#### **Strategic Transformation**

The Group aims to deliver a world-class wireless network with broad and thorough coverage, excellent quality and high speed. By continuing to strengthen and develop our Four-Network Coordination, namely the 2G, 3G (TD-SCDMA), WLAN and TD-LTE networks, we strive to achieve the maximum overall network efficiency. Our continuous network optimization helped us solidify our leading position in 2G. We aim to offer a premium 3G network by focusing our resources on continuous coverage in large and medium cities and effective coverage in areas with heavy network traffic. Voice usage and data traffic carried by our 3G network grew by 1.9 times and nearly 2.4 times over the same period last year, respectively, with a significant increase in network utilization rate. The Group's WLAN maintained its leadership in network capability by carefully planning and optimizing the network for greater efficiency. By the end of June 2012, WLAN access points (AP) reached 2.83 million, making WLAN an essential means of carrying data traffic. In the first half of 2012, in cooperation with our parent company, we initiated the construction of an enlarged network upon the successful completion of large scale

testing of TD-LTE. In Hangzhou, we launched the featured TD-LTE services, which enjoyed a good reception among our customers. We also achieved two-way roaming between the TD-LTE network in Hangzhou and the LTE FDD network in Hong Kong. Our TD-LTE large scale testing received positive feedback from the relevant government bodies who have openly expressed their support for an expedited development of TD-LTE. TD-LTE also accelerated its pace in global adoption, with the Global TD-LTE Initiative currently enjoying the participation of 48 operators and 30 manufacturers worldwide. The TD-LTE industry continued to grow in scale with the official launch of 10 commercial networks across the world.

The Group has made significant progress towards becoming a full services provider. We have brought forward the construction of both metropolitan area networks and high-quality carrier networks, and developed our key broadband businesses with cost effectiveness in mind. By the end of June 2012, we had over 635 thousand corporate customer dedicated-lines. In the first half of 2012, revenue from the informationalization services for our corporate customers surpassed RMB10 billion. Our international network resources have grown rapidly and we continued to strengthen our international business capabilities as a whole. In addition, we are focusing our efforts on the development of Internet Data Center (IDC), Public Internet and Web Cache. With the priority of maximizing effiency and a focus on production differentiation, we are quickly building the second mover's advantage in our full services.

Committed to our mobile Internet development strategy of building up "smart pipes, open platforms, feature services and friendly interfaces", we did our utmost to establish a leading position in the mobile Internet sector. In the first six months of 2012, our key businesses continued to expand in scale. Mobile Market recorded over 200 million cumulative registered customers and over 800 million cumulative application downloads. Active customers of Fetion reached over 90 million. In addition, we made progress in mobile payment, and initiated indepth cooperation with China UnionPay and Shanghai Pudong Development Bank. By launching multiple products together with a number of Internet service providers, we also continued to strengthen our overall competitiveness in the industry chain. We launched "Wireless City" portals in 321 cities nation-wide, with the customer base quickly taking shape. Our Internet of Things business continued to experience robust growth with the expansion of its application areas and scale. The number of M2M terminals increased significantly over the end of last year, signaling a vast development potential for the Internet of Things.

#### **Reform and Innovation**

In the face of a continuously evolving environment, the Group proactively adapted to the changing industrial landscape and business structure by engaging in reform and innovation. In the first six months of 2012, we benchmarked ourselves against world-class companies and determined our overall reform direction, objectives and plans.

The companies we have recently set up have focused on specialized operations. After having quickly formed its global network capabilities and capitalized on its advantages of large scale and specialized operations, our subsidiary, China Mobile International Limited, maintained steady growth by launching highly competitive products and services overseas. China Mobile Terminal continued to strengthen its influence over handset manufacturers, enhance product competitiveness and gradually strengthen its channel expansion capability. Its sales performance was good, with over 14 million TD mobile phones sold in the first half of 2012, of which smart phones accounted for nearly 70%.

Meanwhile, we have actively explored a centralized and standardized infrastructure to be shared within the Group. To further the application of cloud computing technology, centralized data centers and call centers have been built with initial success. In addition, we have been establishing organization systems, incentive mechanisms, management models and talent recruitment structures to promote organizational vitality in line with our strategic transformation in an era of mobile Internet.

#### **Corporate Governance**

Abiding by corporate governance principles of integrity, transparency, openness and high efficiency, the Company has instituted a sound governance structure and taken practical measures to ensure best corporate governance practices. In the first six months of 2012, we continued to improve our internal control and risk management. We also focused on the key issues and risks in corporate operations and management in order to strengthen our auditing and monitoring efforts in key business areas, particularly procurement, business cooperation, information security and decision making authority. The initiatives taken by the Group to improve the risk management systems will ensure that we are operating in an orderly, efficient and secure manner.

