The performance of the Group's businesses was steady and in line with expectations. The reported unaudited earnings of Cheung Kong Infrastructure Holdings Limited ("CKI" or the "Group") for the six months ended 30th June, 2010 were HK\$2,029 million. This figure, when compared to that of the corresponding period last year, showed a decrease. This is due to several factors, most notably:

	HK\$ Million
A one-off disposal gain from divestment of China power plants in 2009:	1,264
3 months loss of profit contribution from the divestment of China power plants:	262
Favourable tax adjustments in the United Kingdom in 2009:	148
Foreign exchange difference:	512
	2.186

If these items were adjusted, the earnings for the period ended 30th June, 2010 have increased 19 per cent.

During the period under review, in addition to organic growth, three new investments were made: cement production facilities in Yunfu, China; a strategic financial investment in Enviro Energy International Holdings Limited ("Enviro Energy International"); and a stake in Seabank Power in the United Kingdom. These ventures, each one of a different industry, have added to the diversity of CKI's businesses and strengthened its revenue base.

The Board of Directors of CKI (the "Board") has declared an interim dividend for 2010 of HK\$0.33 per share (2009: HK\$0.321), representing an increase of 3 per cent over the same period last year. This increase also reflects CKI's continued dividend growth trend. The interim dividend will be paid on Friday, 10th September, 2010 to shareholders whose names appear on the Register of Members of the Company on Thursday, 9th September, 2010.

2010 INTERIM BUSINESS REVIEW

HK Electric

CKI's investment in Hongkong Electric Holdings Limited ("HK Electric") continues to be a major profit contributor for CKI. During the first six months of 2010, HK Electric delivered HK\$1,057 million in profit contribution, a 3 per cent increase from the corresponding period last year. Profits from Hong Kong operations of HK Electric were in line with budget, while international investments, which accounted for over one-third of the company's total profit, recorded an increase of 11 per cent compared to last year. It is expected that the proportion of profit generated from international investments will increase over time as existing businesses grow and as more overseas acquisitions materialise.

Infrastructure Investments

In the first half of the year, the Group's international operations have delivered good performances overall. CKI's projects in Australia, Canada and New Zealand have recorded solid growth. While our investments in the United Kingdom and Mainland China have shown profit earnings differences as compared to 2009 figures, these deviations are mainly attributable to one-off accounting entries from last year.

Australia

CKI's businesses in Australia generated strong results in the first half of the year, bolstered by solid operating incomes. Profit contribution reached HK\$513 million, an increase of 27 per cent over the same period last year. The Group's electricity distribution businesses – ETSA Utilities, CitiPower and Powercor – all recorded favourable performances, resulting from effective cost control measures and prudent financial management. Investments in Spark Infrastructure and Envestra also continued to produce steady returns.

Canada

Strong results were reported by CKI's business in Canada in the first half of the year, with profit contributions increasing 34 per cent to HK\$51 million. Stanley Power's portfolio of gas-fired cogeneration and coal-fired generation power plants in Ontario, Alberta and Saskatchewan continued to deliver steady income during the period.

New Zealand

Profit contribution from the Wellington Electricity distribution network performed in line with expectations, generating HK\$38 million in the first half of 2010, an increase of 3 per cent.

United Kingdom

In the United Kingdom, profit contribution from our businesses was HK\$216 million, while the profit reported in the corresponding period in 2009 was HK\$369 million. The difference is mainly attributable to the one-off tax credit of HK\$148 million which was recorded last year. The Group's interests in Northern Gas Networks, Cambridge Water and Southern Water provided steady returns in the first half of 2010.

Mainland China

Infrastructure investments in Mainland China continued to provide CKI with a satisfactory and reliable income stream, generating HK\$211 million during the first half of the year. There is, however, a significant decrease in reported earnings as compared with last year's profit of HK\$1,668 million. Included in the 2009 profit contribution was a one-off profit generated from the divestment of three power plants to HK Electric and, as a consequence, there are no operating earnings from these plants in 2010. After adjustment for these items, the China portfolio would report a relative growth compared to the same period last year.

Materials Business

Benefitting from large-scale government infrastructure and private sector housing projects, profit contribution from the Group's materials businesses jumped 101 per cent to HK\$147 million.

