INVESTMENT MANAGER'S REPORT

ABOUT ABF PAN ASIA BOND INDEX FUND (PAIF)

ABF Pan Asia Bond Index Fund (PAIF) is a component of Asian Bond Fund 2 (ABF2), the second phase of the EMEAP (Executives' Meeting of East-Asia and Pacific Central Banks) Group's initiative to further develop the bond markets in Asia.

The PAIF is designed to track the performance of the iBoxx ABF Pan-Asia Index and invests in domestic currency-denominated government and quasi-government bonds issued in eight EMEAP markets, namely, China, Hong Kong, Indonesia, Korea, Malaysia, Philippines, Singapore and Thailand.

ABOUT THE IBOXX ABF PAN-ASIA INDEX

PAIF is benchmarked to the iBoxx ABF Pan-Asia Index, which is constructed and published by International Index Company Limited. The iBoxx ABF Pan-Asia Index is a benchmark for the investment returns of Asian currency denominated bonds issued by both government and quasi-government organizations in China, Hong Kong, Indonesia, Korea, Malaysia, Philippines, Singapore and Thailand.

Country weights were reviewed in October 2007 and changed effective 1st November 2007. The previous and current market weights of the index are:

Market	Current Weights	Previous Weights
	(%)	(%)
China	14.89	12.31

PERFORMANCE SUMMARY

Periods Ended 30th June 2008	3 Months	6 Months	1 Year	3 Years	Annualized Since Inception ^(a)
ABF Pan Asia Bond Index Fund (PAIF) ^(b)	-4.60%	-0.86%	4.10%	6.84%	6.84%
iBoxx ABF Pan-Asia Index	-4.50%	-0.69%	4.59%	7.59%	7.59%

Notes:

- (a) Performance inception date is from 29th June 2005 when the units of the Fund were first issued.
- (b) The Fund's returns have been computed from Net Asset Values in USD terms including dividends.

PORTFOLIO AND MARKET REVIEW

Since inception, the annualized total return of the Fund, including dividends, was 6.84% compared to an index return of 7.59%. This is a difference of -0.75% and is principally attributable to an amount of -0.81% due to the estimated impact of certain relevant factors that are unavoidable in the performance of an indexed fund relative to its benchmark (the relevant factors are the permitted expenses under the Trust Deed, withholding tax, transaction costs and the valuations with different sources of FX rates); the balance of +0.06% is attributable to tracking difference resulting from the sampling approach used in the management of the Fund.

The iBoxx Pan-Asia Index performance on an unhedged basis was 7.59% since inception. This performance was generated from resilient bond markets (contributing 4.38% to returns) as well as strong Asian currencies (contributing 3.20%).

PORTFOLIO STRATEGY

The investment objective of PAIF is to provide investment results, before fees and expenses, which correspond closely to the total return of the underlying index. To achieve its objective, PAIF is passively managed.

The Manager employs stratified sampling approach to match the index's characteristics and returns through investing in a well diversified portfolio that represents the index. Full replication in a broad market index would either be impossible or not cost-effective in Asian fixed income markets as the cost of transacting in many bonds is high and some bonds may not be available as they are already held by other long-term investors.

STATEMENT BY THE MANAGER

MANAGER'S RESPONSIBILITIES

The Manager of ABF Pan Asia Bond Index Fund (the "Fund") is required by the Code on Unit Trusts and Mutual Funds established by the Securities and Futures Commission of Hong Kong (the "SFC Code") and the Trust Deed dated 21st June 2005 (the "Trust Deed"), as amended, to prepare financial statements for each annual accounting period which give a true and fair view of the financial position of the Fund at the end of that period and of the transactions for the period then ended. In respect of these financial statements the Manager is required to:

- select suitable accounting policies and then apply them consistently;
- make judgments and estimates that are prudent and reasonable; and

NOTES TO THE FINANCIAL STATEMENTS

1. GENERAL INFORMATION

ABF Pan Asia Bond Index Fund (the "Fund") is a Singapore unit trust authorized under Section 286 of the Securities and Futures Act (Cap. 289) of Singapore and Section 104 of the Securities and Futures Ordinance (Cap. 571) of Hong Kong. The Fund was constituted by a Trust Deed dated 21st June 2005 between State Street Global Advisors Singapore Limited and HSBC Institutional Trust Services (Singapore) Limited. The Trust Deed was amended and restated by an Amending and Restating Deed on 28th June 2006, a Second Amending and Restating Deed dated 28th June 2007 and a supplemental deed dated 27th June 2008. The Trust Deed and all supplement deeds are governed in accordance with the laws of Singapore. The Fund is also listed on The Stock Exchange of Hong Kong Limited. The date of commencement of operation of the Fund was on 29th June 2005.

