2010 Interim Report

## Leveraging Opportunities, Pursuing Growth

2010 will be a complicated year for China's economy. Given a slowdown on economic growth in the second half, we expect that the Group will be affected in respect of its expressway traffic volume, service areas operation and capital market performance. Faced with the not-so-optimistic situation, the management of the Company will continue to build up its core expressway business while actively seeking and cultivating new business opportunities and new sources of profit growth. It will strive unremittingly to contribute to the Company's sustainable development and bring forth satisfactory results for shareholders.

## Business Review

Affected by the relatively high comparison basis for the same period in 2009 and the State's macro-economic control measures, the growth pace of China's economy has slowed during the second quarter of the year. However, the economy as a whole kept a sound developing trend in the first half of 2010, with the national GDP increasing by 11.1% as compared to the same period last year. Although the growth pace of the economy of Zhejiang Province also slowed in the second quarter during the Period, the province did keep a positive recovery trend with continuous optimization of its whole economic structure. GDP of Zhejiang Province recorded a year-on-year growth of 13% in the first half of 2010.

Benefiting from a sound development momentum of the domestic economy and an increase in automobile sales, traffic volume and toll income on the Group's expressways maintained a satisfactory growth during the first half of the year. Therefore, during the Period, income for the Group recorded a rise of 13.0% compared to the same period last year to Rmb3,227.49 million, of which Rmb1,739.65 million, or 53.9% of total income, was generated from the two major expressways owned and operated by the Group. Rmb799.39 million was generated from toll road-related businesses, which accounted for 24.8% of the total income. Affected by a sharp decline of China's stock market during the Period, income from the securities business dropped slightly compared to the same period last year to Rmb688.45 million, accounting for 21.3% of the total income.

During the Period, toll income from toll road operations increased by 11.6% over the same period in 2009, while income from toll road-related businesses increased by 36.1%. A breakdown of the Group's income for the Period is set out below:

## Business Review

### TOLL ROAD OPERATIONS

During the Period, benefiting from the effective macro-economic control measures, China's economy developed positively toward the expected goal. Domestic demand stimulated domestic automobile sales to increase substantially. At the same time, the widening project of the Shanghai Section of the Shanghai-Hangzhou Expressway was completed in early 2010, and together with the implementation of the toll-by-weight policy, the natural growth of traffic volume on the Group's expressways during the Period was quite significant, with the growth rate of toll income being much steeper than that of traffic volume.

On January 1, 2010, construction on the Shanghai Section of the Shanghai-Hangzhou Expressway was completed. Through a series of promotion by the Company, traffic volume on the Group's Shanghai-Hangzhou Expressway resumed in no time to the same level as that before the construction. At the same time, the toll-by-weight policy implemented in mid-April 2010 brought about a notable increase in toll income for the road section. From the first half's operation figures, we are happy to witness that both traffic volume and toll income recorded double-digit increases for the Shanghai-Hangzhou-Ningbo Expressway.

Despite the advantages brought to the Group's Shangsans Expressway by both sound macro-economic growth and the implementation of the toll-by-weight policy in the first half of the year, the launch of the dual path identification system in mid-October 2009 has offset the traffic volume increase on the Shangsans Expressway, resulting in a slight drop in traffic volume and toll income for the road section during the Period.

The average daily traffic volume in full-trip equivalents along the Group's Shanghai-Hangzhou-Ningbo Expressway was 37,933 during the Period, representing an increase of 12.4% year-on-year. The average daily traffic volume in full-trip equivalents along the Shanghai-Hangzhou Section of the Shanghai-Hangzhou-Ningbo Expressway increased by 17.2% year-on-year, and that along the Hangzhou-Ningbo Section increased by 9.2% year-on-year. The average daily traffic volume in full-trip equivalents along the Shangsans Expressway was 18,844 during the Period, representing a decrease of 1.4% year-on-year.

Toll income from the Shanghai-Hangzhou-Ningbo Expressway amounted to Rmb1,361.79 million during the Period, representing an increase of 15.6% year-on-year; while toll income from the Shangsans Expressway amounted to Rmb377.86 million during the Period, representing a decrease of 0.7% year-on-year.

