreign exchange and interest rate exposures are normally offset by entering into counterbalancing positions (including transactions with customers or market counterparties), or by the use of derivatives, thereby controlling the variability in the net cash amounts required to liquidate market positions.

3. 財務風險管理(續)

3.1 應用金融工具策略(續)

本集團亦應用利率掉期及其他利率衍生工具以減輕因利率變動令定息資產公平值下降或定息有期負債公平值上升之利率風險。若干金融工具被用作公平值對沖,對沖項目之細節,包括被對沖項目、金額、利率、對沖期及目的,皆於各公平值對沖項目開始時被確定和記錄,亦於開始對沖時按預期基礎評估及不時根據實際經驗及估價重新評估對沖有效性。倘公平值對沖關係不符合對沖會計的有效性測試標準,則對沖會計方法將於此公平值對沖失效日起停止。

3.2 信貸風險

本集團之主要信貸風險為借款人或交易對手未能履行對本集團之償款責任。此等責任乃源自本集團之貸款及投資活動、以及金融工具之買賣(包括衍生工具)。

本集團設有集團信貸委員會,每部門均設有信貸委員會,由若干執行董事及高級信貸人員組成,並由行政總裁擔任主席。每個信貸委員會負責按集團風險部政策所訂下之範圍及管理架構內,制訂及修訂其部門之信貸政策及程序。信貸政策及程序界定提供信貸評估及批准之條件及指引、信貸批核及評分、檢討及監察過程,以及貸款分類及減值之制度。

本集團根據業務、財務、市場及行業風險,評估不同類型的客戶及交易對方的信貸風險值,並按信貸批核及檢討政策而審慎地管理各類型的信貸風險。不同的管理階層會基於已制定的指引而批核各種信貸產品、客戶或交易對手及信貸額。管理層、信貸委員會及集團風險部會定期監察及控制信貸風險、信貸限額及資產質素。本集團內部審核師會作定期審核及檢查以確保信貸政策,程序及規管指引得以遵從。

3. Financial risk management (Continued)

3.1 Strategy in using financial instruments (Continued)

The Group also uses interest rate swap and other interest rate derivatives to mitigate interest rate risk arising from changes in interest rates that will result in decrease in the fair value of fixed rate assets or increase in the fair value of fixed rate term liabilities. Certain of these financial instruments are designated as fair value hedges, and the terms of hedge including hedged item, amount, interest rates, hedge period and purpose are determined and documented at the inception of each fair value hedge. Hedge effectiveness is assessed at inception on a prospective basis and is reassessed, on an ongoing basis, based on actual experience and valuation. Fair value hedge relationships that do not meet the effectiveness test requirement of hedge accounting are discontinued with effect from the date of ineffectiveness of the fair value hedge.

3.2 Credit risk

The Group's main credit risk is that borrowers or counterparties may default on their payment obligations due to the Group. These obligations arise from the Group's lending and investment activities, and trading of financial instruments (including derivatives).

The Group has a Group Credit Committee and for each business division a credit committee made up of certain Executive Directors and senior credit officers and chaired by the Chief Executive. Each credit committee has the responsibility for formulating and revising credit policies and procedures for that division within the parameters of the Group Risk Policy and regulatory framework. Credit policies and procedures define the credit assessment and approval criteria and guidelines, use of scoring, review and monitoring process and the systems of loan classification and impairment.

The Group manages all types of credit risk on a prudent basis, in accordance with the credit approval and review policies, by evaluating the credit-worthiness of different types of customers and counterparties based on assessment of business, financial, market and industry risks applicable to the types of loans, collateral and counterparty dealings including dealing in or use of derivative financial instruments. Credits are extended within the parameters set out in the credit policies and are approved by different levels of management based upon established guidelines. Credit exposures, limits and asset quality are regularly monitored and controlled by management, credit committees and Group Risk. The Group's internal auditors conduct regular reviews and audits to ensure compliance with credit policies and procedures and regulatory guidelines.

3.2.1 信貸風險計量

(甲) 貸款及墊款

本集團在評估對客戶和銀行及其他財務機構(按交易對手級別)之貸款及墊款之信貸風險時,考慮三個因素(i)客戶或交易對手按合同責任之「違約概率」: (ii)本集團用於計算「違約風險額」之對交易對手之現有風險額及其後可能之發展:及(iii)經考慮因客戶違約可收回數額及變現抵押品後之可能損失(「違約損失」)。

此等透過持續信貸審閱,貸款分類,追收,變現抵押品而降低信貸風險及按本集團信貸政策及程序與監管指引為問題貸款作減值撥備等之運作、控制及監控各個別與組別之貸款人的信貸風險措施,包含於本集團日常營運管理。依據香港銀行業(資本)規則》,本集團亦為任例之《銀行業(資本)規則》,本集團亦須任個人或信貸組合之預計損失,及為任何預計損失作出足夠的貸款損失儲備(即「預計損失方法」)。該等涵蓋預計損失的運作計量方法,與香港會計準則第39號依據在結算日實際已發生損失(即「已損失方法」)的方法有所不同(附註3.2.3)。

3.2 Credit risk (Continued)

The individual business' credit policies also establish policies and processes for the approval and review of new products and activities, together with details of the loan grading, or credit scoring, processes and impairment policies.

3.2.1 Credit risk measurement

(a) Loans and advances

In measuring credit risk of loans and advances to customers and to banks and other financial institutions at a counterparty level, the Group reflects three components (i) the "probability of default" by the client or counterparty on its contractual obligations; (ii) current exposures to the counterparty and its likely future development, from which the Group derive the "exposure at default"; and (iii) the likely loss on the defaulted obligations after considering recovery and collateral realisation (the "loss given default").

These credit risk measurements, which operate to control and monitor credit performance of individual and pool of borrowers through on-going credit review, loan classification, collection, credit risk mitigation including realisation of collateral, and provision of impairment on problem loans as required by the Group's credit policies and procedures, and regulatory guidelines, are embedded in the Group's daily operational management. Based on the Banking (Capital) Rules of the Hong Kong Banking Ordinance, the Group is also required to assess expected loss of individual and portfolio of credits, and to set aside sufficient loan loss reserve against any expected loss (the "expected loss model"). The operational measurements to also cover expected losses can be contrasted with impairment allowances required under HKAS 39, which are based on losses that have been incurred at the balance sheet date (the "incurred loss model") rather than expected loss (Note 3.2.3).

本集團採用內部資料及市場資訊(例如違約概率、信用評估)作為內部信貸風險評估。評級類別中可看到之違約事件每年皆不同,尤其是處於一個經濟循環之間。

- (ii) 違約風險約為依據本集團於違約時預計須承擔之數額。例如對一項貸款而言,其違約風險為其賬面值。而對一項信貸承擔而言,本集團之風險包括於違約時任何已提取之數額,加上可能應已提取之數額。
- (iii) 已違約下損失或損失嚴重度代表當違約已發生時,本集團對損失事件之申索結果之預期。其以風險額之損失百分比表示,並因應交易對手之類別、申索類別、級別及抵押品或其他緩和信貸風險之可能性而不同。

- (i) The Group assesses the probability of default of individual counterparties using internal rating tools tailored to the various categories of counterparty. They have been developed internally and combine statistical analysis with judgements of credit officers, and are validated, where appropriate, by comparison with externally available data. Clients of the Group are segmented into three broad rating classes. The Group's rating scale, which is shown in Note 3.2.3, reflects the range of default probabilities defined for each rating class. This means that, in principle, exposures migrate between classes as the assessment of their probability of default changes. The rating tools are kept under review and upgraded as necessary. The Group regularly validates the performance of the rating and their predictive power with regard to default events.

The Group uses both internal data and market information (e.g. probability of default, credit scoring) for internal credit risk assessment. Observed defaults per rating category vary year on year, especially over an economic cycle.

- (ii) Exposure at default is based on the amounts the Group expects to be owed at the time of default. For example, for a loan, exposure at default is the face value. For a commitment, the Group includes any amount already drawn plus the further amount that may have been drawn by the time of default, should it occur.
- (iii) Loss given default or loss severity represents the Group's expectation of the event of loss on a claim should default occur. It is expressed as percentage loss per unit of exposure and typically varies by type of counterparty, type and seniority of claim and availability of collateral or other credit risk mitigation.

(乙) 信貸承擔

該等工具之主要目的是在客戶有需要時,本集團能夠提供足夠資金。擔保及備用信用證乃本集團不可撤回的保證,表示將會在客戶未能向第三方履行責任時作出價付。該等工具之信貸風險與貸款相同。跟單及商業信用證為本集團代表客戶之書面承諾,授權第三方按訂明之條款及條件向本集團提取訂明金額之款項,並一般以相關之付運貨物作為抵押,因此較直接借貸之風險為低。

授出信貸承擔為以貸款、擔保書及信用證 等形式授權授出而未動用部分之信貸。就 授出信貸承擔之信貸風險而言,本集團所 承擔之潛在損失風險相當於未動用承擔之 總額。然而,因大部分授出之信貸承擔取 決於客戶維持信貸水平,虧損之金額可能 低於未動用承擔。因年期較長之承擔比一 般年期較短之承擔存在較高程度的信貸 險,本集團會控制信貸承擔之到期年期。

(丙) 債務證券及國庫債券

就債務證券及國庫債券而言,集團風險部採用外部評級如標準普爾評級或其等同評級管理信貸風險。投資於此等證券及庫券的目的乃為獲取更佳信貸素質,分散風險及收入來源,並維持一個隨時可提供資金的來源以應付本集團不時之資金需要及流動資產要求。

3.2 Credit risk (Continued)

(b) Credit-related commitments

The primary purpose of these instruments is to ensure that funds are available to a customer as required. Guarantees and standby letters of credit – which represent irrevocable assurances that the Group will make payments in the event that a customer cannot meet its obligations to third parties – carry the same credit risk as loans. Documentary and commercial letters of credit – which are written undertakings by the Group on behalf of a customer authorising a third party to draw drafts on the Group up to a stipulated amount under specific terms and conditions – are normally collateralised by the underlying shipments of goods to which they relate and therefore carry less risk than a direct lending.

