Notes:

1. Basis of preparation and principal accounting policies

The unaudited condensed consolidated financial statements have been prepared in accordance with the applicable disclosure requirements of Appendix 16 to the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the "Stock Exchange") and Hong Kong Accounting Standard ("HKAS") 34 "Interim Financial Reporting" issued by the Hong Kong Institute of Certified Public Accountants (the "HKICPA").

A number of new and revised standards, amendments and interpretations are effective for the financial year beginning on 1 January 2009. Except as described below, the accounting policies used in the interim financial information are consistent with those followed in the preparation of the consolidated financial statements of the Group for the year ended 31 December 2008, included in the annual report of the Group for the year ended 31 December 2008. The adoption of these new and revised standards, amendments and interpretations has resulted in the following changes. The adoption of the other new and revised standards, amendments and interpretations had no material effect on how the results and financial position for the current and prior accounting periods have been prepared and presented.

Presentation of financial statements

In the current period, the Group has adopted HKAS 1 (Revised) "Presentation of financial statements" which has introduced a number of terminology changes (including revised titles for the condensed consolidated financial statements) and has resulted in a number of changes in presentation and disclosure. The adoption of HKAS 1 (Revised), however, has no impact on the reported results or financial position of the Group.

Operating segments

In the current period, the Group has adopted Hong Kong Financial Reporting Standard ("HKFRS") 8 "Operating segments". HKFRS 8 requires the presentation of operating segments in a manner consistent with the internal reports that are regularly reviewed by the Group's chief operating decision maker (see note 2 for details). HKFRS 8 replaces HKAS 14 "Segment reporting" which required an entity to identify two sets of segments (business and geographical). Following the adoption of HKFRS 8, the presentation of the segments results has changed (see note 2 for details).

The Group has not early applied the following new and revised standards, amendments or interpretations that have been issued but are not yet effective:

HKFRSs (Amendments)	Amendment to HKFRS 5 as part of Improvements to HKFRSs issued in 2008 ¹
HKFRSs (Amendments)	Improvements to HKFRSs issued in 2009 ²
HKAS 27 (Revised)	Consolidated and separate financial statements ¹
HKAS 39 (Amendment)	Eligible hedged items ¹
HKFRS 3 (Revised)	Business combinations ¹
HK(IFRIC*) – Int 17	Distributions of non-cash assets to owners ¹
HK(IFRIC) – Int 18	Transfer of assets from customers ³

¹ Effective for annual periods beginning on or after 1 July 2009.

² Amendments that are effective for annual periods beginning on or after 1 July 2009 or 1 January 2010, as appropriate.

³ Effective for transfers on or after 1 July 2009.

* *IFRIC represents the International Financial Reporting Interpretations Committee*

The adoption of HKFRS 3 (Revised) may affect the Group's accounting for business combination for which the acquisition date is on or after 1 January 2010. HKAS 27 (Revised) will affect the accounting treatment for changes in a Group's ownership interest in a subsidiary.

The directors of the Company (the "Directors") anticipate that the application of the other new and revised standards, amendments or interpretations will have no material impact on the results and the financial position of the Group.

2. Segment information

The Group has adopted HKFRS 8 "Operating segments" with effect from 1 January 2009. HKFRS 8 requires operating segments to be identified on the basis of internal reports about components of the Group that are regularly reviewed by the Group's chief operating decision maker in order to allocate resources to the segment and to assess its performance.

The segment information of the Group has been identified on the basis of internal management reports which are prepared in accordance with accounting policies conform with HKFRSs, that are regularly reviewed by the chief executive officer in order to allocate resources to the reportable segments and to assess their performance. Amounts reported for the prior period have been restated to conform to the requirements of HKFRS 8.

The Group's reportable segments under HKFRS 8 are as follows:

Laminates – manufacture and sale of laminates

Printed circuit boards ("PCBs") – manufacture and sale of PCBs

Chemicals – manufacture and sale of chemical and related products

Others – manufacture and sale of liquid crystal displays, magnetic products and others

The options must be taken up within 28 business days from the date of grant upon payment of HK\$1 and are exercisable over a period to be determined and notified by the Directors to each grantee, which period may commence from the date of acceptance of the offer of the grant of the options but shall end in any event not later than ten years from the date of adoption of the Scheme.

The limit on the number of the Company's shares which may be issued upon exercise of all outstanding options granted and yet to be exercised under the Scheme and any other schemes of the Group must not exceed 30% of the Company's shares in issue from time to time. The 2002 Elec & Eltek Employees' Share Option Scheme (the "2002 EEIC Scheme") which was adopted from 12 November 2002 for the duration of 5 years, had terminated in November 2007 without affecting the rights of holders of any options granted and outstanding under the 2002 EEIC Scheme.

