華能國際電力股份有限公司

HUANENG POWER INTERNATIONAL, INC.

(a Sino-foreign joint stock limited company incorporated in the People's Republic of China)

(Stock Code: 902)

POWER GENERATION INCREASES 32% IN THE FIRST THREE QUARTERS OF 2010

This announcement is made pursuant to Rules 13.09(1) and (2) of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited.

Huaneng Power International, Inc. (the “Company”) announces its power generation in the first three quarters of 2010.

According to the Company’s preliminary statistics, as of 30 September 2010, the Company’s total domestic power generation within China on consolidated basis amounted to 190.903 billion kWh, representing an increase of 32% over the same period last year. Accumulated on-grid electricity sold amounted to 179.635 billion kWh.

The increase in power generation of the Company was mainly attributable to the following reasons:

1. the Company has increased its sales efforts, thereby grasping the growth trend of the national economy in 2010 and the favourable conditions for substantial increase in the national electricity demand, expanding various marketing channels and increasing power generation;
2. under the impact of the global financial crisis, the national electricity demand for the first three quarters of 2009 was depressed. The base number of the power generation was relatively lower, resulting in a relatively higher growth in 2010 as compared to the same period of last year; and
3. the electricity generation contributable by the new generating units.

The power generation/on-grid electricity sold by each of the Company's domestic power plants in the first three quarters of 2010 are listed below (in billion kWh):

Domestic Power Plant	Power generation for the first three quarters of 2010	Power generation for the first three quarters of 2009	Change	On-grid electricity sold for the first three quarters of 2010