Commitments to extend credit represent unused portions of authorisations to extend credit in the form of loans, guarantees or letters of credit. With respect to credit risk on commitments to extend credit, the Group is potentially exposed to loss in an amount equal to the total unused commitments. However, the likely amount of loss is less than the total unused commitments, as most commitments to extend credit are contingent upon customers maintaining specific credit standards. The Group monitors the term to maturity of credit commitments because longer-term commitments generally have a greater degree of credit risk than shorter-term commitments.

(c) Debt securities and treasury bills

For debt securities and treasury bills, external rating such as Standard & Poor's rating or their equivalents are used by Group Risk for managing the credit risk exposures. The investments in these securities and bills are made to gain a better credit quality, to diversify risk exposures and income streams, and to maintain a readily available source of funds to meet the funding and liquidity requirement of the Group from time to time.

(i) 持有或發行用作買賣用途的衍生工具

本集團替客戶進行衍生工具合約交易 或應客戶的要求提供合適的結構性衍 生工具。本集團亦進行本身賬戶的交 易。本集團使用的持作買賣用途的衍 生工具主要是以利率、外匯、信貸溢 價及股票價格為指標的場外交易衍生 工具。

持有用作對沖用途的衍生工具主要包括用作管理利率風險及外匯風險的衍生工具或合約。此等工具全為場外交易的衍生工具。

本集團應用以下衍生工具作對沖及買賣用 途:

(i) 貨幣遠期指購買外匯及本地貨幣(包括無交收之現貨交易)之承擔。外匯及利率期貨為因應匯率或利率之變動而收取或支付淨額之合同責任,或在規範化的金融市場以指定價格購買或出售遠期之外匯或某些金融工具。由於期貨合約以現金及可變現之證券作抵押品,且期貨合約價值之變動每天與交易所交收,因此其信貸風險非常低。

(d) Derivatives

In the normal course of business, the Group enters into a variety of derivative transactions including forwards, futures, swaps and options transactions in the interest rate, foreign exchange and equity markets. Derivative transactions are conducted for both trading and hedging purposes. The Group's objectives in using derivative instruments are to meet customers' needs by acting as an intermediary, to manage the Group's exposure to risks and to generate revenues through trading activities within acceptable limits.

(i) Derivatives held or issued for trading purposes

The Group transacts derivative contracts on behalf of customers or to address customer demands in structuring tailored derivatives. The Group also takes proprietary positions for its own accounts. Trading derivative products used by the Group are primarily over-the-counter derivatives transacted based on interest rates, foreign exchange rates, credit spread and equity prices.

(ii) Derivatives held or issued for hedging purposes

Derivatives held for hedging purposes primarily consist of derivative instruments or contracts used to manage interest rate risk and foreign exchange risk. All of these are overthe-counter derivatives.

The Group uses the following derivative instruments for both hedging and trading purposes:

(i) Currency forwards represent commitments to purchase foreign and domestic currency, including undelivered spot transactions. Foreign currency and interest rate futures are contractual obligations to receive or pay a net amount based on changes in currency rates or interest rates or to buy or sell foreign currency or a financial instrument on a future date at a specified price, established in an organised financial market. The credit risk is negligible, as futures contracts are collateralised by cash or marketable securities, and changes in the futures contract value are settled daily with the exchange.

 - (ii) Currency and interest rate swaps are commitments to exchange one set of cash flows for another. Swaps result in an economic exchange of currencies or interest rates (for example, fixed rate for floating rate) or a combination of all these (i.e., cross-currency interest rate swaps). No exchange of principal takes place, except for certain currency swaps. The Group's credit risk represents the potential cost to replace the swap contracts if counterparties fail to perform their obligation. This risk is monitored on an ongoing basis with reference to the current fair value, a proportion of the notional amount of the contracts and the liquidity of the market. To control the level of credit risk taken, the Group assesses counterparties using the same techniques as for its lending activities.
 - (iii) Foreign currency and interest rate options are contractual agreements under which the seller (writer) grants the purchaser (holder) the right, but not the obligation, either to buy (a call option) or sell (a put option) at or by a set date or during a set period, a specific amount of a foreign currency or a financial instrument at a predetermined price. The seller receives a premium from the purchaser in consideration for the assumption of foreign exchange or interest rate risk. Options may be either exchange-traded or negotiated between the Group and a customer. The Group is exposed to credit risk on purchased options only, and only to the extent of their carrying amount, which is their fair value.

The Group may be exposed to counterparty risk arising from its positions in derivative financial instruments, which is either "valuation risk" for the credit risk on receiving mark-to-market gains upon the default of a counterparty prior to scheduled settlement, or "settlement risk" for the possibility of not receiving the expected cash value of a derivative transaction or upon the expiry of a derivative contract on the settlement date.

The notional amounts of certain types of financial instruments provide a basis for comparison with instruments recognised on the balance sheet but do not necessarily indicate the amounts of future cash flows involved or the current fair value of the instruments and, therefore, do not indicate the Group's exposure to credit or price risks. The derivative instruments become favourable (assets) or unfavourable (liabilities) as a result of fluctuations in market interest rates, foreign exchange rates, equity prices and credit market conditions. The aggregate contractual or notional amount of derivative financial instruments on hand, the extent to which instruments are favourable or unfavourable, and thus the aggregate fair values of derivative financial assets and liabilities, can fluctuate significantly from time to time.

The Group maintains strict control limits on net open derivative positions (i.e., the difference between purchase and sale contracts), by both amount and term. At any one time, the amount subject to credit risk is limited to the current fair value of instruments that are favourable to the Group (i.e., assets where their fair values are positive), which in relation to derivatives is only a small fraction of the contract or notional values used to express the volume of instruments outstanding.

3.2.2 Risk limit control and mitigation policies

The Group manages, controls and limits concentrations of credit risk wherever they are identified – in particular, to individual counterparties and groups, and to industries and countries.

The Group structures the levels of credit risk it undertakes by placing limits on the amount of risk accepted in relation to one borrower, or groups of borrowers, and to geographical and industry segments. Such risks are monitored on a revolving basis and are subject to an annual or more frequent review, when considered necessary. Limits on the level of credit risk by product, industry sector and by country are approved by relevant credit committees and Group Risk.

The exposure to any one borrower or counterparty including banks and brokers is further restricted by sub-limits covering on- and off- balance sheet exposures, and daily delivery risk limits in relation to trading items such as forward foreign exchange contracts. Actual exposures against limits are monitored daily.

Exposures to credit risk is also managed through regular analysis of the ability of borrowers and potential borrowers to meet interest and capital repayment obligations and by regular review and revision of these limits where appropriate.

To avoid concentration of risk, large exposures to individual customers or related groups are limited to a percentage of the capital base, and exposures to industry sectors and countries/regions are managed within approved limits to achieve a balanced portfolio.

(a) Loans and advances

In order to mitigate the credit risk and where appropriate, the Group will obtain collateral to support the credit facility. To control credit risk exposure to counterparty arising from derivative positions, the Group limits its derivative dealings with approved financial institutions, and uses established market practices on credit support and collateral settlement to reduce credit risk exposure to derivative counterparties. Overall credit risk limit for each financial institution counterparty, including valuation limit for derivatives, is approved by the Group Credit Committee with reference to the financial strength and credit rating of each counterparty. The acceptable types of collateral and their characteristics are established within the credit policies, as are the respective margins of finance.

Irrespective of whether collateral is taken, all credit decisions are based upon the customer's or counterparty's credit profile, cashflow position and ability to repay.

3.2.2 Risk limit control and mitigation policies (Continued)

(a) Loans and advances (Continued)

The Group employs a range of policies and practices to mitigate credit risk. The most traditional of these is the taking of security for funds advanced, which is a common practice. The Group implements guidelines on the acceptability of specific classes of collateral or credit risk mitigation. The principal collateral types for loans and advances are:

- Mortgages over residential properties;
- Charges over business assets such as premises, inventory and accounts receivable; and
- Charges over financial instruments such as debt securities and equities.

Longer-term finance and lending to corporate entities are generally secured; revolving individual credit facilities are generally unsecured. In addition, in order to minimise credit loss, the Group will seek additional collateral from the counterparty as soon as impairment indicators are noticed on relevant individual loans and advances.

(b) Debt securities

Debt securities and treasury bills are generally unsecured, with the exception of asset-backed securities and similar instruments, which are secured by portfolios of financial instruments.

(c) Derivatives

Since all counterparties for derivatives trading are financial institutions, the risk is managed as part of the credit risk control and monitoring process in respect of financial institutions including credit controls such as setting individual limit for valuation risk, daily settlement limits and performing periodic credit assessment for each counterparty. Moreover, the Group requires all derivative contract counterparties to enter into International Swaps and Derivatives Association ("ISDA") Agreement in order to follow the standardised market practice of close-out arrangement in the event of default, settlement procedure, valuation/pricing methods.

