#### NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

For the six months ended 30 June 2010

#### 1. BASIS OF PREPARATION

The condensed consolidated financial statements have been prepared in accordance with the applicable disclosure requirements of Appendix 16 to the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the "Stock Exchange") and with the Hong Kong Accounting Standard ("HKAS") 34 "Interim Financial Reporting".

#### 2. PRINCIPAL ACCOUNTING POLICIES

The condensed consolidated financial statements have been prepared on the historical cost basis except for certain financial instruments, which are measured at fair values, as appropriate.

The accounting policies used in the condensed consolidated financial statements are consistent with those followed in the preparation of annual financial statements of Genvon Group Limited (formerly known as Wang Sing International Holdings Group Limited) (the "Company") and its subsidiaries (collectively referred to as the "Group") for the year ended 31 December 2009.

In the current interim period, the Group has applied, for the first time, the following new and revised standards, amendments and interpretations ("new and revised HKFRSs") issued by the Hong Kong Institute of Certified Public Accountants (the "HKICPA").

HKFRSs (Amendments)	Amendment to HKFRS 5 as part of
	Improvements to HKFRSs 2008
HKFRSs (Amendments)	Improvements to HKFRSs 2009

HKAS 39 (Amendment)	Eligible Hedged Items
HKFRS 1 (Amendment)	Additional Exemptions for First-time
	Adopters
HKFRS 2 (Amendment)	Group Cash-settled Share-based Payment
	Transactions
HKFRS 3 (Revised)	Business Combinations
HK(IFRIC) - Int 17	Distributions of Non-cash Assets
	to Owners

#### 2. PRINCIPAL ACCOUNTING POLICIES - continued

The Group applies HKFRS 3 (Revised) "Business Combinations" prospectively to business combinations for which the acquisition date is on or after 1 January 2010. The requirements in HKAS 27 (Revised) "Consolidated and Separate Financial Statements" in relation to accounting for the Group's changes in ownership interests in a subsidiary after control is obtained and for loss of control of a subsidiary are also applied prospectively by the Group on or after 1 January 2010.

As there was no transaction during the current interim period to which HKFRS 3 (Revised) and HKAS 27 (Revised) is applicable, the application of HKFRS 3 (Revised), HKAS 27 (Revised) and the consequential amendments to other HKFRSs have had no effect on the condensed consolidated financial statements of the Group for the current or prior accounting periods.

Results of the Group in future periods may be affected by future transactions for which HKFRS 3 (Revised), HKAS 27 (Revised) and the consequential amendments to the other HKFRSs are applicable.

The application of the other new and revised HKFRSs has had no effect on the condensed consolidated financial statements of the Group for the current or prior accounting periods.

The Group has not early applied the following new and revised standards, amendments or interpretations that have been issued but are not yet effective.

#### 2. PRINCIPAL ACCOUNTING POLICIES – continued

- Effective for annual periods beginning on or after 1 July 2010 and 1 January 2011, as appropriate
- <sup>2</sup> Effective for annual periods beginning on or after 1 February 2010
- <sup>3</sup> Effective for annual periods beginning on or after 1 July 2010

- <sup>5</sup> Effective for annual periods beginning on or after 1 January 2013

HKFRS 9 Financial Instruments introduces new requirements for the classification and measurement of financial assets and will be effective from 1 January 2013, with earlier application permitted. The Standard requires all recognised financial assets that are within the scope of HKAS 39 Financial Instruments: Recognition and Measurement to be measured at either amortised cost or fair value. Specifically, debt investments that (i) are held within a business model whose objective is to collect the contractual cash flows and (ii) have contractual cash flows that are solely payments of principal and interest on the principal outstanding are generally measured at amortised cost. All other debt investments and equity investments are measured at fair value. The application of HKFRS 9 might affect the classification and measurement of the Group's financial assets.

The directors of the Company anticipate that the application of other new and revised standards, amendments or interpretations will have no material impact on the results and the financial position of the Group.

#### 6. LOSS PER SHARE

The calculation of the basic loss per share for the six months ended 30 June 2010 is based on the loss for the period attributable to owners of the Company of HK\$13,265,000 (six months ended 30 June 2009: HK\$26,327,000) and the number of 1,689,910,000 (six months ended 30 June 2009: approximately 681,388,000) ordinary shares in issue.

The number of ordinary shares for the purpose of basic loss per share for the six months ended 30 June 2009 had been adjusted for the open offer completed on 29 July 2009.

The computation of diluted loss per share for the six months ended 30 June 2010 and 2009 does not assume the conversion of the Company's outstanding convertible note as the exercise would result in reduction in loss per share for the six months ended 30 June 2010 and 2009.

The computation of the diluted loss per share for the six months ended 30 June 2010 and 2009 does not assume the exercise of the Company's options because the exercise prices of those options were higher than the average market price for shares for both periods.

