32. Risk management

(A) Banking Group

The Group recognises the changing nature of risk and manages it through a well-developed management structure.

Risk management is focused on the five major areas of risk – credit risk, market risk, interest rate risk, liquidity risk and operational risk. Credit risk occurs mainly in the Group's credit portfolios comprising commercial, wholesale and retail lending, equipment and hire purchase financing, and treasury and financial institutions wholesale lending.

Market risk arises mainly in Treasury and is associated principally with the Group's on-balance sheet positions in the trading book, and off-balance sheet trading positions including positions taken to hedge elements of the trading book.

Interest rate risk means the risk to the Group's financial condition resulting from adverse movements in interest rates.

Liquidity risk arises across the Group's balance sheet.

Operational risk is the risk of loss (direct or indirect) resulting from inadequate or failed internal processes, people and systems or from external events.

(a) The risk management structure of the Group

The Board of Directors has the broad overall responsibility for the management of all types of risk. The responsibilities of the Board in relation to risk control are:

- the approval of the overall strategy and policies to ensure that credit and other risks are properly managed at both the transaction and portfolio levels;
- the management of risk, both financial and non-financial, conducted through operational and administrative control systems including the operation of the Group Audit Committee; review of key results (against forecasts), operational statistics and policy compliance; and
- financial performance by analysis against approved budgets and analysis of variations in key non-financial measures.

The Executive Committee has been delegated the authority to oversee and guide the management of different risks which are more particularly managed and dealt with by Group Risk and different functional committees.

(b) Group risk function

The independent Group Risk function is responsible for ensuring that policies and mandates are established for the Group as a whole. Group Risk monitors and reports the Group risk positions to the Board via the Risk Management Committee and the Executive Committee, sets standards for financial risks and data integrity and ensures that the financial risks are fully considered in the product planning and pricing process. Group Risk reviews and approves all credit and risk exposure policies for the Group including the approval of exposures to new markets, economic sectors, organisations, credit products and financial instruments which expose the Group to different types of risks. In determining risk policies, Group Risk takes into account the guidelines established by the Hong Kong Monetary Authority, business direction, and risk adjusted performance of each business. Group Risk is also represented on the lending or risk committees of the Group's operating divisions and businesses.

The Group's risk management expertise continues to advance the overall quality of the Group's lending portfolios, and enables the Group to meet the changing regulatory requirements and enter into credit exposures with the confidence that it understands the associated risks and rewards.

The Group is continuing to evolve its risk management capabilities under the aegis of the Head of Group Risk, increasing the focus of its risk strategy on risk and reward and returns on capital. The Group uses a range of risk measurement and analytical tools in its management of the various risks which it faces in its day-to-day businesses and these are continually being enhanced and upgraded to reflect the everchanging business needs and the requirements of the regulators. The Risk Management and Control function is part of Group Risk and reports directly to the Head of Group Risk.

(c) Business division credit committees

Each of the operating divisions of the Group has its own credit or risk committee responsible for approving and recommending policies, limits and mandates for risk control within their respective business areas. This is consistent with the Group's approach of devolving responsibility for risk management to the individual business areas under the aegis of the Group Risk function. As such, each business credit risk function reports to both Group Risk and the business area which it supports.

(丁) 應用金融工具策略

本集團接受定息或浮息及不同年期之 客戶存款,並透過投資所收取之資金 於高質素資產以賺取息差收入。本集 團尋求透過整合短期資金及按較高利 率借出較長期之款項以增加此等息差 收入,同時並保持足夠之流動資金以 應付可能須付之所有到期債務。

本集團亦按信貸風險及市場情況,透 過向不同信貸級別之商業及零售借款 人貸款,以合理利率及服務費用,提 高息差。此等活動風險不單涉及資產 負債表內之貸款及墊款,亦涉及本集 團提供擔保及其他承擔,例如信用證 及其他承諾。

本集團亦通過交易所及場外交易買賣 包括衍生工具之金融工具,藉著證 券、債券、貨幣、利率及商品價格之 短期波動賺取利潤。董事會制定交易 限額以控制不同程度之市場持倉風 險。除指定對沖安排外,有關外匯及 利率之風險一般以訂立對銷持倉(包 括與客戶及市場對手之交易)或利用 衍生工具作對沖,藉此控制有關市場 持倉套現之現金淨值。

本集團亦應用利率掉期及其他利率衍 生工具以減輕因利率變動令定息資產 公平值下降或定息有期負債公平值上 升之利率風險。若干金融工具被用作 公平值對沖,對沖項目之細節,包括 被對沖項目、金額、利率、對沖期及 目的,皆於各公平值對沖項目開始時 被確定和記錄,亦於開始對沖時按預 期基礎評估及不時根據實際經驗及估 價重新評估對沖有效性。倘公平值對 沖關係不符合對沖會計的有效性測試 標準,則對沖會計方法將於此公平值 對沖失效日起停止。

32. Risk management (Continued)

(A) Banking Group (Continued)

(d) Strategy in using financial instruments

The Group accepts deposits from customers at both fixed and floating rates, and for various periods, and seeks to earn positive interest margins by investing these funds in high-quality assets. The Group seeks to increase these margins by consolidating short-term funds and lending for longer periods at higher rates, while maintaining sufficient liquidity to meet all claims that might fall due.

The Group also seeks to raise its interest margins through lending to commercial and retail borrowers with a range of credit standing by charging customers appropriate lending rates and fees, taking into consideration credit risk and market conditions. Such exposures involve not just on-balance sheet loans and advances, as the Group also enters into guarantees and other commitments such as letters of credit performance and other bonds.