對此等工具之信貸風險通常並沒有取得抵 押品或其他抵押,惟本集團要求對手方提 供保證按金之情況除外。

集團與進行大量交易的交易對方訂立整體 淨額結算安排,藉此進一步減少信貸風 險。整體淨額結算安排不會經常地導致資 產負債表之資產及債務的抵銷,原因是交 易通常按總額結算。然而,有利合約之相 關信貸風險會藉著整體淨額結算安排而降 低,並於拖欠發生時交易對方所有借貸將 被停止及按淨額結算。

本集團在整體淨額結算安排下對衍生工具 之整體信貸風險可能因受到在此安排下之 每單交易所影響而在短時間內出現重大變 化。

3.2.3 減值及撥備政策

於附註3.2.1敘述之內部評級系統多集中在借貸及 投資活動開始時之信貸素質評估。與其相比,對 編製財務報告而言,減值準備則是根據結算日存 在的客觀減值證據所顯示之虧損(見附註2.6)。基 於應用方法不同,在財務報表內為涉及信貸虧損 而撥備之數額普遍較按採用作內部運作管理及銀 行業監管用途之預計損失方法而釐定之數額為 低。

於年末資產負債表中列示之減值準備乃從三大內部評分等級中每個等級計算而得,然而減值之大部份準備來自底層之兩個等級。下表列示各大內部評分等級中本集團資產負債表內有關貸款及墊款之項目及涵蓋資產負債表內及外項目之相關減值準備的百分比。

(c) Derivatives (Continued)

Collateral or other security is not usually obtained for credit risk exposures on these instruments, except where the Group requires margin deposits from counterparties.

The Group further restricts its exposure to credit losses by entering into master netting arrangements with counterparties with which it undertakes a significant volume of transactions. Master netting arrangements do not generally result in an offset of balance sheet assets and liabilities, as transactions are usually settled on a gross basis. However, the credit risk associated with favourable contracts is reduced by a master netting arrangement to the extent that if an event of default occurs, all amounts with the counterparty are terminated and settled on a net basis.

The Group's overall exposure to credit risk on derivative instruments subject to master netting arrangements can change substantially within a short period, as it is affected by each transaction subject to the arrangement.

3.2.3 Impairment and provisioning policies

The internal rating system described in Note 3.2.1 focuses more on credit-quality assessment from the inception of the lending and investment activities. In contrast, impairment allowances are recognised for financial reporting purposes only for losses that have been incurred at the balance sheet date based on objective evidence of impairment (see Note 2.6). Due to the different methodologies applied, the amount of incurred credit losses provided for in the financial statements are usually lower than the amount determined from the expected loss model that is used for internal operational management and banking regulation purposes.

The impairment allowance shown in the balance sheet at year-end is derived from each of the three broad internal rating grades. However, the majority of the impairment allowance comes from the bottom two gradings. The table below shows the percentage of the Group's onbalance sheet items relating to loans and advances and the associated impairment allowance covering on- and off-balance sheet amounts for each of these broad internal rating categories.

Grade 1 "satisfactory", which covers Grade 1 to 9 of the Group's internal loan grading system, represents loans for which borrowers are current in meeting commitments and for which the full repayment of interest and principal is not in doubt.

Grade 2 "special monitoring", which covers Grade 10 of the Group's internal loan grading system, represents loans with which borrowers are experiencing difficulties and which may lead to credit losses to the Group if the deterioration in loan quality cannot be contained.

Grade 3 "sub-standard or below", which covers Grade 11 to 13 of the Group's internal loan grading system, represents loans in which borrowers are displaying a definable weakness that is likely to jeopardise repayment; or collection in full is improbable and the Group expects to sustain a loss of principal and/or interest, taking into account the fair value of collateral less cost to sell; or loans that are considered uncollectible after all collection options have been exhausted.

3. 財務風險管理(續)

3.2 信貸風險(續)

3.2.3 減值及撥備政策(續)

根據由本集團設定之下列標準之內部評級方法能協助管理層判斷香港會計準則第39號確認減值之客觀證據是否存在:

- 如期償付本金或利息之不履行狀況;
- 借款人陷於現金流困境(如:股本對債務比率、銷售之淨收益百分率);
- 違反貸款契約或條款;
- 開始破產程序;
- 借款人之競爭能力惡化;及
- 抵押品價值下降。

本集團之政策規定最少每年一次,或當個別情況需要多次評估個別高於重要性界線之金融資產。個別評估賬戶之減值準備,應用至所有個別重要賬戶乃按個別基準評估其於結算日涉及之損失而評定。評估普遍包含就該個別賬戶所持之抵押品(包括重新確認對其可執行性)及預計收入和其抵押品的變現能力。

綜合評估減值準備已就(一)個別低於重要性界線 之同類資產組合;及(二)根據過往紀錄、經驗判 斷及統計技巧評估已發生但而仍未確認之損失作 出撥備。 (Expressed in thousands of Hong Kong dollars)

- 3. Financial risk management (Continued)
- 3.2 Credit risk (Continued)
- 3.2.3 Impairment and provisioning policies (Continued)

The internal rating tool assists management to determine whether objective evidence of impairment exists under HKAS 39, which is based on the following criteria set out by the Group:

- Delinquency in contractual payments of principal or interest;
- Cash flow difficulties experienced by the borrower (e.g. equity to debt ratio, net income percentage of sales);
- Breach of loan covenants or conditions;
- Initiation of bankruptcy proceedings;
- Deterioration of the borrower's competitive position; and
- Deterioration in the value of collateral.

The Group's policy requires the review of individual financial assets that are above materiality thresholds at least annually or more regularly when individual circumstances require. Impairment allowances on individually assessed accounts are determined by an evaluation of the incurred loss at balance sheet date on a case-by-case basis, and are applied to all individually significant accounts. The assessment normally encompasses collateral held (including re-confirmation of its enforceability) and the anticipated receipts and liquidating collaterals for that individual account.

Collectively assessed impairment allowances are provided for: (i) portfolios of homogenous assets that are individually below materiality thresholds; and (ii) losses that have been incurred but have not yet been identified, by using the available historical experience, experienced judgement and statistical techniques.

3.2.5 Loans and advances (Continued)

The total impairment allowance for loans and advances is HK\$359,557,000 (2006: HK\$355,097,000), comprising an allowance of HK\$142,589,000 (2006: HK\$135,729,000) for the individually impaired loans and a collective allowance of HK\$216,968,000 (2006: HK\$219,368,000) provided on loans assessed on a collective basis. Further information on the impairment allowance for loans and advances to customers and to banks and other financial institutions is provided in Note 24.

During the year ended 31 December 2007, the Group's total loans and advances increased by 21% as a result of the expansion of the lending business, especially in Hong Kong and Mainland China. When entering into new markets or expanding business focus or allocation to different loan segments, the Group undertakes proper risk assessment in accordance with credit policies and procedures, review and approval of new risk limits, financial and credit reviews with an emphasis on proper risk and return balance. In order to minimise the potential increase of credit risk exposure, the Group focused more on the business with large corporate enterprises or banks with good credit rating, extending credit to a diversified pool of small-and-medium sized enterprises approved with proper consideration of their risk profiles and collateral pledged to the Group, and granting secured and unsecured credit to retail customers based on customers' income, occupation, credit scoring, collateral to be pledged, and credit limit allowed for different loan types.

Advances to customers by geographical area are classified according to the location of the counterparties after taking into account the transfer of risk. In general, risk transfer applies when an advances is guaranteed by a party located in an area which is different from that of the counterparty.

At 31 December 2007, over 90% of the Group's advances to customers, including related impaired advances and overdue advances, categorised on the basis of the geographical location of the borrower were classified under Hong Kong (a position unchanged from that as at 31 December 2006).

3. Financial risk management (Continued)

3.3 Market risk

Market risk is the risk of losses in assets, liabilities and off-balance sheet positions arising from movements in market rates and prices.

Market risk exposure for different types of transactions is managed within risk limits and guidelines approved by the Board, Executive Committee ("EXCO"), Asset and Liability Management Committee ("ALCO"), and Treasury Risk Committee ("TRC"). Risk limits are set by products and by different risk types. Limits comprise a combination of notional, stop loss, sensitivity and value-at-risk ("VaR") controls. All trading positions are subject to daily mark-to-market valuation. Risk Management and Control Department ("RMCD") in Group Risk Division, as an independent risk management and control unit, identifies, measures, monitors and controls the risk exposures against approved limits and initiates specific action to ensure the overall and the individual market risks are managed within an acceptable level. Any exceptions have to be reviewed and sanctioned by the appropriate level of management of TRC or by EXCO.

The launch of every new product is governed by the New Product Approval process stipulated under the Group Risk Policy in which the relevant business units, supporting functions and Group Risk review the critical requirements, risk assessment and resources plan. The Group's Internal Audit function performs regular independent review and testing to ensure compliance with the market risk policies and procedures by Treasury, RMCD and other relevant units.

Banco Comercial de Macau, S.A. ("BCM"), a subsidiary of Dah Sing Bank, Limited ("DSB"), runs its treasury functions locally under its own set of limits and policies and within the overall market risk limits set by DSB. RMCD of DSB oversees and controls the market risk arising from BCM's treasury operation.

The Group applies different risk management policies and procedures in respect of the market risk arising from its trading and banking books.

3.3 市場風險(續)

3.3.1 源自買賣賬之市場風險

本集團之買賣賬內,在外匯、債務證券、權益性 證券及衍生工具之買賣持倉中存在市場風險。

(甲) 市場風險計量方法

作為市場風險管理之一部份,本集團進行各種對沖策略。本集團訂立利率掉期以配對與長期定息債務證券有關之利率風險。 用於計量及監控市場風險之計量方法概述如下:

(i) 市場風險數值

本集團依據一系列針對市場狀況及各種變化之假設,應用市場風險數值法預計持作買賣用途組合之市場風險狀況及最大預計損失。董事會就本集團可接受之市場風險數值設定額度,並由集團風險部每日監控。

市場風險數值乃一種以統計為基準就 現時組合因市場不利變化預計潛在損 失。其表明本集團可能損失之最大數 額,惟只限於某個置信水平,就一日 持倉期之基準作推算,本集團之置信 水平為99%。因此存在明確的統計概 率,實際損失可能比市場風險數值之 估計數為大。市場風險數值模型假設 某個持倉期直至結束持倉。市場風險 數值亦依據持倉之現時市值、市場風 險因素過往在一個二百五十天週期 (或超過一年)之相互關係及波幅。本 集團採用參數性市場風險數值法,直 接應用上述之過去相互關係及利率、 價格、指數等之波幅於現有的持倉。 並定期監控實際結果以測試應用於計 算市場風險數值之假設及參數/因素 之有效性。

3. Financial risk management (Continued)

3.3 Market risk (Continued)

3.3.1 *Market risk arising from the trading book*

In the Group's trading book, market risk is associated with trading positions in foreign exchange, debt securities, equity securities and derivatives.

