PROSPECTS FOR THE SECOND HALF OF THE YEAR

In the second half of 2011, the PRC government will continue to maintain the sustainability and stability of the macro-economic policy to enable China to maintain a healthy and stable economic growth. The country's increased efforts in the construction of more affordable housing and water infrastructure facilities will raise the consumption demand for cement. Meanwhile, the State will step up its efforts in phasing out obsolete production capacities. On 11 July 2011, the Ministry of Industry and Information Technology released the list of cement industry enterprises to be phased out for reason of obsolete production capacity, and the target obsolete production capacity to be phased out is 153 million tonnes. With the continuous decrease of fixed asset investments in the cement industry and acceleration of consolidation and restructuring within the industry, the supply and demand of the industry is expected to continue to improve. In addition, we also noticed that factors such as the government steadily stepping up its efforts in enhancing regulation of the real estate sector and the unlikely relaxation of the tightened monetary policy in short term would bring challenges to the cement industry in the second half of the year.

In this regard, looking into the second half of the year, by strengthening internal management, exercising stringent control over various operating costs and optimizing the indicator management on an on-going basis, the Group will further enhance the competitiveness in different regional markets. Meanwhile, the Group will push ahead with the construction of 5,000t/d clinker production line projects (phase two) of Guangyuan Conch and Kuyang Conch and 3 clinker production lines projects each with a daily production capacity of 12,000t/d within Anhui province, and prepare itself for project acquisitions, and proceed with acquisitions as and when opportunities arise. The Group will also explore the international development strategies and proceed, at a steady pace, with preparation to pursue overseas cement projects in countries such as Indonesia, etc. According to the "Memorandum of Understanding for Collaboration in the Development of the Cement Industry in the Republic of Indonesia" (《印度尼西亞共和國水泥行業開發合作諒解備忘錄》) entered into with the Ministry of Industry of the Republic of Indonesia in Jakarta on 30 June 2011, the Company will officially commence the preliminary works of the Tan Jung cement project, including application for approvals from local and overseas authorities, as well as construction design. Furthermore, the Company will implement its Twelfth-Five Year Plan to continue to enhance its operational quality with a view to create greater value for its shareholders.

VI. Financial Accounting Report (Unaudited)

Notes to the unaudited interim financial report

(Expressed in Renminbi Yuan unless otherwise indicated)

1 BASIS OF PREPARATION

This interim financial report of Anhui Conch Cement Company Limited (the “Company”) and its subsidiaries (the “Group”) has been prepared in accordance with the applicable disclosure provisions of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited, including compliance with International Accounting Standard (“IAS”) 34 “Interim Financial Reporting” adopted by the International Accounting Standards Board (“IASB”). It was authorised for issuance on 15 August 2011.

The interim financial report has been prepared in accordance with the same accounting policies adopted in the 2010 annual financial statements, except for the accounting policy changes that are expected to be reflected in the 2011 annual financial statements. Details of these changes in accounting policies are set out in note 2.

The preparation of an interim financial report in conformity with IAS 34 requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses on a year to date basis. Actual results may differ from these estimates.

In preparing this interim financial report, the significant judgements made by management in applying the Group’s accounting policies and the key sources of estimation uncertainty were the same as those that applied to the 2010 annual financial statements.

The interim financial report contains condensed consolidated financial statements and selected explanatory notes. The notes include an explanation of events and transactions that are significant to an understanding of the changes in financial position and performance of the Group since the 2010 annual financial statements. The condensed consolidated interim financial statements and notes thereon do not include all of the information required for full set of financial statements prepared in accordance with International Financial Reporting Standards (“IFRSs”).

The interim financial report is unaudited, but has been reviewed by the Audit Committee of the Company.

The financial information relating to the financial year ended 31 December 2010 that is included in the interim financial report as being previously reported information does not constitute the Group’s annual financial statements prepared under IFRSs for that financial year but is derived from those financial statements. The Group’s annual financial statements for the year ended 31 December 2010 are available at the Company’s registered office. The auditors have expressed an unqualified opinion on those financial statements in their audit report dated 28 March 2011.

2 CHANGES IN ACCOUNTING POLICIES

The IASB has issued a number of amendments to IFRSs and one new Interpretation that are first effective for the current accounting period of the Group and the Company. Of these, the following developments are relevant to the Group’s financial statements:

- IAS 24 (revised 2009), *Related party disclosures*
- Improvements to IFRSs (2010)

The Group has not applied any new standard or interpretation that is not yet effective for the current accounting period.

2 CHANGES IN ACCOUNTING POLICIES (CONTINUED)

Improvement to IFRSs (2010) allows a first-time adopter of IFRSs to use an event-driven fair value measurement as deemed cost for its assets and liabilities, even when the measurement date is after the IFRS transition date, provided that the measurement date is before the end of the period covered by the entity's first IFRS financial statements. This amendment can also be adopted retrospectively by existing IFRS reporters, provided that they make the necessary changes at the latest in the first annual period beginning on or after 1 January 2011. Accordingly, with effect from 1 January 2011, the Company has applied this amendment retrospectively, and the revalued amount of the Group's interests in leasehold land for own use on the occurrence of the Company's initial public offering in 1997 has been recognised as deemed cost in this interim financial report. Prior to 1 January 2011, interests in leasehold land for own use which is included in the financial statements as lease prepayments were carried at historical cost. The above change in accounting policy was made with a view to aligning the accounting policies adopted in the financial statements of the Group prepared under IFRSs and the China Accounting Standards for Business Enterprises issued by the Ministry of Finance of the PRC.

The change in the aforesaid accounting policy is applied retrospectively and had no material impact on earnings per share.

	Lease prepayments RMB'000	Capital reserve RMB'000	Retained earnings/ profit or loss RMB'000
Balance as reported – 1 January 2010	1,458,659	(38,727)	(11,068,873)

3 SEGMENT REPORTING

The Group manages its businesses by divisions, which are organised by a mixture of both business lines (products and services) and geography. In a manner consistent with the way in which information is reported internally to the Group's most senior executive management for the purposes of resource allocation and performance assessment, the Group has presented the following four reportable segments based on the region in which the Group's business operates: East China, Central China, South China and West China. All segments are primarily engaged in manufacture and sale of clinkers and cement products. No operating segments have been aggregated to form the reportable segments.

(a) Segment results, assets and liabilities

For the purposes of assessing segment performance and allocating resources between segments, the Group's senior executive management monitors the results, assets and liabilities attributable to each reportable segment on the following bases:

Segment assets include all assets in the financial statements prepared in accordance with China Accounting Standards for Business Enterprises (2006) ("PRC accounting standards"). Segment liabilities include all liabilities in the financial statements prepared in accordance with PRC accounting standards.

Revenue and expenses are allocated to the reportable segments with reference to sales generated by those segments and the expenses incurred by those segments or which otherwise arise from the depreciation or amortisation of assets attributable to those segments in accordance with PRC accounting standards.

The measure used for reporting segment profit is profit before taxation in accordance with PRC accounting standards.

In addition to receiving segment information concerning profit before taxation, management is provided with segment information concerning revenue (including inter segment revenue), interest income and expense from cash balances and borrowings managed directly by the segments, depreciation, amortisation and impairment losses and additions to non-current segment assets used by the segments in their operations. Inter-segment revenue are priced with reference to prices charged to external parties for similar orders.
