# **Management Discussion and Analysis**

# **Business Review**

For the six months ended 30 June 2011 (the "Reporting Period"), despite the volatile market conditions in China, the Group recorded significant growth, with sales reached US\$96.3 Million (2010 H1: US\$61.2 Million) representing an increase of 57.4% over the same period last year, while net profit reached US\$29.9 Million (2010 H1: US\$15.3 Million), up 95.0% from the corresponding period of last year.

The Group recorded satisfactory results growth as it benefited from pursuing two core development strategies: introduction and development of products and expanding its sales network, in addition during the Reporting Period, through merger and acquisition, the Group acquired products and expanded the network.

During the Reporting Period, while maintaining stable growth of the flagship products, the Group has increased the investment and intensity of promotion on potential products, including through organizing nearly 1,000 academic activities at various levels, continuously advancing the formation of expert networks and brand promotion, and through continued educating of doctors and visiting to experts, expanding the scope of product utilization, increasing the number of prescription doctors, further strengthening the depth of coverage of products in hospitals. At the same time, the Group continued to move forward the registration applications of the three products we introduced last year which require import drug license registration in China, for some of these products, the application of clinical trial for registration have been accepted by the State Food and Drug Administration ("SFDA"). In addition, the phase III pump clinical trial of the Group's inhouse researched pharmaceutical product CMS024 (Tyroseuleutide) has commenced. We expect to enroll patients in the second half of 2011.

During the Reporting Period, the Group continued its commitment to strengthening the expansion of marketing network and expanding geographical and hospital coverage of the network. The Group through the "Internship Programme" and "Professional Talent Development Programme" recruited a large number of undergraduate and post-graduate students from medical colleges throughout the country as they are about to graduate. Through training and internal evaluation, we selected outstanding talents to join our marketing and promotion team. In addition, we recruited some experienced medical representatives from the pharmaceutical industry. As at 30 June 2011, the Direct Network of the Group had over 1,000 sales, marketing and promotion professionals; the Agency Network had close to 1,000 independent third party sales representatives or distributors. The sales coverage spans over 13,000 hospitals throughout China, of which over 7,400 hospitals are being covered by the Direct Network.

Aside from products development and network expansion, the corporate acquisitions in the first half of 2011 also greatly advanced the development of the Group.

In April 2011, the Group acquired Great Move Enterprises Limited ("Great Move") and its subsidiaries. The main wholly-owned subsidiary of Great Move is Tianjin Precede Medical Trade Development Company Limited ("Tianjin Precede"), a Chinese company which engages in the marketing, promotion and sale of prescription drugs through Agency Promotion Model in China. After the acquisition, the Group's business model evolved from a simple Direct Academic Orientated Promotion Model to an integrated development model that incorporates the Agency Promotion Model. After the acquisition, the Group will focus on integrating and developing the two models.

For product introduction, the Group is not only committed to introducing an average of not less than two products with academic value to our Direct Network each year, but also committed to introducing not less than two products with market potential to our Agency Network, to make the product mix of that network more reasonable. In the first half of 2011, the Group broadened the scope of product screening, in addition to continued products screening for the Direct Network, we have also included screening for products suitable for the Agency Network. The Group has stepped up efforts in product evaluation and introduction, aside from on-going discussions for candidate products for the Direct Network, in May 2011 we introduced a product to the Agency Promotion Model, a type of enteral nutrition drug "Protein Hydrolysate" manufactured by Guangming Pharmaceutical Co., Ltd ("Guangxi Guangming"). The speedy introduction of that product is the result of the combination of the professional academic ability from our Direct Network and the rapid market coverage ability of our Agency Network. The second half of 2011, the Group will continue to introduce products with market potential and suitable for its two business models.

Meanwhile, for the existing products of the Group, we have considered the advantage from integration of the two business models in accelerating the pace of market coverage of products, explored the increase in product sales volume, the task of promotion models integration for some products has already been initiated.

After the acquisition, the Group has strengthened the governance of the Agency Promotion Model and improved the management of the network, and assisted the Agency Network to set up information management system. The Group believes these activities laid a foundation for faster development of the Agency Network in the future.

In addition Tianjin Precede, when the Group introduced "Protein Hydrolysate" in May 2011, combined with capital market practice, by way of investment in capital and equity increase to the product production enterprise – Guangxi Guangming, the Group has gained the stable product right through equity control. This is a major breakthrough in product introduction policy for the Group since the Company listed in Hong Kong Stock Exchange, the subsequent product introductions of the Group will enhance on obtaining the product rights through purchase or equity control.