EEIC has since 1997, had in place share option schemes to acknowledge the contributions of and to motivate employees to contribute to the EEIC Group. With the expiration of the 2002 EEIC Scheme, the directors of EEIC wished to have in place a new share option scheme to replace the expired 2002 EEIC Scheme for the purpose of providing an opportunity for employees who have contributed significantly to the growth and performance of the EEIC Group to participate in the equity of EEIC so as to motivate them to greater dedication, loyalty and higher standards of performance, and to give recognition to past contributions and services as well as to align the interests of employees with the interests of shareholders.

The 2008 Elec & Eltek Employees' Share Option Scheme (the "2008 EEIC Scheme") was approved by the shareholders of EEIC at the extraordinary general meeting of EEIC held on 21 April 2008 and was adopted and took effect from 9 May 2008 upon approval by the shareholders of the Company.

The 2008 EEIC Scheme which shall be administered by the committee of directors of EEIC as authorised by EEIC's directors, is open to full-time employees and directors of any company within EEIC and its subsidiaries, the parent group and of an associated company of EEIC, subject to certain conditions being satisfied.

The 2008 EEIC Scheme entitles the option holders to exercise their options and subscribe for new ordinary shares in EEIC either at an "Exercise Price", which equals to the average of the last dealt prices for an EEIC share for a period of 5 consecutive market days immediately prior to the relevant date of grant, or at a discount to the Exercise Price as defined earlier, whereby the discount shall not exceed 20% of the Exercise Price.

Options granted at the Exercise Price or discount to the Exercise Price is exercisable after the first or second anniversary respectively of the date of grant and expiring on the fifth anniversary of the date of grant.

The total number of EEIC shares issued and to be issued upon the exercise of the options granted to each participant (including both exercised and outstanding options) in any 12-month period must not exceed 1% of the total number of EEIC shares in issue from time to time.

Share options may be accepted within 30 days after the relevant date of grant accompanied by payment of S\$1.00 (or its equivalent) as consideration by the participants, but the grant of share options do not confer rights on the option holders to any dividend entitlement or to vote at any shareholders' meeting.

There was no share options granted under the 2008 EEIC Scheme since its adoption. However, there are outstanding share options under the 2002 EEIC Scheme and a summary of the movements of the outstanding share options under the 2002 EEIC Scheme for the period is as follows:

	Granted to Directors	Granted to employees	Total
Balance at 31 December 2008 and 1 January 2009 (<i>Note</i>)	3,892,800	5,441,000	9,333,800
Lapsed during the period	–	(107,600)	(107,600)
Balance at 30 June 2009	<u>3,892,800</u>	<u>5,333,400</u>	<u>9,226,200</u>

Note:

The interests in share options arise by virtue of

- (i) 4,055,000 share options accepted by the Directors and 5,745,000 share options accepted by the employees of the Group on 24 June 2005, which would entitle the relevant Directors and employees to subscribe for shares in EEIC at an adjusted subscription price of US\$2.033 per share after the 1 for 5 bonus issue effected by EEIC on 13 October 2005 ("Bonus Issue"). The share options are exercisable in whole or in part at the staggered manner within 5 option periods, commencing on 26 November 2006, 26 November 2007, 26 November 2008, 26 November 2009 and 26 March 2010 respectively and all ending on 24 May 2010;
- (ii) 150,000 share options accepted by the independent non-executive directors of EEIC on 29 September 2005, which would entitle the relevant directors to subscribe for shares in EEIC at an adjusted subscription price of US\$2.375 per share after the Bonus Issue. The share options are exercisable in whole or in part at the staggered manner within 5 option periods, commencing on 5 September 2006, 5 September 2007, 5 September 2008, 5 September 2009 and 5 July 2010 respectively, and all ending on 4 September 2010; and
- (iii) 1,020,000 share options accepted by full-time employees of EEIC and its subsidiaries on 12 December 2006, which would entitle the relevant employees to subscribe for shares in EEIC at a subscription price of US\$2.400 per share. The share options are exercisable in whole or in part at the staggered manner within 4 option periods, commencing on 13 November 2008, 13 November 2009, 13 November 2010 and 13 September 2011, respectively, and all ending on 12 November 2011.

There was no share options exercised during the six months ended 30 June 2009.

The share options were granted on 24 June 2005, 29 September 2005 and 12 December 2006. The estimated fair value of each share option granted on those dates was approximately HK\$1.58, HK\$1.55 and HK\$2.56 per share respectively.