The Group also trades in financial instruments where it takes positions in exchange-traded and over-the-counter instruments, including derivatives, to take advantage of shortterm market movements in equities and bonds and in currency, interest rate and commodity prices. The Board places trading limits on the level of exposure that can be taken in relation to market positions. Apart from specific hedging arrangements, foreign exchange and interest rate exposures are normally offset by entering into counterbalancing positions (including transactions with customers or market counterparties), or by the use of derivatives, thereby controlling the variability in the net cash amounts required to liquidate market positions.

The Group also uses interest rate swap and other interest rate derivatives to mitigate interest rate risk arising from changes in interest rates that will result in decrease in the fair value of fixed rate assets or increase in the fair value of fixed rate term liabilities. Certain of these financial instruments are designated as fair value hedges, and the terms of hedge including hedged item, amount, interest rates, hedge period and purpose are determined and documented at the inception of each fair value hedge. Hedge effectiveness is assessed at inception on a prospective basis and is reassessed, on an ongoing basis, based on actual experience and valuation. Fair value hedge relationships that do not meet the effectiveness test requirement of hedge accounting are discontinued with effect from the date of ineffectiveness of the fair value hedge.

(戊) 信貸風險

本集團之主要信貸風險為借款人或交 易對手未能履行對本集團之償款責 任。此等責任乃源自本集團之貸款及 投資活動、以及金融工具之買賣(包 括衍生工具)。

32. Risk management (Continued)

(A) Banking Group (Continued)

(e) Credit risk

The Group's main credit risk is that borrowers or counterparties may default on their payment obligations due to the Group. These obligations arise from the Group's lending and investment activities, and trading of financial instruments (including derivatives).

The Group has a Group Credit Committee and for each business division a credit committee made up of certain Executive Directors and senior credit officers and chaired by the Chief Executive. Each credit committee has the responsibility for formulating and revising credit policies and procedures for that division within the parameters of the Group Risk Policy and regulatory framework. Credit policies and procedures define the credit assessment and approval criteria and guidelines, use of scoring, review and monitoring process and the systems of loan classification and impairment.

The Group manages all types of credit risk on a prudent basis, in accordance with the credit approval and review policies, by evaluating the credit-worthiness of different types of customers and counterparties based on assessment of business, financial, market and industry risks applicable to the types of loans, collateral and counterparty dealings including dealing in or use of derivative financial instruments. Credits are extended within the parameters set out in the credit policies and are approved by different levels of management based upon established guidelines. Credit exposures, limits and asset quality are regularly monitored and controlled by management, credit committees and Group Risk. The Group's internal auditors conduct regular reviews and audits to ensure compliance with credit policies and procedures and regulatory guidelines.

The individual business' credit policies also establish policies and processes for the approval and review of new products and activities, together with details of the loan grading, or credit scoring, processes and impairment policies.

(e)(i) Credit risk exposures

Standard & Poor's Ratings Services ("Standard & Poor's"), Moody's Investors Services ("Moody's") and Fitch Ratings are the external credit assessment institutions ("ECAIs") that the Group uses for the assessment of its credit risk exposures to banks, sovereigns, public sector entities, and collective investment schemes as well as securitisation exposures and exposures to corporates that do not qualify as regulatory retail exposures.

The process it uses to map ECAI issuer ratings to exposures booked in its banking book follows the process prescribed in Part 4 of the Banking (Capital) Rules.

- 甲. 集團銀行系 (續)
- (戊) 信貸風險 (續)
 - (戊)(ii) 交易對手信貸風險承擔

本集團嚴謹控制其銀行賬或買 賣賬內之場外(「場外」)衍生交 易、回購形式交易及信貸衍生 交易合約等持倉淨額之年期和 未結算餘額的額度。與此等合 約有關之信貸風險承擔主要是 其公平值(如利於本集團之市 場估值正數值),該信貸風險 承擔褲視為授予交易對手的 整體借貸額度之一部份而管 理。此等信貸風險承擔一般無 抵押品或其他擔保。

結算風險在支付現金或交收證 券或股票並預期可收回有關現 金或證券或股票時產生。本集 團為各交易對手任何日期結算 總額設定每天結算額度以減低 結算風險。本集團亦簽訂淨額 結算安排,及於適當時按收款 交付基準結算。

(戊)(iii) 減低信貸風險

本集團採用之減低信貸風險措 施一般為《銀行業(資本)規則》 認可以減少資本加權值,收取 之抵押品類別普遍為現金存 款、不動產物業及的士和公共 小巴經營牌。就某些類別之客 戶貸款,本集團亦信賴政府、 公營單位及配有可接受信貸評 級法團等發出之擔保。

全部用作抵押品之不動產物業 在授出貸款前將被估值。問題 客戶之抵押物業,公開市場價 值將最少每六個月估值一次。 就已收回之物業抵押品,本集 團之政策為按可行情況盡快出 售。

32. Risk management (Continued)

- (A) Banking Group (Continued)
- (e) Credit risk (Continued)
 - (e)(ii) Counterparty credit risk exposures

The Group exercises strict control limits in tenor and outstanding amounts on net open positions arising from over-the-counter ("OTC") derivative transactions, repostyle transactions and credit derivative contracts booked in its banking book or trading book. The credit risk exposures associated with these contracts are predominantly their fair values (i.e. the positive markedto-market values favourable to the Group). These credit risk exposures together with potential exposures from market movements are managed as part of the overall lending limits allowed to counterparties. Collateral or other security is generally not obtained for such credit risk exposures.

Settlement risk arises in situations where a payment in cash or a delivery of securities or equities is made in expectation of a corresponding receipt in cash, securities or equities. To mitigate settlement risk, daily settlement limits are established for each counterparty on the aggregate of all settlements on any day. The Group will also enter into netting arrangements and make settlement on the basis of delivery against payment as appropriate.