# **Development of Products**

The Group mainly markets, promotes and sells nine products via the Direct Network, ten products via the Agency Network, and also has some in-house manufactured products in China. Meanwhile, we also have another three products-Budenofalk, L-lysine Aescinat and Thiotriazolin, which are requiring import drug registration in China, some of which the application of clinical trial for registration have been processed by the SFDA. In addition, we are carrying out the CMS024 phase III clinical trial pump study, which is an in-house researched pharmaceutical product.

#### REPORT ON REVIEW OF INTERIM FINANCIAL INFORMATION

TO THE BOARD OF THE DIRECTORS OF CHINA MEDICAL SYSTEM HOLDINGS LIMITED 康哲藥業控股有限公司 (Incorporated in the Cayman Islands with limited liability)

#### Introduction

We have reviewed the interim financial information set out on pages 21 to 42, which comprises the condensed consolidated statement of financial position of China Medical System Holdings Limited (the "Company") and its subsidiaries (collectively referred to as the "Group") as of 30 June 2011 and the related condensed consolidated statement of comprehensive income, statement of changes in equity and statement of cash flows for the six-month period then ended and certain explanatory notes. The Main Board Listing Rules governing the Listing of Securities on The Stock Exchange of Hong Kong Limited require the preparation of a report on interim financial information to be in compliance with the relevant provisions thereof and International Accounting Standard 34 "Interim Financial Reporting" ("IAS 34"). The directors of the Company are responsible for the preparation and presentation of this interim financial information in accordance with IAS 34. Our responsibility is to express a conclusion on this interim financial information based on our review, and to report our conclusion solely to you, as a body, in accordance with our agreed terms of engagement, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

#### Scope of review

We conducted our review in accordance with Hong Kong Standard on Review Engagements 2410 "Review of Interim Financial Information Performed by the Independent Auditor of the Entity" issued by the Hong Kong Institute of Certified Public Accountants. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Hong Kong Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly we do not express an audit opinion.

#### Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the interim financial information is not prepared, in all material respects, in accordance with IAS 34.

## 1. BASIS OF PREPARATION

The condensed consolidated financial statements have been prepared in accordance with the applicable disclosure requirements of Appendix 16 to the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited and with International Accounting Standard 34 (IAS 34) "Interim Financial Reporting".

# 2. PRINCIPAL ACCOUNTING POLICIES

The condensed consolidated financial statements have been prepared on the historical cost basis except for certain financial instruments, which are measured at revalued amounts or fair values, as appropriate.

The accounting policies and methods of computation used in the condensed consolidated financial statements for the six months ended 30 June 2011 are the same as those followed in the preparation of the Group's annual financial statements for the year ended 31 December 2010, except as described below.

In the current interim period, the Group has applied, for the first time, the following new or revised standards and interpretations ("new or revised IFRSs") issued by the International Accounting Standard Board ("IASB") and IFRS Interpretations Committee ("IFRIC") of the IASB:

IFRSs (Amendments)	Improvements to IFRSs issued in 2010
IAS 24 (as revised in 2009)	Related party disclosure
IAS 32 (Amendments)	Classification of rights issues
IFRIC - INT 14 (Amendments)	Prepayments of a minimum funding requirement
IFRIC - INT 19	Extinguishing financial liabilities with equity instruments

The application of the above new or revised IFRSs in the current interim period has had no material effect on the amounts reported in these condensed consolidated financial statements and/or disclosures set out in these condensed consolidated financial statements.

The Group has not early applied the following new or revised standards that have been issued but are not yet effective.

IFRS 7 (Amendments) IFRS 9 IFRS 10	Disclosures - Transfers of financial assets <sup>1</sup> Financial instruments <sup>2</sup> Consolidated financial statements <sup>2</sup>
IFRS 11	Joint arrangements <sup>2</sup>
IFRS 12	Disclosure of interests in other entities <sup>2</sup>
IFRS 13	Fair value measurement <sup>2</sup>
IAS 1 (Amendments)	Presentation of items of other comprehensive income <sup>3</sup>
IAS 12 (Amendments)	Deferred tax: Recovery of underlying assets <sup>4</sup>
IAS 19 (Revised 2011)	Employee benefits <sup>2</sup>
IAS 27 (Revised 2011)	Separate financial statements <sup>2</sup>
IAS 28 (Revised 2011)	Investments in associates and joint ventures <sup>2</sup>

- <sup>1</sup> Effective for annual periods beginning on or after 1 July 2011.
- <sup>2</sup> Effective for annual periods beginning on or after 1 January 2013.
- <sup>3</sup> Effective for annual periods beginning on or after 1 July 2012.
- <sup>4</sup> Effective for annual periods beginning on or after 1 January 2012.