(a) Market risk measurement technique

As part of the management of market risk, the Group undertakes various hedging strategies. The Group enters into interest rate swaps to match the interest rate risk associated with the fixed-rate long-term debt securities. The major measurement techniques used to measure and control market risk are outlined below.

(i) Value at risk

The Group applies a "value at risk" methodology ("VaR") to its trading portfolio to estimate the market risk positions held and the maximum losses expected, based on a number of assumptions for various changes in market conditions. The Board sets limits on the value at risk that are acceptable for the Group which are monitored on a daily basis by Group Risk.

VAR is a statistically based estimate of the potential loss on the current portfolio from adverse market movements. It expresses the "maximum" amount the Group might lose, but only to a certain level of confidence which for the Group is 99% for a one day holding period. There is therefore a specified statistical probability that actual loss could be greater than the VaR estimate. The VaR model assumes a certain "holding period" until positions can be closed. It is also based on the current mark-to-market value of the positions, the historical correlation and volatilities of the market risk factors over a period of 250 days (or over one year). The Group applies these historical correlation and volatilities in rates, prices, indices, etc. directly to its current positions using a method known as parametric VaR methodology. Actual outcomes are monitored regularly to test the validity of the assumptions and parameters/factors used in the VaR calculations.

3.3.1 源自買賣賬之市場風險(續)

(甲) 市場風險計量方法(續)

(i) 市場風險數值(續)

採納該方法並不能避免當市場狀況發 生重大變化時超逾此等額度之損失。

因市場風險數值為本集團之市場風險 管理範疇內一重要環節,董事會就各 持作買賣用途組合之運作設定不同市 場風險數值額度及分配至各業務部 門,並每年審閱。集團風險部每天審 視大新銀行之市場風險數值,對比實 際風險及額度。本集團就年內全部交 易活動之市場風險數值日均值為 4,312,000港元(二零零六年: 3,172,000港元)。

本集團藉著反饋測試買賣賬之市場風 險數值結果,持續監控市場風險數值 模型之素質。所有反饋測試的偏差予 以調查及向高層管理人員匯報。

(ii) 壓力測試

壓力測試提供極端情況下可能出現之 潛在損失之約額。集團風險部進行的 壓力測試包括:風險因素壓力測試, 方法為在各風險類別中施行不同壓力 程度:及專案壓力測試,方法為對特 定持倉或地區施行各種可能壓力事 項。

壓力測試之結果由各業務部門之高層 管理人員及董事會審閱。壓力測試的 設計乃按各業務特定剪裁及慣常地應 用不同方案分析。

3. Financial risk management (Continued)

3.3 Market risk (Continued)

- 3.3.1 *Market risk arising from the trading book (Continued)*
 - (a) Market risk measurement technique (Continued)
 - (i) Value at risk (Continued)

The use of this approach does not prevent losses outside of these limits in the event of more significant market movements.

As VaR constitutes an integral part of the Group's market risk control regime, VaR limits are established and reviewed by the Board annually for all trading portfolio operations and allocated to business units. Actual exposures against limits, together with DSB's VaR, is reviewed daily by Group Risk. Average daily VaR for the Group for all trading activities during the year was HK\$4,312,000 (2006: HK\$3,172,000).

The quality of the VaR model is continuously monitored by back-testing the VaR results for trading books. All back-testing exceptions are investigated, and all back-testing results are reported to senior management.

(ii) Stress tests

Stress tests provide an indication of the potential size of losses that could arise in extreme conditions. The stress tests carried out by Group Risk include: risk factor stress testing, where stress movements are applied to each risk category; and ad hoc stress testing, which includes applying possible stress events to specific positions or regions.

The results of the stress tests are reviewed by senior management in each business unit and by the Board of Directors. The stress testing is tailored to the business and typically uses scenario analysis.

3.3.2 源自銀行賬之市場風險

本集團之銀行賬中,市場風險主要來自於債務證 券及權益性證券之持倉。

(甲) 市場風險計量方法

在董事會、行政委員會及財資風險委員會設立之風險管理框架及政策中,設定了了同的管理層行動觸發額,藉此提示管理層對本集團銀行賬中有關外匯風險、利率風險及流動資金風險等不同程度之風險。本集團定期進行對資產負債表內及外持倉中之利率變化和衝擊和流動資產在特定及一般市場危急情況下趨勢之感應度分析及壓力測試,比對管理層行動觸發額以估量及預測存在於本集團銀行賬中之市場風險。

本集團現時並無採用市場風險數值法以計量及監控銀行賬中之市場風險。

3.3.2 Market risk arising from the banking book

In the Group's banking book, market risk is predominantly associated with positions in debt and equity securities.

(a) Market risk measurement technique

Within the risk management framework and policies established by the Board, EXCO and TRC, various management action triggers ("MATs") are established to provide early alert to management on the different levels of exposures of the Group's banking book activities to foreign exchange risk, interest rate risk, and liquidity risk. Sensitivity analysis and stress testing covering shocks and shifts in interest rates on the Group's on- and off-balance sheet positions, liquidity drift under institution-specific and general market crisis scenarios are regularly performed to gauge and forecast the market risk inherent in the Group's banking book portfolios against these MATs.

VaR methodology is not currently being used to measure and control the market risk of the banking book.

(乙) 非持作買賣用途組合之感應度分析

下列敍述為有關大新銀行有限公司之感應 度分析。

(i) 外匯風險

除美元及澳門幣外,本集團承擔的淨外匯風險十分有限,因為由客戶交易引致的外匯持倉及外匯結存,通常會與其他的客戶交易或市場交易配對抵銷。淨風險持倉,無論是個別貨幣或總體而言,每日皆由本集團財資部控制在已制定的外匯限額內。

若用長期外幣資金融資港元資產,通 常會透過與遠期外匯合約配對抵銷以 減低外匯風險。

於二零零七年十二月三十一日,倘所有其他變數保持不變而港元對美元貶值1%,本年度之除税後溢利將增加11,730,000港元(二零零六年:13,290,000港元),主要受惠於換算美元資產時之外匯收益,雖受換算美元負債時之外匯虧損所抵銷。

相反地,倘所有其他變數保持不變而港元對美元升值1%,本年度之除稅後溢利將減少11,730,000港元(二零零六年:13,290,000港元)。

(b) Sensitivity analysis of non-trading portfolio

The following descriptions on sensitivity analysis relate to Dah Sing Bank, Limited.

(i) Foreign exchange risk

The Group has limited net foreign exchange exposure (except for USD and MOP) as foreign exchange positions and foreign currency balances arising from customer transactions are normally matched against other customer transactions or transactions with the market. The net exposure positions, both by individual currency and in aggregate, are managed by the Treasury of the Group on a daily basis within established foreign exchange limits.

Long-term foreign currency funding, to the extent that this is used to fund Hong Kong dollar assets, is normally matched using foreign exchange forward contracts to reduce exposure to foreign exchange risk.

At 31 December 2007, if HK\$ had weakened by 1% against US\$ with all other variable held constant, the profit after taxation for the year would have been HK\$11,730,000 (2006: HK\$13,290,000) higher, mainly as a result of foreign exchange gain on translation of US\$ denominated financial assets compensated by foreign exchange losses on translation of US\$ denominated financial liabilities.

Conversely, if HK\$ had strengthened by 1% against US\$ with all other variables held constant, profit after tax for the year would have been HK\$11,730,000 (2006: HK\$13,290,000) lower.

3.3 市場風險(續)

- 3.3.2 源自銀行賬之市場風險(續)
 - (乙) 非持作買賣用途組合之感應度分析 (續)
 - (ii) 利率風險

現金流利率風險乃由於市場利率變化 而令金融工具未來現金流波動之風 險。公平值利率風險則為由於市場利 率變化而令金融工具價值波動之風 險。本集團就現水平市場利率之波動 承擔公平值風險及現金流風險。息差 及淨利息收入可能由於此等變化或突 如其來之變化而上升或下跌。董事會 就可能承擔之重訂利率錯配水平設定 額度,由風險管理及監控部每天監 控。

於二零零七年十二月三十一日,倘所有其他變數保持不變而港元之市場利率上升二百個基點及美元之市場利率上升二百個基點,未來十二個月之除稅後溢利及經濟價值將分別減少71,000,000港元(二零零六年:減少26,000,000港元)及減少192,000,000港元(二零零六年:減少320,000,000港元)。

由於二零零七年之美元淨資產減少, 故二零零七年之淨利息收入受美元利 率相對港元利率變化之波動較二零零 六年為少。

上述於二零零六年及二零零七年應用 在外匯及利率風險之敏感度分析方法 及假設基準皆相同。 (Expressed in thousands of Hong Kong dollars)

- 3.3 Market risk (Continued)
- 3.3.2 *Market risk arising from the banking book* (Continued)
 - (b) Sensitivity analysis of non-trading portfolio (Continued)
 - (ii) Interest rate risk

Cash flow interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Fair value interest rate risk is the risk that the value of a financial instrument will fluctuate because of changes in market interest rates. The Group takes on exposure to the effects of fluctuations in the prevailing levels of market interest rates on both its fair value and cash flow risks. Interest margins and net interest income may increase or decrease as a result of such changes or in the event that unexpected movements arise. The Board sets limits on the level of mismatch of interest rate repricing that may be undertaken, which is monitored daily by RMCD.

