Report of the Chief Executive Officer

Recovery remains on track

In 2009, we emerged from the global financial crisis with a remarkable recovery in major stock markets. This year, the momentum was not sustained, and the major stock markets over the first six months were difficult and volatile. Notwithstanding this fragile environment, the Group's business and financial performance was encouraging.

The key factor for us, as always, was the performance of our funds under management. From late last year, we became more cautious on the near term outlook for China related stocks, and started to construct increasingly defensive portfolios for our funds. This strategy turned out to be effective in this difficult market — many of our funds remained resilient and were top performers in their respective fund classes at a time of widespread losses in the market. Our flagship Value Partners Classic Fund[#] increased by 1.0% in the first half of 2010, whereas the Hang Seng and MSCI China indices both fell by 6.1%.

Net subscriptions in the first half of this year amounted to US\$319 million, compared to US\$226 million in the second half of last year. Most of the new subscriptions came from Hong Kong, whilst our overseas markets stabilized but remained sluggish. That our subscription volume from Hong Kong has remained robust reflects our funds' superior performance and our market reputation.

For the first half of 2010, the Group's total revenue increased by 27.1% to HK\$207.0 million, compared to HK\$162.8 million for the same period last year. Notwithstanding the increase in revenue, net profit for the period was HK\$91.6 million, representing a 21.1% decrease from the HK\$116.1 million net profit in the first half of 2009. The decline in profitability was mainly due to the lower unrealized mark-to-market gain of HK\$3.6 million on our fund investments recorded in the first half of 2010, versus the unrealized gain of HK\$57.9 million in the same period of 2009.

Building our AUM

For our premium, actively managed products, we have focused our efforts on building up the assets under management ("AUM") of our existing products and positioning ourselves to capture new opportunities when the markets finally turn around. We have not launched any new products, as the markets, particularly the overseas markets, have remained fragile, and it is difficult to raise funds for new, unproven products.

As aforementioned, net subscriptions in the first half of this year amounted to US\$319 million, as the recovery in fund inflow that started in the second half of last year has sustained its pace. Most of the new subscriptions came from Hong Kong, and it is encouraging to see that our flagship Classic Fund has become the best selling equity fund in the HSBC retail bank platform in Hong Kong. The strong fund inflows from Hong Kong investors reflect our leading market position in our home market.

Our overseas markets have stabilized but remained sluggish. The major new mandate we secured over the first six months was an agreement to manage and co-manage two funds for a leading Swiss private bank, starting from 14 June 2010. But new subscriptions from overseas investors in general remained weak, primarily because many of these investors have not yet fully recovered the losses they sustained in the financial crisis.

Report of the Chief Executive Officer

Another development regards our collaboration with Affiliated Managers Group, Inc. (“AMG”), a substantial shareholder of Value Partners. Listed in New York, AMG holds strategic stakes in various asset management firms. In November 2009, it acquired a 5.05% shareholding in Value Partners Group, and we have recently entered into an agreement with AMG for it to assist Value Partners in marketing our investment management services in the Middle East.

Growing our Value ETFs

Launched on 15 December 2009, our Value China ETF tracks a basket of 25 China value stocks captured by the FTSE Value-Stocks China Index, which was developed based on a proprietary value-based screening methodology designed by us. The Value China ETF benefits from Value Partners’ 17 years of dedicated research and Asian market experience and it is the first ETF that applies the “fundamental indexing” concept to China related stocks.

During the first six months of 2010, our Value China ETF increased its AUM by nearly 42%, peaking at US\$61 million in April 2010. The liquidity of the ETF has also been significantly enhanced, and we have raised the number of our participating dealers. The Value China ETF dropped by 3.2%[^] for the first six months, when the Hang Seng and MSCI China indices both fell by 6.1%. We believe institutional and retail investors are now more receptive to our Value China ETF, given its good performance.

Awards and distinctions

We have seen significant market recognition of Value Partners’ achievements, and also received major distinctions for the quality of our funds. According to results published on 13 July 2010, Value Partners was ranked the leading hedge fund management firm in Asia by *Institutional Investor’s* 2010 Asia Hedge Fund 25. In their other global survey published in May 2010, we took the 79th spot on the list of the top 100 funds, worldwide. *Institutional Investor* is a prestigious financial publication that periodically reports on the fund performance of top global and regional fund management firms.