(e)(iii) Credit risk mitigation

The credit risk mitigation techniques used by the Group are generally those recognised by the Banking (Capital) Rules for reduced capital weighting. Common types of collateral obtained are cash deposits, real estate properties, as well as taxi and public light bus medallion. For certain types of advances to customers, the Group also places reliance on guarantees issued by governments, public sector entities and corporates with acceptable credit rating.

The value of all real estate properties taken as collateral is appraised prior to the inception of the loans. For property collateral supporting problem accounts, their open market values are appraised at least every six months. For property collateral that has been repossessed, the Group's policy is to arrange for realisation as soon as practicable.

(f) Market risk

Market risk is the risk of losses in assets, liabilities and offbalance sheet positions arising from movements in market rates and prices.

Market risk exposure for different types of transactions is managed within risk limits and guidelines approved by the Board, Executive Committee ("EXCO"), Asset and Liability Management Committee ("ALCO"), and Treasury Risk Committee ("TRC"). Risk limits are set by products and by different risk types. Limits comprise a combination of notional. stop loss, sensitivity and value-at-risk ("VaR") controls, All trading positions are subject to daily mark-to-market valuation. Risk Management and Control Department ("RMCD") in Group Risk Division, as an independent risk management and control unit, identifies, measures, monitors and controls the risk exposures against approved limits and initiates specific action to ensure the overall and the individual market risks are managed within an acceptable level. Any exceptions have to be reviewed and sanctioned by the appropriate level of management of TRC or by EXCO.

The launch of every new product is governed by the New Product Approval process stipulated under the Group Risk Policy in which the relevant business units, supporting functions and Group Risk review the critical requirements, risk assessment and resources plan. The Group's Internal Audit function performs regular independent review and testing to ensure compliance with the market risk policies and procedures by Treasury, RMCD and other relevant units.

Banco Comercial de Macau, S.A. ("BCM"), a subsidiary of Dah Sing Bank, Limited ("DSB"), runs its treasury functions locally under its own set of limits and policies and within the overall market risk limits set by DSB. RMCD of DSB oversees and controls the market risk arising from BCM's treasury operation.

The Group applies different risk management policies and procedures in respect of the market risk arising from its trading and banking books.

(1) 市場風險計量方法

作為市場風險管理之一部份, 本集團進行各種對沖策略。本 集團訂立利率掉期以配對與長 期定息債務證券有關之利率風 險。用於計量及監控市場風險 之計量方法概述如下:

市場風險數值

本集團依據一系列針對市場狀況及各種變化之假設,應用市 場風險數值法預計持作買賣用 途組合之市場風險狀況及最大 預計損失。董事會就本集團可 接受之市場風險數值設定額 度,並由集團風險部每日監 控。

市場風險數值乃一種以統計為 基準就現時組合因市場不利變 化預計潛在損失。其表明本集 團可能損失之最大數額,惟只 限於某個置信水平,就一日持 倉期之基準作推算,本集團之 置信水平為99%。因此存在明 確的統計概率,實際損失可能 比市場風險數值之估計數為 大。市場風險數值模型假設某 個持倉期直至結束持倉。市場 風險數值亦依據持倉之現時市 值、市場風險因素過往在一個 二百五十天週期(或超過一年) 之相互關係及波幅。本集團採 用參數性市場風險數值法,直 接應用上述之過去相互關係及 利率、價格、指數等之波幅於 現有的持倉。並定期監控實際 結果以測試應用於計算市場風 險數值之假設及參數/因素之 有效性。

採納該方法並不能避免當市場 狀況發生重大變化時超逾此等 額度之損失。

因市場風險數值為本集團之市 場風險管理範疇內一重要環 節,董事會就各持作買賣用途 組合之運作設定不同市場風險 數值額度及分配至各業務部 門,並每年審閱。集團風險部 每天審視大新銀行之市場風險 數值,對比實際風險及額度。 本集團就截至二零零八年六月 三十日止之六個月內全部交易 活動之市場風險數值日均值為 5,423,000港元 (二零零七年十 二月三十一日止年度: 4.312.000港元)。

本集團藉著反饋測試買賣賬之 市場風險數值結果,持續監控 市場風險數值模型之素質。所 有反饋測試的偏差予以調查及 向高層管理人員匯報。

- Market risk (Continued) (f)
 - Market risk arising from the trading book (Continued) (f)(i)
 - Market risk measurement technique (1)

As part of the management of market risk, the Group undertakes various hedging strategies. The Group enters into interest rate swaps to match the interest rate risk associated with the fixed-rate long-term debt securities. The major measurement techniques used to measure and control market risk are outlined below.

Value at risk

The Group applies a "value at risk" methodology ("VaR") to its trading portfolio to estimate the market risk positions held and the maximum losses expected. based on a number of assumptions for various changes in market conditions. The Board sets limits on the value at risk that are acceptable for the Group which are monitored on a daily basis by Group Risk.

VaR is a statistically based estimate of the potential loss on the current portfolio from adverse market movements. It expresses the "maximum" amount the Group might lose, but only to a certain level of confidence which for the Group is 99% for a one day holding period. There is therefore a specified statistical probability that actual loss could be greater than the VaR estimate. The VaR model assumes a certain "holding period" until positions can be closed. It is also based on the current mark-to-market value of the positions, the historical correlation and volatilities of the market risk factors over a period of 250 days (or over one year). The Group applies these historical correlation and volatilities in rates, prices, indices, etc. directly to its current positions using a method known as parametric VaR methodology. Actual outcomes are monitored regularly to test the validity of the assumptions and parameters/factors used in the VaR calculation.

The use of this approach does not prevent losses outside of these limits in the event of more significant market movements

As VaR constitutes an integral part of the Group's market risk control regime, VaR limits are established and reviewed by the Board annually for all trading portfolio operations and allocated to business units. Actual exposures against limits, together with VaR of Dah Sing Bank, Limited, is reviewed daily by Group Risk. Average daily VaR for the Group for all trading activities during the six months ended 30 June 2008 was HK\$5,423,000 (year ended 31 December 2007: HK\$4,312,000).

