## CHAIRMAN'S STATEMENT

For the full year 2012, we are pleased to report an 11.8% increase in revenues and a rise of 3.3% in net profit. These results demonstrate the cautious, yet profitable approach we have taken to grow our business, despite the uncertain macroeconomic conditions in China, pressure from competition, and increases in operating costs.

PCauto, our largest vertical portal in terms of revenue, delivered revenue growth of 17.3% in 2012. The portal benefited from the across the board increases seen in the advertising budgets of automobile manufacturers due to intensified competition in the retail market. However, we also saw increased competition from both vertical and diversified portals. Our auto business was temporarily affected during the second half of the year as a result of the dispute between the Chinese and Japanese governments. This caused a brief decrease in marketing spending by some manufacturers, though the impact was temporary as advertiser spending quickly returned to pre-dispute levels. To successfully navigate through these challenges, we worked to strengthen the quality of our content, which helped us increase user stickiness and brand equity, and remain relevant for our users.

PConline, our IT portal, continued its stable development in 2012 thanks in part to relatively steady advertising spending in the IT sector amid intensified competition. The political dispute between China and Japan last year also had a minor temporary impact on our IT business. We were able to marginally expand by shifting our advertising product mix to adapt to the market. With more spending coming from mobile device manufacturers and other similar areas, we will continue to devote resources to this important segment as demand for consumer electronic devices in China continues to expand in line with the rising middle class.

Revenue from our female-focused PClady portal increased 13.9% in 2012. As more and more women move online to research and purchase luxury and brand name products, we are devoting resources to this area in order to attract traffic from users who start their shopping experience with our portal. In addition, we have re-aligned our editorial team in order to strengthen our content, developed a variety of brand-building opportunities, and strengthened cooperation with e-commerce companies both online and offline.

Our other vertical portals, including PCgames, PCbaby and PChouse, continued to improve content and attract users during 2012 as they gradually build scale. While these brands remain relatively small, their user bases remain robust and continue to grow as new features and content are added. We expect that the revenue contribution from these portals will increase in the coming years.

Last year, we continued to invest in the development of mobile applications for each of our vertical portals. We also launched our third free online magazine for PClady on Apple's iPad which mirrors and expands on the content that is already available on the portal. Our online magazines generated a significant buzz in the market last year and garnered positive feedback. In particular, our PChouse magazine was named one of the Products of the Year by Apple's Mac App store in China. With the increased viewership that we attracted in 2012 along with continued development of our brand, we believe we are better positioned to capture the rapidly growing mobile internet market in 2013.

## CHAIRMAN'S STATEMENT

In anticipation of the changing competitive environment, we believe that we have taken the right measures to address current and potential challenges. We are committed to our long-term strategy and will continue to invest more on marketing to increase our brand value, strengthen our management team, and improve the quality of our content to increase user stickiness. This will help to ensure the success of Pacific Online Limited (the "Company", together with its subsidiaries collectively as the "Group") over the long-term.

### APPRECIATION

I would like to take this opportunity to express my gratitude, on behalf of the board of directors of the Company (the "Board"), to all our employees for their contribution and to all our shareholders for their continuous support of our Group.

## MANAGEMENT DISCUSSION AND ANALYSIS

### REVENUE

Revenue increased 11.8% from RMB640.1 million for the year ended 31 December 2011 to RMB715.6 million for the year ended 31 December 2012. In 2012, the Ministry of Finance in China launched a pilot program to gradually transition the taxation system from a business tax (“BT”) to a value-added tax (“VAT”). Pursuant to this program, the Group’s advertising revenue in Shanghai, Beijing and Guangzhou is now fully subject to VAT. For purposes of comparison, our reported revenue growth for 2012 would have been 15.8% had the BT remained applicable to our business during the year.

Revenue for PCauto, the Group’s automobile portal, increased 17.3% from RMB293.9 million in 2011 to RMB344.6 million in 2012. According to statistics from the China Passenger Car Association, passenger car sales in China rose 6.8% to 14.68 million vehicles in 2012. PCauto was able to outperform car industry growth because automobile advertisers continued to allocate more of their marketing budgets to digital media.

Revenue for PConline, the Group’s IT and consumer electronics portal, increased 3.3% from RMB257.5 million in 2011 to RMB266.1 million in 2012. The increase in revenue from PConline was mainly due to the overall increase in advertising spending from IT sector customers, including smart phone and tablet manufacturers.

Revenue for PClady, the Group’s women’s and fashion portal, increased 13.9% from RMB51.8 million in 2011 to RMB59.0 million in 2012. The rise mainly reflected increased demand in the women’s segment, especially for luxury and fashion goods.