### TOLL ROAD-RELATED BUSINESSES

The Company also operates certain toll road-related businesses along its expressways through its subsidiaries and associated companies, including gas stations, restaurants and shops in service areas, as well as roadside advertising and vehicle service businesses.

During the Period, with a steady recovery of the domestic economy, traffic volume along the Group's expressways increased significantly. The opening of Shanghai Expo also lifted traffic volume and thus enhanced income for the service areas. Meanwhile, both sales and prices of petroleum products increased substantially, which has in turn boosted the income of the gas station operation. Consequently, income of toll road-related businesses of the Group amounted to Rmb806.48 million during the Period, an increase of 35.6% year-on-year.

## SECURITIES BUSINESS

During the Period, the macro-economy was under structural adjustments, leading to a sharp drop of Shanghai and Shenzhen stock market indices and a decrease in market trading volume. Competition in the brokerage market became intensified, resulting in a reduction on average commission rates. Despite the severe external environment, Zheshang Securities Co., Ltd. (“Zheshang Securities”) continued to maintain a smooth operation through active business developments. The market share of its brokerage business continued to be enhanced, as well as its number of clients. In the meantime, Zheshang Securities achieved growth on investment banking, asset management and futures businesses, which to some extent offset the impact on Zheshang Securities caused by intense market competition and share index drop.

During the Period, the offering scale of Zheshang Securities’ first accumulated asset management plan, “Zheshang Huijin No.1”, reached Rmb2.3 billion, boosting the total scale of the asset management business to exceed Rmb3.0 billion. Zheshang Securities set up five new branches in coastal provinces and cities like Fujian and Guangdong, and the number of operating offices was expanded to 46, thereby further enhancing its network deployment.

During the Period, the securities business realized an operating income of Rmb688.45 million, representing a decrease of 3.2% year-on-year. Of such income, brokerage commission income amounted to Rmb590.94 million, representing a year-on-year decrease of 9.3%; and bank interest income amounted to Rmb97.51 million, representing a year-on-year increase of 64.1%. Apart from these, the proprietary securities trading business recorded a profit of Rmb51.61 million as accounted for in the income statement (2009 Interim: Rmb27.20 million).

## LONG-TERM INVESTMENTS

Zhejiang Expressway Petroleum Development Co., Ltd. (a 50% owned associate of the Company) (“Petroleum Co”) benefited from a recovery of the macro-economy and an increase in petroleum products prices during the Period. It recorded a substantial increase in sales of petroleum products and a revenue of Rmb1,599.90 million, a 37.4% increase year-on-year. In the Period, Petroleum Co achieved a net profit of Rmb11.52 million.

Zhejiang Jinhua Yongjin Expressway Co., Ltd. (a 23.45% owned associate of the Company) (“Jinhua Co”) operates the 69.7km Jinhua Section of Ningbo-Jinhua Expressway. During the Period, benefiting from a recovery of the domestic economy and the toll income increase brought about by the implementation of the toll-by-weight policy, the average daily traffic volume in full-trip equivalents along the road section was 9,066 vehicles, a 26.1% increase as compared to the same period last year. Toll income was Rmb88.37 million, an increase of 34.9% year-on-year. A loss of Rmb39.93 million was recorded due to Jinhua Co’s heavy financial burden, though the loss was gradually decreasing year after year.

JoinHands Technology Co., Ltd. (a 27.582% owned associate of the Company) generated its income mainly from its printing operation and property leasing during the Period. Due to a lack of improvement in its operations, the associate company incurred a loss of Rmb1.79 million during the Period.

## CONTINGENT LIABILITIES AND PLEDGE OF ASSETS

As at June 30, 2010, the Group did not have any contingent liabilities nor any pledge of assets or guarantees.

