Highlights of progress

- 28 transactions to dispose of or exit non-strategic businesses announced since start of 2011 - making HSBC simpler and easier to manage, transferring 15k FTEs, and potentially releasing US\$55bn in risk-weighted assets
- Reaffirming financial targets to achieve return on common equity of 12-15%, cost efficiency ratio of 48-52%, and a common equity tier 1 ratio of 9.5-10.5%
- US\$2bn sustainable cost savings achieved on an annualised basis to date: anticipated to hit top end of US\$2.5-3.5bn savings target by end of 2013
- Integration of HSBC's four global businesses delivered incremental revenue of US\$0.5bn in 2011, with a further US\$1.5bn anticipated in the short to medium term
- Continued to position HSBC for growth: in 2011, profit before tax increased in fast-growing regions including Hong Kong and Rest of Asia-Pacific (15%) and Latin America (29%)

Stuart Gulliver, Group Chief Executive, commented:

"Since we set out our strategy to make HSBC the leading international bank, we have moved at pace. We are making material progress towards getting HSBC into shape for the future - a simpler, more coherent organisation that is easier to manage and control.

HSBC Updates Investors On Strategy Execution/2

“We are reaffirming our targets, and, while market conditions and changing regulatory costs will continue to influence our performance, we have clear and robust programmes in hand to manage costs and capture opportunities for growth.

“We will continue to simplify HSBC, enabling us to integrate systems and operate to high global standards internationally. We will continue to run off our legacy assets, including the US consumer and mortgage lending book. We are restructuring our US operations, repositioning our Global Private Banking offering, and adapting to the challenges posed to Global Banking & Markets products by the changing regulatory environment.

“Closer integration between our four global businesses and disciplined capital allocation will position HSBC to capture growth. We have increased by an additional US\$1bn our assessment of the potential extra revenue achievable from business integration in the short to medium term. We will commit capital to organic growth opportunities in priority growth markets.

“Focusing on these priorities will enable us to make further progress towards delivering our strategy, and becoming the world’s leading international bank.”