At 31 December 2007, if HK\$ market interest rates had been 200 basis points higher and US\$ market interest rates had been 200 basis points higher with other variables held constant, profit after tax over the next 12 months and economic value would have been HK\$71 million lower (2006: HK\$26 million lower) and HK\$192 million lower (2006: HK\$320 million lower) respectively.

The net interest income is less sensitive to movement in US\$ versus HK\$ interest rate in 2007 than 2006 because of the decrease in the net US\$ asset position in 2007.

The method and assumptions used in the above sensitivity analysis on foreign exchange and interest rate risk are on the same basis for both 2006 and 2007.

3.4 流動資產風險

流動資產風險乃本集團未能就到期之金融負債履行付款責任及當其提取時未能補充資金之風險, 後果可能是未能履行責任付還存款人及履行承擔 授出貸款。

3.4.1 流動資產風險管理程序

本集團審慎地管理流動資產以確保流動資產比率 於是年度內均能保持高於法定最低要求的流動資 金比率。本集團內之銀行附屬公司是年內之平均 流動資金比率遠高於銀行業條例最低要求的 25%。

本集團的資產及負債管理委員會定期檢討現行貸款和存款的組合及變化、融資需求及預測、對到期錯配狀況及流動資金比率作出持續監控。本集團亦對流動資金比率及到期錯配定下適當的限額並持有充足的流動資產以確保能應付所有短期資金需求。

本集團的資金主要包括客戶存款、已發行的存款 證及中期票據。發行存款證及中期票據有助延長 融資年期及減少到期錯配,在少數情況下,亦會 吸納短期銀行同業存款。本集團乃銀行同業市場 的淨放款人。

監控及呈報之形式為計量並對次日、下星期及下 月份之現金流分別作出推測,此等為流動資產管 理之主要期間。以該等推測之起步點為依據分析 金融負債之合約到期日及金融資產之預計回收 日。

資產及負債委員會亦監控錯配之中期資產,未提取借貸承擔之水平及類別,透支額之使用率及或然負債之影響(例如備用信用證及擔保)。

3.4 Liquidity risk

Liquidity risk is the risk that the Group is unable to meet its payment obligations associated with its financial liabilities when they fall due and to replace funds when they are withdrawn. The consequence may be the failure to meet obligations to repay depositors and fulfil commitments to lend.

3.4.1 Liquidity risk management process

The Group manages its liquidity on a prudent basis to ensure that a sufficiently high liquidity ratio relative to the statutory minimum is maintained throughout the year. The average liquidity ratio of the banking subsidiaries within the Group during the period was well above the 25% minimum ratio set by the Hong Kong Banking Ordinance.

The Group's Asset and Liability Management Committee ("ALCO") regularly reviews the Group's current loan and deposit mix and changes, funding requirements and projections, and monitors the liquidity ratio and maturity mismatch on an ongoing basis. Appropriate limits on liquidity ratio and maturity mismatch are set and sufficient liquid assets are held to ensure that the Group can meet all short-term funding requirements.

The Group's funding comprises mainly deposits of customers, certificates of deposit and medium term notes issued. The issuance of certificates of deposit and medium term notes helps lengthen the funding maturity and reduce the maturity mismatch. Short-term interbank deposits are taken on a limited basis and the Group is a net lender to the interbank market.

Monitoring and reporting take the form of cash flow measurement and projections for the next day, week and month respectively, as these are key periods for liquidity management. The starting point for those projections is an analysis of the contractual maturity of the financial liabilities and the expected collection date of the financial assets.

ALCO also monitors unmatched medium-term assets, the level and type of undrawn lending commitments, the usage of overdraft facilities and the impact of contingent liabilities such as standby letters of credit and guarantees.

3.4.2 到期日分析 (續)

資產與負債期限及利率的相配和受控的錯配對集 團管理層十分重要。由於進行的業務交易經常有 不確定的期限及不同類別,對銀行而言,完全相 配的情況並不普遍。不相配的持倉既可能提高盈 利能力,但也會增加虧損風險。

資產與負債的到期日及以合理的成本替代到期之 計息負債的能力,是評估集團流動資金及其因利 率及匯率變動所承擔風險的重要因素。

因集團一般不預期第三方會根據有關協議全數動用資金,應付擔保和備用信用證項下所需款項的流動資金需求遠少於承擔的金額。由於很多信貸承擔於到期或終止日毋須動用資金,因此用於提供信貸之信貸承擔的未償付合約總金額未必等同日後的現金需求。

3.4.3 按合約到期日之未貼現現金流

下表列示本集團就非衍生金融負債之應付額、衍生金融工具結算之淨額及衍生金融工具結算之總額,按資產負債表結算日之合約到期日剩餘時間將發生之現金流。表內列示之數額為合約未貼現現金流,而本集團依據預計之未貼現流入現金以管理固有的流動資產風險。

本集團通常按淨額基準結算之衍生工具包括:

- 外匯衍生工具:場外交易外匯期權、外匯 期貨、場內交易外匯期權;及
- 利率衍生工具:利率掉期、遠期利率合 約、場外交易利率期權、其他利率合約、 場內交易利率期貨及場內交易利率期權。

本集團通常按總額基準結算之衍生工具包括:

- 外匯衍生工具:遠期外匯、外匯掉期;
- 利率衍生工具:利率掉期及交換貨幣利率 掉期;
- 權益性衍生工具:權益性期權;及
- 信貸性衍生工具:信用違約交換合約。

3. Financial risk management (Continued)

3.4 Liquidity risk (Continued)

3.4.2 Maturity analysis (Continued)

The matching and controlled mismatching of the maturities and interest rates of assets and liabilities are fundamental to the management of the Group. It is unusual for banks to be completely matched, as businesses transacted are often of uncertain term and of different types. An unmatched position potentially enhances profitability, but also increases the risk of losses.

The maturities of assets and liabilities and the ability to replace, at an acceptable cost, interest-bearing liabilities as they mature are important factors in assessing the liquidity of the Group and its exposure to changes in interest rates and exchange rates.

Liquidity requirements to support calls under guarantees and standby letters of credit are considerably less than the amount of the commitment because the Group does not generally expect the third parties to fully draw funds under the agreement. The total outstanding contractual amount of commitments to extend credit does not necessarily represent future cash requirements, as many of these commitments will expire or terminate without being funded.

3.4.3 Undiscounted cash flows by contractual maturities

The table below presents the cash flows payable by the Group under non-derivative financial liabilities, derivative financial instruments that will be settled on a net basis and derivative financial instruments that will be settled on gross basis by remaining contractual maturities at the balance sheet date. The amounts disclosed in the table are the contractual undiscounted cash flows, whereas the Group manages the inherent liquidity risk based on expected undiscounted cash inflows.

The Group's derivatives that normally will be settled on a net basis include:

- Foreign exchange derivatives: over-the-counter (OTC) currency options, currency futures, exchange traded currency options; and
- Interest rate derivatives: interest rate swaps, forward rate agreements, OTC interest rate options, other interest rate contracts, exchange traded interest rate futures and exchange traded interest rate options.

The Group's derivatives that will be settled on a gross basis include:

- Foreign exchange derivatives: currency forward, currency swaps;
- Interest rate derivatives: interest rate swaps and cross currency interest rate swaps;
- · Equity derivatives: equity options; and
- Credit derivatives: credit default swaps.

3.5 金融資產及負債之公平值

於活躍市場買賣之金融工具(例如公開買賣之衍生工具、持作買賣用途的證券及可供出售之證券) 之公平值為結算日之市場價格。本集團所持金融資產所用之市價為當時買入價;而金融負債之適用市價為當時賣出價。

非活躍市場買賣之金融工具(例如櫃枱交易衍生工具)之公平值乃使用估值技術釐定。本集團使用多種方法,並按各結算日當時之市況作出假設。長期債項乃使用同類工具之市場價或交易商之報價。釐定其餘金融工具之公平值時則使用其他技術,例如預計貼現現金流量。利率掉期之公平值按估計未來現金流量之現值計算。遠期外匯合約之公平值則應用於結算日期外匯市場遠期匯率釐定。

就披露之用途而言,金融資產及負債之公平值乃 按本集團可得之同類金融工具按當時市場利率貼 現未來合約現金流量而計算。

(甲) 採用估值方法計量公平值之金融工具

於二零零七年及二零零六年內,本集團並 無任何以公平值計量之金融工具須採用未 有以相同或同類工具之可觀察到市價或未 有依據可得及可觀察到之市場資料之估值 方法。 (Expressed in thousands of Hong Kong dollars)

3. Financial risk management (Continued)

3.5 Fair values of financial assets and liabilities

The fair value of financial instruments traded in active markets (such as publicly traded derivatives, trading and available-for-sale securities) is based on quoted market prices at the balance sheet date. The quoted market price used for financial assets held by the Group is the current bid price; the appropriate quoted market price for financial liabilities is the current ask price.

The fair value of financial instruments that are not traded in an active market (for example, over-the counter derivatives) is determined by using valuation techniques. The Group uses a variety of methods and makes assumptions that are based on market conditions existing at each balance sheet date. Quoted market prices or dealer quotes for similar instruments are used for long-term debt. Other techniques, such as estimated discounted cash flows, are used to determine fair value for the remaining financial instruments. The fair value of interest-rate swaps is calculated as the present value of the estimated future cash flows. The fair value of forward foreign exchange contracts is determined using forward exchange market rates at the balance sheet date.