#### **Corporate Social Responsibility**

The Group attaches great importance to corporate social responsibility. The Group makes a solid contribution to society by providing an extensive and reliable network, addressing climate change and participating in various philanthropic initiatives. In the wake of several natural disasters this year, such as the torrential rains in Beijing and Hebei, and the typhoons in Guangdong and Guangxi, we acted swiftly to dispatch a total of 14,000 emergency protection vehicles and 42,000 contingency protection staff to provide emergency telecommunications service and ensure the smooth flow of mobile telecommunications, which were essential to the relief work in the affected areas. Fully committed to energy saving and emissions reduction, we furthered our "Green Action Plan" through the promotion of proven technologies and innovation in energy-saving applications to achieve sustainable development with low energy consumption. In the first six months of 2012, our power consumption per unit of telecommunications traffic decreased by 12% over the same period last year. Through our China Mobile Charity Foundation and other philanthropic activities, we contributed to helping disadvantaged groups. We continued the elementary and middle school headmaster training programs in rural areas in central and western China, the building of libraries and multimedia classrooms, and the China Mobile "Heart" Caring Campaign.

#### **Director Resignations**

On 22 March 2012, Mr. Wang Jianzhou resigned from his position as Executive Director and Chairman of the Company due to age. Madam Xin Fanfei resigned from her position as Executive Director and Vice President of the Company due to a change in job. On behalf of the Board, I take this opportunity to acknowledge the contributions of Mr. Wang and Madam Xin to the Company with the highest regard and deepest gratitude.

#### **Awards and Recognition**

Our efforts have continued to be recognized in 2012. The Group was again included in the Financial Times' "FT Global 500", moving up to 8th place from last year's 16th. Our ranking also improved in Forbes Magazine's "Global 2000" List, moving up to 31st place from last year's 34th. The China Mobile brand was named one of the "BRANDZ<sup>TM</sup> Top 100 Most Powerful Brands" by Millward Brown and Financial Times for the seventh consecutive year, ranking 10th among all companies considered and 1st among all Chinese companies. In the first half of 2012, Moody's and Standard & Poor's kept our corporate credit rating at Aa3/Outlook Positive and AA-/Outlook Stable respectively, equivalent to China's sovereign credit rating.

#### **Dividends**

In view of the Group's continued stable operating results in the first six months of 2012 and taking into consideration its long-term future development, based on the dividend payout guidance for the full year of 2012, the Board declared an interim dividend of HK\$1.633 per share for the six months ended 30 June 2012.

The Board is of the view that the Company's good profitability and strong cash flow generating capability will continue to support the future sustainable development of the Company, while providing shareholders with a favourable return.

#### **Future Outlook**

Looking forward, the fundamentals of China's economic development continue to hold, and the information and communications industry is at a critical stage of transformation. Information and communications technologies will veer towards broadband, mobility and integration. With the increasing popularity of smart terminals, the sustained growth in demand for information and communications services will bring huge market potential, presenting the Group with a new value source. TD-LTE, as a new generation of wireless broadband technology that offers higher performance, lower cost and better utilization of spectrum, is fully supported by the Chinese government, which is actively encouraging home-grown innovation. With the development of the TD-LTE industry chain and its commercialization on an international scale, the Group will continue to gain momentum.

Constant changes continue to reshape competition among the traditional telecommunications industry and the mobile Internet industry. As mobile penetration continues to increase and growth potential in traditional mobile telecommunications is shrinking, the competition for customer value will become more fierce. The rapid development of the mobile Internet has brought new opportunities to the Group, but at the same time has also presented challenges with business replacement and value shift.

Facing both opportunities and challenges, we will fully leverage our advantages of scale in our network and customer base, brand value, operational capabilities, strong management experience and talented personnel, to further accelerate our strategic transformation and innovation. We will continue to strengthen the coordinated development of the Four Networks, and promote the operational transition from a voice model to a "voice + data traffic + applications" model, to provide service at a reasonable network cost. We aim to command a leading position in the mobile Internet industry by increasing our capabilities, pushing forward our specialized operations and actively implementing our mobile Internet strategy. We will adhere to the full services strategy centered on wireless broadband and mobile business, to quickly establish the second mover's advantage in full services. We will focus on revitalizing our Group through centralizing management, specializing in operations, adopting market-oriented mechanisms, achieving a flat organizational structure, and standardizing procedures, all geared towards achieving sustainable growth.

Meanwhile, we will look for appropriate investment opportunities in an active but cautious manner, working to broaden our presence in the telecommunications market.

As always, we will strive to create value for our shareholders.

