Chairman's Statement

Dear Shareholders,

2010 proved to be another challenging yet fruitful year for the Group. We began the year in the midst of the economic meltdown. In order to stay stable and respond to market conditions, management continues to focus on the huge demand from the domestic market.

Performance Review

Anticipating the tough operating environment of the fiscal year ended 30 September 2010, the Group swiftly reworked its corporate strategies and targets. With the export markets in the US and Europe weakening and decreasing sales orders, the Group maintained its stability by responding to market conditions nimbly and looked for more opportunities from the domestic jewellery market.

Driven by the huge domestic demand of luxury jewellery products, the Group's domestic sales reached to a record high of approximately HK$437.3 million, representing an increase of 26.3% as compare to approximately HK$346.3 million in the previous year, the Group managed to achieve total revenue of HK$730.4 million for the year, an increase of approximately 7.5% as compared to last fiscal year. Consequently, the Group achieved a record high net profit of approximately HK$88.7 million, representing an increase of 540.7% over last fiscal year. The net profit margins also improved from 2.0% to 12.1%.

Affected by the deteriorated economies in United States and Europe, the export sales slid down by 12.0% to HK$293.1 million as compared to HK$333.0 million in the previous year. Although the gross profit margins on export sales to United States and Europe has improved in the second half of the fiscal year of 2010, the Group still facing difficulties in pricing competition and weaken demand in the export market. On the whole, the negative impact from the export sales during the year was offset by the growth in domestic sales in PRC.

In October 2010, The Group entered into a corporation agreement with Hengdeli Holdings Limited (3389.HK) – the world's largest retailer and wholesaler of high prestige global brand watches. By this agreement, the Group can get access to Hengdeli's existing and new coming retail outlets for selling our jewellery products.

This agreement marked a significant milestone for the Group. It provided an important and breakthrough platform for the Group for retail business in China. Both parties are able to leverage on each other's strengths and further develop an extensive network and reputable branding.

On 12 November 2010, the Group announced the proposed acquisition of Shenzhen Qijingda Trade Company Limited (深圳市琪晶達貿易有限公司), which is a retailer of watches and jewellery products based in China and holds the exclusive distribution rights of Gucci timepieces in the Greater China Region. Upon completion of this acquisition, which is subject to the shareholder's approval and due diligence review, it will immediately provide the Group a network base of not less than 42 outlets in China and an opportunity to collaborate with international renowned brand for their products distributorship in the Greater China Region.

During the period under review, the Group also completed the acquisition of Chi Zhou and Chi Feng gold mines located in Anhui Province and Inner Mongolia respectively. With the on-going upward trend of the gold prices continuously adding value to the revenue of the mines, we expect these mines will generate contribution to the Group in the near future.

Chairman's Statement

Business Outlook

The appreciation of RMB and strong economic growth of the PRC will continue to boost the domestic demand of luxury jewellery products in China. In order to capture this doubtless market growth potential, the Group is determined to move fast in terms of networking and product diversification. To enlarge our sales network, we will roll out our cooperation plan with Hengdeli in full speed whilst continue to open self-owned retail outlets in a speedy manner across the nation. We will actively look for retailing partners and/or brand owners in China for strategic alliance in the area of network expansion and product offering. The Group will also strive to solicit suitable targets for acquisition which will benefit the Group in network development and brand building in the long run. In addition, we will continue to strengthen our collaboration with international renowned brand owners for their products distributorship in the Greater China Region and joint development of new product range with unique design and materials exclusively for the Greater China Region.

For the export business, while the economic environment is still obsessed with slow recovery pace in United States and the emerging sovereign debt problems in Europe, the Group expected the contribution from the export segment will remain sluggish in the coming year. Even so, the Group will continue to maintain its present worldwide clientele and market share through participating in major international jewellery fairs.

For the gold mines, we will take into the consideration of the advice of the professional mining consultants to carry out the necessary exploration and preparation work with the aim of commencing production as early as possible.

Acknowledgements

Once again, on behalf of the Board of Directors, I would like to take this opportunity to thank the management and employees for their dedicated services and hard work in bringing about our success.

My appreciation also goes to all shareholders, business associates, partners and valued customers for their generous support and confidence, and to the board members for their leadership and guidance.

I look forward to your commitment and continued support as we venture into another year ahead!

Management Discussion and Analysis

Financial Review

For the year ended 30 September 2010, the turnover of the Group recorded at approximately HK$730.4 million, representing an increase of 7.5% as compared to HK$679.3 million for the previous year. Export sales had moderate dropped compared with the same period of last year while domestic sales reaching another record high contributed more to the overall turnover. As a result, turnover increased by about 7.5%.

The net profit from ordinary activities attributed to shareholders increased to HK$88.7 million as compared to HK$13.8 million for the previous year, an increase of 540.7%. The surge was mainly due to the strong demand of the domestic jewellery sales.

The selling and distribution expenses significantly decreased 51.3% to approximately HK$47.2 million as compared to HK$96.9 million for the year ended 30 September 2009. The decrease was attributed to the increase in cooperation with retail chain partner, more products were placed for sales in the retail partner's outlet, the rental expenses and staff cost for the retail store dropped substantially. In addition, share based payment in relation to the share option scheme which was included in the administration expenses is decreased to approximately HK$20.0 million from approximately HK$51.4 million in the previous financial year. Accordingly, profit from operating activities increased to HK$114.0 million, representing about 220.1% increase when compare with that of the previous year.

The finance cost decreased 63.5% to approximately HK$2.7 million as compared to HK$7.3 million for the previous year, which was mainly due to the full repayment of syndicated bank borrowings and significant decrease in other bank borrowings.

For the financial year end 30 September 2010, non-current assets increased from HK$60.3 million to HK$467.9 million, which was due to completion of the acquisition of Chi Zhou and Chi Feng gold mines.

The Group's net current assets improved from HK$618.5 million to HK$1,001.0 million, which was mainly due to significant decrease in bank borrowings. The net current assets comprise of inventories of HK$628.9 million (2009: HK$494.6 million), trade receivables of about HK$228.0 million (2009: HK$194.3 million), other receivables of approximately HK$27.5 million (2009: HK$27.2 million).