#### 7. MOVEMENTS IN PROPERTY, PLANT AND EQUIPMENT

During the six months ended 30 June 2010, the Group acquired property, plant and equipment of approximately HK\$859,000 (for the six months ended 30 June 2009: HK\$1,379,000).

# MANAGEMENT DISCUSSION AND ANALYSIS Industry Overview

Property Development

During the recent years, significant growth was noted on the economy of China. The growth was more apparent after entry into the World Trade Organisation. For these years, the boom in the economy brought about the increase in disposable income by the people. The acceleration in the pace of urbanization and the adjustment in the economic composition facilitated the change in the ways that the economy achieves its development. These factors have contributed to the sustainable growth in the real estate market in China.

Driven by the growth in economy and population, the demand for residential properties in Jiangsu Province demonstrated an uprising trend during the recent years. Similarly, the demand of real estate market in Shanghai remained strong, and the property price stayed at a relatively high level. During the first half of 2010, notwithstanding the control measures imposed by the Central government so as to control the rapidly growing real estate market, the market price basically remains steady and there was not much fall in the market demand. The real estate market in China is still growing at a sound and steady manner.

# Power tools, air tools and hand tools

During the first half of 2010, the economy in China has been growing steadily. Exports by the enterprises in the Mainland grew significantly as compared with the same period in 2009, which was then suffered from the outbreak of the financial crisis that resulted in a lower amount of exports. In the first half of 2010 growth in exports was recovering gradually.

During the period under review, the recovery of the international economy remained slow. The purchase made by international vendors in China was conservative and prudent as compared to that prior to 2009. Although the demand in emerging markets such as South Asia, East Europe, Russia and Middle East was relatively rapid, the recovery in the demand from Europe and the United States, the traditional exports destinations, was relatively slower.

# MANAGEMENT DISCUSSION AND ANALYSIS – continued Business Review

Property Development

The progress for the development of the real estate project in Shanghai was smooth. Construction work for the southern portion was already up to 10 floors for the structure. Foundation work was commenced for the northern portion. It is expected that pre-sale will begin during the fourth quarter of this year. Construction work will be fully completed by 2011.

In January 2010, a subsidiary of the Company acquired the land use right for a piece of land in Jiangsu province by way of open tender at a consideration of RMB445,480,000. The Company has established a joint venture with a real estate developer in Shanghai for the joint development of this project, and has 70% interests in the Company. Please refer to the circular dated 27 March 2010 for the details of this acquisition. On 15 April 2010, the shareholders of the Company had approved this acquisition.

The land should be delivered latest by December 2010. Construction work shall commence within six months after the land was delivered and shall be completed within three years. According to the preliminary development plan, it is expected that the lot will be developed into a residential community of approximately 550,000 square meters.

# Power tools, air tools and hand tools

The Group is principally engaged in the production and sale of mid to high end alternating current (AC) and direct current (DC) power tools, garden tools and air tools. During the period under review, there were certain fluctuations for the prices of raw materials in China, with which increases were recorded to a certain extent. By mid-2010, drops were recorded from time to time. As of the end of June 2010, the prices of raw materials as a whole slightly fell when compared with the end of 2009. The pressure on product costs faced by the manufacturing enterprises was slightly mitigated, which was beneficial to the future development of the enterprises.

As the Group had integrated businesses earlier and ceased to operate a majority of those with relatively lower gross profit margin, the sales recorded by the Group reduced. But costs were saved and resources are then concentrated in the development of new customers and research of high value added products. The integration plan made significant progresses and as a result loss incurred by the tools business was reduced significantly.

# MANAGEMENT DISCUSSION AND ANALYSIS – continued Business Review – continued

Power tools, air tools and hand tools - continued

During the first half of 2010, enterprise management for the Group's factories was enhanced continuously. Assurance systems such as ISO9001:2008, ISO14001: 2004 and GB/T28001-2001 were strictly executed. The fundamental ERP modules were implemented in full force at the Group's factories. Product qualities were improved in an ongoing manner. Evaluation of the Group by a number of customers showed that the Group has achieved the highest ratings among the suppliers.

During the period under review, there were signs of recovery in the United States market. Demand for power tools increased slightly as compared to two years ago. European market remained sluggish. Demand as a whole grew slowly. However, the Company is still active in acquiring new customers. Results were achieved to a certain extent upon tapping into product market. As of the first half of 2010, the Group's major customers included international renowned chain stores and major power and air tools distributors such as Bosch, TTI, Sparky and Kingfisher.

The Group's professional laboratory was also given considerable development during the period under review. As a provincial-class inspection centre, it is estimated to implement more than 30 batches of dedicated monitoring and inspection about power tools throughout 2010. During the period under review, it had completed 22 batches of inspection. After years of operation, the Group's professional laboratory has developed into an inspection institute with certain degree of professionalism and modernization. It has certain degree of influence to the region where the Group's factories are located.