The fair value of financial assets and financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the Group for similar financial instruments.

(a) Financial instruments measured at fair value using a valuation technique

During 2007 and 2006, there was no financial instrument measured at fair value using a valuation technique which is based on assumptions that are not supported by observable market prices for the same or similar instrument or not based on available observable market data.

- 3.5 Fair values of financial assets and liabilities (Continued)
 - (b) Financial instruments not measured at fair value (Continued)
 - (ii) Loans and advances to customers

The estimated fair value of loans and advances represents the discounted amount of estimated future cash flows expected to be received. Expected cash flows are discounted at current market rates to determine fair value.

(iii) Investment securities

Investment securities include only interest-bearing assets held to maturity; assets classified as available-for-sale are measured at fair value. Fair value for held-to-maturity assets is based on market prices or broker/dealer price quotations. Where this information is not available, fair value is estimated using quoted market prices for securities with similar credit, maturity and yield characteristics.

 (iv) Deposits and balances from banks and other financial institutions, deposits from customers, certificates of deposit issued, debt securities issued and other borrowed funds

The estimated fair value of deposits with no stated maturity, which includes non-interest bearing deposits, is the amount repayable on demand. The estimated fair value of fixed interest-bearing deposits and other borrowings not quoted in an active market is based on discounted cash flows using interest rates for new debts with similar remaining maturity.

(v) Debt securities in issue

For those notes where a quoted market prices are not available, a discounted cash flow model is used based on current yield curve appropriate for the remaining term to maturity.

- 3.6 Capital management

The Group's objectives when managing capital are:

- To comply with the capital requirements set by the banking regulators in the markets where the entities within the Group operate;
- To safeguard the Group's ability to continue its business as a going concern;
- To maximize returns to shareholders and optimize the benefits to other stakeholders; and
- To maintain a strong capital base to support the development of its business.

Capital adequacy and the use of regulatory capital of the Group's Hong Kong banking subsidiaries, Dah Sing Bank, Limited ("DSB") and MEVAS Bank Limited ("MEVAS"), are monitored regularly by the Group's management, employing techniques based on the guidelines developed by the Basel Committee, as implemented by the Hong Kong Monetary Authority ("HKMA"), for supervisory purposes. The required information is filed with the HKMA on a quarterly basis. The HKMA requires DSB and MEVAS to maintain a ratio of total regulatory capital to the risk-weighted amount (i.e. the capital adequacy ratio) at or above the internationally agreed minimum of 8%. These banking subsidiaries' regulatory capital as managed by the Group's management is divided into two tiers:

- Core capital: share capital, profit and loss, and reserves created by appropriations of retained earnings. The book value of goodwill and other intangible assets is deducted in arriving at core capital; and
- Supplementary capital: qualifying perpetual and term subordinated debts, collectively assessed impairment allowances, regulatory reserve, and fair value gains arising on revaluation of holdings of land and buildings and available-for-sale equities and debt securities.

Investment in subsidiaries, significant investments in non-subsidiary companies and shares, exposures to connected companies and investments in other banks' equity are deducted from Core capital and Supplementary capital to arrive at the regulatory capital.

3.6 Capital management (Continued)

(Expressed in thousands of Hong Kong dollars)

Risk-weighted amount is the aggregate of the risk-weighted amounts for credit risk, market risk and operational risk, and covers both onbalance sheet and off-balance sheet exposures. On-balance sheet exposures are classified according to the obligor or the nature of each exposure and risk-weighted based on the credit assessment rating assigned by an external credit assessment institution recognized by the HKMA or other principles as set out in the Banking (Capital) Rules, taking into account the capital effects of credit risk mitigation. Off-balance sheet exposures are converted into credit-equivalent amounts by applying relevant credit conversion factors to each exposure, before being classified and risk-weighted as if they were on-balance sheet exposures.

Capital adequacy and the use of regulatory capital of the Group's Macau banking subsidiary, Banco Comercial de Macau, S.A. ("BCM"), is monitored regularly by the Group's management, employing techniques based on the guidelines provided by the Autoridade Monetaria de Macau ("AMCM") for supervisory purposes. The required information is filed with the AMCM on a quarterly basis. The AMCM requires BCM to maintain a ratio of own funds to total weighted exposures (i.e. the solvency ratio) at or above the agreed minimum of 8%.

Subsidiaries of the Group are also subject to statutory capital requirements from other regulatory authorities, such as the Securities and Futures Commission.

3.7 Fiduciary activities

The Group provides custody, trustee, wealth management and advisory services to third parties, which involve the Group making allocation and purchase and sale decisions in relation to a variety of financial instruments. 4. Critical accounting estimates, and judgements in applying accounting policies

4.1 Critical accounting estimates and assumptions

The Group makes estimates and assumptions that affect the reported amounts of assets and liabilities within the next financial year. Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Changes in estimates and assumptions may have a significant impact on the results of the Group in the periods when changes are made. The application and selection of different estimates and assumptions, and their subsequent changes, could affect the Group's profit and net asset value in the future. The Group, based on its high-level assessment of the sensitivity impacts on the reported assets and liabilities of the Group arising from the changes in critical accounting estimates and assumptions, believes that the estimates and assumptions adopted are appropriate and reasonable, and the financial results and positions presented in the Group's financial statements are fair and reasonable in all material respects.

(a) Impairment allowances on loans and advances

The Group reviews its loan portfolios to assess impairment at least on a quarterly basis. In determining whether an impairment loss should be recorded in the income statement, the Group makes judgments as to whether there is any observable data indicating that there is a measurable decrease in the estimated future cash flows from a portfolio of loans before the decrease can be identified with an individual loan in that portfolio. This evidence may include observable data indicating that there has been an adverse change in the payment status of borrowers in a group, or economic conditions that correlate with defaults on assets in the group. Management uses estimates based on historical loss experience for assets with credit risk characteristics and objective evidence of impairment similar to those in the portfolio when estimating its future cash flows of recoverable amounts. The methodology and assumptions used for estimating both the amount and timing of future cash flows are reviewed regularly to reduce any differences between loss estimates and actual loss experience.

4.1 重要會計估計及假設(續)

(乙) 金融工具之公平值

本集團之可供出售證券投資包含由第三方 投資經理人所管理的槓桿式/結構性投 工具。此等工具一般運用短期至中期 資。於年內,本集團注意到該等工具管 於融資困境,及不同程度地依賴其管 於融資困境,及不同程度地依賴其管理 於融資大與價值於年內因債券 團持有之投資工具價值於年內因債券 下跌及槓桿效應而減少,因此本集團 下跌及槓桿效應而減少,因此本集團 下跌及槓桿效應而減等投資組合已減 存在客觀條件顯示該等投資組合已 故此於結算日參考投資管理人提供之估值 確認減值虧損。

(丙) 商譽及無形資產之評估

於業務合併中,繼初始確認商譽及無形資產後,任何有關用於無形資產未來可產生收益之假設之重大變動,包括被收購之企業之未來收益現金流量,或因市場環境及前景的重大改變而影響貼現率,將對此資產之賬面價值作出調整。倘在某些情況下,無形資產及商譽預期可收回之金額較其賬面價值為低,則須確認該資產的減值。

4. Critical accounting estimates, and judgements in applying accounting policies (Continued)

4.1 Critical accounting estimates and assumptions (Continued)

(b) Fair value of financial instruments

The Group has invested in leveraged/structured investment vehicles managed by third party portfolio managers, which are included in the Group's available-for-sale investment portfolio. These vehicles typically invest in medium term high grade bonds using short to medium term financing to provide an enhanced yield to investors. During the year, the Group observed that these vehicles experienced more difficult funding conditions, and were reliant to varying extents on their managers or bank sponsors for funding support. Falls in the prices of bonds during the year, coupled with the leverage effect on the Group's holdings has resulted in a decrease in their values. As a result, the Group has assessed that there are objective indications that the vehicles have suffered impairment, and an impairment loss has therefore been recognised at the balance sheet date calculated with reference to valuations received from the portfolio managers.

(c) Goodwill and intangible asset valuation

For business combinations, subsequent to initial recognition of goodwill and intangible assets, any major change in the assumptions in relation to future benefits to be generated from the intangible assets, including future cash flow of benefits to be generated from the acquired entities, or discount rates which could be caused by major changes in market conditions and outlook, could result in adjustments to the carrying values of such assets. In the event that the expected recoverable amounts of goodwill and intangible assets are significantly lower than their carrying values, impairment of such assets would have to be recognised.

- 4. 應用會計政策時之重要會計估計及判斷(續)
- 4.2 應用集團會計政策之重大判斷
 - (甲) 投資物業與自用物業之區別

本集團自行釐定物業是否符合列作投資物業的資格。在作出有關判斷時,本集團須考慮該物業是否在不受本集團所持其他資產協助下提供現金流量。業主自用物業所提供之現金流量不僅來自物業本身,亦因在生產或供應過程使用其他資產而產生。

本集團若干物業之一部份乃用作賺取租金或資本增值用途,而另一部份則為提供服務或用作行政用途。倘這一部份可個別出售(或根據一項融資租賃分開出租),本集團則就不同部份分開入賬。倘不同部份不能分開出售及該物業用作提供服務或行政。 在分開出售及該物業用作提供服務或行政。 用途之部份極小,其將以投資物業入賬。 本集團將對確定有關服務用途之部份之重要性而導致相關物業不符合為投資物業作 判斷,亦會在作出判斷時,分開考慮每項物業。

(乙) 可供出售及持至到期證券之減值評估

本集團已於年末及截至本集團財務報表之 核準日期間對所持有之可供出售及持至到 期證券進行評估。減值評估參考各發行人 之財務實力及信貸評級、行業發展和市場 狀況、及信貸評級機構提供之相同評級 資過往的損失紀錄,按個別及綜合基準進 行。除卻結構性投資工具已被評估為減進 分,本集團已確認並無客觀或明確條件期 示其任何可供出售(結構性投資工具除外) 及持至到期證券已減值。除確認結構性投 資工具之減值虧損外,並無就其他可供出 售及持至到期證券作出減值撥備。

- 4. Critical accounting estimates, and judgements in applying accounting policies (Continued)
- 4.2 Critical judgments in applying the entity's accounting policies
 - (a) Distinction between investment properties and owneroccupied properties

The Group determines whether a property qualifies as an investment property. In making its judgment, the Group considers whether the property generates cash flows largely independently of the other assets held by an entity. Owner-occupied properties generate cash flows that are attributable not only to property but also to other assets used in the production or supply process.

