1 BASIS OF PREPARATION

The unaudited condensed consolidated interim financial statements (the "Interim Financial Statements") have been prepared in accordance with the applicable disclosure requirements of Appendix 16 to the Rules Governing the Listing of Securities ("Listing Rules") on The Stock Exchange of Hong Kong Limited ("Stock Exchange") and the Hong Kong Accounting Standard ("HKAS") 34 "Interim financial reporting" issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA").

The interim financial statements should be read in conjunction with the annual financial statements for the year ended 31 December 2009, which has been prepared in accordance with Hong Kong Financial Reporting Standards ("HKFRS").

2 ACCOUNTING POLICIES

The accounting policies adopted in the unaudited condensed consolidated interim financial statements are consistent with those used in the annual financial statements for the year ended 31 December 2009.

In the current period, the Group has adopted all the new or revised Hong Kong Financial Reporting Standards ("HKFRSs") that are relevant to its operations and effective for the current accounting period of the Group. The adoption of these new or revised HKFRSs had no material effect on the reported results or financial position of the Group for both the current and prior reporting periods.

3 SEGMENT INFORMATION

The Group operates one business segment, which is provision of "automatic teller machines" services. No separate segment information is prepared according to IFRS 8 "operating segments".

All operating assets and operations of the Group during the periods ended 30 June 2010 and 2009 were substantially located and carried out in the PRC.

Management has determined the operating segments based on the reports reviewed by the Group's Chief Executive Officer ("CEO") (being the chief operating decision maker) to make strategic decisions about resources allocation and performance assessment.

The Group's CEO assesses the performance of the operating segment based on a measure of earnings before interest, tax, depreciation and amortisation. This measurement basis of segment results excludes the effects of non-recurring expenditures from the operating segment such as loss on disposal of property, plant and equipment and loss on written off of property, plant and equipment.

Bank and cash balances held by the Group are not considered to be segment assets but rather are centrally managed by the Chief Finance Officer ("CFO") in Hong Kong.

Management Discussion and Analysis

BUSINESS REVIEW

During the period under review, FinTronics' extensive ATM network has covered first and second-tier cities including Shenzhen, Jinan, Qingdao, Yantai, Linyi, Weihai, Changsha and Nantong, tapping into the increasing consumption power and maintaining a competitive market share. The Group has prepared for continued business expansion, actively negotiating with some potential clients, including banks, China UnionPay and China Yinshang (中國銀商), for potential collaboration opportunities, including the launch of new ATM projects at the appropriate time.

In March 2010, FinTronics attained a new milestone in its business development history by diversifying into the natural resources industry, a sector with great prospects. The Group, via its wholly-owned subsidiary, signed a conditional sale and purchase agreement with Truffle Rich Holdings Limited to acquire its 80% interest in CSJC Gold Mining Company Omchak ("Omchak") at a consideration of US\$300 million.

Omchak and its subsidiaries are engaged in the business of geological exploration and commercial mining of placer gold deposits and hard rock gold deposits located in Russia and own eight gold projects in Russia. According to the Russian Resource Reporting Code, Omchak's projects contain enormous gold reserves and offer huge potential for exploration and exploitation, with an estimated aggregate gold reserve of 1,193,000 ounces (around 37 tonnes) and estimated aggregate gold resources of 6,232,000 ounces (around 194 tonnes). Currently, the Omchak Project is operated by the Russian management team with years of gold mine management and operations experience. To maintain a professional standard of operations and efficient management performance, FinTronics intends to retain the management team of Omchak after the acquisition is completed.

The management believes that the Omchak Project transaction will create a unique development opportunity for the Group to tap the tremendous potential of the gold mining business and natural resources industry. The move also reinforces the Group's business strategy to manage and operate profitable businesses and, ultimately, to boost value to shareholders.

PROSPECTS

In the second half of 2010, the more intense competition in the ATM cooperation sector is expected to increase operating costs. The demand from commercial banks in many provinces and cities of China for cooperative ATM operation will gradually begin to drop after a few years of rapid growth. Thus, the development scale of the Group's ATM market will rely on the banks' strategic decision related to ATM deployment and the business derived from cooperation in operation of the ATM machines will level off.

Despite the challenging operating environment, the Security Service Management Ordinance promulgated by the PRC Government in January 2010 has helped to enhance the popularity of security services in the market and reduce the trend towards monopolisation of the escort industry. This has created more room for development of cooperation in the ATM operation which was originally subject to higher limitations in filling the ATM machine with bank notes. Looking to the second half of the year, the Group plans to continue its proven business consolidation strategy to counter the intense competition in the market. At the same time, the Group intends to maintain its stringent ATM deployment strategy and steer business development with prudence and pragmatism.

Skyrocketing demand for gold has propelled the price of gold to record heights. The Group's management is positive about the long term prospects of the gold market and the acquisition of Omchak positions FinTronics to participate in the booming natural resources sector. Upon completion of the transaction, this sector is to become one of the core business segments of the Group.

The Group will intensify its focus on the natural resources sector going forward, and evaluate investing in other gold mines globally, including but not limited to those located in Russia and the People's Republic of China. The Group will retain and currently has no intention to divest its existing businesses, having the aim of expanding its profitability base.

LIQUIDITY AND FINANCIAL RESOURCES

As at 30 June 2010, the Group had cash and bank balances HK\$207.7 million (31 December 2009: HK\$159.3 million) of which HK\$5 million (31 December 2009: HK\$5 million) were pledged to banks for facilities granted to the Group.

The Group had no loans and overdrafts as at 30 June 2010 (31 December 2009: HK\$4.6 million). As at 30 June 2010, the total asset value of the Group was HK\$288.3 million (31 December 2009: HK\$250.1 million) whereas the total liabilities was HK\$12.8 million (31 December 2009: HK\$18.3 million). The gearing ratio of the Group, calculated as total liabilities over total assets, was 4.4% (31 December 2009: 7.3%).

As at 30 June 2010, the Group had available aggregate banking facilities of HK\$5 million (31 December 2009: HK\$5 million) of which HK\$5 million (31 December 2009: HK\$0.4 million) has not been utilised.

The Group maintained a net cash (being the total cash and bank balances net of total bank borrowings) to equity ratio of 75.4% (31 December 2009: 68.7%) as at 30 June 2010. With net cash of HK\$207.7 million (31 December 2009: net cash of HK\$159.3 million) as at 30 June 2010, the Group's liquidity position is healthy and the directors of the Company ("Directors") believe that the Group has sufficient financial resources to satisfy its commitments and working capital requirements.

CONTINGENT LIABILITIES

There were no significant contingent liabilities as at both 30 June 2010 and 31 December 2009.

EXCHANGE RISK

As the Group's operations are principally in the PRC and all assets and liabilities are denominated either in Renminbi, HK dollars or US dollars, the Directors believe that the operations of the Group are not subject to significant exchange risk.

Management Discussion and Analysis

EMPLOYEES, TRAINING AND REMUNERATION POLICIES

The Group ensures that the pay levels of its employees are competitive and employees are rewarded on a performance related basis.

The Directors believe that experienced staff, in particular its technicians, are the most valuable assets of the Group. Training programs are provided to technicians, especially new recruits, to ensure their technical proficiency.

The Company operates a share option scheme (the "Scheme") whereby the Board may at their absolute discretion, grant options to employees and Directors of the Company and any of its subsidiaries to subscribe for shares in the Company. The subscription price, exercisable period and the maximum number of options to be granted are determined in accordance with the prescribed terms of the Scheme. During the period, no share options were granted to directors, executives and employees to their contribution to the Group.