Revenue for other operations, including the PCgames, PCbaby and PChouse portals, increased by 24.3% from RMB37.0 million in 2011 to RMB45.9 million in 2012. Revenue from these segments increased significantly as advertisers increasingly look to the internet as an effective platform to promote and market their products and brands.

As a percentage of total revenue, PCauto accounted for 45.9% in 2011 and 48.2% in 2012, PConline accounted for 40.2% in 2011 and 37.2% in 2012, PClady accounted for 8.1% in 2011 and 8.2% in 2012 and other operations accounted for 5.8% in 2011 and 6.4% in 2012. The Group continued to diversify its revenue base across different industry segments.

### COST OF REVENUE

Cost of revenue increased 5.0% from RMB197.9 million in 2011 to RMB207.7 million in 2012. The gross profit margin was 69.1% in 2011 and 71.0% in 2012.

The slight increase in cost of revenue was due to increases in personnel related expenses, higher sales commissions and increases in branch operating expenses during the year. This was partially offset by lower business tax charges through the implementation of the business tax/value-added tax reform policy, fully applied to us in late 2012.

## MANAGEMENT DISCUSSION AND ANALYSIS

### SELLING AND MARKETING COSTS

Selling and marketing costs increased 32.5% from RMB86.3 million in 2011 to RMB114.4 million in 2012. The increase was mainly due to increases in staff costs and marketing expenses.

### ADMINISTRATIVE EXPENSES

Administrative expenses increased by 37.6% from RMB48.7 million in 2011 to RMB67.1 million in 2012. The rise was primarily due to increases in hiring and salary, traveling expenses and higher provisions for the impairment of trade receivables during the full year 2012.

### PRODUCT DEVELOPMENT EXPENSES

Product development expenses increased by 38.3% from RMB28.7 million in 2011 to RMB39.7 million in 2012. The increase was mainly due to greater staff recruitment in research and development.

### OPERATING PROFIT BEFORE SHARE-BASED COMPENSATION EXPENSES (NON-GAAP)

Operating profit before share-based compensation expenses (non-GAAP) was RMB297.9 million in 2012, representing a 3.0% increase from RMB289.2 million in 2011.

### FINANCE INCOME AND COST

Net finance income was RMB5.3 million in 2011 and RMB4.7 million in 2012. The decline was mainly due to lower interest income on bank deposits.

### INCOME TAX EXPENSE

Income tax expense increased 2.6% from RMB58.5 million in 2011 to RMB60.0 million in 2012. The increase in income tax expense was primarily due to a modest increase in operating profit during the year.

### NET PROFIT

Net profit increased 3.3% from RMB228.9 million in 2011 to RMB236.5 million in 2012.

### LIQUIDITY AND FINANCIAL RESOURCES

As of 31 December 2012, the Group had short-term deposits and cash totaling RMB439.9 million, compared with RMB432.2 million as of 31 December 2011.

## MANAGEMENT DISCUSSION AND ANALYSIS

In 2012, net cash generated from operating activities was RMB199.4 million, net cash used in investing activities was RMB23.3 million, and net cash used in financing activities was RMB168.0 million. The Group had a net increase in cash and cash equivalents of RMB8.1 million for the year 2012.

In 2011, net cash generated from operating activities was RMB218.2 million, net cash generated from investing activities was RMB84.7 million, and net cash used in financing activities was RMB134.5 million. The Group had a net increase in cash and cash equivalents of RMB168.4 million for the year 2011.

The Company had no external borrowings as of 31 December 2012 and 2011, respectively.

### **BANK BORROWINGS**

As of both 31 December 2012 and 31 December 2011, the Group did not have any bank borrowings and therefore, its gearing ratio, representing the ratio of total bank borrowings to shareholders' equity, was nil for both years.

### **MATERIAL ACQUISITIONS AND DISPOSALS**

During the year ended 31 December 2012, the Group had no material acquisitions or disposals of subsidiaries and associates.

### **CHARGES ON ASSETS**

As at 31 December 2012, the Group had no bank deposits or other assets pledged to secure its banking facilities.

### **FOREIGN EXCHANGE RISK**

The Group's operating activities were principally carried out in China. Most transactions, assets and liabilities were denominated in Renminbi, and therefore the overall foreign currency risk was not considered to be significant.

### **BUSINESS OUTLOOK**

Looking ahead, the Group will continue to adapt to current trends and technologies in order to ensure that it is keeping up with the changing needs of its operating environment. In view of the government's policy on expanding domestic consumption through urbanization in the coming years, and the continual growth of the online advertising market, the Group is confident that the potential for future business opportunities remains strong. The Group is devoted to enhancing and developing the content on its existing vertical portals, and to improving its brand recognition in order to strengthen competitiveness and provide business growth potential. The Group will also continue to invest in mobile applications, with the aim of enhancing long-term shareholder value.