The quality of the VaR model is continuously monitored by back-testing the VaR results for trading books. All back-testing exceptions are investigated, and all backtesting results are reported to senior management.

Stress tests provide an indication of the potential size of losses that could arise in extreme conditions. The stress tests carried out by Group Risk include: risk factor stress testing, where stress movements are applied to each risk category; and ad hoc stress testing, which includes applying possible stress events to specific positions or regions.

The results of the stress tests are reviewed by senior management in each business unit and by the Board of Directors. The stress testing is tailored to the business and typically uses scenario analysis.

(己)(ii) 源自銀行賬之市場風險

本集團之銀行賬中,市場風險 主要來自於債務證券及權益性 證券之持倉。

(1) 市場風險計量方法

本集團現時並無採用市場風險 數值法以計量及監控銀行賬中 之市場風險。 (f)(ii) Market risk arising from the banking book

In the Group's banking book, market risk is predominantly associated with positions in debt and equity securities.

(1) Market risk measurement technique

Within the risk management framework and policies established by the Board, EXCO and TRC, various management action triggers ("MATs") are established to provide early alert to management on the different levels of exposures of the Group's banking book activities to foreign exchange risk, interest rate risk, and liquidity risk. Sensitivity analysis and stress testing covering shocks and shifts in interest rates on the Group's on- and off- balance sheet positions, liquidity drift under institution-specific and general market crisis scenarios are regularly performed to gauge and forecast the market risk inherent in the Group's banking book portfolios against these MATs.

VaR methodology is not currently being used to measure and control the market risk of the banking book.

(2) 外匯風險

除美元及澳門幣外,本集團承 擔的淨外匯風險十分有限,因 為由客戶交易引致的外匯持倉 及外匯結存,通常會與其他的 客戶交易或市場交易配對抵 銷。淨風險持倉,無論是個別 貨幣或總體而言,每日皆由本 集團財資部控制在已制定的外 匯限額內。

若用長期外幣資金融資港元資 產,通常會透過與遠期外匯合 約配對抵銷以減低外匯風險。

(3) 利率風險

現金流利率風險乃由於市場利 率變化而令金融工具未來現金 流波動之風險。公平值利率風 險則為由於市場利率變化而令 金融工具價值波動之風險。本 集團就現水平市場利率之波動 承擔公平值風險及現金流風 險。息差及淨利息收入可能由 於此等變化或突如其來之變化 而上升或下跌。董事會就可能 承擔之重訂利率錯配水平設定 額度,由風險管理及監控部每 天監控。

(庚) 流動資產風險

流動資產風險乃本集團未能就到期之 金融負債履行付款責任及當其提取時 未能補充資金之風險,後果可能是未 能履行責任付還存款人及履行承擔授 出貸款。

本集團審慎地管理流動資產以確保流 動資產比率於是年度內均能保持高於 法定最低要求的流動資金比率。本集 團內之銀行附屬公司是年內之平均流 動資金比率遠高於香港銀行業條例最 低要求的25%。

32. Risk management (Continued)

- (A) Banking Group (Continued)
- (f) Market risk (Continued)
 - (f)(ii) Market risk arising from the banking book (Continued)
 - (2) Foreign exchange risk

The Group has limited net foreign exchange exposure (except for USD and MOP) as foreign exchange positions and foreign currency balances arising from customer transactions are normally matched against other customer transactions or transactions with the market. The net exposure positions, both by individual currency and in aggregate, are managed by the Treasury of the Group on a daily basis within established foreign exchange limits.

Long-term foreign currency funding, to the extent that this is used to fund Hong Kong dollar assets, is normally matched using foreign exchange forward contracts to reduce exposure to foreign exchange risk.

(3) Interest rate risk

Cash flow interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Fair value interest rate risk is the risk that the value of a financial instrument will fluctuate because of changes in market interest rates. The Group takes on exposure to the effects of fluctuations in the prevailing levels of market interest rates on both its fair value and cash flow risks. Interest margins and net interest income may increase or decrease as a result of such changes or in the event that unexpected movements arise. The Board sets limits on the level of mismatch of interest rate repricing that may be undertaken, which is monitored daily by RMCD.

(g) Liquidity risk

Liquidity risk is the risk that the Group is unable to meet its payment obligations associated with its financial liabilities when they fall due and to replace funds when they are withdrawn. The consequence may be the failure to meet obligations to repay depositors and fulfill commitments to lend.

The Group manages its liquidity on a prudent basis to ensure that a sufficiently high liquidity ratio relative to the statutory minimum is maintained throughout the year. The average liquidity ratio of the banking subsidiaries within the Group during the period was well above the 25% minimum ratio set by the Hong Kong Banking Ordinance.

(庚) 流動資產風險(續)

本集團的資產及負債管理委員會定期 檢討現行貸款和存款的組合及變化、 融資需求及預測、對到期錯配狀況及 流動資金比率作出持續監控。本集團 亦對流動資金比率及到期錯配定下適 當的限額並持有充足的流動資產以確 保能應付所有短期資金需求。

本集團的資金主要包括客戶存款、已 發行的存款證及中期票據。發行存款 證及中期票據有助延長融資年期及減 少到期錯配,在少數情況下,亦會吸 納短期銀行同業存款。本集團乃銀行 同業市場的淨放款人。

監控及呈報之形式為計量並對次日、 下星期及下月份之現金流分別作出推 測,此等為流動資產管理之主要期 間。以該等推測之起步點為依據分析 金融負債之合約到期日及金融資產之 預計回收日。