Some properties comprise a portion that is held to earn rentals or for capital appreciation and another portion that is held to supply services or for administrative purposes. If these portions can be sold separately (or leased out separately under a finance lease), the Group accounts for the portions separately. If the portions cannot be sold separately, the property is accounted for as investment property only if an insignificant portion is held to supply services or for administrative purposes. Judgment is applied in determining whether ancillary services are so significant that a property does not qualify as investment property. The Group considers each property separately in making its judgment.

(b) Impairment assessment on available-for-sale and held-tomaturity securities

The Group has conducted assessment of its investments held as available-for-sale ("AFS") and held-to-maturity ("HTM") securities as of the end of the year and up to the date of the approval of the financial statements of the Group. Assessment for any impairment, on individual and collective basis, is made with reference to the financial strength and credit rating of each issuer, industry development and market conditions, and historical loss experience of a portfolio of similar credits provided by rating agencies. Apart from the SIV investments having been assessed as impaired, the Group has concluded that there are no objective or specific indications that any of its AFS (except for SIV investments) and HTM securities is impaired. Except for the impairment losses recognized on SIV investments, no impairment allowance is provided on other AFS and HTM securities.

(丙) 持至到期證券

本集團遵循香港會計準則第39號之指引分類具有固定或可予釐定付款及固定到期日之非衍生金融資產為持至到期證券。此一分類須作出重大判斷。在作出判斷時,本集團評估其持有該等資產至到期之意向及能力。倘本集團未能持有此等投資至到期(不包括特別情況,例如在接近到期時出售少量部分),整個類別則須被重新分類為可供出售證券。該等投資將因而按其公平值而非按攤餘成本計量。

- 4. Critical accounting estimates, and judgements in applying accounting policies (Continued)
- 4.2 Critical judgments in applying the entity's accounting policies (Continued)
 - (c) Held-to-maturity securities

The Group follows the guidance of HKAS 39 on classifying non-derivative financial assets with fixed or determinable payments and fixed maturity as held-to-maturity. This classification requires significant judgment. In making this judgment, the Group evaluates its intention and ability to hold such investments to maturity. If the Group fails to keep these investments to maturity other than for the specific circumstances – for example, selling an insignificant amount close to maturity – it will be required to reclassify the entire class as available-for-sale. The investments would therefore be measured at fair value, not amortised cost.

15. 可供出售證券之減值虧損(提撥)/回 撥

本集團之可供出售證券投資包括由第三方投資經 理人所管理的槓桿式/結構性投資工具。

截至二零零七年十二月三十一日止年度內,本集團持有之槓桿式/結構性投資工具的價值因債券價格下跌及槓桿效應而減少,因此本集團評定存在客觀條件顯示該等投資組合已減值,故此於結算日已確認合計1,038,000,000港元之減值虧損,這些結構性投資於年底之價值由二億美元撇減至六千七百萬美元,減幅為67%。

16. 税項

香港利得税乃按照年內估計應課税溢利以税率 17.5%(二零零六年:17.5%)提撥準備。海外税 項支出乃按年內海外估計應課税溢利依本集團經 營業務地區之現行税率計算。

15. Impairment losses (charged)/reversed on available-for-sale securities

The Group's investment in available-for-sale securities included leveraged/structured investment vehicles managed by third party portfolio managers.

During the year ended 31 December 2007, falls in the prices of bonds coupled with the leverage effect on the Group's holdings in leveraged/structured investment vehicles have resulted in a decrease in their values. As a result, the Group has assessed that there are objective indications that the investments have suffered impairment, and an impairment loss totalling HK\$1,038 million has therefore been recognised at the balance sheet date, writing down the amount of these structured investments by 67% from US\$200 million to US\$67 million at the end of the year.

16. Income tax expense

Hong Kong profits tax has been provided at the rate of 17.5% (2006: 17.5%) on the estimated assessable profit for the year. Taxation on overseas profits has been calculated on the estimated assessable profit for the year at the rates of taxation prevailing in the countries in which the Group operates.

此等工具之合約數額僅為其於結算日的交易量, 並不代表其風險數額。

二零零七年之信貸風險加權數額乃參考香港金融管理局(「金管局」)發出之《銀行業(資本)規則》而計算之數額,相應之二零零六年數額則參考銀行業務條例第三附表及金管局所發出之指引計算,計算所得之數額則視乎交易對手及各項合約到期特性而定。

As at 31 December 2006, the credit risk weighted amount of credit default swaps calculated under Basel I basis amounting to HK\$855,575,000 is included in the total credit risk weighted amount of contingent liabilities and commitments in Note 42.

The contract amounts of these instruments indicate the volume of transactions outstanding as at the balance sheet date, they do not represent the amounts at risk.

The credit risk weighted amounts for 2007 are the amounts that have been calculated with reference to the Banking (Capital) Rules issued by the Hong Kong Monetary Authority ("HKMA"). The corresponding amounts for 2006 are the amounts that have been calculated with reference to the Third Schedule of the Hong Kong Banking Ordinance and guidelines issued by the HKMA. The amounts calculated are dependent upon the status of the counterparty and the maturity characteristics of each type of contract.

4. 客戶貸款及墊款(續)

(丙) 按區域分析之客戶貸款總額及逾期貸款

客戶貸款之區域分析乃根據已考慮風險轉移後之 交易對手所在地分類。一般而言,當貸款的擔保 方位處與交易對手不同之區域時,風險將被轉 移。

二零零七年十二月三十一日,本集團客戶貸款總額中超過90%(包括有關之減值貸款及逾期貸款)皆分類在香港項下(此情況與二零零六年十二月三十一日相同)。

5. 信貸、市場及操作風險之資本要求

於附註1披露之二零零七年十二月三十一日資本充足比率乃大新銀行有限公司(「大新銀行」)、豐明銀行有限公司(「豐明銀行」)及D.A.H. Hambros Bank (Channel Islands) Limited(「DAHCI」)參考《銀行業(披露)規則》列明之方法按巴塞爾準則II基準所計算的合併比率。綜合基準已在財務報表附註2.2敘述作會計之用。

於二零零七年,法定資本減少主要為扣減資本基礎之數額增加,包括可供出售投資之重估虧損, 須扣減資本的證券化投資,及於聯營公司之投資。

由於在二零零七年採納《銀行業(資本)規則》,法 定資本及資本要求之計算已採用不同之方法,資 本充足度的量化比較資料不作呈列。

4. Loans and advances to customers (Continued)

(c) Analysis of gross advances to customers and overdue loans by geographical area

Advances to customers by geographical area are classified according to the location of the counterparties after taking into account the transfer of risk. In general, risk transfer applies when an advances is guaranteed by a party located in an area which is different from that of the counterparty.

At 31 December 2007, over 90% of the Group's advances to customers, including related impaired advances and overdue advances, were classified under Hong Kong (a position unchanged from that as at 31 December 2006).

5. Capital charge for credit, market and operational risks

The capital adequacy ratio as at 31 December 2007 disclosed in Note 1 above represents the combined ratio of Dah Sing Bank, Limited ("DSB"), MEVAS Bank Limited ("MEVAS") and D.A.H. Hambros Bank (Channel Islands) Limited ("DAHCI") computed on Basel II basis with reference to the methods set out in the Banking (Disclosure) Rules. For accounting purposes, the basis of consolidation is described in Note 2.2 to the financial statements.

The decrease in regulatory capital in the year of 2007 is mainly due to the increase in the amount of deductions against capital base as a result of revaluation losses for available-for-sale investments and securitisation exposures subject to capital deduction, and an investment in an associate.

Due to the adoption of Banking (Capital) Rules in the year 2007, a different approach has been used to calculate the regulatory capital and capital charges. Comparative quantitative information for capital adequacy is not presented.

風險管理 6.

本集團明瞭各類風險會不停蜕變的特性並透過完 善的管理架構作有效管理。

風險管理專注於五大範圍:信貸風險、市場風 險、利率風險,流動資產風險及操作風險。信貸 風險之產生主要源於本集團之信貸組合,其中包 括商業, 批發和零售借貸、機械和租購融資及財 資部和金融機構業務部的批發借貸。

大部份的市場風險乃源於財資部。此主要與本集 團資產負債表內之買賣交易及資產負債表外之買 賣交易(包括對沖活動之有關持倉)有關。

6. Risk management

The Group recognises the changing nature of risk and manages it through a well-developed management structure.

Risk management is focused on the five major areas of risk - credit risk, market risk, interest rate risk, liquidity risk and operational risk. Credit risk occurs mainly in the Group's credit portfolios comprising commercial, wholesale and retail lending, equipment and hire purchase financing, and treasury and financial institutions wholesale lending.

Market risk arises mainly in Treasury and is associated principally with the Group's on-balance sheet positions in the trading book, and offbalance sheet trading positions including positions taken to hedge elements of the trading book.