## INDEPENDENT AUDITOR'S REPORT

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation of consolidated financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

### OPINION

In our opinion, the consolidated financial statements give a true and fair view of the state of affairs of the Company and of the Group as at 31 December 2012, and of the Group's profit and cash flows for the year then ended in accordance with Hong Kong Financial Reporting Standards and have been properly prepared in accordance with the disclosure requirements of the Hong Kong Companies Ordinance.

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## 1. GENERAL INFORMATION

### (a) General information

Pacific Online Limited (the "Company") was incorporated on 27 August 2007 as an exempted company with limited liability under the Company Law, Cap.22, (Law 3 of 1961, as combined and revised) of the Cayman Islands. The address of its registered office is Cricket Square, Hutchins Drive, P.O. Box 2681, Grand Cayman, KY1-1111, Cayman Islands.

The Company and its subsidiaries (together, the "Group") are principally engaged in the provision of internet advertising services in the People's Republic of China ("PRC").

The Company has its shares listed on The Stock Exchange of Hong Kong Limited (the "Stock Exchange") since 18 December 2007.

These consolidated financial statements have been approved for issue by the board of directors (the "Board") of the Company on 26 March 2013.

### (b) Operations of the online advertising business of the Group

The PRC laws and regulations limit foreign ownership of companies providing value-added telecommunications services, which include online advertising through the internet, as such the following arrangements have been made:

- *Establishment of Guangzhou Yingxin Computer Technology Exchange Co., Ltd. (廣州英鑫計算機科技交流有限公司, "GZ Yingxin")*

GZ Yingxin, a PRC limited liability company, was established on 25 November 2003 by Ms. Zhang Cong Min, Ms. Fan Zeng Chun and Ms. Lu Wu Qing, employees of Takehigh Industrial Limited ("Takehigh") and its subsidiaries (together, the "Takehigh Group") who are PRC citizens as its legal owners (the "3 Registered Owners"). Takehigh also made loans to the 3 Registered Owners for the financing of the initial working capital of GZ Yingxin in connection with its establishment. Through the execution of various contracts and agreements (collectively defined as "Structure Contracts", see below for more details) among the Takehigh Group, GZ Yingxin and the 3 Registered Owners, the Takehigh Group controls GZ Yingxin. GZ Yingxin is accounted for as a subsidiary of the Takehigh Group.

- *Transfer/acquisition of equity ownership of certain PRC operating companies to GZ Yingxin*

Through various equity transfer arrangements commenced after the establishment of GZ Yingxin, all the equity interests of two operating companies in the PRC, Guangzhou Pacific Advertising Co., Ltd. (廣州市太平洋廣告有限公司, "GZP Advertising") and Guangdong Pacific Internet Information Service Co., Ltd. (廣東太平洋互聯網信息服務有限公司, "GDP Internet") were transferred to GZ Yingxin in or before August 2007.

Thereafter, GZ Yingxin became the holding company of GDP Internet and GZP Advertising.

### (b) Operations of the online advertising business of the Group (Continued)

#### — *Structure Contracts arrangements made between GZ Yingxin and its subsidiaries*

In addition to GZ Yingxin, Structure Contracts have also been executed among Guangzhou Pacific Computer Information Consulting Co., Ltd. (廣州太平洋電腦信息諮詢有限公司, "GZP Computer"), a subsidiary of the Takehigh Group, the subsidiaries of GZ Yingxin, and the 3 Registered Owners. Through these contractual arrangements, the decision-making rights and operating and financing activities of GZ Yingxin and its subsidiaries (collectively the "GZ Yingxin Group") are ultimately controlled by Takehigh. Takehigh and GZP Computer are also entitled to substantially all the operating profits and residual benefits generated by GZ Yingxin Group under these arrangements. In particular, the 3 Registered Owners are required under the contractual arrangements made with the Takehigh Group to transfer their interests in GZ Yingxin to the Takehigh Group or its designee, upon the Takehigh Group's request at the lowest amount of consideration permitted by PRC law and upon the time when the relevant PRC law and regulations allow such to do so.

Further, the Takehigh Group owns the intellectual property developed by GDP Internet and it also receives the cash flow derived from the operations of GDP Internet and its subsidiaries through the levying of service and consultancy fees. The ownership interests in GZ Yingxin and GDP Internet have also been pledged by the 3 Registered Owners to the Takehigh Group.

## 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

### 2.1 Basis of presentation

The consolidated financial statements of the Group have been prepared in accordance with Hong Kong Financial Reporting Standards ("HKFRS"). They have been prepared under the historical cost convention.

The preparation of financial statements in conformity with HKFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in note 4.

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

### 2.2 Consolidation

The consolidated financial statements include the financial statements of the Company and all of its subsidiaries made up to 31 December.