資產及負債委員會亦監控錯配之中期 資產,未提取借貸承擔之水平及類 別,透支額之使用率及或然負債之影 響(例如備用信用證及擔保)。

(辛) 操作風險

本集團透過一個管理架構管理操作風 險,其成員包括高層管理人員及來自 各業務和支援部門之操作風險人員, 並透過一系列操作風險政策、風險工 具箱、操作風險事件申報及紀錄系 統,及自我評估監控和主要風險指標 工具運作。連同設立一個良好內部監 控系統,操作風險在大多數情況下均 可充分地認明、評估、監控及減低。 為能向集團內各階層清晰地傳達該操 作風險架構,認知和訓練課程不時舉 行。

為減低系統失靈或災難對本集團業務 之影響,本集團已設定備用場地、操 作復元政策及計劃,並對所有主要業 務及支援部門進行測試。

外部及內部審核師亦定期對內部監控 系統作獨立審閱以支托操作營運架 構。集團風險部負責監控操作風險管 理表現之報告及評估,並向集團風險 管理委員會匯報。

32. Risk management (Continued)

(A) Banking Group (Continued)

(g) Liquidity risk (Continued)

The Group's Asset and Liability Management Committee ("ALCO") regularly reviews the Group's current loan and deposit mix and changes, funding requirements and projections, and monitors the liquidity ratio and maturity mismatch on an ongoing basis. Appropriate limits on liquidity ratio and maturity mismatch are set and sufficient liquid assets are held to ensure that the Group can meet all short-term funding requirements.

The Group's funding comprises mainly deposits of customers, certificates of deposit and medium term notes issued. The issuance of certificates of deposit and medium term notes helps lengthen the funding maturity and reduce the maturity mismatch. Short-term interbank deposits are taken on a limited basis and the Group is a net lender to the interbank market.

Monitoring and reporting take the form of cash flow measurement and projections for the next day, week and month respectively, as these are key periods for liquidity management. The starting point for those projections is an analysis of the contractual maturity of the financial liabilities and the expected collection date of the financial assets.

ALCO also monitors unmatched medium-term assets, the level and type of undrawn lending commitments, the usage of overdraft facilities and the impact of contingent liabilities such as standby letters of credit and guarantees.

(h) Operational risk

The Group manages its operational risk through a management structure comprising members of senior management and operational risk officers from each business and support function, and operating through a set of operational risk policies, risk tool-kits, operational risk incident reporting and tracking system, and control self assessment and key risk indicator tools. Together with a well established internal control systems, operational risk in most situations can be adequately identified, assessed, monitored and mitigated. To allow the operational risk framework to be clearly communicated to all levels within the Group, awareness and training programs are conducted from time to time.

To minimise the impact on the Group's business in the event of system failure or disasters, back-up sites and operational recovery policies and plans have been established and tested for all critical business and operations functions.

Operational risk framework is also supported by periodic independent reviews of internal control systems by external and internal auditors. Reporting and assessment of the performance of operational risk management are monitored by the Group Risk and reported to the Group's Risk Management Committee.

巴塞爾準則II之架構環繞三大支柱。 第一支柱除修訂了巴塞爾準則I對信 貸風險及市場風險之處理方法外,並 加入了銀行對營運風險之最低資本要 求。第二支柱要求銀行必須有完善之 內部程序,按照其風險(包括該等未 包含在第一支柱之風險)之全面評 估,及監察人員應當對此程序進行管 理監察審查,以評估其資本之充足 度。第三支柱透過要求銀行對其風險 組合、資本充足度及風險管理作出公 開披露,增加市場之透明度及紀律, 以補助第一支柱及第二支柱。

32. Risk management (Continued)

(A) Banking Group (Continued)

(i) Reputation risk

Reputation risk is the risk arising from the potential that negative publicity regarding the Group's business practices, operational errors or operating performance, whether true or not, could cause customer concerns or negative view, decline in the customer base or market share, or lead to costly litigation or revenue reductions.

The Group manages reputation risk through upholding a high standard of corporate governance and management oversight, maintenance of effective policies and procedures with emphasis on internal control, risk management and compliance; proper staff training and supervision; proper handling of customer complaints or dissatisfaction; and adherence to sound business practices. Standards are set and policies and procedures are established by the Group in all areas, which operate to reduce vulnerability to reputation risk.

(j) Strategic risk

Strategic risk generally refers to the corporate risk that may bring significant immediate or future negative impact on the financial and market positions of the Group because of poor strategic decisions, unacceptable financial performance, improper implementation of strategies and lack of effective response to the market changes.

The Board of Directors, assisted by senior management, is directly responsible for the management of strategic risk. Directors formulate the strategic goals and key direction of the Group, ensure business strategies are developed to achieve these goals, oversee the strategic development and implementation to secure compatibility with the Group's strategic goals, review business performance, deploy proper resources to achieve the Group's objectives, and authorise management to take appropriate actions to mitigate risks.

(k) Implementation of the Basel II Capital Accord

The revised capital adequacy framework known as Basel II has come into force for all locally incorporated authorized institutions in Hong Kong from January 2007. To implement Basel II, the Hong Kong Monetary Authority published the final Banking (Capital) Rules and Banking (Disclosure) Rules at the end of 2006.

Basel II is structured around three "pillars". Pillar 1 sets out the minimum capital requirements for a bank's operational risk, in addition to revising the "Basel I" treatment of credit risk and market risk. Pillar 2 requires that banks should have in place sound internal processes to assess the adequacy of their capital, based on a thorough assessment of their risks including those risks not covered under Pillar 1, and that supervisors should carry out supervisory review of this process. Pillar 3 complements Pillar 1 and Pillar 2 through enhanced market transparency and market discipline by requiring banks to make public disclosure of information on their risk profiles, capital adequacy and risk management.

