OPERATIONAL AND FINANCIAL REVIEW

The Group is principally engaged in the trading, manufacturing and selling of extracts, flavors and fragrances, which are provided to the Group's customers for making addition and improvement of flavors or fragrances in the customers manufactured tobacco, food and daily consumer goods. The Group's products add value by enhancing tastes or smells of its customers' products and therefore improve the product quality of the products manufactured by the Group's customers. The Group's flavors are sold principally to manufacturers of tobacco, beverages, daily foods, preserved food, savory and confectionery products whereas the Group's fragrances are sold principally to manufacturers of cosmetics, perfumes, soaps, toiletries, hair care products, deodorant, detergent and air fresheners products.

In the midst of the lingering euro zone crises and no improvement in the US economic growth, China is expected to pick up the slack and be the next powerhouse of the world economy at the time when its domestic economy was going strong. But China's economic growth is used to be driven by export demand from more developed markets, capital expenditures and government infrastructure spendings. The weakening economies of its world trade partners inevitably filtered back to export demands on China and the PRC government has been implementing macro measures to combat rising property prices in the country and its inflation. Following these factors, the China economy shows signs of slowing since the turn of Year 2012. The China GDP grew by 8.1% and 7.6% in the 1st quarter and the 2nd quarter of 2012 respectively and it is yet to see if the China economy will bottom out in the 3rd quarter or by the end of the year.

The slowdown of export demand and economic growth was felt in our upstream extracts business unit. The flavor and fragrance ingredients manufactured in this extracts segment are basic ingredients applied by the Group's customers to manufacture flavors and fragrances for production of flavors enhancers, fine fragrances and food flavors. Turnover of this segment fell 16.2% in the first half of 2012 as compared to the corresponding period in 2011. The decrease was attributed to reduced overseas demands for products of the Group's customers and non-renewal of a processing service contract having expired in the period under review by an overseas customer.

On the bright side, the Group's continuous business strategy in focusing and maintaining our strength in research and development, which is fundamental in innovating and improving our product formulas and efforts in bringing forth cost control measures such as sourcing new suppliers and substitute raw materials yield rewards. The Group's flavor enhancers, food flavors and fine fragrances products continued to enjoy increasing market demands for recognition of our brand name and quality of products, which more than covers the turnover loss in the extracts segment. The total turnover for the six months ended 30 June 2012 increased to approximately RMB381.7 million from RMB356.5 million in the corresponding period in 2011. With improved product formulas and better control of raw materials and production process, the percentage of cost of sales to sales decreased to 55.9% in the first half of 2012 from 57.3% in the corresponding period in 2011, including containing some rising raw material prices. The overall gross profit margin was improved to 44.1% in the first half of 2012 from 42.7% in the corresponding period in 2011. The net profit increased to approximately RMB35.5 million in the first half of 2012 from approximately RMB31.7 million in the corresponding period in 2011, improving the net profit margin moderately to 9.3% in the first half of 2012 from 8.9% in the corresponding period in 2011.

Management Discussion and Analysis

TURNOVER

For the six months ended 30 June 2012, the Group recorded a turnover of approximately RMB381.7 million (2011: RMB356.5 million), representing an increase of approximately 7.1% as compared to the corresponding period in 2011. The increase in turnover was mainly attributed to increases in the demand of flavors enhancers, up 13.7%; food flavours, up 10.8%; and in particular, fine fragrances, up 21.8% which was driven by (i) introduction of new fine fragrances products and (ii) gaining new customers through promotion efforts.

GROSS PROFIT

The gross profit margin of the Group for the six months ended 30 June 2012 was approximately 44.1% (2011: 42.7%). The increase in gross profit margin was attributed to refined product formulas which enabled better usage of raw materials and the flexibility of substitute raw materials without compromise of product quality as well as new suppliers to save raw material costs such as that of "Technical Grade d-Limonene", one of the major raw materials used.

NET PROFIT

The Group's net profit for the six months ended 30 June 2012 was approximately RMB35.5 million (2011: RMB31.7 million), approximately 12% more than 2011. Net profit margin for the period ended 30 June 2012 was approximately 9.3% (2011: 8.9%). This moderate improvement was brought forth by increase in gross profit, implementation of other cost control measures, in addition to raw materials control, such as reduction in selling and marketing expenses and additional government grant received in the period under review; however, partly offset by increase in administration expenses.