Cash and bank balances stood at approximately HK$216.8 million (2009: HK$211.1 million) and current liabilities of approximately HK$100.4 million (2009: HK$308.7 million).

The Group's inventory turnover, trade receivables turnover and trade payables turnover period were 443 days, 114 days and 8 days respectively. Overall the turnover was consistent and complied with the respective policies of the Group on credit terms granted to customers and credit terms obtained from suppliers.

Liquidity and Financial Resources

During the year, the Group financed its operations and investing activities through a combination of operating cash inflows and interest bearing bank borrowings. The capital structure of the Company solely consists of share capital. As at 30 September 2010, the shareholders' equity of the Group amounted to HK$1,320.1 million (2009: HK$678.8 million).

The Group's total interest bearing bank borrowings as at 30 September 2010 amounted to approximately HK$3.5 million, representing a decrease of approximately HK$211.4 million when compared to HK$214.9 million in the previous financial year. The interest bearing bank borrowings were mainly used for working capital purpose and carried at commercial lending interest rates. All of the interest bearing bank borrowings as at 30 September 2010 and 2009 were repayable within one year. The Group's gearing ratio for the year was 0.2% (2009: 31.7%) and was kept at a comfortable level. On the whole, the Group kept a strong and adequate financial position during the year under review and is well prepared for cash flow budget in the coming year.

The sales and purchases of the Group were mostly denominated in the United States dollars, Hong Kong dollars and Renminbi. The cash and cash equivalents and interest bearing borrowings of the Group were also denominated in Hong Kong dollars, the United States dollars and Renminbi. Since the Group's exposure to fluctuations in foreign exchange rates was minimal, the Group did not use any hedging instruments.

As at 30 September 2010, the Group had capital commitment of HK$22.2 million (2009: Nil), which was in relation to the exploration works in Chi Zhou mines. The Group did not have any significant contingent liabilities as at 30 September 2010 (2009: Nil).

As at 30 September 2010, the Company has given guarantees in favour of certain banks to the extent of approximately HK$50.0 million (2009: HK$236.3 million) in respect of banking facilities granted to certain subsidiaries of the Company. As at 30 September 2010, the banking facilities utilised by these subsidiaries amounted to approximately HK$3.5 million (2009: HK$214.9 million).

Employee and Remuneration Policies

As at 30 September 2010, the Group had approximately 61 employees with remuneration of approximately HK$8.9 million. The Group's emolument policies are formulated according to the performance of individual employee and will be reviewed regularly every year.

Same as disclosed above, the current information in other management and discussion analysis has not changed materially from the information disclosed in the last published 2010 interim report.

Independent Auditor's Report to the Members of:–
Ming Fung Jewellery Group Limited
(Incorporated in Cayman Islands with limited liability)

We have audited the consolidated financial statements of Ming Fung Jewellery Group Limited (the "Company") and its subsidiaries (collectively referred to as the "Group") set out on pages 30 to 84, which comprise the consolidated and company statements of financial position as at 30 September 2010, and the consolidated statement of comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the year then ended, and a summary of significant accounting policies and other explanatory notes.

Directors' responsibility for the financial statements

The directors of the Company are responsible for the preparation and the true and fair presentation of these financial statements in accordance with Hong Kong Financial Reporting Standards ("HKFRSs") issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA") and the disclosure requirements of the Hong Kong Companies Ordinance. This responsibility includes designing, implementing and maintaining internal control relevant to the preparation and the true and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditor's responsibility

Our responsibility is to express an opinion on these financial statements based on our audit and to report solely to you, as a body, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report. We conducted our audit in accordance with Hong Kong Standards on Auditing issued by the HKICPA. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance as to whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and true and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Independent Auditor's Report

Opinion

In our opinion, the consolidated financial statements give a true and fair view of the state of affairs of the Company and of the Group as at 30 September 2010 and of the Group's results and cash flows for the year ended in accordance with HKFRSs and have been properly prepared in accordance with the disclosure requirements of the Hong Kong Companies Ordinance.

(a) The statutory reserve of the Group refers to the PRC statutory reserve fund. Appropriations to such reserve fund are made out of profit after tax of the statutory financial statements of the PRC subsidiaries and the amount should not be less than 10% of the profit after tax unless the aggregate amount exceeded 50% of registered capital of the PRC subsidiaries. The statutory reserve fund can be used to make up prior years' losses of the PRC subsidiaries.

1. Corporate Information

Ming Fung Jewellery Group Limited ("Company") was incorporated in the Cayman Islands as an exempted company with limited liability on 30 January 2002 under the Companies Law, Chapter 22 (Law 3 of 1961, as consolidated and revised) of the Cayman Islands. Its shares have been listed on the Main Board of The Stock Exchange of Hong Kong Limited ("Stock Exchange") on 3 September 2002.

The address of its registered office is Cricket Square, Hutchins Drive, P.O. Box 2681, Grand Cayman, KY1-1111, Cayman Islands. The principal place of business of the Company is located at Room 1825, 18th Floor, Hutchison House, 10 Harcourt Road, Central, Hong Kong.

The principal activity of the Company is investment holding. The principal activities of the Company's subsidiaries (which together with the Company are collectively referred to as the "Group") are set out in note 19 to the financial statements. There were no significant changes in the nature of the Group's principal activities during the year.

2. Application of New And Revised Hong Kong Financial Reporting Standards ("HKFRSs")

In the current year, the Group has applied the following amendments and interpretations ("new HKFRSs") issued by the Hong Kong Institute of Certified Public Accountants (the "HKICPA") which are or have become effective.