The investment objective of the Fund is to seek to provide investment results that correspond closely to the total return of the iBoxx ABF Pan-Asia Index (the "Underlying Index"), before fees and expenses. The Underlying Index is determined and composed by International Index Company Limited (the "Index Provider"). The Underlying Index is an indicator of investment returns of Asian Currency denominated debt obligations issued or guaranteed by an Asian Government or by an agency or instrumentality of an Asian Government in each case as determined by the Index Provider and which are for the time being constituent securities of the Underlying Index.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

(a) Basis of preparation

The financial statements of the Fund have been prepared in accordance with International Financial Reporting Standards ("IFRS"). The financial statements have been prepared under the historical cost convention, as modified by the revaluation of financial assets and financial liabilities (including derivative financial instruments) held at fair value through profit or loss.

The preparation of financial statements in conformity with IFRS requires the Trustee and Manager to make judgments, estimates and assumptions that affect the application of policies and the reported amounts of assets and liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgments about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

NOTES TO THE FINANCIAL STATEMENTS *(Continued)*

Standards and amendments to standards effective in current period

IFRS 7, "Financial Instruments: Disclosures" (effective for periods beginning on or after 1st January 2007) introduces new disclosures to improve the information about financial instruments. It requires the disclosure of qualitative and quantitative information about exposure to risks arising from financial instruments, including specified minimum disclosures about credit risk, liquidity risk and market risk, including sensitivity analysis to market risk. It replaces the disclosure requirements in IAS 32, "Financial Instruments: Disclosures and Presentation". This Standard does not have any impact on the classification and valuation of the Fund's financial instruments.

Amendment to IAS 1, "Presentation of Financial Statements – Capital Disclosures" (effective for periods beginning on or after 1st January 2007) introduces disclosures on the Fund's objectives and policies for its capital, which is represented by the net assets attributable to holders of redeemable units. There is no impact on the classification and measurement of the Fund's capital.

Amendments to standards that are not yet effective and have not been early adopted by the Fund

IAS 1 (Revised), "Presentation of Financial Statements" (effective for periods beginning on or after 1st January 2009). IAS 1 (Revised) requires changes made to the presentation of the financial statements. However, it does not change the recognition, measurement or disclosure of specific transactions and other events required by other IFRS. The Fund will apply IAS 1 (Revised) from 1st July 2009.

IAS 32 and IAS 1 Amendments "Puttable Financial Instruments and Obligations Arising on Liquidation" (effective from 1st January 2009). The amendment requires some puttable financial instruments and some financial instruments that impose on the entity an obligation to deliver to another party a pro rata share of the net assets of the entity only on liquidation to be classified as equity. The Fund will apply IAS 32 and IAS 1 Amendments from 1st July 2009.

The Statement of Net Assets presents assets and liabilities in increasing order of liquidity and does not distinguish between current and non-current items. All the Fund's assets and liabilities are held for the purpose of being traded or are expected to be realised within one year.

NOTES TO THE FINANCIAL STATEMENTS *(Continued)*

(b) Investments

The Fund invests in debt securities which are designated by the Manager as financial assets at fair value through profit and loss. Purchases and sales of investments are accounted for on the trade date basis. Investments are initially recognised at fair value, excluding transaction costs which are expensed as incurred, and are subsequently re-measured at fair value. Realised and unrealised gains and losses on investments are included in the Statement of Operations in the period in which they arise. Investments are derecognised when the rights to receive cash flows from the investments have expired or have been transferred and the Fund has transferred substantially all risks and rewards of ownership.

Investments that are listed or traded on an exchange are fair valued based on quoted bid prices. Investments which are not listed on an exchange are valued by using quotes from brokers. The investments are fair valued based on quoted prices inclusive of accrued interests.

Foreign exchange contracts are valued at the difference between forward rates ruling at the valuation date and the contract rates. Realized and unrealized gains and losses on foreign exchange contracts are recognized in the Statement of Operations.

(c) Income

Interest income on bank deposits is recognised on a time-proportionate basis using the effective interest method. Interest income on investments is accounted for as part of net gain/loss on investments in the Statement of Operations. Other income is accounted for in the Statement of Operations on an accrual basis.

(d) Expenses

All expenses are accounted for in the Statement of Operations on an accrual basis.

(e) Cash and cash equivalents

For the purpose of the Statement of Cash Flows, cash and cash equivalents comprise bank deposits with original maturities of three months or less.