These fair values were calculated using the Trinomial Lattice Model. The inputs into the model are as follows:

	Share option grant date		
	12 December 2006	29 September 2005	24 June 2005
Share price at grant date	US\$2.74	US\$2.92	US\$2.53
Subscription price	US\$2.40	US\$2.85*	US\$2.44*
Expected volatility	36.6%	21.2%	25.4%
Expected life	5 years	5 years	5 years
Risk-free rate	3.7%	4.2%	3.7%

* *The original subscription price of the share options granted on 29 September 2005 and 24 June 2005 were adjusted to US\$2.375 and US\$2.033 respectively as a result of the Bonus Issue.*

Expected volatility was determined by using the historical volatility of EEIC's share price over the previous five years. The expected life used in the model has been adjusted, based on the best estimate of the management, for the effects of non transferability, exercise restrictions and behavioural considerations.

The Group recognised the total expense of approximately HK\$752,000 for the six months ended 30 June 2009 (1 January 2008 to 30 June 2008: HK\$1,412,000) in relation to the share options granted by EEIC.

The option may be accepted by a participant within 28 days from the date of the offer for the grant of the option upon the payment of a consideration of HK\$1. An option may be exercised at any time during a period to be determined and notified by the directors of KLHL to each grantee, and in the absence of such determination, from the date upon which the offer for the grant of the option is accepted but shall end in any event not later than 10 years from the date of grant of the option subject to the provisions for early termination thereof. BUSINESS REVIEW

Underscoring the strength of our balanced business portfolio with concrete business fundamentals, Kingboard Chemical Holdings Limited (the “Group”) continued to chalk up profitable results for the six months ended 30 June 2009 (the “reporting period”). Despite tough operating landscape in the first half of 2009 (“1H 2009”), all business divisions delivered positive contributions to the Group’s earnings. Reacting promptly to market changes, management adopted a disciplined approach to capital expenditure and implemented stringent cost control initiatives. Under the strong leadership of our dedicated and seasoned management team, the Group achieved encouraging results which outperformed our peers in the industry. Group revenue decreased 27% to HK\$9,001.5 million while net profit decreased 37% to HK\$983.3 million.

Capitalizing on the ongoing industry consolidation, laminate division advanced its No 1. position in the world with market share of 14% in 2008. Our position as the largest PCB manufacturer in China was further reinforced by the recent acquisition of Express Electronics (Dongguan) Company Ltd in March 2009 – which increased our monthly PCB production capacity by 5%. Chemical division continued to generate positive earnings. Our remarkable operational performance is a clear testament on the Group’s strong capability to ride out the trough of the financial crisis and deliver profitability with diversified revenue streams. As the Group generated robust and steady operating cash inflow in the current period, the Board decided to increase our dividend payout ratio to 26% from 21% last year and declared an interim dividend of HK30 cents per share.

Performance

In the first half of 2009, demand for electronic products gradually improved as the economic stimulus measures initiated by governments worldwide started to take effect. Order booking for laminate showed encouraging uptrend towards the end of first quarter of 2009 (“Q1 2009”) and capacity utilization of laminate plants improved since March 2009. Key raw material prices including copper, wood pulp and chemical products were significantly lower than last year, which helped to offset the lower average selling price for laminate. Revenue (including inter-segment sales) fell 28% to HK\$4,104.5 million while volume sales declined 18% with average monthly shipment reaching 7.0 million square meters. As capacity utilization improved, margin rebounded strongly in Q2 2009. Laminate division attained an earnings before interest and tax (“EBIT”) of HK\$872.5 million – down 26% against first half of 2008.

PCB division also experienced stronger order inflow and higher capacity utilization since end of Q1 2009. Bolstered by high density interconnect (“HDI”) PCB capacity increase from the two dedicated HDI plants in Kunshan, Jiangsu province and Kaiping, Guangdong province, HDI sales was more than double against the same period last year. In addition, the newly acquired Express PCB shops in Suzhou, Jiangsu province and Dongguan, Guangdong province provided extra growth impetus to revenue and earnings. Contributions from these new plants together with substantial raw material costs reduction mitigated the adverse impact from average selling price decline in 1H 2009. PCB division’s revenue decreased 25% to HK\$3,065.2 million with EBIT reduced to HK\$217.3 million. EBIT margin merely declined 1% to 7.1%.

The Chinese government’s aggressive efforts in supporting infrastructure projects and local industries resulted in quick recovery of the demand for industrial products, which in turn translated into favorable market dynamics for chemical products in the first half of 2009. Average selling prices for all our key chemical products including coke, methanol, phenol and acetone have recovered in the current period from that of end 2008 level. The Hebei coke/methanol plant ramped up to full capacity utilization within Q2 2009 and total coke output from the Hebei site increased over 30% against the same period last year. With lower average selling prices for chemical products against last year, revenue was down 29% to HK\$2,703.6 million. EBIT declined by 62% to HK\$239.0 million while EBIT margin reduced to 8.8%. Share of associate profits decreased to HK\$11 million mainly due to reduced contribution from CNOOC Kingboard Chemical Limited as a result of lower sales volume and average selling price for methanol during the first half of 2009.