(c) Business division credit committees

Each of the operating divisions of the Group has its own credit or risk committee responsible for approving and recommending policies, limits and mandates for risk control within their respective business areas. This is consistent with the Group's approach of devolving responsibility for risk management to the individual business areas under the aegis of the Group Risk function. As such, each business credit risk function reports to both Group Risk and the business area which it supports.

(d) Credit risk

(i) Credit risk exposures

Standard & Poor's Ratings Services ("Standard & Poor's"), Moody's Investors Services ("Moody's") and Fitch Ratings are the external credit assessment institutions ("ECAIs") that the Group uses for the assessment of its credit risk exposures to banks, sovereigns, public sector entities, and collective investment schemes as well as securitisation exposures and exposures to corporates that do not qualify as regulatory retail exposures.

The process it uses to map ECAI issuer ratings to exposures booked in its banking book follows the process prescribed in Part 4 of the Banking (Capital) Rules.

- 3. 未有評級機構配予評級或推斷評級之風險 承擔。

(ii) 交易對手信貸風險承擔

本集團嚴謹控制其銀行賬或買賣賬內之場外(「場外」)衍生交易、回購形式交易及信貸衍生交易合約等持倉淨額之年期和未結算餘額的額度。與此等合約有關之信貸風險承擔主要是其公平值(如利於本集團之市場估值正數值),該信貸風險承擔連同因市場變動之潛在風險承擔被視為授予交易對手的整體借貸額度之一部份而管理。此等信貸風險承擔一般無抵押品或其他擔保。

結算風險在支付現金或交收證券或股票並預期可收回有關現金或證券或股票時產生。本集團為各交易對手任何日期結算總額設定每天結算額度以減低結算風險。本集團亦簽訂淨額結算安排,及於適當時按收款交付基準結算。

 the Capital Rules by reference to an ECAI issuer rating assigned to
 the obligor of the exposure or to an ECAI issue rating of any other
 exposures of the obligor).
- exposures which do not have ECAI issue-specific rating, nor inferred rating.

(ii) Counterparty credit risk exposures

The Group exercises strict control limits in tenor and outstanding amounts on net open positions arising from over-the-counter ("OTC") derivative transactions, repo-style transactions and credit derivative contracts booked in its banking book or trading book. The credit risk exposures associated with these contracts are predominantly their fair values (i.e. the positive marked-to-market values favourable to the Group). These credit risk exposures together with potential exposures from market movements are managed as part of the overall lending limits allowed to counterparties. Collateral or other security is generally not obtained for such credit risk exposures.

Settlement risk arises in situations where a payment in cash or a delivery of securities or equities is made in expectation of a corresponding receipt in cash, securities or equities. To mitigate settlement risk, daily settlement limits are established for each counterparty on the aggregate of all settlements on any day. The Group will also enter into netting arrangements and make settlement on the basis of delivery against payment as appropriate.

(iii) Credit risk mitigation

The credit risk mitigation techniques used by the Group are generally those recognised by the Banking (Capital) Rules for reduced capital weighting. Common types of collateral obtained are cash deposits, real estate properties, as well as taxi and public light bus medallion. For certain types of advances to customers, the Group also places reliance on guarantees issued by governments, public sector entities and corporates with acceptable credit rating.

The value of all real estate properties taken as collateral is appraised prior to the inception of the loans. For property collateral supporting problem accounts, their open market values are appraised at least every six months. For property collateral that has been repossessed, the Group's policy is to arrange for realisation as soon as practicable.

(e) Market risk

The Group is exposed to various types of market risk. Details of the risk management policies and procedures adopted are set out in Note 3.3 to the financial statements.

(f) Asset securitisation

The Group uses the standardised (securitisation) approach to calculate the credit risk for securitisation exposures. The Group is an investing institution for all classes of exposures below.

(i) Operational risk

The Group manages its operational risk through a management structure comprising members of senior management and operational risk officers from each business and support function, and operating through a set of operational risk policies, risk tool-kits, operational risk incident reporting and tracking system, and control self assessment and key risk indicator tools. Together with a well established internal control systems, operational risk in most situations can be adequately identified, assessed, monitored and mitigated. To allow the operational risk framework to be clearly communicated to all levels within the Group, awareness and training programs are conducted from time to time.

To minimise the impact on the Group's business in the event of system failure or disasters, back-up sites and operational recovery policies and plans have been established and tested for all critical business and operations functions.

Operational risk framework is also supported by periodic independent reviews of internal control systems by external and internal auditors. Reporting and assessment of the performance of operational risk management are monitored by the Group Risk and reported to the Group's Risk Management Committee.

(j) Reputation risk

(Expressed in thousands of Hong Kong dollars)

Risk management (Continued)

Reputation risk is the risk arising from the potential that negative publicity regarding the Group's business practices, operational errors or operating performance, whether true or not, could cause customer concerns or negative view, decline in the customer base or market share, or lead to costly litigation or revenue reductions.

The Group manages reputation risk through upholding a high standard of corporate governance and management oversight, maintenance of effective policies and procedures with emphasis on internal control, risk management and compliance; proper staff training and supervision; proper handling of customer complaints or dissatisfaction; and adherence to sound business practices. Standards are set and policies and procedures are established by the Group in all areas, which operate to reduce vulnerability to reputation risk.

(k) Strategic risk

Strategic risk generally refers to the corporate risk that may bring significant immediate or future negative impact on the financial and market positions of the Group because of poor strategic decisions, unacceptable financial performance, improper implementation of strategies and lack of effective response to the market changes.

The Board of Directors, assisted by senior management, is directly responsible for the management of strategic risk. 6. 風險管理(續)

(丑) 執行巴塞爾Ⅱ資本協定(續)

巴塞爾準則II之架構環繞三大支柱。第一支柱除修訂了巴塞爾準則對信貸風險及市場風險之處理方法外,並加入了銀行對營運風險之最低資本要求。第二支柱要求銀行必須有完善之內部程序,按照其風險(包括該等未包含在第一支柱之風險)之全面評估,及監察人員應當對此程序進行管理監察審查,以評估其資本之充足度。第三支柱透過要求銀行對其風險組合、資本充足度及風險管理作出公開披露,增加市場之透明度及紀律,以補助第一支柱及第二支柱。

自二零零七年一月起,大新銀行及豐明銀行採納標準法計算信貸風險及市場風險,及採納基本指標法計算操作風險。此等均為《銀行業(資本)規則》內列明之認可方法。據此,本集團已全面檢查其系統及管理以符合該等方法要求之標準。本集團正再進一步準備採用更完善的方法,即內部評級基礎計算法(「內部評級法」)以計算信貸風險。此方法將令本集團重大地增強其分辨、評估、監察、控制及減少風險之風險管理能力。本集團並以朝向使用標準法計算操作風險為目標。

本集團已成立一個專注於巴塞爾準則II之小組,其職責為提出整體方向及協調業務部門及支援部門之間修改基礎設施及運作以符合監管規定。該小組在來年將繼續擴大及提昇能力以符合第二支柱及第三支柱之規定,並為邁向採用內部評級法建設基礎。

(寅) 審核處的角色

本集團之審核處是一個獨立、客觀及顧問性質的 部門,集中於改進和維持本集團業務及後勤部門 良好的內部控制。該處向一獨立非執行董事所主 持的集團審核委員會作出功能上的匯報。審核處 處理各類不同形式的內部控制活動,例如合規性 審計,操作和系統覆查以確保本集團控制系統的 完整性、效率和有效性。

6. Risk management (Continued)

(l) Implementation of the Basel II Capital Accord (Continued)

Basel II is structured around three "pillars". Pillar 1 sets out the minimum capital requirements for a bank's operational risk, in addition to revising the "Basel I" treatment of credit risk and market risk. Pillar 2 requires that banks should have in place sound internal processes to assess the adequacy of their capital, based on a thorough assessment of their risks including those risks not covered under Pillar 1, and that supervisors should carry out supervisory review of this process. Pillar 3 complements Pillar 1 and Pillar 2 through enhanced market transparency and market discipline by requiring banks to make public disclosure of information on their risk profiles, capital adequacy and risk management.

Starting January 2007, Dah Sing Bank and MEVAS Bank adopt the standardised approach for credit risk and market risk, and the basic indicator approach for operational risk. These are the default approaches as specified in the Banking (Capital) Rules. Accordingly, the Group has overhauled its systems and controls in order to meet the standards required for these approaches. As a step forward, the Group is preparing for the use of the more advanced approach i.e. foundation internal ratings-based ("FIRB") approach for the calculation of credit risk. This will enable the Group to enhance significantly its risk management capabilities in identifying, assessing, monitoring, controlling and mitigating risks. The Group also targets to advance to the standardised approach in calculating its operational risk.

A dedicated Basel II team has been set up with the responsibility to provide an overall direction to and co-ordinate with relevant business divisions and support units in revamping the infrastructure and operations for meeting the compliance imperative. The team will continue to expand and upgrade its capabilities in the coming years to meet the requirements of Pillar 2 and Pillar 3, and to build the foundation for migration to the FIRB approach.

(m) The role of Internal Audit

The Group's Internal Audit Division is an independent, objective assurance and consulting unit, which is designed to focus on enhancing and sustaining sound internal control in all business and operational units of the Group. The Division reports functionally to the Group Audit Committee, which is chaired by an Independent Non-Executive Director. The Division conducts a wide variety of internal control activities such as compliance audits and operations and systems reviews to ensure the integrity, efficiency and effectiveness of the systems of control of the Group.

Auditor's responsibility (Continued)

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and true and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements give a true and fair view of the state of affairs of the Company and of the Group as at 31 December 2007 and of the Group's profit and cash flows for the year then ended in accordance with Hong Kong Financial Reporting Standards and have been properly prepared in accordance with the Hong Kong Companies Ordinance.