## FOREIGN EXCHANGE EXPOSURE

Save for the repayment of a World Bank loan of Rmb391.51 million equivalent in US dollars, as well as dividend payments to the holders of H shares in Hong Kong dollars, the Group's principal operations are transacted and booked in Renminbi. Therefore, the Group's exposure to foreign exchange fluctuations is limited and the Group has not used financial instrument for hedging purposes during the Period.

Although the Directors do not foresee any material foreign exchange risks for the Group, there is no assurance that foreign exchange risks will not affect the operating results of the Group in the future.

## Outlook

In the first half of this year, China's economy continued to develop steadily according to the direction led by the macro-economic control measures. Under an improving external environment, fast growth on foreign export and a low comparison basis last year, Zhejiang Province's economy continued to develop positively in the first half of 2010. However, we expect a slowdown on the growth rate of the economy in the second half under vigorous structural adjustment policies carried out by the government. As a result of the slowdown of economic growth, the rapid growth on domestic car ownership will also slow, which in turn will affect the natural traffic growth along the Group's expressways.

Although the opening of the Shanghai-Jiaxing-Huzhou-Hangzhou Expressway in early February this year caused little impact on the Group's expressways, the opening of Zhuyong Expressway on July 22, 2010 will bring about negative effect on the traffic volume along the Group's expressways, especially causing significant traffic diversions on the Shangsang Expressway.

Introduction of the toll-by-weight policy created a decrease in truck traffic volume for a short period of time, but from existing figures, it already brought a notable increase in toll income. In the second half of this year, through strengthened promotion and measures to attract more empty vans, we expect truck traffic volume to resume to the level before the policy was implemented.

During the Period, benefiting from a better economic environment in Zhejiang Province, the Group's toll road-related businesses achieved significant growth. In the second half of the year, the Company will apply various measures, including introducing and refining quality operational projects and intensifying our promotion, to enhance management standards and service quality at the service areas.

As China's economy is in the course of transformation, despite the rapid GDP growth in the first half of the year, the stock market will remain sluggish. Although the Group's securities business may be affected by the turbulent A share market in the short run, Zheshang Securities will carry out various measures including further expanding its investment banking business and grouping financing product marketing with the futures agency business, with a view to continuously gaining industry influence and market share. We expect good profit contribution from Zheshang Securities to the Group in the future.

2010 will be a complicated year for China's economy. Given a slowdown on economic growth in the second half, we expect that the Group will be affected in respect of its expressway traffic volume, service areas operation and capital market performance. Faced with the not-so-optimistic situation, the management of the Company will continue to build up its core expressway business while actively seeking and cultivating new business opportunities and new sources of profit growth. It will strive unremittingly to contribute to the Company's sustainable development and bring forth satisfactory results for shareholders.

# Notes to Condensed Consolidated Financial Statements

## 1. BASIS OF PREPARATION

The condensed consolidated financial statements have been prepared in accordance with the applicable disclosure requirements of Appendix 16 to the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the “Listing Rules”) and with Hong Kong Accounting Standard 34 (“HKAS 34”) “Interim Financial Reporting”.

## 2. PRINCIPAL ACCOUNTING POLICIES

The condensed consolidated financial statements have been prepared on the historical cost basis except for certain financial instruments, which are measured at fair value, as appropriate.

The accounting policies used in the condensed consolidated financial statements are consistent with those followed in the preparation of the Group’s annual financial statements for the year ended December 31, 2009 except as described below.

During the Period, the Group has applied, for the first time, the following new and revised standards, amendments and interpretations (“new and revised HKFRSs”) issued by the Hong Kong Institute of Certified Public Accountants (“HKICPA”).