EXPENSES

Selling and marketing expenses amounted to approximately RMB59.5 million for the six months ended 30 June 2012 (2011: RMB61.8 million), representing approximately 15.6% (2011: 17.3%) of turnover for the six months ended 30 June 2012. Such decrease was mainly attributable to further control of direct marketing expenses.

Administrative expenses amounted to approximately RMB66.9 million for the six months ended 30 June 2012 (2011: RMB52.6 million), representing approximately 17.5% (2011: 14.7%) of turnover for the period ended 30 June 2012. The increase was due to rising employee benefit expenses, increase in research and development expenditures and in other expenses which included testing expenses, a new corporate promotion contract fee and increased brand name promotional expenses.

Net finance income amounted to approximately RMB0.02 million for the six months ended 30 June 2012 (2011: RMB2.3 million). The decrease in the net finance income was mainly due to reduced interest income resulted from decrease in cash and cash equivalents in the period under review for capital expenditures on the Company's new factory under construction and exchange loss of approximately RMB0.2 million in the period versus exchange gain of approximately RMB0.8 million which was mainly consolidated financial statement translation result in the corresponding period in 2011.

FUTURE PLANS AND PROSPECTS

The second half of 2012 appears to be as challenging as the first half of the year. The market has been expecting the PRC government to relax its governmental policies to stimulate domestic growth. The Group shall strive to maintain steady turnover growth by allocating resources to maintain its research and development capabilities in improving product formulas and innovating new products to meet market demands and by corporate promotional activities to further enhance market recognition of its brand name to enrol new customers. At the same time, the Group will keep close monitor and constant review of its cost structure to alleviate pressure from rising market prices of raw materials and operating overheads which are eating into our net profit. The Group continues to carry out its expansion plan by construction of a new plant in Nanshan to improve its production capacities for the benefits of the economy of scale it shall bring. The construction of the new factory is expected to be completed at the end of 2012. Current total construction cost amounted to RMB287.7 million.

LIQUIDITY AND FINANCIAL RESOURCES

As at 30 June 2012, the Group had net current assets less current liabilities of approximately RMB372.7 million (31 December 2011: RMB407.7 million). As at 30 June 2012, the Group's cash and cash equivalents together with bank deposits totalled approximately RMB110.8 million (31 December 2011: RMB135.6 million). The current ratio of the Group was approximately 4.2 as at 30 June 2012 (31 December 2011: 3.9).

The equity attributable to shareholders of the Company as at 30 June 2012 amounted to approximately RMB916.6 million (31 December 2011: RMB883.7 million). As at 30 June 2012, the Group had no bank loan (31 December 2011: RMB20.0 million). Therefore there was no gross debt gearing ratio (borrowings over total equity) as at 30 June 2012 (31 December 2011: 2.1%).

The financial health of the Group has been strong throughout the period under review as evident by the above figures.

FINANCING

As at 30 June 2012, the Group did not have any banking and loan borrowing facilities (31 December 2011: RMB20.0 million).

The Board considers that the existing financial resources together with funds generated from business operations will be sufficient to meet future expansion plans and, if necessary, the Group believes that it will be capable of obtaining additional financing with favourable terms.

The share capital of the Company comprised ordinary shares for the six months ended 30 June 2012.

FOREIGN EXCHANGE RISK AND INTEREST RATE RISK

The Group had net exchange loss of approximately RMB0.2 million for the six months ended 30 June 2012 (2011: RMB0.8 million net exchange gain). The Group mainly operates in the PRC with most of the transactions denominated in RMB, hence, no financial instrument of hedging was employed because hedging cost is relatively high and the conversion of RMB into foreign currencies is subject to the rules and regulations of foreign exchange control promulgated by the PRC government.

As at 30 June 2012, the Group did not have any borrowings. Should the Group require borrowings in future, it would most likely be bank borrowings denominated in Renminbi and at variable interest rate with reference to The People's Bank of China Prescribed Interest Rate. The Board is of the opinion that the Group is not subject to any significant foreign exchange risk and interest rate risk.