Additionally, Lipper Asia, a subsidiary of Thomson Reuters, awarded our Value Partners High-Dividend Stocks Fund as the Best Equity Fund in Asia Pacific (excluding Japan) in the 3-year category in the Lipper Fund Award 2010. Announced in March 2010, the Lipper Fund Award 2010 was given to our Fund based on 3-year returns from 1 January 2007 to 31 December 2009.

We have also maintained the top positions for our Hong Kong authorized funds in the Morningstar Rating, which compares their past performance against their peers in their respective comparison groups.

Internal development reflects our strength

Our business is a people business, and our strength rests upon the quality of our people. To further strengthen our leadership capacity and to reward outstanding performance, we have promoted certain senior members of the firm to leadership positions.

Effective from 1 July 2010, Mr. Louis So Chun Ki was promoted to Co-Chief Investment Officer, and Mr. Cheah Cheng Hye, who remains our Chairman, shares the role of Co-Chief Investment Officer with Mr. So, providing leadership to the investment team. Mr. Cheah focuses more on investment strategies, whilst Mr. So takes over the day-to-day operation of the investment team.

Report of the Chief Executive Officer

Additionally, Mr. Norman Ho Man Kei was promoted to the role of Investment Director, and four members of the investment team were appointed as Senior Fund Managers and two as Fund Managers.

On the business management side, Mr. Timothy Tse Wai Ming was promoted from Chief Financial Officer to the dual roles of Deputy Chief Executive Officer and Chief Financial Officer. I was promoted from the position of Managing Director to Chief Executive Officer, taking charge of the business and corporate management of Value Partners.

I would also like to express my gratitude to Ms. Chau Yee Man, who resigned from her post as Senior Fund Manager. She joined the Company in July 2005 and left in March 2010. I would also like to extend my good wishes to Mr. Eugene Law Ka Kin, who left the Company in July 2010. Joining Value Partners in December 2004, Mr. Law held a leadership role in the business management team.

Financial summary

As at 30 June 2010, our total AUM grew to US\$5.7 billion, up from US\$5.5 billion in December 2009, and up from US\$4.0 billion one year ago. I am pleased to report that our net subscriptions of US\$319 million over the first six months of this year already surpassed the total net subscriptions of US\$82 million we reached for the whole of last year. If this trend continues in the second half of this year, 2010 will indeed be a significant improvement over 2009 in terms of net subscriptions to our funds.

As stated earlier, we have seen solid increases in our management fees, such that our gross management fees for the first six months were HK\$149.0 million, compared to HK\$98.2 million for the same period in 2009. Notwithstanding the increase in revenue, net profit for the period was HK\$91.6 million, representing a 21.1% decrease from the HK\$116.1 million net profit in the first half of 2009. The decline in profitability was mainly due to the lower unrealized mark-to-market gain of HK\$3.6 million on our fund investments recorded in the first half of in 2010, versus the unrealized gain of HK\$57.9 million in the same period of 2009.

Our balance sheet as at 30 June 2010 remained liquid and sound, with zero leverage and significant cash balances.

Overall, our business performance for the period was encouraging, given the volatile and difficult market. Though some of our funds are close to their high watermarks at the end of the first six months, the performance fee valuation days of the majority of these funds are in December. It is not possible for us to project whether performance fees for these funds will be earned at the end of the year. What we have been doing and will continue to do is to strive to deliver superior investment performance, thereby enhancing our chance to earn performance fees, and to keep our fixed costs down to allow us to sustain our profitability, even if market conditions deteriorate in the second half of the year.

Looking forward

The past six months have seen us focus on building our strengths, and we will continue to do so for the rest of the year and beyond. In our investment team, we have made some senior appointments and are committed to positioning Value Partners as the “Temple of Value Investing” in Asia and delivering superior investment returns. Our business team has generated stronger fund inflows and will continue our efforts in Hong Kong and abroad in building our distribution networks, and enhancing our support to established and new distributors. For the next six months, we will increase our marketing efforts in Europe and the US, so that when these markets finally turn around, we will be ready to capture the new inflows.

Report of the Chief Executive Officer

In terms of our product development, we are committed to our strategy of offering both premium, actively managed products and high volume ETFs and quantitative products. We will continue to create new premium products, but remain cautious on market reception of new products in the near term, as investor sentiment has not yet fully recovered. Our ETF suite remains on track, and we will continue releasing truly innovative ETF products.

