**PROJECT PORTFOLIO OVERVIEW**

The table below sets forth the details of (i) wind power projects operated by our direct and indirect subsidiaries, (ii) wind power projects operated by our associated companies, and (iii) wind power projects operated by other companies in which we have minority interests, as of September 30, 2009:

Project companies	Aggregate ownership directly and indirectly held by the Group <sup>(1)</sup>	Location	Wind power project <sup>(2)</sup>	Status <sup>(3)</sup>	Actual/Est. in-service date <sup>(4)</sup>	Installed capacity (in MW)	Capacity under construction (in MW)	Consolidated/ capacity under construction <sup>(5)</sup> (in MW)	Attributable/ capacity under construction <sup>(6)</sup> (in MW)	On-grid tariff (RMB/kWh, including VAT)
<b>PROJECTS OPERATED BY OUR SUBSIDIARIES</b>										
<b>The Three Northeast Provinces</b>										
吉林龍源風力發電有限公司 (Jilin Longyuan Wind Power Generation Co., Ltd.)	66.23%	Tongyu County, Jilin Province	Phase I Jilin Tongyu Wind Concession Project <sup>(7)</sup>	Operational	12/2006	100.30 <sup>(9)</sup>		100.30	66.43	0.5523

**Notes:**

- (1) It is calculated by including 100% of the shareholding directly owned by the Company and a portion of the shareholding indirectly owned by the Company's subsidiaries proportionate to our direct percentage ownership in such subsidiaries.
- (2) A wind farm sometimes includes several phases or is expanded by additional technology improvement projects. As each phase or technology improvement project of a wind farm is subject to separate government approvals, it is deemed as a separate project.
- (3) The status of a wind power project refers to an operating project or a project under construction (as the case may be) as defined in “Glossary of Technical Terms.”
- (4) Based on the actual or estimated in-service date of the first wind turbine installed.
- (5) With respect to operating projects that are fully operational, the data provided refers to consolidated installed capacity and attributable installed capacity of such projects. With respect to operating projects that are partly operational and partly under construction, the data provided refers to the aggregate amount of consolidated installed capacity and consolidated capacity under construction of such projects, as well as the aggregate amount of attributable installed capacity and attributable capacity under construction of such projects. With respect to projects fully under construction, the data provided refers to the consolidated capacity under construction and attributable capacity under construction of such projects.
- (6) The aggregate installed capacity or capacity under construction (as the case may be) of our project companies or individual projects under one project company in which we have an interest in proportion to the level of our ownership in each of those companies. It is calculated by multiplying our percentage ownership in each project company in which we have an interest, whether or not such interest is a controlling interest, by its total installed capacity or total capacity under construction (as the case may be). Both attributable installed capacity and attributable capacity under construction include the capacity of both our subsidiaries and associated companies but only to the extent of our equity ownership.

## PROJECT PORTFOLIO OVERVIEW

---

- (7) Concession wind power projects awarded by the NDRC or provincial DRC.
- (8) The on-grid tariff of the relevant project has not been approved, although the project has obtained project approval of the NDRC or provincial DRC.
- (9) The approved capacity of this wind power project is 100.00 MW.
- (10) The approved capacity of this wind power project is 19.55 MW.
- (11) The approved capacity of this wind power project is 49.50 MW.
- (12) The approved capacity of this wind power project is 49.50 MW.
- (13) The approved capacity of this wind power project is 49.50 MW.
- (14) The approved capacity of this wind power project is 49.30 MW.
- (15) The approved capacity of this wind power project is 49.20 MW.
- (16) The approved capacity of this wind power project is 4.80 MW.
- (17) The approved capacity of this wind power project is 4.80 MW.
- (18) This is an expansion project, but not a concession project.
- (19) The approved capacity of this wind power project is 3.60 MW.
- (20) The approved capacity of this wind power project is 1.0 MW.
- (21) The approved capacity of this wind power project is 12.0 MW.

*Notes:*

- (1) The two 137.5 MW generation units were installed in 1995 each with an installed capacity of 125 MW and then upgraded to 137.5 MW in 2002.
- (2) The four 275.0 MW generation units of Tianshenggang Power Plants have suspended operations in 2008 and therefore the installed capacity of those four units were zero as of June 30, 2009.