HKFRSs (Amendments)	Improvements to HKFRSs issued in 2008
HKFRSs (Amendments)	Improvements to HKFRSs issued in 2009 in relation to the amendments to HKFRS 2, HKAS 38, paragraph 80 of HKAS 39, HK(IFRIC) – Int 9 and HK(IFRIC) – Int 16
HKAS 1 (Revised)	Presentation of Financial Statements
HKAS 23 (Revised)	Borrowing Costs
HKAS 27 (Revised)	Consolidated and Separate Financial Statements
HKAS 32 & 1 (Amendments)	Puttable Financial Instruments and Obligations Arising on Liquidation
HKAS 39 (Amendment)	Eligible Hedged Items
HKFRS 1 & HKAS 27 (Amendments)	Cost of an Investment in a Subsidiary, Jointly Controlled Entity or Associate
HKFRS 2 (Amendment)	Vesting Conditions and Cancellations
HKFRS 3 (Revised)	Business Combinations
HKFRS 7 (Amendment)	Improving Disclosures about Financial Instruments

2. Application of New And Revised Hong Kong Financial Reporting Standards ("HKFRSs") *(continued)*

HKFRS 8	Operating Segments
HK(IFRIC) – Int 9 & HKAS 39 (Amendments)	Embedded Derivatives
HK(IFRIC) – Int 15	Agreements for the Construction of Real Estate
HK(IFRIC) – Int 17	Distributions of Non-cash Assets to Owners

Except as described below, the application of the new and revised HKFRSs had no material effect on the consolidated financial statements of the Group.

HKAS 1 (Revised) Presentation of Financial Statements

HKAS 1 (Revised) has introduced terminology changes (including revised titles for the consolidated financial statements) and changes in the format and content of the consolidated financial statements.

HKFRS 8 Operating Segments

HKFRS 8 is a disclosure standard that has not resulted in a redesignation of the Group's reportable segments.

HKAS 23 (Revised) Borrowing Costs

In previous years, the Group expensed all borrowing costs when they were incurred. HKAS 23 (Revised) removes the option previously available to expense all borrowing costs when incurred. The adoption of HKAS 23 (Revised) has resulted in the Group changing its accounting policy to capitalise all borrowing costs that were directly attributable to the acquisition, construction or production of a qualifying asset as part of the cost of the qualifying asset.

The application of HKAS 23 (Revised) had no material effect on the consolidated financial statements of the Group.

HKFRS 3 (Revised) Business Combinations

HKAS 27 (Revised) Consolidated and Separate Financial Statements

The Group applies HKFRS 3 (Revised) Business Combinations prospectively to business combinations for which the acquisition date is on or after 1 October 2010. The requirements in HKAS 27 (Revised) Consolidated and Separate Financial Statements in relation to accounting for changes in ownership interests in a subsidiary after control is obtained and for loss of control of a subsidiary are also applied prospectively by the Group on or after 1 October 2010.

As there was no transaction during the current year in which HKFRS 3 (Revised) and HKAS 27 (Revised) are applicable, the application of HKFRS 3 (Revised), HKAS 27 (Revised) and the consequential amendments to other HKFRSs had no effect on the consolidated financial statements of the Group for the current or prior years.

2. Application of New And Revised Hong Kong Financial Reporting Standards ("HKFRSs") *(continued)*

Results of the Group in future periods may be affected by future transactions for which HKFRS 3 (Revised), HKAS 27 (Revised) and the consequential amendments to the other HKFRSs are applicable.

The Group has not early applied the following new and revised Standards, Amendments or Interpretations that have been issued but are not yet effective.

HKFRSs (Amendments)	Improvements to HKFRSs issued in 2009 in relation to amendments to HKAS 1, HKAS 7, HKAS 17, HKAS 36, HKAS 39, HKFRS 5 and HKFRS 8[1]
HKFRSs (Amendments)	Improvements to HKFRSs 2010[2]
HKAS 24 (Revised)	Related Party Disclosures[5]
HKAS 32 (Amendment)	Classification of Rights Issues[3]
HKFRS 1 (Amendment)	Additional Exemptions for First-time Adopters[1]
HKFRS 1 (Amendment)	Limited Exemption from Comparative HKFRS 7 Disclosures for First-time Adopters[4]
HKFRS 2 (Amendment)	Group Cash-settled Share-based Payment Transactions[1]
HKFRS 9	Financial Instruments[6]
HK(IFRIC)-Int 14 (Amendment)	Prepayments of a Minimum Funding Requirement[5]
HK(IFRIC)-Int 19	Extinguishing Financial Liabilities with Equity Instruments[4]

[1] Effective for annual periods beginning on or after 1 January 2010
[2] Effective for annual periods beginning on or after 1 July 2010 and 1 January 2011, as appropriate
[3] Effective for annual periods beginning on or after 1 February 2010
[4] Effective for annual periods beginning on or after 1 July 2010
[5] Effective for annual periods beginning on or after 1 January 2011
[6] Effective for annual periods beginning on or after 1 January 2013

The directors of the Company ("Directors") anticipate that the application of the other new and revised Standards, Amendments or Interpretations will have no material impact on the consolidated financial statements.

3. Significant Accounting Policies

Basis of preparation

The consolidated financial statements have been prepared in accordance with Hong Kong Financial Reporting Standards ("HKFRSs") (which also include Hong Kong Accounting Standard ("HKASs") and Interpretations) issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA"), accounting principles generally accepted in Hong Kong and the disclosure requirements of the Hong Kong Companies Ordinance. The consolidated financial statements also comply with the applicable disclosure provisions of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited. They have been prepared under the historical cost convention with the exception of certain assets and liabilities, which (where appropriate) were measured at fair value. These financial statements are presented in Hong Kong dollars and all values are rounded to the nearest thousand (HK$'000) except otherwise indicated.

Basis of presentation and consolidation

The consolidated financial statements include the financial statements of the Company and its subsidiaries for the year ended 30 September 2010. Control is achieved where the Company has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. The results of subsidiaries acquired or disposed of during the year are included in the consolidated financial statements from or to their effective date of acquisition or up to the effective date of disposal, as appropriate.

All significant inter-company transactions and balances within the Group are eliminated on consolidation.

Non-controlling interests represent the interests of outside shareholders not held by the Group in the results and net assets of the Company's subsidiaries. An acquisition of non-controlling interests is accounted for using the entity concept method whereby the difference between the consideration and the book value of the share of the net assets acquired is recognised as an equity transaction.

Subsidiaries

Subsidiaries are all entities over which the Group has the power to govern the financial and operating policies generally accompanying a shareholding of more than one half of the voting rights. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Group controls another entity.

Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are de-consolidated from the date that control ceases.