Xi Guohua Chairman

#### NOTES TO THE UNAUDITED INTERIM FINANCIAL REPORT

(Expressed in Renminbi unless otherwise indicated)

#### 1 BASIS OF PREPARATION

The interim financial report of China Mobile Limited (the "Company") and its subsidiaries (together referred to as the "Group") has been prepared in accordance with the applicable disclosure provisions of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the "Hong Kong Listing Rules"), including compliance with International Accounting Standard ("IAS") 34, "Interim financial reporting", issued by the International Accounting Standards Board ("IASB") and Hong Kong Accounting Standard ("HKAS") 34, "Interim financial reporting", issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA"). It was authorized for issuance on 16 August 2012.

The Group's interim financial report has been prepared in accordance with the same accounting policies adopted in the 2011 annual financial statements.

The preparation of an interim financial report in conformity with IAS/HKAS 34 requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses on a year-to-date basis. Actual results may differ from these estimates.

The Group's interim financial report contains condensed consolidated financial statements and selected explanatory notes. The notes include an explanation of events and transactions that are significant to an understanding of the changes in financial position and performance of the Group since the 2011 annual financial statements. The condensed consolidated interim financial statements and notes thereon do not include all of the information required for a full set of financial statements prepared in accordance with International Financial Reporting Standards ("IFRSs") or Hong Kong Financial Reporting Standards ("HKFRSs").

The Group's interim financial report is unaudited, but has been reviewed by the Company's Audit Committee. The interim financial report has also been reviewed by the Company's auditors, KPMG, in accordance with Hong Kong Standard on Review Engagements 2410, Review of interim financial information performed by the independent auditor of the entity, issued by the HKICPA. KPMG's unmodified independent review report to the board of directors is included in the interim report to be sent to shareholders.

The financial information relating to the financial year ended 31 December 2011 that is included in the interim financial report as being previously reported information does not constitute the Company's statutory financial statements for that financial year but is derived from those financial statements. Statutory financial statements for the year ended 31 December 2011 are available from the Company's registered office. The auditors have expressed an unqualified opinion on those statutory financial statements in their report dated 15 March 2012.

(Expressed in Renminbi unless otherwise indicated)

#### 2 SIGNIFICANT ACCOUNTING POLICIES

The IASB has issued a number of new or revised IFRSs, which term collectively includes IASs and interpretations, that are first effective or available for early adoption for accounting periods beginning on or after 1 January 2012. The equivalent new or revised HKFRSs, which term collectively includes HKASs and Interpretations, consequently issued by HKICPA as a result of these developments have the same effective date as those issued by the IASB and are consistent with the pronouncements issued by the IASB. These developments have had no material impact on the Group's financial statements.

The IFRSs and HKFRSs that will be effective or are available for voluntary early adoption in the annual financial statements for the year ending 31 December 2012 may be affected by the issuance of additional interpretations or other changes announced by the IASB and HKICPA subsequent to the date of issuance of the interim financial report. Therefore the policies that will be applied in the Group's financial statements for the year ending 31 December 2012 cannot be determined with certainty at the date of issuance of the Group's interim financial report.

#### 3 SEGMENT REPORTING

An operating segment is a component of the Group that engages in business activities from which the Group may earn revenue and incur expenses, and is identified on the basis of the internal financial reports that are provided to and regularly reviewed by the Group's chief operating decision maker in order to allocate resource and assess performance of the segment. For the periods presented, the Group as a whole is an operating segment since the Group is only engaged in mobile telecommunications and related business. No Group's geographical information has been disclosed as the majority of the Group's operating activities are carried out in Mainland China (for the purpose of preparing the interim financial report, Mainland China refers to the People's Republic of China ("PRC") excluding the Hong Kong Special Administrative Region of the PRC ("Hong Kong"), the Macau Special Administrative Region of the PRC and Taiwan). The Group's assets located and operating revenue derived from activities outside Mainland China are less than 5% of the Group's assets and operating revenue, respectively.

#### 4 TURNOVER

The principal activities of the Group are the provision of mobile telecommunications and related services in Mainland China and in Hong Kong.

Following a review of the presentation of the components of revenue, the Group re-categorized the presentation of operating revenue in the consolidated statement of comprehensive income for the year ended 31 December 2011 and in the unaudited consolidated statement of comprehensive income for the six months ended 30 June 2012. The new presentation categorizes operating revenue into voice services revenue, data services revenue and other operating revenue. Voice services revenue includes revenue derived from voice usage services (including usage fees and monthly fee) and from voice value-added services that were categorized in value-added services in prior period presentation. Data services revenue is mainly derived from short message services ("SMS"), multi-media message services ("MMS"), wireless data traffic, and applications and information services. Other operating revenue mainly represents interconnection revenue.

This change in presentation has no effect on reported profit or loss, total income and expense or net assets, for any of the periods presented. The comparative figures in this interim financial report have been reclassified to conform to current period's presentation.