We expect that Mainland China will be our primary strategic market for the next decade, as we are very positive on the future growth of its fund management industry. We think it is important that we will be able to capitalize on this great opportunity and develop a significant business in the Mainland. In the past six months, we started contacts and dialogues with potential partners and regulators in the Mainland, and so far the response has been positive. We are confident that given our strong track record in investing in China and our similar culture with potential Mainland partners, we will establish new businesses in the Mainland in the near future.

Since the financial crisis, it has been anticipated that regulators around the world will take new initiatives, including new legislation, to tighten the regulation of the financial services industry. In June, the Securities and Futures Commission of Hong Kong gazetted the new SFC Handbook which includes Code on Unit Trusts and Mutual Funds. Other countries have also passed or plan to promulgate new legislation regarding the financial services industry. These new regulations no doubt pose significant challenges to many financial institutions, including fund management companies. It is probable that additional costs will have to be incurred by us to comply with these new regulations.

Thanks and appreciation

Finally, I would take this opportunity to express my heartfelt gratitude and appreciation to our team, as their commitment and dedication have been instrumental for our achievements. I would also thank our business partners and shareholders for their support.

Financial Review

Despite the volatile and relatively fragile market conditions throughout the first half of 2010, the Group's AUM was stable and held at US\$5.7 billion as at 30 June 2010, representing a net increase of 2.7%, over the US\$5.5 billion recorded six months earlier. Along with this, the Group's total revenue increased by 27.1% to HK\$207.0 million for the six months ended 30 June 2010, compared to HK\$162.8 million a year earlier. Net profit for the first half of 2010 was HK\$91.6 million, which was a decrease from the HK\$116.1 million net profit seen in the first half of 2009. The drop was mainly due to the lower unrealized mark-to-market gain of HK\$3.6 million on our fund investments recorded in 2010, than the unrealized gain of HK\$57.9 million in 2009, notwithstanding the increase in revenue in 2010. Having excluded those non-recurring and non-operating items, the Group's core earnings amounted to HK\$90.5 million, representing an increase of 47.9% from HK\$61.2 million, one year earlier. The increase in core earnings was mainly due to the increase in management fees.

Assets Under Management

AUM and return

The Group's AUM amounted to US\$5,654 million as at 30 June 2010, compared to US\$5,506 million half a year earlier, representing a 2.7% increase. The growth was mainly driven by the positive net inflow of US\$319 million, partly offset by the negative performance of US\$171 million recorded during the period. The average AUM increased from US\$3,391 million to US\$5,538 million for the first half of 2009 and 2010, respectively, representing a 63.3% increase and resulting in higher management fees for 2010. In terms of fund performance, we generated an asset-weighted average return of funds under management of negative 1.9%, compared to the recorded losses of 6.1% for both the Hang Seng Index and MSCI China Index during the same period. In addition, Value Partners Classic Fund, our flagship fund, recorded a 1.0% gain during the first half of 2010.

Gross subscriptions for the period under review amounted to US\$847 million, compared to US\$437 million and US\$824 million in the first and second half last year, respectively, reflecting the continuing steady positive trend of funds inflow and recovery starting from the second half of 2009. Gross redemptions amounted to US\$528 million during the period, which were stable in comparison to the first and second halves of 2009.

Net subscriptions for the period under review amounted to US\$319 million, compared to net redemptions of US\$144 million and net subscriptions of US\$226 million recorded in the first and second half of 2009, respectively.

(In US\$ million)	1H 2010	2H 2009	1H 2009

AUM by category

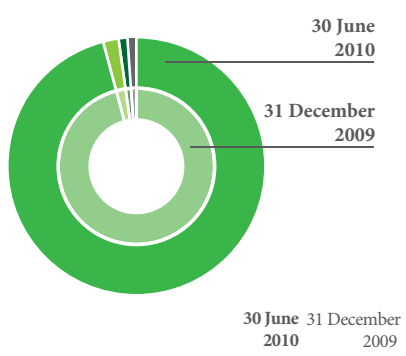

The charts below provide an analysis of the Group's AUM by different classifications, including brand, strategy and fund type, as at 30 June 2010.