The purchase method of accounting is used to account for the acquisition of subsidiaries by the Group. The cost of an acquisition is measured as the fair value of the assets given, equity instruments issued and liabilities incurred or assumed at the date of exchange, plus costs directly attributable to the acquisition. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date, irrespective of the extent of any non-controlling interests. The excess of the cost of acquisition over the fair value of the Group's share of the identifiable net assets acquired is recorded as goodwill. If the cost of acquisition is less than the fair value of the net assets of the subsidiary acquired, the difference is recognised directly in the statement of comprehensive income.

3. Significant Accounting Policies *(continued)*

Subsidiaries *(continued)*

Inter-company transactions, balances and unrealised gains on transactions between the Group's entities are eliminated. Unrealised losses are also eliminated but considered as an impairment indicator of an impairment of the asset transferred. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

In the Company's statement of financial position the investments in subsidiaries are stated at cost less provision for impairment losses. The results of subsidiaries are accounted for by the Company on the basis of dividend received and receivable.

Revenue recognition

Revenue is recognised when it is probable that the economic benefits will flow to the Group and when the revenue can be measured reliably, on the following bases:

(a) for the sale of goods, when the significant risks and rewards of ownership have been transferred to the buyer, provided that the Group maintains neither managerial involvement to the degree usually associated with ownership, nor effective control over the goods sold; and

(b) for interest income, on a time proportion basis, taking into account the principal outstanding and the effective interest rate applicable.

Segment reporting

In accordance with the Group's internal financial reporting, the Group has determined the geographical segment be presented as the primary reporting format and business segment as the secondary reporting format.

Unallocated costs represent corporate expenses. Segment assets consist primarily of property, plant and equipment, inventories and receivables. Segment liabilities comprise operating liabilities and exclude items such as taxation and certain corporate borrowings.

In respect of geographical segment reporting, sales are based on the country in which the customer is located and total assets and capital expenditure are based on where the assets are located.

Operating leases

Leases where substantially all the rewards and risks of ownership of assets remain with the lessor are accounted for as operating leases. Where the Group is the lessee, rentals payable under the operating leases are charged to the statement of comprehensive income on the straight-line basis over the lease terms.

3. Significant Accounting Policies *(continued)*

Goodwill

Goodwill arising on the acquisition of subsidiaries represents the excess of the cost of the business combination over the Group's interest in the net fair value of the acquirees' identifiable assets acquired, and liabilities and contingent liabilities assumed as at the date of acquisition.

Goodwill on acquisitions for which the agreement date is on or after 1 October 2005 applies.

Goodwill arising on acquisition is recognised in the consolidated statement of financial position as an asset, initially measured at cost and subsequently at cost less any accumulated impairment losses.

The carrying amount of goodwill is reviewed for impairment annually or more frequently if events or changes in circumstances indicate that the carrying value may be impaired.

For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating units, or groups of cash-generating units, that are expected to benefit from the synergies of the combination, irrespective of whether other assets or liabilities of the Group are assigned to those units or groups of units. Each unit or group of units to which the goodwill is so allocated:

(a) represents the lowest level within the Group at which the goodwill is monitored for internal management purposes; and

(b) is not larger than a segment based on either the Group's primary or the Group's secondary reporting format determined in accordance with HKAS 14 "Segment Reporting".

Impairment is determined by assessing the recoverable amount of the cash-generating unit (or group of cash-generating units) to which the goodwill relates. Where the recoverable amount of the cash-generating unit (or group of cash-generating units) is less than the carrying amount, an impairment loss is recognised.

Where goodwill forms part of a cash-generating unit (or group of cash-generating units) and part of the operation within that unit is disposed of, the goodwill associated with the operation disposed of is included in the carrying amount of the operation when determining the gain or loss on disposal of the operation. Goodwill disposed of in this circumstance is measured based on the relative values of the operation disposed of and the portion of the cash-generating unit retained.

An impairment loss recognised for goodwill is not reversed in a subsequent period.

Goodwill previously eliminated against the consolidated reserves

Prior to the adoption of Statement of Standard Accounting Practice 30 "Business Combinations" in 2001, goodwill arising on acquisition was eliminated against the consolidated retained profits in the year of acquisition. On the adoption of HKFRS 3, such goodwill remains eliminated against the consolidated retained profits and is not recognised in profit or loss when all or part of the business to which the goodwill relates is disposed of or when a cash-generating unit to which the goodwill relates becomes impaired.

3. Significant Accounting Policies *(continued)*

Employee benefits

(a) Pension obligations

The Group operates a defined contribution Mandatory Provident Fund retirement benefits scheme ("MPF Scheme") under the Mandatory Provident Fund Schemes Ordinance, for those employees who are eligible to participate in the MPF Scheme. The MPF Scheme has operated since 1 December 2000. Contributions are made based on a percentage of the employees' basic salaries and are charged to the statement of comprehensive income as they become payable in accordance with the rules of the MPF Scheme. The assets of the MPF Scheme are held separately from those of the Group in an independently administered fund. The Group's employer contributions vest fully with the employees when contributed into the MPF Scheme.

The employees of the PRC subsidiaries are members of the state-managed retirement benefit scheme operated by the PRC government. The PRC subsidiaries are required to contribute a certain percentage of their payroll to the retirement benefit scheme to fund the benefits. The only obligation of the Group with respect to the retirement benefit scheme is to make the required contributions under the scheme.

(b) Employee leave entitlements

Employee entitlements to annual leave and long service leave are recognised when they accrue to employees. A provision is made for the estimated liability for annual leave as a result of services rendered by employees up to the end of the reporting period.

Employee entitlements to sick leave and maternity leave are not recognised until the time of leave.

Equity-settled share-based payment transactions

Share options granted to employees of the Company

The fair value of services received determined by reference to the fair value of share options granted at the grant date is expensed on a straight line basis over the vesting period, with a corresponding increase in equity (share-based payment reserve).

At the end of the reporting period, the Group revises its estimates of the number of options that are expected to ultimately vest. The impact of the revision of the estimates during the vesting period, if any, is recognised in profit or loss, with a corresponding adjustment to share-based payment reserve.

At the time when the share options are exercised, the amount previously recognised in share-based payment reserve will be transferred to share premium. When the share options are forfeited after the vesting date or are still not exercised at the expiry date, the amount previously recognised in share-based payment reserve will be transferred to retained earnings.