IFRS 9 "Financial instruments" (as issued in November 2009) introduces new requirements for the classification and measurement of financial assets. IFRS 9 "Financial instruments" (as revised in November 2010) adds requirements for financial liabilities and for derecognition. Specifically, under IFRS 9, all recognised financial assets that are within the scope of IAS 39 "Financial instruments: Recognition and measurement" are subsequently measured at either amortised cost or fair value. Specifically, debt investments that are held within a business model whose objective is to collect the contractual cash flows, and that have contractual cash flows that are solely payments of principal and interest on the principal outstanding are generally measured at amortised cost at the end of subsequent accounting periods. All other debt investments and equity investments are measured at their fair values at the end of subsequent accounting periods.

IFRS 9 is effective for annual periods beginning on or after 1 January 2013, with earlier application permitted. The directors anticipate that the application of IFRS 9 will have no significant impact on amount reported in respect of the Group's financial assets and financial liabilities.

The five new or revised standards on consolidation, joint arrangements and disclosures including IFRS 10, IFRS 11, IFRS 12, IAS 27 (Revised 2011) and IAS 28 (Revised 2011) were issued by the IASB in June 2011 and are effective for annual periods beginning on or after 1 January 2013. Earlier application is permitted provided that all of these five new or revised standards are applied early at the same time. The directors of the Company anticipate that these new or revised standards will be applied in the Group's consolidated financial statements for financial year ending 31 December 2013 and the potential impact is described below.

IFRS 10 replaces the parts of IAS 27 "Consolidated and separate financial statements" that deal with consolidated financial statements. Under IFRS 10, there is only one basis for consolidation, that is control. In addition, IFRS 10 includes a new definition of control that contains three elements: (a) power over an investee, (b) exposure, or rights, to variable returns from its involvement with the investee, and (c) ability to use its power over the investee to affect the amount of the investor's returns. Extensive guidance has been added in IFRS 10 to deal with complex scenarios. Overall, the application of IFRS 10 requires a lot of judgement.

Other than disclosed above, the directors of the Company anticipate that the application of these new or revised standards will have no material impact on the results and financial position of the Group.

#### 3. TURNOVER AND SEGMENT INFORMATION

Turnover represents the amounts receivable for good sold in the normal course of business, net of customer returns, rebates, other similar allowances and sales related taxes during the period.

The Group's operating segments are based on the internal reports reviewed by the Board of Directors of the Company that are used for the purpose of resources allocation and assessment of segment performance.

During the six month ended 30 June 2011, the Group acquired a new subsidiary that is engaged in marketing, promotion and sale through network of agents/distributors(see note 16(a)). Therefore, the Group changed the structure of its internal organisation in a manner such that the number of its reportable and operating segments has been increased from two to three.

After the change, the Group has the following three reportable and operating segments:

- (1) Direct promotion (formerly known as marketing, promotion and sale of pharmaceutical products) - marketing, promotion and sale of in-licensed medicine and pharmaceutical products from overseas and domestic pharmaceutical companies to wholesale customers across China, including distributors and hospitals.
- (2) Agency promotion marketing, promotion and sales of prescription pharmaceutical products through network of agents/distributors. The Group owns the in-licensed rights or product control rights for these products, which enable the Group to promote and sell these products through its nationwide promotion and sales network (which consists of independent third party sales representatives and distributors).
- (3) Others business production and sales of other medicines and pharmaceutical products to wholesale customers across China, including distributors and hospitals.

In addition, in the current period, the measure of segment results has been changed from gross profit to profit for the period.

The comparative figures of the segment information has been restated to conform with the current period presentation.

## 18. EVENTS AFTER THE END OF THE INTERIM PERIOD

Subsequent to the end of the interim period, the directors recommended a bonus issue of shares on the basis of one bonus share for every four existing share in issue on 15 August 2011. The bonus issue is conditional upon (a) the passing of an ordinary resolution by shareholders at an extraordinary general meeting that is scheduled to be held on 14 September 2011, and (b) the Listing Committee of the Stock Exchange of Hong Kong Limited granting the listing of, and permission to deal in, the bonus shares. The bonus shares will be credited as fully paid by way of capitalisation of an amount equal to the total par value of the bonus shares in the share premium account of the Company. The bonus shares, upon issued, will rank pari passu in all respects with the then existing shares in issue as at the record date, except that they will not rank for the proposed cash dividend of the Company for the six months ended 30 June 2011.