During the period under review, our product mix by brand remained stable, and White Label Funds accounted for 51% of the total AUM. Absolute Return Long-biased Funds represented the majority of our funds by strategy. In terms of fund type, the proportion remained stable, and authorized funds accounted for 73% of the total AUM.

Client base

Institutional clients, the Group's primary group of fund investors, accounted for 85% of the total AUM as at 30 June 2010. In addition, retail investors increased from 13% to 15% of the Group's total AUM over the past six months, which was due to the higher fund inflow from Hong Kong retail investors through our expanded distribution channel network, such as retail banks. Institutional clients include institutions, pension funds, endowments and foundations, high-net-worth individuals, funds of funds, and family offices and trusts. Pension funds increased from 26% of the Group's AUM in 2009, to 27% in 2010, due to consistent fund inflow adding into our mandatory provident fund product. By geographical region, Hong Kong clients accounted for 66% of the Group's AUM. United States and European clients accounted for 22% of the Group's AUM, which was the same as last year.

Financial Review

Revenue and fee margins

The Group's total revenue increased by 27.1% to HK\$207.0 million for the six months ended 30 June 2010, compared to HK\$162.8 million for the corresponding period one year earlier, while gross management fees rose by 51.7% to HK\$149.0 million from HK\$98.2 million over the same period last year. These gains were mainly driven by the 63.3% increase in the Group's average AUM from US\$3,391 million a year earlier, to US\$5,538 million, partly offset by the contracted net management fee margin.

The net management fee margin came to 30 basis points for first half of the year, compared with 32 basis points recorded in the same period in the previous year. This margin contraction was due to the relative increase in the average AUM of funds that carry a lower margin (e.g. our mandatory provident fund product).

Gross performance fees amounted to HK\$53.8 million. This represents an 11.8% decline, compared to the HK\$61.0 million recorded for the same period last year. Out of the total performance fees generated during first half 2009, a total of HK\$52.6 million was generated from a private equity fund previously managed by the Group, but it has since been dissolved. During the period under review, a majority of performance fees were generated from funds which had exceeded their benchmark returns, with the remaining amount generated from funds which had exceeded their high watermarks. As at 30 June 2010, of all funds managed by the Group, a number of own-branded funds were at or around their high watermarks.

Other income, comprising mainly dividend income and interest income, decreased from HK\$9.4 million in the previous year to HK\$4.5 million. Dividend income decreased from HK\$6.9 million to HK\$3.6 million, due to the decline in dividends received from investee companies, while interest income decreased from HK\$1.3 million to HK\$0.5 million, due to lower interest rates.

Other gains and losses

The Group's accounting treatment of our fund investments has allowed changes in the fair value of our fund investments to be reflected in the profit and loss accounts. In so doing, an unrealized gain of HK\$3.6 million was recorded in the profit and loss accounts for the period under review, compared to HK\$57.9 million unrealized gain recorded in same period last year.

Cost management

The Group's total expenses amounted to HK\$108.8 million; this is relatively stable when compared to HK\$104.2 million recorded in the same period last year, given the Group's prudent, closely-monitored cost management. Total expenses included distribution and advisory fees, fixed operating expenses, share-based compensation expenses, and management bonuses.

Distribution and advisory fees increased by 76.5% to HK\$28.6 million, from HK\$16.2 million one year earlier, which was in line with the increase in management fee income.

Fixed operating expenses, which consist mainly of fixed salaries, rent and other administrative and office expenses, amounted to HK\$50.5 million, compared to HK\$48.4 million, one year earlier. The management continued to exercise stringent cost discipline and aims to keep its fixed operating expenses well covered by its management fees income, which is considered as a relatively stable source of income. Internally, the Group measures this objective by using the fixed cost coverage ratio, an indicator which shows how many times fixed operating expenses are covered by management fees income. For the period under review, the management has maintained the Group's fixed cost coverage at 3.0 times.

Financial Review

Apart from operating expenses, the Group recorded an expense of HK\$3.0 million, relating to stock options granted to employees. This expense item did not impact on cash flow, and is recognized in accordance with Hong Kong Financial Reporting Standards (“HKFRS”).

Management bonuses amounted to HK\$26.7 million for the period under review. This is consistent with the Group’s compensation policy, which distributes 20% to 23% of a net profit pool every year as the management bonus to employees. The net profit pool comprises the net profit before management bonus and taxation, and after certain adjustments. This discretionary bonus promotes staff loyalty and performance, while it aligns the interests of employees with those of shareholders.