NEW INVESTMENTS

Further to increasing the Group's stake in Northern Gas Networks in November last year, CKI concluded three new investments in the first half of 2010:

- Yunfu Cement Plant The Group further expanded its scope in Mainland China with the HK\$700 million investment in new cement production facilities in Yunfu in March.
- Enviro Energy International CKI made a strategic financial investment in Enviro Energy International via a HK\$176 million exchangeable note in April.
- Seabank Power The Group made its first foray into the UK power generation market in April with the HK\$2.4 billion acquisition of an interest in Seabank Power, which owns and operates a 1,140 MW power plant. Upon selling half of our interest to HK Electric for HK\$1.2 billion in June, CKI holds a 25 per cent stake in the company. This well-managed and profitable business is expected to provide a secure and steady income stream for the Group. Immediate contribution has already been generated.

Efforts are being made to continue the momentum built up in the first half of the year. Currently, we are studying a number of new projects, with some in the final stages of negotiation.

OUTLOOK

Against the backdrop of an uncertain macro-economic environment following the global financial crisis, CKI's businesses continued to record a steady performance. Our prudent investment and management strategies have ensured that the Group's businesses stay resilient in the midst of fragile economic conditions.

With a solid cash position and deposits of about HK\$10 billion, CKI will continue to pursue new investments around the globe to further enrich and strengthen our portfolio. Our acquisition team is studying investment opportunities in the markets in which we have operations as well as new ones which meet the Group's stringent investment criteria.

CKI looks forward to encouraging prospects for the rest of 2010.

I would like to take this opportunity to thank the Board, management and staff for their hard work and dedication, as well as our shareholders for their support and confidence in the Group.

FINANCIAL REVIEW

FINANCIAL RESOURCES, TREASURY ACTIVITIES AND GEARING RATIO

The Group's capital expenditure and investments were funded from cash on hand, internal cash generation, syndicated loans, notes issued and other project loans.

As at 30th June, 2010, total borrowings of the Group amounted to HK\$7,646 million, which were all denominated in foreign currencies. Of the total borrowings, 4 per cent will be repayable in 2010, 61 per cent will be repayable between 2011 and 2014 and 35 per cent will be repayable beyond 2014. The Group's financing activities continue to be well received and fully supported by its bankers.

The Group adopts conservative treasury policies in cash and financial management. To achieve better risk control and minimise the cost of funds, the Group's treasury activities are centralised. Cash is generally placed in short-term deposits mostly denominated in U.S. dollars, Hong Kong dollars, Australian dollars or Pounds Sterling. The Group's liquidity and financing requirements are reviewed regularly. The Group will continue to maintain a strong capital structure when considering financing for new investments or maturity of bank loans.

The Group continues to have a strong financial position. Cash on hand amounted to HK\$9,928 million as at 30th June, 2010, while total borrowings of the Group amounted to HK\$7,646 million, resulting in no net debt at the corporate level.

To minimise currency risk exposure in respect of its investments in other countries, the Group generally hedges those investments with the appropriate level of borrowings denominated in the local currencies of those countries. The Group also entered into certain interest rate and currency swaps to mitigate interest rate and other currency exposure risks. As at 30th June, 2010, the notional amounts of these derivative instruments amounted to HK\$11,654 million.

1. BASIS OF PREPARATION

The consolidated interim financial statements are prepared in accordance with Hong Kong Accounting Standard 34 "Interim Financial Reporting" issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA") and Appendix 16 to the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited.

The accounting policies adopted are consistent with those set out in the Group's consolidated annual financial statements for the year ended 31st December, 2009, except for adoption of new and revised Hong Kong Financial Reporting Standards ("HKFRSs") issued by the HKICPA which are effective to the Group for accounting periods beginning on or after 1st January, 2010. The adoption of the new HKFRSs has no material impact on the Group's results and financial position for the current or prior periods except for the adoption of HKAS 17 (Amendment) "Leases".

The adoption of HKAS 17 (Amendment) "Leases" has resulted in a change in accounting policy for the classification of leasehold land of the Group. Previously, the Group's interests in leasehold land were accounted for as prepaid operating leases which were amortised and recognised in the consolidated income statement over the unexpired lease terms using the straight-line method. As substantially all risks and rewards of the leasehold land are considered having been transferred to the Group based on HKAS 17 (Amendment), the Group's interests in leasehold land are now accounted for as assets held under finance leases and are stated at cost less accumulated depreciation. The amendment has been applied retrospectively to unexpired leases since 1st January, 2010 on the basis of information existing at the inception of the leases. The amendment does not apply to the leasehold land disposed of by the Group in prior years.

Effect of change in accounting policy on consolidated statement of financial position:

Effect of add	Effect of adopting HKAS 17 (Amendment				
HK\$ million	30/6/2010	31/12/2009			
Increase/(decrease) in:					
Property, plant and equipment	261	272