(子) 執行巴塞爾II資本協定(續)

自二零零七年一月起,大新銀行及豐 明銀行採納標準法計算信貸風險及市 場風險,及採納基本指標法計算操作 風險。此等均為《銀行業(資本)規則》 內列明之認可方法。據此,本集團已 全面檢查其系統及管理以符合該等方 法要求之標準。本集團正再進一步準 備採用更完善的方法,即內部評級基 礎計算法(「內部評級法」)以計算信貸 風險。此方法將令本集團重大地增強 其分辨、評估、監察、控制及減少風 險之風險管理能力。本集團並以朝向 使用標準法計算操作風險為目標。

本集團已成立一個專注於巴塞爾準則 II之小組,其職責為提出整體方向及 協調業務部門及支援部門之間修改基 礎設施及運作以符合監管規定。該小 組在來年將繼續擴大及提昇能力以符 合第二支柱及第三支柱之規定,並為 邁向採用內部評級法建設基礎。

(丑) 金融資產及負債之公平值

於活躍市場買賣之金融工具(例如公 開買賣之衍生工具、持作買賣用途的 證券及可供出售之證券)之公平值為 結算日之市場價格。本集團所持金融 資產所用之市價為當時買入價;而金 融負債之適用市價為當時賣出價。

非活躍市場買賣之金融工具(例如櫃 枱交易衍生工具)之公平值乃使用估 值技術釐定。本集團使用多種方法, 並按各結算日當時之市況作出假設。 長期債項乃使用同類工具之市場價或 交易商之報價。釐定其餘金融工具之 公平值時則使用其他技術,例如預計 貼現現金流量。利率掉期之公平值按 估計未來現金流量之現值計算。遠期 外匯合約之公平值則應用於結算日期 外匯市場遠期匯率釐定。

就披露之用途而言,金融資產及負債 之公平值乃按本集團可得之同類金融 工具按當時市場利率貼現未來合約現 金流量而計算。

32. Risk management (Continued)

(A) Banking Group (Continued)

(k) Implementation of the Basel II Capital Accord (Continued)

Starting January 2007, Dah Sing Bank and MEVAS Bank adopt the standardised approach for credit risk and market risk, and the basic indicator approach for operational risk. These are the default approaches as specified in the Banking (Capital) Rules. Accordingly, the Group has overhauled its systems and controls in order to meet the standards required for these approaches. As a step forward, the Group is preparing for the use of the more advanced approach i.e. foundation internal ratings-based ("FIRB") approach for the calculation of credit risk. This will enable the Group to enhance significantly its risk management capabilities in identifying, assessing, monitoring, controlling and mitigating risks. The Group also targets to advance to the standardised approach in calculating its operational risk.

A dedicated Basel II team has been set up with the responsibility to provide an overall direction to and co-ordinate with relevant business divisions and support units in revamping the infrastructure and operations for meeting the compliance imperative. The team will continue to expand and upgrade its capabilities in the coming years to meet the requirements of Pillar 2 and Pillar 3, and to build the foundation for migration to the FIRB approach.

(I) Fair values of financial assets and liabilities

The fair value of financial instruments traded in active markets (such as publicly traded derivatives, trading and available-forsale securities) is based on quoted market prices at the balance sheet date. The quoted market price used for financial assets held by the Group is the current bid price; the appropriate quoted market price for financial liabilities is the current ask price.

The fair value of financial instruments that are not traded in an active market (for example, over-the counter derivatives) is determined by using valuation techniques. The Group uses a variety of methods and makes assumptions that are based on market conditions existing at each balance sheet date. Quoted market prices or dealer quotes for similar instruments are used for long-term debt. Other techniques, such as estimated discounted cash flows, are used to determine fair value for the remaining financial instruments. The fair value of interest-rate swaps is calculated as the present value of the estimated future cash flows. The fair value of forward foreign exchange contracts is determined using forward exchange market rates at the balance sheet date.

The fair value of financial assets and financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the Group for similar financial instruments.

(m) Capital management

The Group's objectives when managing capital are:

- To comply with the capital requirements set by the banking and insurance regulators in the markets where the entities within the Group operate;
- To safeguard the Group's ability to continue its business as a going concern;
- To maximize returns to shareholders and optimize the benefits to other stakeholders; and
- To maintain a strong capital base to support the development of its business.

Capital adequacy and the use of regulatory capital of the Group's Hong Kong banking subsidiaries, Dah Sing Bank, Limited ("DSB") and MEVAS Bank Limited ("MEVAS"), are monitored regularly by the Group's management, employing techniques based on the guidelines developed by the Basel Committee, as implemented by the Hong Kong Monetary Authority ("HKMA"), for supervisory purposes. The required information is filed with the HKMA on a quarterly basis. The HKMA requires DSB and MEVAS to maintain a ratio of total regulatory capital to the risk-weighted amount (i.e. the capital adequacy ratio) at or above the internationally agreed minimum of 8%. These banking subsidiaries' regulatory capital as managed by the Group's management is divided into two tiers:

- Core capital: share capital, profit and loss, and reserves created by appropriations of retained earnings. The book value of goodwill and other intangible assets is deducted in arriving at Core capital; and
- Supplementary capital: qualifying perpetual and term subordinated debts, collectively assessed impairment allowances, regulatory reserve, and fair value gains arising on revaluation of holdings of land and buildings and available-for-sale equities and debt securities.

Investment in subsidiaries, significant investments in nonsubsidiary companies and shares, exposures to connected companies and investments in other banks' equity are deducted from Core capital and Supplementary capital to arrive at the regulatory capital.