Share options granted to other participants

Share options issued in exchange for goods or services are measured at the fair values of the goods or services received, unless that fair value cannot be reliably measured, in which case the goods or services received are measured by reference to the fair value of the share options granted. The fair values of the goods or services received are recognised as expenses, with a corresponding increase in equity (share-based payment reserve), when the Group obtains the goods or when the counterparties render services, unless the goods or services qualify for recognition as assets.

3. Significant Accounting Policies *(continued)*

Financial instruments

Financial assets and financial liabilities are recognised on the statement of financial position when a group entity becomes a party to the contractual provisions of the instruments. Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and liabilities at fair value through profit or loss ("FVTPL")) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at FVTPL are recognised immediately in the statement of comprehensive income.

Financial assets

The Group's financial assets are classified as financial assets at loans and receivable. All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

Effective interest method

The effective interest method is a method of calculating the amortised cost of a financial asset and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees on points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial asset, or, where appropriate, a shorter period.

Interest income is recognised on an effective interest basis for debt instruments other than those financial assets designated as at FVTPL.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. At each end of the reporting period subsequent to initial recognition, loans and receivables (including trade and other receivables, amounts due from subsidiaries, bank deposits and balances and cash) are carried at amortised cost using the effective interest method, less any identified impairment losses (see accounting policy on impairment of financial assets below).

Impairment of financial assets

Financial assets, other than those at FVTPL are assessed for indicators of impairment at each end of the reporting period. Financial assets are impaired where there is objective evidence that as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the financial assets have been impacted.

3. Significant Accounting Policies *(continued)*

Financial instruments *(continued)*

Financial assets (continued)

Impairment of financial assets *(continued)*

For loans and receivable, objective evidence of impairment could include:

- significant financial difficulty of the issuer or counterparty; or
- default or delinquency in interest or principal payment; or
- it becoming probable that the borrower will enter bankruptcy of financial re-organisation.

For certain categories of financial asset, such as trade receivable, assets that are assessed not to be impaired individually are subsequently assessed for impairment on a collective basis. Objective evidence of impairment for a portfolio of receivables could include the Group's past experience of collecting payments and observable changes in national or local economic conditions that correlate with default on receivables.

For financial assets carried at amortised cost, an impairment loss is recognised in profit or loss when there is objective evidence that the asset is impaired and is measured as the difference between the asset's carrying amount and the present value of the estimated future cash flows discounted at the original effective interest rate.

The carrying amount of the financial asset is reduced by the impairment loss directly for all financial asset with the exception of trade receivables, where the carrying amount is reduced through the use of an allowance account. Changes in the carrying amount of the allowance account are recognised in profit or loss. When a trade receivable is considered uncollectible, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited to profit or loss.

For financial assets measured at amortised cost, if, in a subsequent period, the amount of impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment loss was recognised, the previously recognised impairment loss is reversed through profit or loss to the extent that the carrying amount of the asset at the date the impairment is reversed does not exceed what the amortised cost would have been had the impairment not been recognised.

Financial liabilities

Financial liabilities issued by a group entity are classified according to the substance of the contractual arrangements entered into and the definitions of a financial liability.

Effective interest method

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments through the expected life of the financial liability, or where appropriate a shorter period.

3. Significant Accounting Policies *(continued)*

Financial instruments *(continued)*

Financial liabilities (continued)

Effective interest method *(continued)*

Interest expense is recognised on an effective interest basis other than those financial liability designated as at FVTPL.

Financial liabilities including trade and other payables, bills payable, amounts due to subsidiaries and bank borrowings are initially measured at fair value, and subsequently measured at amortised cost, using the effective interest method.

Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets until such time as the assets are substantially ready for their intended use or sale.

All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

Dividends

Final dividends proposed by the directors are classified as a separate allocation of retained profits within the equity section of the statement of financial position, until they have been approved by the shareholders in a general meeting. When these dividends have been approved by the shareholders and declared, they are recognised as a liability.

Interim dividends are simultaneously proposed and declared, because the Company's memorandum and articles of association grant the directors the authority to declare interim dividends. Consequently, interim dividends are recognised immediately as a liability when they are proposed and declared.

Mining rights

Mining rights acquired separately are initially measured at cost. Mining rights are reclassified from exploration and evaluation assets at the carrying amount when the technical feasibility and commercial viability of extracting mineral resources are demonstrable. Mining rights with finite useful lives are carried at costs less accumulated amortization and any identified impairment loss. Amortisation for mining rights with finite useful lives is provided using the unit of production method based on the actual production volume over the estimated total proved and probable reserves of the mines.

Exploration and evaluation assets

Exploration and evaluation assets are recognised at cost on initial recognition. Subsequent to initial recognition, exploration and evaluation assets are stated at cost less any identified impairment loss.

Exploration and evaluation assets include the cost of exploration rights and the expenditures incurred in the search for mineral resources as well as the determination of the technical feasibility and commercial viability of extracting those resources. Exploration and evaluation assets are assessed for impairment when facts and circumstances suggest that the carrying amount of an exploration and evaluation asset may exceed its recoverable amount. An impairment loss is recognised in the statement of comprehensive income.

3. Significant Accounting Policies *(continued)*

Impairment of exploration and evaluation assets

The carrying amount of the exploration and evaluation assets is reviewed annually and adjusted for impairment in accordance with HKAS 36 "Impairment of Assets" whenever one of the following events or changes in circumstances indicate that the carrying amount may not be recoverable (the list is not exhaustive):

– the period for which the Group has the right to explore in the specific area has expired during the period or will expire in the near future, and is not expected to be renewed;

– substantive expenditure on further exploration for and evaluation of mineral resources in the specific area is neither budgeted nor planned;

– exploration for and evaluation of mineral resources in the specific area have not led to the discovery of commercially viable quantities of mineral resources and the Group has decided to discontinue such activities in the specific area; or

– sufficient data exist to indicate that, although a development in the specific area is likely to proceed, the carrying amount of the exploration and evaluation asset is unlikely to be recovered in full from successful development or by sale.

An impairment loss is recognised in the statement of comprehensive income whenever the carrying amount of an asset exceeds its recoverable amount.