NOTES TO THE FINANCIAL STATEMENTS *(Continued)*

(f) Amounts due from/to brokers

Amounts due from/to brokers represent receivables for investments sold and payables for investments purchased that have been contracted for but not yet settled by the end of the year.

(g) Translation of foreign currencies

Functional and presentation currency

Items included in the financial statements are measured using the currency of the primary economic environment in which the Fund operates ("the functional currency"). The financial statements are presented in United States dollars, which is the Fund's functional and presentation currency.

Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of assets and liabilities denominated in foreign currencies are recognised in the Statement of Operations.

(h) Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the Statement of Net Assets when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

NOTES TO THE FINANCIAL STATEMENTS *(Continued)*

(i) Redeemable units

The Fund issues redeemable units, which are redeemable at the holder's option and are classified as financial liabilities. Redeemable units can be put back to the Fund for cash equal to a proportionate share of the Fund's net asset value. The redeemable unit is carried at the redemption amount that is payable at the year end date if the holder exercises the right to put the unit back to the Fund. In accordance with the Fund's Trust Deed, the minimum redemption unit is 20,000 units.

Redeemable units are issued and redeemed at the holder's option at prices based on the Fund's net assets value per unit at the time of issue or redemption. The Fund's net asset value per unit is calculated by dividing the net assets attributable to the holders of redeemable units with the total number of outstanding redeemable units.

(j) Formation expenses

Expenditures incurred in the formation of the Fund are recognised as expenses of the Fund in the period in which they arise. Refer to note 3.

(k) Segmental information

In the opinion of the Manager, all activities of the Fund is in a single business of investment activities conducted mainly in Asia Pacific region. Geographical information is provided in note 9(b).

NOTES TO THE FINANCIAL STATEMENTS *(Continued)*

3. NET ASSETS ATTRIBUTABLE TO HOLDERS OF REDEEMABLE UNITS AND NUMBER OF UNITS IN ISSUE

Net assets attributable to holders of redeemable units

The Fund's capital is represented by the units in the Fund, and is shown as net assets attributable to holders of redeemable units in the Statement of Net Assets. In accordance with the Fund's Trust Deed, the minimum redemption unit is 20,000 units. Subscriptions and redemptions of units during the year are shown in the Statement of Changes in Net Assets Attributable to Holders of Redeemable Units. In order to achieve the investment objectives, the Fund endeavors to invest its capital in accordance with the investments policies as outlined in note 9(a), whilst maintaining sufficient liquidity to meet redemption requests. Such liquidity is augmented by the holding of liquid investments.

In accordance with the provisions of the Fund's Trust Deed dated 21st June 2005, as amended, the formation expenses (including costs for setting up, authorization and listing of the Fund) or costs incidental to the establishment of the Fund will be paid out of the assets of the Fund and amortised over the first 5 financial years. However, as stated in note 2(j), the accounting policy of the Fund for the purpose of compliance with IAS 38 – Intangible Assets and for reporting purpose is to expense the costs incurred in the formation of the Fund in the period in which they arose. As at 30th June 2008, the expensing of the unamortized formation expenses as stated in the financial statements resulted in a decrease in the Fund's other assets by US\$338,603 (2007: US\$509,534) compared with using the methodology indicated in the Fund's Trust Deed.

Net assets attributable to holders of redeemable units represent a liability in the Statement of Net Assets, carried at the redemption amount that would be payable at the Statement of Net Assets date if the holders of redeemable units exercised the right to redeem units in the Fund. Consequently, the movement in the differences of US\$170,931 (2007: US\$169,535) as described above is recognized in the Statements of Operations. The cumulative differences are included as "Adjustments for different bases adopted by the Fund in arriving at the net assets attributable to holders of redeemable units" on the Statement of Net Assets.

NOTES TO THE FINANCIAL STATEMENTS *(Continued)*

(b) Market price risk

Market price risk is the risk that the value of a financial instrument will fluctuate as a result of changes in market prices, whether those changes are caused by factors specific to the individual instrument or factors affecting all instruments in the market.

The Fund's fixed income securities are susceptible to market price risk arising from uncertainties about future price of the securities. The Fund's market price risk is managed through diversification of investment portfolio. As at year end, the overall market exposures were as follows:

NOTES TO THE FINANCIAL STATEMENTS *(Continued)*

The table below summarizes the impact on net assets attributable to holders of redeemable units as a result of increases/decreases of the key index to which the Fund is exposed. The analysis is based on the assumption that the index had increased/decreased by the respective percentage with all other variables held constant and the Fund's investments moved according to the historical correlation with the index.