LIQUIDITY AND CAPITAL RESOURCES

The Group’s consolidated financial and liquidity position continued to be robust. As at 30 June 2009, net current assets and current ratio of the Group were approximately HK\$5,424.6 million (31 December 2008 – HK\$5,264.4 million) and 1.70 (31 December 2008 – 1.72) respectively.

The net working capital cycle increased from 65 days as at 31 December 2008 to 81 days as at 30 June 2009 on the following key metrics:

- Inventories, in terms of stock turnover days, increased to 75 days as the Group stocked up strategic key raw materials in the first half of 2009 (31 December 2008 – 48 days).
- Trade receivables, in terms of debtors turnover days, increased to 78 days in line with higher sales in second quarter of 2009 (31 December 2008 – 61 days).
- Trade and bills payable, in terms of creditors turnover days, increased to 72 days (31 December 2008 – 44 days), in line with increased business volume.

In the first half of 2009, the Group invested approximately HK\$1 billion in new production capacities. The Group's net gearing ratio (ratio of interest bearing borrowings net of cash and cash equivalents to total equity) was approximately 22% (31 December 2008 – 23%). The proportion of bank borrowings between short term and long term stood at 24%:76% (31 December 2008: 27%:73%). As at 30 June 2009, the Group had cash on hand and committed and undrawn bank loan facilities of HK\$3.6 billion and HK\$3.3 billion respectively. Hence, the Group is in a strong financial position to capitalize on any opportunities arising from the ongoing industry consolidation. Only 6% of the bank borrowings was denominated in Renminbi and the rest in Hong Kong or US dollars.

The Group continued to adopt a prudent financial management policy including the use of interest rate swap contract to minimize exposure to fluctuation in interest rates movement. At the end of June 2009, we had entered into interest rate swap agreements of notional amount of HK\$4.8 billion with reputable financial institutions for a weighted average duration and interest rate of 1.49 years and 3.01% respectively. The Group also entered into commodity and foreign currency forward contracts to manage the Group's exposure to fluctuation in exchange rates and commodities prices. The fair value of these contracts amounted to HK\$230,000 as at 30 June 2009. Other than derivative financial instruments in connection with our daily operations as mentioned above, the Group had not entered into any other type of derivative financial instruments throughout the first six months of 2009. There was no material foreign exchange exposure to the Group during the period under review. The Group's revenue, mostly denominated in Hong Kong dollars, Renminbi and US dollars, was fairly matched with the currency requirement of operating expenses.

HUMAN RESOURCES

As at 30 June 2009, the Group had a global workforce of over 44,700 (31 December 2008: 40,800). The increase in headcount was in line with improved capacity utilization against the end of 2008. Other than offering competitive salary package, the Group grants share options and discretionary bonuses to eligible employees based on our financial achievement and individual performance.

PROSPECTS

Global economy has shown signs of continuous improvement in the third quarter of 2009 (“Q3 2009”) – reinforcing the general belief that bottom of the cycle is behind us. For the Group, business outlook for long term remains positive. Leveraging on the Group’s robust financial strength and our commitments to pursue competitive advantage in core businesses, the Group is well poised to benefit from the tremendous growth opportunities in the fastest growing emerging market – China.

Laminate order bookings in Q3 2009 showed an uptrend against Q2 2009. Our persistent effort to upgrade capability on thin and high performance laminate brings in encouraging results. In addition to supplying the laminate requirements for dedicated HDI PCB plants within the Group, we expect to see significant sales growth from external customers for these new products. We will pursue market expansion in the domestic China market in order to take full advantage of business opportunities arising from favorable government policies.

PCB division also experienced upward momentum in order bookings in the third quarter of 2009. Hence, most of our PCB manufacturing sites have been operating at full capacities. Both of our dedicated HDI plants have made good progress and will continue to ramp up production in the second half of 2009. We expect ongoing 3G infrastructure investments in China to boost demand for mobile handsets related HDI products. We will continue to upgrade our technical capabilities and enhance our product mix in order to explore untapped market segments.

In the first two months of Q3 2009, both demand and selling prices of our key chemical products have shown an upturn. Capacity utilization has improved against that in the first half of 2009. In addition, most of our major chemical plants including Hebei coke/methanol plant and Huizhou phenol/acetone plants are currently operating at full capacities. Construction of the new acetic acid plant adjacent to the existing coke/methanol plant in Hebei province is on track to commence production in Q3 2009. Utilizing coke granules and methanol as feedstock, this acetic acid project will further enhance our production capabilities of downstream chemical products and expand the chemical products range to capture the growing chemical demand in China.