Net profit and core earnings

In the first half of 2010, net profit came to HK\$91.6 million, decreased from HK\$116.1 million in 2009, and core earnings were HK\$90.5 million, representing an increase of 47.9% from HK\$61.2 million reported for the same period last year. Core earnings measure the Group’s core operating performance and exclude non-recurring and non-operating items such as our fund investments mark-to-market gain/loss. This year’s core earnings increase was mainly due to a rise in management fees.

Dividends

From 2009 onwards, the Group has been practicing a more consistent dividend distribution policy that takes into account the relatively volatile nature of asset management income streams. This policy states that dividends (if any) will be declared once a year and at the end of each financial year to better align them with the Group’s full-year performance. Barring any unexpected changes in the market environment, we expect that a final dividend (but not interim dividend) will be declared this year.

Liquidity and financial resources

Fee income is the Group’s main source of income. Other sources of income include interest income generated from bank deposits, as well as dividend income from investments held. During the period, the Group’s balance sheet and cash flow positions remained strong. As at 30 June 2010, the Group had a net cash balance of HK\$542.9 million. For the six months ended 30 June 2010, net cash inflows from operating activities amounted to HK\$138.2 million. The Group had no bank borrowings and did not pledge any assets as collateral for overdrafts or other loan facilities during the period under review. The debt-to-equity ratio (interest bearing external borrowings divided by shareholders’ equity) stood at zero, while the current ratio (current assets divided by current liabilities) came to 7.4 times.

Capital structure

As at 30 June 2010, the Group’s shareholders’ equity and total number of shares in issue for the Company stood at HK\$1,045.7 million and 1.6 billion, respectively.

REPORT ON REVIEW OF INTERIM FINANCIAL INFORMATION TO THE BOARD OF DIRECTORS OF VALUE PARTNERS GROUP LIMITED

(Incorporated in the Cayman Islands with limited liability)

Introduction

We have reviewed the interim financial information set out on pages 14 to 27, which comprises the condensed consolidated balance sheet of Value Partners Group Limited (the “Company”) and its subsidiaries (together, the “Group”) as at 30 June 2010 and the related condensed consolidated statements of comprehensive income, changes in equity and cash flows for the six-month period then ended, and a summary of significant accounting policies and other explanatory notes. The Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited require the preparation of a report on interim financial information to be in compliance with the relevant provisions thereof and Hong Kong Accounting Standard 34 “Interim Financial Reporting” issued by the Hong Kong Institute of Certified Public Accountants. The directors of the Company are responsible for the preparation and presentation of this interim financial information in accordance with Hong Kong Accounting Standard 34 “Interim Financial Reporting”. Our responsibility is to express a conclusion on this interim financial information based on our review and to report our conclusion solely to you, as a body, in accordance with our agreed terms of engagement and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

Scope of review

We conducted our review in accordance with Hong Kong Standard on Review Engagements 2410, “Review of Interim Financial Information Performed by the Independent Auditor of the Entity” issued by the Hong Kong Institute of Certified Public Accountants. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Hong Kong Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the interim financial information is not prepared, in all material respects, in accordance with Hong Kong Accounting Standard 34 “Interim Financial Reporting”.

Notes to the Condensed Consolidated Interim Financial Information

For the six months ended 30 June 2010

1 General information

Value Partners Group Limited (the “Company”) was incorporated in the Cayman Islands on 10 November 2006 as an exempted company with limited liability under the Companies Law, Cap 22 (Law 3 of 1961, as consolidated and revised) of the Cayman Islands. The address of its registered office and its principal place of business are Cricket Square, Hutchins Drive, P.O. Box 2681, Grand Cayman, KY1-1111, Cayman Islands and 9th Floor, Nexxus Building, 41 Connaught Road Central, Hong Kong, respectively.

The Company acts as an investment holding company. The Company and its subsidiaries (together, the “Group”) principally provides investment management services to investment funds and managed accounts. The Company is listed on the Main Board of The Stock Exchange of Hong Kong Limited (the “Hong Kong Stock Exchange”).