Risk-weighted amount is the aggregate of the risk-weighted amounts for credit risk, market risk and operational risk, and covers both on-balance sheet and off-balance sheet exposures. On-balance sheet exposures are classified according to the obligor or the nature of each exposure and risk-weighted based on the credit assessment rating assigned by an external credit assessment institution recognized by the HKMA or other principles as set out in the Banking (Capital) Rules, taking into account the capital effects of credit risk mitigation. Off-balance sheet exposures are converted into credit-equivalent amounts by applying relevant credit conversion factors to each exposure, before being classified and risk-weighted as if they were on-balance sheet exposures.

企業及業務回顧

摘要

全球金融市場於二零零八年首六個月持續陷入 困境。儘管本集團銀行及保險業務之核心營運 表現維持穩定,本集團之淨溢利受到外部管理 投資進一步減值提撥及本集團保險業務之投資 表現欠佳之影響,股東應佔溢利較二零零七年 上半年減少百分之四十三。每股盈利較二零零 七年上半年減少百分之四十四至1.50港元。董 事會宣派中期股息每股0.68港元。

因二零零七年下半年市況惡化,本集團於二零 零八年上半年採取審慎方針擴展業務。由於執 行較為審慎之策略,本集團資產總值較去年年 底輕微減少。然而,基於去年貸款增長強勁, 淨息差穩定,且服務費用收入可觀及買賣收入 增長強勁,本銀行集團扣除貸款減值後之營運 溢利較二零零七年上半年增加百分之二十三。 本集團之保險業務持續增加銷售及其承保業績 有所改善,淨保費收入連同內含價值增加百分 之二十一。儘管收入增長強勁,但由於保險投 資組合市場價值之下降(主要由於期內全球股 市下跌),故此於期內保險業務錄得虧損。

本集團擁有百分之十七權益之聯營公司重慶銀 行期內表現良好,對溢利帶來五千五百萬港元 貢獻。

業務及財務回顧

本集團銀行業務之核心業務表現仍然穩健,扣 除貸款減值後之營運溢利增加百分之二十三。 於本集團較為審慎之策略下,期內貸款結餘溫 和增長百分之三,主要由銀團貸款、機械及車 輛融資及物業借貸所帶動。由於審慎的策略及 因期內住宅按揭市場之低息差,故此本集團並 不作積極競爭,本集團銀行業務零售借貸並無 顯著增長。於一個較為低利率環境下,期內淨 息差於二零零七年下半年由百分之二點零八遞 增擴闊至百分之二點二四,與去年上半年之百 分比相若。淨利息收入增加百分之十三,主要 為貸款平均結餘增加帶動。

CORPORATE AND BUSINESS OVERVIEW

HIGHLIGHTS

The first six months of 2008 continued to be a difficult period for financial markets globally. Although core operating performance in both our banking and insurance businesses remained stable, our net profit suffered from further impairment charges against externally managed investments and a weak investment performance for our insurance business, resulting in a decline in profit attributable to shareholders of 43% compared with the first half of 2007. Earnings per share decreased by 44% to HK\$1.50 compared with the first half of 2007. The Board of Directors has declared an interim dividend of HK\$0.68 per share.

In response to the deteriorating market conditions in the second half of 2007, we adopted a cautious approach to business growth in the first half of 2008. As a result of this more cautious strategy, total assets contracted slightly compared with the end of last year. However, with strong loan growth last year, and a stable net interest margin, as well as reasonable fee income and a strong increase in trading income, operating profit after loan impairment for our banking group grew by 23% when compared with the first half of 2007. Our insurance businesses continued to grow sales and achieved improvement in underwriting results, with net insurance premium income plus embedded value growing by 21%. Despite this strong income growth, the insurance operation posted a loss for the period, due to negative mark-to-market changes on the insurance investment portfolio, mainly attributable to falls in global equity markets during the period.

Our 17% associate, Bank of Chongqing performed well during the period, contributing HK\$55 million.

BUSINESS AND FINANCIAL REVIEW

The core performance of our banking business remained sound, with operating profit after loan impairment increasing by 23%. As a result of our more cautious strategy, loan balances for the period grew by a modest 3% mainly driven by syndicated loans, equipment and vehicle finance and property lending. Retail lending did not grow significantly, as we were cautious and did not compete aggressively due to the low margins achievable in the residential mortgage market during the period. With a lower interest rate environment, net interest margin improved sequentially from 2.08% in the second half of 2007 to 2.24% in the period, a level similar to the first half of last year. Net interest income, largely driven by a higher average loan balance, increased by 13%.

業務及財務回顧 (續)

本集團因擴大的代理團隊及銀行保險和直接銷 售之持續增加,以及基本保險業務理想的續保 率,保費收入連同內含價值增長百分之二十 一。此外,期內有效長期壽險業務之有效保單 價值(或內含價值),亦受惠於更為強勁的新銷 售,增加至七千五百萬港元,而二零零七年上 半年則為三千六百萬港元。

未計入保險投資賬之市場價值負額變動之非利 息收入增加百分之二十九至六億零六百萬港 元,主要受淨服務費及佣金收入增加及本集團 銀行系之強勁買賣業務表現所推動。於保險投 資賬(此等投資按以公平值計量且其變動計入 損益的基準入賬)市場價值之負額變動為九千 八百萬港元,為所管理資金少於百分之三之跌 幅。雖然市場價值變動帶來負面影響,期內保 險投資表現仍優於相關平均市況。

期內營運支出上升百分之七,主要因通脹壓力 而導致員工成本及其他支出上升,資訊科技及 折舊支出增加所致。雖然本集團持續於內地發 展銀行業務,本集團於二零零八年六月底之員 工人數(不包括非集團合約員工之保險代理)接 近2,000人,與二零零七年底之人數相若。

扣除減值提撥前之營運溢利下跌百分之三至九 億一千萬港元,減值提撥增加百分之四十四至 一億二千六百萬港元,導致扣除減值提撥後之 營運溢利減少至七億八千四百萬港元,較二零 零七年上半年下降百分之八。