Impairment of tangible and intangible assets other than goodwill and exploration and evaluation assets

At the end of the reporting period, the Group reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss, if any. In addition, intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment annually, and whenever there is indication that they may be impaired.

If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. An impairment loss is recognised as an expense immediately, unless the relevant asset is carried at a revalued amount under another standard, in which case the impairment loss is treated as a revaluation decrease under that standard.

Where an impairment loss subsequently reverses, the carrying amount of the asset is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset in prior years. A reversal of an impairment loss is recognised immediately in the statement of comprehensive income, unless the relevant asset is carried at a revalued amount under another standard, in which case the reversal of the impairment loss is treated as a revaluation increase under that standard.

3. Significant Accounting Policies *(continued)*

Property, plant and equipment

All property, plant and equipment are stated at historical cost less accumulated depreciation and accumulated impairment losses. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. All other repairs and maintenance are expensed in the statement of comprehensive income during the financial period in which they are incurred.

Depreciation is calculated on the reducing-balance basis to write off the cost of each asset, less accumulated impairment losses, over its estimated useful life. The principal annual rates used for this purpose are as follows:

Leasehold improvement	20%
Plant and machinery	15%
Furniture, fixtures and office equipment	15% – 20%
Motor vehicles	15% – 20%

The gains or losses on disposal or retirement of property, plant and equipment recognised in the statement of comprehensive income are the difference between the net sales proceeds and the carrying amount of the relevant assets.

Inventories

Inventories are stated at the lower of cost and net realisable value after allowances for obsolete or slow-moving items. Cost is calculated using the first-in, first-out basis and comprises all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition. Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

Taxation

Income tax charge represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit as reported in the consolidated statement of comprehensive income because it excludes items of income or expense that are taxable or deductible in other years, and it further excludes items that are never taxable or deductible. The Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

3. Significant Accounting Policies *(continued)*

Deferred taxation

Deferred taxation is the tax expected to be payable or recoverable on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred taxation is charged or credited in the statement of comprehensive income, except when it relates to items charged or credited directly to equity, in which case the deferred taxation is also dealt with in equity.

Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets should be recognised for all deductible temporary differences to the extent that it is probable that taxable profit will be available against which the deductible temporary difference can be utilised, and also should be recognised for the carryforward of unused tax losses and unused tax credits to the extent that it is probable that future taxable profit will be available against which the unused tax losses and unused tax credits can be utilised.

Deferred tax assets and liabilities should be measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates that have been enacted or substantively enacted by the end of the reporting period.

Foreign currencies translation

(a) *Functional and presentation currency*

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates (the "functional currency"). The Group's functional currencies are Renminbi ("RMB") and United States dollars ("USD") while the consolidated financial statements are presented in Hong Kong dollars ("HKD"), which is the presentation currency of the Group and the Company.

(b) *Transactions and balances*

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the statement of comprehensive income.

(c) *Group companies*

The results and financial position of all the group entities (none of which has the currency of a hyperinflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

(i) assets and liabilities for each statement of financial position presented are translated at the closing rate at the date of that statement of financial position;

(ii) income and expenses for each statement of comprehensive income are translated at average exchange rates (unless this average is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the dates of the transactions); and

(iii) all resulting exchange differences are recognised as a separate component of equity.

3. Significant Accounting Policies *(continued)*

Related parties

Parties are considered to be related to the Group if:

(a) directly, or indirectly through one or more intermediaries, the Group:

  (i) controls, is controlled by, or is under common control with, the entity;

  (ii) has an interest in the entity that gives it significant influence over the entity;

  (iii) has joint control over the entity;

(b) the party is a jointly-controlled entity;

(c) the party is a member of the key management personnel of the Group or its parent;

(d) the party is a close member of the family or any individual referred to in (a) or (c);

(e) the party is an entity that is controlled, jointly-controlled or significantly influenced by or for which significant voting power in such entity resides with, directly or indirectly, any individual referred to in (c) or (d); or

(f) the party is a post-employment benefit plan for the benefit of employees of the Group, or of any entity that is a related party of the Group.

Cash and cash equivalents

For the purpose of the consolidated statement of cash flows, cash and cash equivalents comprise cash on hand and demand deposits, and short term highly liquid investments which are readily convertible into known amounts of cash and which are subject to an insignificant risk of changes in value, and have a short maturity of generally within 3 months when acquired, less bank overdrafts which are repayable on demand and form an integral part of the Group's cash management.

For the purpose of statement of financial position, cash and cash equivalents comprise cash on hand and at banks, including term deposits, and assets similar in nature to cash, which are not restricted as to use.

Contingent liabilities

A contingent liability is a possible obligation that arises from past events and whose existence will only be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Group. It can also be a present obligation arising from past events that is not recognised because it is not probable that outflow of economic resources will be required or the amount of obligation cannot be measured reliably.

A contingent liability is not recognised but is disclosed in the notes to the financial statements. When a change in the probability of an outflow occurs so that the outflow is probable, it will then be recognised as a provision.

3. Significant Accounting Policies *(continued)*

Share capital

Ordinary shares are classified as equity. Share capital is determined using the nominal value of shares that have been issued.

Any transaction costs associated with the issuing of shares are deducted from the proceeds (net of any related income tax benefits), to the extent they are incidental costs directly attributable to the equity transaction.

4. Financial risk management

(a) Financial risk factors

The Group's activities expose it to a variety of financial risks: foreign exchange risk, price risk, credit risk, liquidity risk and cash flow and fair value interest rate risk.

(i) Foreign exchange risk

The Group operates mainly in Hong Kong and PRC and is exposed to foreign exchange risk arising from various currency exposures, primarily with respect to USD and RMB. Foreign exchange risk arises from future commercial transactions, recognised assets and liabilities and net investments in foreign operations.

The Group manages its foreign exchange risk by performing regular reviews of the Group's net foreign exchange exposures. The Group has not entered into any forward foreign exchange contracts to hedge its foreign exchange exposure as the directors are of the view that the potential foreign exchange exposures are not significant.

As Hong Kong dollars ("HKD") is pegged with USD, foreign exchange risk in relation to USD denominated monetary assets/liabilities is expected to be minimal.

