Dear Sirs,

INSTRUCTIONS

We refer to the instructions from Hosa International Limited (the “Company”) for us to value the properties held or leased by the Company and/or its subsidiaries (together referred to as the “Group”) located in the People’s Republic of China (the “PRC”). We confirm that we have performed inspections, made relevant enquiries and obtained such further information as we consider necessary for the purpose of providing you with our opinion of the market values of the properties as at 31 May 2011 (the “date of valuation”).

BASIS OF VALUATION

Our valuations of the concerned properties have been based on the Market Value, which is defined as “the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm’s-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion”.

PROPERTY CATEGORIZATION

In the course of our valuations, the portfolio of properties of the Group is categorized into the following groups:

Group I — Property held and occupied by the Group in the PRC

Group II — Property leased by the Group in the PRC

VALUATION METHODOLOGIES

In valuing the property in Group I, we have adopted the Depreciated Replacement Cost Approach. Depreciated replacement cost is defined as “the aggregate amount of the value of the land for the existing use or a notional replacement site in the same locality and the new replacement cost of the buildings and other site works, from which appropriate deductions may then be made to allow for the age, condition, economic or functional obsolescence and environmental factors, etc.; all of these might result in the existing property being worth less to the undertaking in occupation than would a new replacement”. This basis has been used due to the lack of an established market upon which to base comparable transactions, which generally furnishes the most reliable indication of values for assets without a known used market. This opinion of value does not necessarily represent the amount that might be realized from the disposition of the subject asset in the market and is subject to adequate profitability of the business compared to the value of the total assets employed.

We have attributed no commercial value to the property in Group II which is leased by the Group, due either to the short-term nature of the leases or the prohibition against assignment or sub-letting or otherwise due to the lack of substantial profit rents.

TITLE INVESTIGATION

We have been provided with copies of title documents/tenancy information and have been advised by the Group that no further relevant documents have been produced. However, we have not examined the original documents to verify ownership or to ascertain the existence of any amendment documents, which may not appear on the copies handed to us. In the course of our valuations, we have relied upon the advice and information given by the Group’s PRC legal advisor — Jingtian & Gongcheng Attorneys at Law (競天公誠律師事務所) regarding the title of the properties located in the PRC. All documents have been used for reference only.

VALUATION ASSUMPTIONS

Our valuations have been made on the assumption that the properties are sold in the market in their existing state without the benefit of deferred terms contract, leaseback, joint venture, management agreement or any other similar arrangement which might serve to affect the values of the properties.

In addition, no account has been taken of any option or right of pre-emption concerning or effecting sale of the properties and no forced sale situation in any manner is assumed in our valuations.

In valuing the properties, we have relied on the advice given by the Group that the Group has valid and enforceable titles to the properties which are freely transferable, and have free and uninterrupted rights to use the same, for the whole of the unexpired term granted subject to the payment of annual government rent/land use fees and all requisite land premium/purchase consideration payable have been fully settled.

VALUATION CONSIDERATIONS

We have inspected the exterior and wherever possible, the interior of the properties. During the course of our inspections, we did not note any serious defects. However, no structural surveys have been made nor have any tests been carried out on any of the services provided in the properties. We are, therefore, unable to report that the properties are free from rot, infestation or any other structural defects.

In the course of our valuations, we have relied to a considerable extent on the information given by the Group and have accepted advice given to us on such matters as planning approvals or statutory notices, easements, tenures, particulars of occupancy, site/floor areas, identification of the properties and other relevant information.

We have not carried out detailed on-site measurements to verify the correctness of the site/floor areas in respect of the properties but have assumed that the site/floor areas shown on the documents handed to us are correct. Dimensions, measurements and areas included in the valuation certificates are based on information contained in the documents provided to us by the Group and are therefore only approximations.

We have no reason to doubt the truth and accuracy of the information provided to us by the Group and we have relied on your confirmation that no material facts have been omitted from the information provided. We consider that we have been provided with sufficient information for us to reach an informed view.

No allowances have been made in our valuations for any charges, mortgages or amounts owing on the properties or for any expenses or taxation, which may be incurred in effecting a sale or purchase.

Unless otherwise stated, it is assumed that the properties are free from encumbrances, restrictions and outgoings of an onerous nature, which could affect their values.

Our valuations have been prepared in accordance with the HKIS Valuation Standards on Properties (First Edition 2005) published by the Hong Kong Institute of Surveyors.

Our valuations have been prepared under the generally accepted valuation procedures and are in compliance with the requirements contained in Chapter 5 and Practice Note 12 of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited.

REMARKS

Unless otherwise stated, all money amounts stated herein are in Renminbi (RMB) and no allowances have been made for any exchange transfers.

Our Summary of Values and the Valuation Certificates are attached herewith.

Yours faithfully,
For and on behalf of