本集團商業及零售銀行貸款組合之信貸質素保 持穩健,反映於持續處於低水平之整體減值貸 款比率(於二零零八年六月三十日為百分之零 點四四,相對二零零七年年底之比率為百分之 零點四六),逾期及重組貸款總比率為百分之 零點四九(相對二零零七年年底之比率為百分 之零點五六)。

期內本集團外部管理結構性投資組合進一步撤 減三億一千八百萬港元(反映於買賣收入項下 公平值虧損六千六百萬港元及可供出售證券之 減值提撥二億五千二百萬港元)。現時本集團 已將全部結構性投資組合撤減百分之八十七至 二億零五百萬港元,預期即使有進一步之撇減 亦不會屬重大。

BUSINESS AND FINANCIAL REVIEW (Continued)

Insurance premium income plus embedded value increase grew by 21% due both to continuing sales from both our enlarged agency force and our bancassurance and direct sales platforms, as well as due to good levels of persistency in our regular premium business. The increase in the value of in-force long-term life assurance business (or embedded value) in the period also benefited from the stronger new sales and amounted to HK\$75 million, compared to HK\$36 million in the first half of 2007.

Non-interest income grew by 29% to HK\$606 million before accounting for the negative mark-to-market impacts on the insurance investment book, mainly driven by higher net fee and commission income as well as a strong trading performance of our banking group. The negative mark-to-market changes on the insurance investment book, which are accounted for on a fair value through profit or loss basis, was HK\$98 million, which represents a decline of less than 3% on funds under management. Despite the negative mark-tomarket impact, the insurance investment performance was better than the relevant market benchmarks during the period.

Operating expenses in the period increased by 7%, due mainly to inflationary pressure on both staff costs and other expenses, and higher IT and depreciation expenses. Staff numbers at the end of June 2008 (excluding insurance agents who are not contract staff of the group) remained similar to the end of 2007 at close to 2,000, despite the continuing build-up of our Mainland banking operations.

Operating profit before impairment charges was down by 3% to HK\$910 million, and impairment charges increased by 44% to HK\$126 million, resulting in a decrease in operating profit after impairment charges to HK\$784 million, down 8% relative to the first half of 2007.

Credit quality in our commercial and retail banking loan portfolios remained sound, as reflected in the continuing low overall impaired loan ratio at 0.44% as compared to 0.46% at the end of 2007, and a total overdue and rescheduled loan ratio of 0.49% as at 30 June 2008, against 0.56% as at 31 December 2007.

We experienced further write-downs of HK\$318 million on our externally managed structured investment portfolio in the period (reflected under trading income as a fair value loss of HK\$66 million, and an impairment charge on available-for-sale securities of HK\$252 million). We have now written down the entire structured investment portfolio by 87% to HK\$205 million, and therefore do not expect any further write-downs to be material.

業務及財務回顧 (續)

相對於二零零七年上半年,重慶銀行受惠於強 勁貸款增長及營運收入增加,於期內錄得較強 勁之業績。本集團佔其百分之十七股權之期內 淨溢利為五千五百萬港元。

本集團之資產總值輕微減少,主要由於本集團 之更審慎之資產負債管理及營運策略。

前瞻

就短中期而言,本集團相信全球金融市場將持續波動,預測是次金融危機即將完結未免言之 過早。全球經濟受到美國及歐洲經濟前景疲弱 及對通脹升溫之持續憂慮所影響,預期將於下 半年放緩,短期內此為香港經濟增長帶來不利 影響。國內中央政府為使經濟能以合理步伐持 續增長而於過往數月實行整體經濟緊縮政策, 已輕微遏抑過往兩年之急速增長。

就上述狀況及在短期而言,本集團預期維持其 審慎態度擴展業務,本集團預料本年度之貸款 無顯著增長,並將更專注於監控各貸款組合之 信貸質素。

本集團近期獲得其於國內之全資附屬公司大新 銀行(中國)有限公司之開業批文,該公司於深 圳正式註冊成立,並於二零零八年八月一日開 始營運。本集團期望在未來歲月拓展國內銀行 業務,包括於中國內地開設更多該附屬公司的 分行。

就中長期而言,本集團仍然深信,發展中之大 中華市場,能持續為本集團業務發展提供商 機。

BUSINESS AND FINANCIAL REVIEW (Continued)

When compared with the first half of 2007, Bank of Chongqing achieved a set of stronger results in the period underpinned by strong loan growth and improved operating income. The Group's 17% share of its net profit in the period was HK\$55 million.

Our total assets were slightly down, largely a result of our more cautious balance sheet management and business strategy.

PROSPECTS

In the short to medium term, we believe that global financial markets will remain volatile, and it is too early to predict an imminent end to the current financial crisis. The global economy, on the back of a weaker outlook of the US and European economies as well as continuing concerns on rising inflation, is expected to slow in the second half year, which will have an unfavourable impact to the economic growth of Hong Kong in the near term. The generally tighter economic policies of the Central Government of Mainland China, for the purpose of achieving sustainable growth at a reasonable pace, had in the past few months operated to slightly constrain the rapid rate of growth as experienced in the past two years.

Against such a backdrop and in the short term, we expect to maintain our cautious stance on growing our businesses. We do not expect substantial growth in our loan book this year, and will place increased emphasis on controlling and monitoring the credit quality of our loan portfolio.

We have recently received approvals for the commencement of our wholly-owned Mainland China banking subsidiary, Dah Sing Bank (China) Limited, which has been formally incorporated in Shenzhen, and started business operations, on 1 August 2008. We look forward to building this business, including the opening of further Mainland China branches of this subsidiary in the years to come.

In the medium to long term, we continue to believe that the growing Greater China market is likely to continue to provide opportunities for growth for both our banking and insurance businesses.