These condensed consolidated interim financial information are presented in thousands of Hong Kong dollars (HK\$’000), unless otherwise stated. This condensed consolidated interim financial information has been approved for issue by the Board of Directors on 24 August 2010.

This condensed consolidated interim financial information has not been audited.

2 Basis of preparation

This condensed consolidated interim financial information for the six months ended 30 June 2010 has been prepared in accordance with HKAS 34 “Interim Financial Reporting”. The condensed consolidated interim financial information should be read in conjunction with the annual financial statements for the year ended 31 December 2009, which have been prepared in accordance with Hong Kong Financial Reporting Standards issued by the Hong Kong Institute of Certified Public Accountants (the “HKFRS”).

3 Accounting policies

Except as described below, the accounting policies applied are consistent with those of the annual financial statements for the year ended 31 December 2009, as described in those annual financial statements.

Taxes on income in the interim periods are accrued using the tax rate that would be applicable to expected total annual earnings.

The following amendment to standard is mandatory for the first time for the financial year beginning 1 January 2010.

- HKAS 1 (Amendment) “Presentation of Financial Statements”. The amendment is part of the HKICPA’s annual improvements project published in May 2009. The amendment provides clarification that the potential settlement of a liability by the issue of equity is not relevant to its classification as current or non-current. By amending the definition of current liability, the amendment permits a liability to be classified as non-current (provided that the entity has an unconditional right to defer settlement by transfer of cash or other assets for at least 12 months after the accounting period) notwithstanding the fact that the entity could be required by the counterparty to settle in shares at any time. The Group has applied HKAS 1 (Amendment) from 1 January 2010. The amendment does not have any impact on the Group’s financial statements.

Notes to the Condensed Consolidated Interim Financial Information

For the six months ended 30 June 2010

3 Accounting policies *(continued)*

The following new standards, interpretations and amendments to standards have been issued but are not effective for the financial year beginning 1 January 2010 and have not been early adopted:

- HKFRS 9 “Financial Instruments” addresses the classification and measurement of financial assets and is likely to affect the Group’s accounting for its financial assets. The standard is not applicable until 1 January 2013 but is available for early adoption. The Group is in the process of assessing HKFRS 9’s full impact. However, initial indications are that it may affect the Group’s accounting for its available-for-sale financial assets, as HKFRS 9 only permits the recognition of fair value gains and losses in other comprehensive income if they relate to equity investments that are not held for trading. Fair value gains and losses on available-for-sale equity investments, for example, will therefore have to be recognised directly in profit or loss. In the current reporting period, the Group recognised HK\$181,000 of such gains in other comprehensive income. The Group has not yet decided when to adopt HKFRS 9.

4 Segment information

The Board reviews the Group’s internal financial reporting and other information and also obtains other relevant external information in order to assess performance and allocate resources and operating segment is identified with reference to these.

The Board considers that the business of the Group is organised in one operating segment as provision of investment management services in the Greater China and the Asia Pacific region. Additional disclosure in relation to segment information is not presented as the Board assesses the performance of the only operating segment identified based on the consistent information as disclosed in this condensed consolidated interim financial information.

The total segment income is equivalent to total comprehensive income for the period as shown in the condensed consolidated statement of comprehensive income and the total segment assets are equivalent to the sum of current and non-current assets and the total segment liabilities are equivalent to the sum of current and non-current liabilities as shown in the condensed consolidated balance sheet.

Details of interest income, depreciation and amortisation in relation to the operating segment are disclosed in Notes 5, 9 and 10 below respectively.

The Company is domiciled in the Cayman Islands with the Group’s major operations in the Greater China and the Asia Pacific region. Total turnover and revenue as disclosed in Note 5 below represented the revenue from external customers arising from investment management services in the Greater China and the Asia Pacific region. The Board considers that substantially all the assets of the Group are located in Hong Kong.

Later than one year and not later than five years	18,753	21,572
Total operating lease commitments	25,884	28,242

17 Contingencies

The Group has contingent assets in respect of performance fees and contingent liabilities in respect of the performance fee element of distribution fees arising in the ordinary course of business.

17.1 Contingent assets

Performance fees for non-private equity fund products for each performance period are generally calculated annually with reference to a performance fee valuation day. Performance fees for private equity fund products are generally calculated at the end of the period over which the performance is measured (performance fee valuation day) and this is generally the end of the life of the private equity fund or upon each successful divestment of an investment of the private equity fund. Performance fees are only recognised when they are earned by the Group.