As at 30 September 2010, the Group's entities with functional currency of RMB had net monetary assets denominated in HKD of HK$52 million (2009: HK$92 million). If RMB had strengthened/ weakened by 5% against HKD with all other variables unchanged, the Group's profit before taxation would have been HK$2.6 million (2009: HK$4.6 million) higher/lower.

The sensitivity analysis ignores any offsetting foreign exchange factors and has been determined assuming that the change in foreign exchange rates had occurred at the end of the reporting period. The stated change represents next annual end of the reporting period. There are no other significant monetary balances held by Group at 30 September 2010 that are denominated in a non-functional currency. Foreign exchange risks as defined by HKFRS 7 arise on account of monetary assets and liabilities being denominated in a currency that is not the functional currency; differences resulting from the translation of financial statements into the Group's presentation currency are not taken into consideration.

4. Financial risk management *(continued)*

(a) Financial risk factors *(continued)*

(ii) Price risk

The Group's exposure to commodity risk relates to the market price fluctuation in gold is minimum for this year since the gold mines have not yet started in production.

In addition, the management will closely monitor the price risk and will consider hedging the risk exposure should the need arise.

(iii) Credit risk

The Group has no concentrations of credit risk. It has policies in place to ensure that the sales of products are made to customers with appropriate credit history and the Group performs credit evaluation of its customers.

Retail sales are usually made in cash, through credit cards or through reputable and dispersed department stores. Majority of trade receivables are with wholesales customers having an appropriate credit history and at credit terms of 30 to 120 days. Normally the Group does not require collaterals from trade debtors. The existing debtors have no significant defaults in the past. The Group's historical experience in collection of trade and other receivables falls within the recorded allowances and the directors are of the opinion that adequate provision for uncollectible receivables, if any, has been made.

As at 30 September 2010 and 2009, substantially all the bank balances as detailed in Note 23 are held in major financial institutions located in Hong Kong and the PRC, which management believes are of high credit quality. The Group has a policy to limit the amount of credit exposure to any financial institution and management does not expect any losses arising from non-performance by these counterparties.

4. Financial risk management *(continued)*

(a) Financial risk factors *(continued)*

(iv) Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and the availability of funding through an adequate amount of committed credit facilities. The Group aims to maintain flexibility in funding by keeping committed credit lines available.

Management monitors rolling forecasts of the Group's liquidity reserve comprising undrawn borrowing facility (Note 26) and cash and cash equivalents (Note 23) on the basis of expected cash flow.

Financial liabilities of the Group and of the Company are primarily due within one year, except for long-term bank borrowings.

The table below analyses the Group's financial liabilities into relevant maturity groupings based on the remaining period at the statement of financial position to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances, as the impact of discounting is not significant.

4. Financial risk management *(continued)*

(a) Financial risk factors *(continued)*

(v) Interest rate risk

The Group's exposure to interest rate risk for changes in interest rates relates primarily to the Group's bank balances which generate interest income for the Group and the Group's floating interest rates borrowings. The Group does not actively engaged in derivative financial instruments to hedge its interest rate risk.

At 30 September 2010, it is estimated that a general increase/decrease of 50 basis points in interest rates, with all other variables held constant, would decrease/increase the Group's profit after tax and retained profits by approximately HK$15,000 (2009: HK$897,000).

Assuming that the change in interest rates had occurred at the end of the reporting period and had been applied to the exposure to interest rate risk for financial instruments at the end of the reporting period. The 50 basis points increase or decrease represents management's assessment of reasonably possible change in interest rates over the period until the next annual end of the reporting period. The analysis is performed on the same basis for 2009.

(vi) Fair value

The fair value of the Group's financial assets and liabilities are not materially different from their carrying amounts because of the immediate or short term maturity of these financial instruments.

(b) Capital risk management

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

The Group manages the capital structure and make adjustments to it in the light of changes in economic conditions. In order to maintain or adjust the capital structure, the Group may adjust the dividend payments to shareholders or obtain new bank borrowings.

The Group also monitors capital on the basis of gearing ratio. This ratio is calculated as net debt divided by total capital. Net debt is calculated as total borrowings (including current and non-current borrowings as shown in the consolidated statement of financial position) less cash and cash equivalents. Total capital is calculated as "equity", as shown in the consolidated statement of financial position, plus net (cash)/debt.

4. Financial risk management *(continued)*

(b) Capital risk management *(continued)*

The table below analyses the Group's capital structure as at 30 September 2010 and 2009:

	2010	2009
	HK$'000	HK$'000
Total borrowings	**3,545**	214,890
Less: Cash and cash equivalents (Note 23)	**(216,832)**	(211,144)
Net (cash)/debt	**(213,287)**	3,746
Total equity	**1,468,775**	678,767
Gearing ratio	**N/A**	1%

The Group's strategy is to maintain a solid capital base to support the operations and development of its business in the long term.

5. Critical Accounting Estimates and Judgements

Estimates are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The Group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below:

(a) Impairment of receivables

The Group's management determines impairment of receivables on a regular basis. This estimate is based on the credit history of its customers and current market conditions. Management reassesses the impairment of receivables at the end of the reporting period.

(b) Useful lives of property, plant and equipment

The Group's management determines the estimated useful lives and related depreciation charges for its property, plant and equipment. This estimate is based on the historical experience of the actual useful lives of property, plant and equipment of similar nature and functions. It could change significantly as a result of technical innovations and competitor actions in response to severe industry cycles. Management will increase the depreciation charge where useful lives are less than previously estimated lives, or it will write-off or write-down technically obsolete or non-strategic assets that have been abandoned or sold.

5. Critical Accounting Estimates and Judgements *(continued)*

(c) Net realisable value of inventories

Net realisable value of inventories is the estimated selling price in the ordinary course of business, less estimated costs of completion and selling expenses. These estimates are based on the current market conditions and the historical experience of selling products of a similar nature. It could change significantly as a result of competitor actions in response to severe industry cycles. Management reassesses these estimations at the end of the reporting period to ensure inventory is shown at the lower of cost and net realisable value.

6. Turnover

Turnover represents the net invoiced value of goods sold, after allowances for returns and trade discounts, and after eliminations of all significant intra-group transactions during the year.