HKFRSs (Amendments)	Amendments to HKFRS 5 as part of Improvements to HKFRSs 2008
HKFRSs (Amendments)	Improvements to HKFRSs 2009
HKAS 27 (Revised)	Consolidated and Separate Financial Statements
HKAS 39 (Amendment)	Eligible Hedged Items
HKFRS 1 (Amendment)	Additional Exemptions for First-time Adopters
HKFRS 2 (Amendment)	Group Cash-settled Share-based Payment Transactions
HKFRS 3 (Revised)	Business Combinations
HK(IFRIC)-Int 17	Distribution of Non-cash Assets to Owners

The Group applies HKFRS 3 (Revised) Business Combinations prospectively to business combinations for which the acquisition date is on or after January 1, 2010. The requirements in HKAS 27 (Revised) Consolidated and Separate Financial Statements in relation to accounting for changes in ownership interests in a subsidiary after control is obtained and for loss of control of a subsidiary are also applied prospectively by the Group on or after January 1, 2010.

As there was no transaction during the current interim period in which HKFRS 3 (Revised) and HKAS 27 (Revised) are applicable, the application of HKFRS 3 (Revised), HKAS 27 (Revised) and the consequential amendments to other HKFRSs had no effect on the condensed consolidated financial statements of the Group for the current or prior accounting periods.

Results of the Group in future periods may be affected by future transactions for which HKFRS 3 (Revised), HKAS 27 (Revised) and the consequential amendments to the other HKFRSs are applicable.

The application of the other new and revised HKFRSs had no material effect on the condensed consolidated financial statements of the Group for the current or prior accounting periods.

## Notes to Condensed Consolidated Financial Statements

### 2. PRINCIPAL ACCOUNTING POLICIES (Continued)

The Group has not early applied the following new and revised standards, amendments or interpretations that have been issued but are not yet effective.

HKFRSs (Amendments)	Improvements to HKFRSs 2010 <sup>1</sup>
HKAS 32 (Amendment)	Classification of Right Issues <sup>2</sup>
HKFRS 1 (Amendment)	Limited Exemption from Comparative HKFRS 7 Disclosures for First-time Adopters <sup>3</sup>
HKFRS 9	Financial Instruments (relating to the classification and measurement of financial assets) <sup>5</sup>
HK(IFRIC)-Int 14 (Amendment)	Prepayments of a Minimum Funding Requirement <sup>4</sup>
HK(IFRIC)-Int 19	Extinguishing Financial Liabilities with Equity Instruments <sup>3</sup>

<sup>1</sup> Effective for annual periods beginning on or after July 1, 2010 or January 1, 2011, as appropriate

<sup>2</sup> Effective for annual periods beginning on or after February 1, 2010

<sup>3</sup> Effective for annual periods beginning on or after July 1, 2010

<sup>4</sup> Effective for annual periods beginning on or after January 1, 2011

<sup>5</sup> Effective for annual periods beginning on or after January 1, 2013

HKFRS 9 *Financial Instruments* introduces new requirements for the classification and measurement of financial assets and will be effective from January 1, 2013, with earlier application permitted. The Standard requires all recognised financial assets that are within the scope of HKAS 39 *Financial Instruments: Recognition and Measurement* to be measured at either amortised cost or fair value. Specifically, debt investments that (i) are held within a business model whose objective is to collect the contractual cash flows and (ii) have contractual cash flows that are solely payments of principal and interest on the principal outstanding are generally measured at amortised cost. All other debt investments and equity investments are measured at fair value. The application of HKFRS 9 might affect the classification and measurement of the Group's financial assets.

The directors of the Company anticipate that the application of the other new and revised standards, amendments or interpretations will have no material impact on the results and the financial position of the Group.

The Group operates in an economic environment currently predominated by entities directly or indirectly owned or controlled by the PRC government ("state-controlled entities"). Apart from the transactions with the Communications Investment Group and parties under the common control of the Communications Investment Group, the Group also conducts business with other state-controlled entities. The directors consider those state-controlled entities are independent third parties so far as the Group's business transactions with them are concerned.

The Group has entered into various transactions, including deposit placements, borrowings and other general banking facilities, with certain banks and financial institutions which are state-controlled entities in its ordinary course of business. In view of the nature of those banking transactions, the directors are of the opinion that separate disclosure would not be meaningful.

In respect of the Group's tolled road business, the directors are of the opinion that it is impracticable to ascertain the identity of counterparties and accordingly whether the transactions are with other state-controlled entities in the PRC.