As a result, at 30 June 2010 and 31 December 2009, performance fees in respect of performance periods ending on a performance fee valuation day not falling within the corresponding period/year have not been recognised. These performance fees may be receivable in cash if a positive performance results (for non-private equity fund products) or a performance threshold is exceeded (for private equity fund products) on the performance fee valuation days, taking into consideration the relevant basis of calculation for the investment funds and managed accounts.

Notes to the Condensed Consolidated Interim Financial Information

For the six months ended 30 June 2010

17 Contingencies *(continued)*

17.2 Contingent liabilities

The performance fee element of distribution fees is based on the performance fees earned by the Group. These distribution fees are recognised when the performance fees are earned by the Group and the Group is obliged to pay the corresponding distribution fees.

As a result, at 30 June 2010 and 31 December 2009, the performance fee element of distribution fees in respect of performance periods ending on a performance fee valuation day not falling within the corresponding period/year have not been recognised. These distribution fees may be payable in cash if the performance fees are subsequently earned on the performance fee valuation days.

18 Related-party transactions

Parties are considered to be related if one party has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions. Parties are also considered to be related if they are subject to common control or common significant influence.

The Group has entered into the following significant related-party transactions which, in the opinion of the directors, were carried out in the ordinary and usual course of the Group's business.

18.3 Investments in an investment fund managed by a related company and receivable from a related company

At 30 June 2010, the Group had investments in Malabar India Fund, LP amounted to HK\$12,573,000 (31 December 2009: HK\$12,237,000) which is managed by Malabar Investment LLC in which the Group had an interest of 7.77% (31 December 2009: 8.75%). The Group also had a receivable of HK\$1,167,000 (31 December 2009: HK\$1,163,000) from Malabar Investment LLC at 30 June 2010.

19 Cyclicalality

Performance fee valuation days of investment funds and managed accounts under management are mostly concentrated in December of each financial year. Therefore, the recognition of performance fees for the Group may be subject to cyclical fluctuation.

Notes:

- The closing prices of the Shares immediately before the share options granted on 26 March 2008, 15 May 2008, 27 April 2009 and 23 June 2010 were HK\$5.50, HK\$7.56, HK\$2.20 and HK\$5.00 respectively.
- No share option was cancelled during the period under review.
- The share options granted to Mr. CHEAH Cheng Hye were in excess of his individual limit under the Listing Rules. The grant of excess share options to Mr. CHEAH was approved in the annual general meeting of the Company held on 15 May 2008.

Other Information

Save as disclosed above, at no time during the period under review as the Company or its subsidiaries a party to any arrangement that enabled the Directors or any of their spouses or children under the age of 18 to acquire benefits by means of the acquisition of shares in, or debentures of, the Company or any other body corporate.

All the options forfeited before expiry of the Scheme will be treated as lapsed option which will not be added back to the number of shares available to be issued under the Scheme.

Share Option Expenses

According to HKFRS 2, the fair value of share options granted to employees is recognized as an employee cost with a corresponding increase in a capital reserve within equity. The fair value is measured at grant date using Black-Scholes option pricing model, taking into account the terms and conditions upon which the options were granted and the assumptions listed below. In addition, employee forfeiture rate is also considered in determining the amount of share option expenses.

Where the employees have to meet vesting conditions before becoming unconditionally entitled to the share options, the total estimated fair value of the share options is spread over the vesting period, taking into account the probability that the options will vest or lapse.

A new batch of share options were granted on 23 June 2010. The fair value of share options granted as determined using Black-Scholes option-pricing model was in a range of HK\$1.80 to HK\$1.99 per option. The key inputs into the model were share price of HK\$5.00 at the grant date, the exercise price of HK\$5.00 per share, an estimated volatility of 51.99% based on relevant market comparables, an estimated dividend yield of 1.60% based on historical dividend of HK8.0 cents per share, an estimated expected option life from 3.7 to 4.8 years and an annual risk-free interest rate in a range of 1.33% to 1.60%. An estimated annualized forfeiture rate of 20% is used in determining the amount of share option expenses.

Since the Black-Scholes option pricing model requires input of highly subjective assumptions, any change in the subjective input assumptions may materially affect the estimation of the fair value of an option.