7. Segment Information

HKFRS 8 "Operating Segments" replaces HKAS 14 "Segment Reporting" with effect from 1 October 2009, HKFRS 8 is a disclosure standard that requires that disclosure of information about the Group's operating segments. It replaces the requirements under HKAS 14 to determine the primary (business) and secondary (geographical) reporting operating segments of the Group. Adoption of this standard did not have any effect on the Group's results of operations or financial position. The Group has determined that the operating segments are substantially the same as the business segments previously identified under HKAS 14.

The Group's operating segments are structured and managed separately according to the nature of their operations and the products they provided. Each of the Group's operating segments represents a strategic business unit that offers products which are subject to risks and returns that are different from those of the other operating segments. Summary details of the operating segments are as follows:

(a) Exports segment is export of manufactured jewellery products on ODM or OEM basis;

(b) Domestic segment is trading of jewellery products for the Group's retail and wholesale business in Mainland China; and

(c) Mining segment comprised the mining, exploration and sale of gold resources.

10. Directors' Remuneration and 5 Highest Paid Employees *(continued)*

Fees include approximately HK$462,000 (2009: HK$236,000) payable to the independent non-executive directors of the Company. There were no other emoluments payable to the independent non-executive directors of the Company during the year (2009: Nil).

There was no arrangement under which a director waived or agreed to waive any remuneration during the year (2009: Nil).

During the year, no emoluments were paid by the Group to the directors or any of the 5 highest paid employees as an inducement to join, or upon joining the Group, or as compensation for loss of office (2009: Nil).

During the year, there were no options granted to the directors in respect of their services to the Group (2009: Nil).

Of the five highest paid employees in the Group, two directors of the Company whose emoluments are set out above (2009: Nil). The emoluments of the highest paid employees are as follows:

	2010	2009
	HK$'000	HK$'000
Basic salaries, housing benefits, other allowances and benefits in kind	**1,526**	512
Retirement benefits scheme contributions	**–**	–

29. Share Options

The Company operates a share option scheme ("Scheme") for the purpose of providing incentives and rewards to eligible participants (including, inter alia, employees, directors, advisors and consultants) who contribute to the success of the Group's operations. The Scheme became effective on 3 September 2002 and unless otherwise cancelled or amended, will remain in force for 10 years from its date of adoption 12 August 2002.

Salient details of the Scheme are:

(a) The maximum number of shares issuable upon exercise of the options which may be granted under the Scheme and any other share option scheme of the Group to each participant in any 12-month period shall not exceed 1% of the issued share capital of the Company for the time being. Any further grant of share options in excess of this limit is subject to shareholders' approval in a general meeting;

(b) The exercise period of the share options granted is determinable by the directors, and commences after a certain vesting period and ends on a date which is not later than 10 years from the date of the grant of the share options or other expiry date(s) stipulated in the Scheme, whichever is the earlier;

(c) The offer of a grant of share options may be accepted within 21 days from the date of the offer, upon payment of a nominal consideration of HK$1 by the grantee; and

(d) The exercise price of the share options is determinable by the directors but may not be less than the highest of (i) the closing price of the Company's shares as stated in the Stock Exchange's daily quotations sheet on the date of the offer of grant, which must be a trading day; (ii) the average closing price of the Company's shares as stated in the Stock Exchange's daily quotations sheets for the 5 trading days immediately preceding the date of the offer of the grant; and (iii) the nominal value of the Company's shares.

Since adoption of the Scheme, no share options have been offered and/or granted to the directors of the Group under the Scheme.

* Upon passing of the resolution for the bonus issue by the shareholders at the extraordinary general meeting held on 12 July 2010 and pursuant to the Scheme, the exercise price of the share options granted under the Scheme and the number of shares to be allotted and issued upon full exercise of the subscription right attaching to the outstanding share options were adjusted in accordance with the terms of the Scheme and the Listing Rules.

29. Share Options *(continued)*

The number and weighted average exercise price of the share options are as follows:

	2010		2009	
	Number of share options	**Weighted average exercise price HK$**	Number of share options	Weighted average exercise price HK$
Outstanding at the beginning of the year	**227,025,000#**	**0.330#**	–	–

Exercised during the year	**(68,825,000)**	**0.345**	(40,500,000)	0.358
Exercisable at the end of the year	**407,400,000**	**0.418**	181,825,000	0.442

The number of share options and exercise prices have been adjusted to reflect the bonus issue during the year.

The weighted average share price at the date of exercise during the year was HK$0.76 (2009: HK$0.68). As at the date of this annual report, 407,400,000 (2009:181,825,000) shares were available for issue under the Scheme, representing approximately 14.02% (2009:18.98%) of the issued share capital of the Company at that date.

Note: The share options granted are in exchange for certain services provided by those other eligible participants, the directors considered that the fair values of the services received cannot be measured reliably, accordingly, the share-based payment is measured by reference to the fair value of the share options granted.

These fair values were calculated using the Black-Scholes option pricing model. The model is commonly used models to estimate the fair value of the share options. The variables and assumptions used in computing the fair value of the share options are based on the directors' best estimate. The value of an option varies with different variable of certain assumption. The inputs into the model were as follows:

	10 December 2008	**11 May 2009**	**7 July 2009**	**17 June 2010**
Fair value per option	HK$0.07521	HK$0.242026	HK$0.346217	HK$0.08029
Share price at the grant date	HK$0.146	HK$0.435	HK$0.610	HK$0.4790
Exercise price	HK$0.1634	HK$0.435	HK$0.630	HK$0.4786
Expected volatility	89.207%	92.733%	90.494%	53.551%
Expected life	3 years	3 years	3 years	0.75 years
Risk free rate	1.065%	1.023%	1.160%	0.515%
Expected dividend yield	1.21%	1.21%	–	–

Expected volatility was determined by using the historical volatility of the Company's share price over the past years. The expected life used in the model has been adjusted, based on management's best estimate, for the effects of non transferability, exercise restrictions and behavioural considerations.

The Group recognised the total expenses of HK$20,009,000 for the year ended 30 September 2010 (2009: HK$51,366,000) in relation to share options granted by the Company.