The Investment Manager has used their view of what would be a "reasonable shift" in each key market to estimate the change for use in the market sensitivity analysis above.

Disclosures above are shown in absolute terms, changes and impacts could be positive or negative. Changes in market index % are revised annually depending on management's current view of market volatility and other relevant factors.

NOTES TO THE FINANCIAL STATEMENTS *(Continued)*

(c) Interest rate risk

Interest rate risk is the risk that the value of a financial instrument will fluctuate due to changes in market interest rates.

The majority of the Fund's financial assets and liabilities are interest bearing; as a result, the Fund is subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates. Any excess cash and cash equivalents are invested at short-term market interest rates.

The table below summarizes the Fund's exposure to interest rate risk. It includes the Fund's assets and liabilities at fair values, categorized by the earlier of contractual repricing or maturity dates.

NOTES TO THE FINANCIAL STATEMENTS *(Continued)*

(d) Credit risk

Credit risk is the risk that an issuer or counterparty will be unable or unwilling to pay amounts in full when due.

All transactions in listed securities are settled/paid for upon delivery using approved brokers. The risk of default is considered minimal, as delivery of securities sold is only made when the broker has received payment. Payment is made on a purchase when the securities have been received by the broker. The trade will fail if either party fails to meet its obligation.

The Fund's financial assets which are potentially subject to concentration of credit risk consist principally of bank deposits and assets held with the custodians.

The table below summarizes the assets placed with banks and custodians at 30th June 2008 and 2007:

The Fund limits its exposure to credit risk by transacting the majority of its securities and contractual commitment activities with broker-dealers, banks and regulated exchanges with high credit ratings and that the Fund considers to be well established.

(e) Liquidity risk

Liquidity risk is the risk that an enterprise will encounter difficulty in settling a liability, including a redemption request.

The Fund is exposed to daily redemptions of units in the Fund. The Fund invests the majority of its assets in investments that are traded in an active market which can be readily disposed of.

The table below analyses the Fund's financial liabilities and net settled derivative financial liabilities into relevant maturity groupings based on the remaining period at the year end date to the contractual maturity date. NOTES TO THE FINANCIAL STATEMENTS *(Continued)*

(f) Currency risk

Currency risk is the risk that the value of financial instruments will fluctuate due to changes in foreign exchange rates.

The Fund has assets and liabilities denominated in currencies other than US dollar, the functional currency. The Fund is therefore exposed to currency risk, as the value of the assets and liabilities denominated in other currencies will fluctuate due to change in exchange rates. The Manager will enter into forward foreign exchange contracts from time to time to hedge against the fluctuation in exchange rates. Details of forward foreign exchange contracts outstanding at the year end are disclosed in note 11.

The table below summarizes the Fund's exposure to currency risks:

	2008	2007

The table on the next page summarizes the impact on net assets attributable to holders of redeemable units as a result of increases/decreases of key exchange rates on the exposures tabled above, to which the Fund is exposed. The analysis is based on the assumption that the exchange rates had increased/decreased by the respective percentage with all other variables held constant.

(g) Emerging market risk

The Fund invests in certain Asian bond markets that are considered to be emerging markets. These markets are subject to special risk associated with foreign investment in these emerging markets including, but not limited to: generally less liquid and less efficient securities markets; generally greater price volatility; exchange rate fluctuations and exchange controls; imposition of restrictions on the expatriation of funds or other assets; less publicly available information about issuers; the imposition of taxes; higher transaction and custody costs; settlement delays and risk of loss; difficulties in enforcing contracts; lesser regulation of securities markets; smaller market capitalization; different accounting and disclosure standards; governmental interference; greater risk of market shutdown; the risk of expropriation of assets; higher inflation; social, economic and political uncertainties.

The Fund is designed to track the performance of the iBoxx Pan-Asia Bond Index, a broad Asian local currency bond index; therefore the exposure to emerging market risk in the Fund will be substantially the same as the index. As an indexed fund, the Manager manages the Fund's exposure to emerging market risk by ensuring that the key characteristics of the Fund, such as market weights and duration, are closely aligned to the characteristics of the index.

(h) Fair value estimation

As at 30th June 2008 and 2007, the carrying values of assets and liabilities are a reasonable approximation of their fair values.

NOTES TO THE FINANCIAL STATEMENTS *(Continued)*

For the avoidance of doubt, such goods and services may not include travel, accommodation, entertainment, general administrative goods or services, general office equipment or premises, membership fees, employees' salaries or direct money payments.