#### *Subsidiaries*

Subsidiaries are all entities (including special purpose entities) over which the Group has the power to govern the financial and operating policies generally accompanying a shareholding of more than one half of the voting rights. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Group controls another entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are de-consolidated from the date that control ceases.

The Group uses the acquisition method of accounting to account for business combinations. The consideration transferred for the acquisition of a subsidiary is the fair values of the assets transferred, the liabilities incurred and the equity interests issued by the group. The consideration transferred includes the fair value of any asset or liability resulting from a contingent consideration arrangement. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. On an acquisition-by-acquisition basis, the group recognises any non-controlling interest in the acquiree either at fair value or at the non-controlling interest's proportionate share of the recognised amounts of acquiree's identifiable net assets.

The directors of the Company have concluded that it is appropriate to include GZ Yingxin Group in its consolidated financial statements, notwithstanding lack of the share ownership, because in substance the contractual arrangements described in note 1(b) above give Takehigh control over GZ Yingxin and GDP Internet by way of controlling the operational and financial decisions of the GZ Yingxin Group.

Inter-company transactions, balances and unrealised gains on transactions between group companies are eliminated. Profits and losses resulting from inter-company transaction that are recognised in assets are also eliminated.

Accounting policies of subsidiaries have been changed where necessary in the consolidated financial statements to ensure consistency with the policies adopted by the Group.

In the Company's balance sheet, the interests in subsidiaries are stated at cost less provision for impairment losses (note 2.8). The results of subsidiaries are accounted by the Company on the basis of dividend received and receivable.

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

### 2.3 Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-makers. The chief operating decision-makers, who are responsible for allocating resources and assessing performance of the operating segments, have been identified as the executive directors that make strategic decisions.

### 2.4 Foreign currency translation

#### (a) *Functional and presentation currency*

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates (the 'functional currency'). The consolidated financial statements are presented in RMB, which is the functional and presentation currency of all the individual entities of the Group.

#### (b) *Transactions and balances*

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are re-measured. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the consolidated income statement within 'finance income—net', except when deferred in equity as qualifying cash flow hedges or qualifying net investment hedges.

#### (c) *Group companies*

The results and financial position of all the group entities (none of which has the currency of a hyperinflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- assets and liabilities for each balance sheet presented are translated at the closing rate at the date of that balance sheet;
- income and expenses for each income statement are translated at average exchange rates (unless this average is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the dates of the transactions); and
- all resulting exchange differences are recognised as a separate component of equity.

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

### 2.4 Foreign currency translation (Continued)

#### (c) Group companies (Continued)

On consolidation, exchange differences arising from the translation of the net investment in foreign operations are taken to shareholders' equity. When a foreign operation is partially disposed of or sold, exchange differences that were recorded in equity are recognised in the consolidated income statement as part of the gain or loss on sale.

### 2.5 Lease prepayment

Lease prepayment represents payments of land use rights to the PRC's land bureau. Land use right is carried at cost less accumulated amortisation and impairment losses. Amortisation is provided to write off the cost of lease prepayment on a straight-line basis over the periods of the right which are from 39 years to 49 years.

### 2.6 Property and equipment

Property and equipment are stated at historical cost less accumulated depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to the income statement during the financial period in which they are incurred.

Depreciation on property and equipment is calculated using the straight-line method to allocate their costs to their residual values over their estimated useful lives, as follows:

Buildings	39 years
Building improvement	10 years
Computers and servers	3–5 years
Motor vehicles	5 years
Furniture, fittings and equipment	5 years
Leasehold improvements	the shorter of their useful lives and the lease terms

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each balance sheet date.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount (note 2.8).

Gains and losses on disposals are determined by comparing proceeds with the carrying amount and are recognised within administrative expenses, in the consolidated income statement.

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

### 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### 2.7 Intangible assets

(a) *Computer software licences*

Acquired computer software licenses are capitalised on the basis of costs incurred to acquire and bring to use the specific software. These costs are amortised over their estimated useful lives of 2 years.

(b) *Club membership*

Club membership is stated at cost less impairment losses, if any. No amortisation is charged as the club membership has an indefinite useful life because the Company has the contractual right to control over the asset and legal rights with no definite period.

#### 2.8 Impairment of non-financial assets and investments in subsidiaries

Assets that have an indefinite useful life, for example club membership, are not subject to amortisation and are tested annually for impairment. Other assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units). Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at each reporting date.

Impairment testing of the investments in subsidiaries is required upon receiving dividends from these investments if the dividend exceeds the total comprehensive income of the subsidiary in the period the dividend is declared or if the carrying amount of the interest in the separate financial statements exceeds the carrying amount of the investee's net assets in the consolidated financial statements.

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

### 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### 2.9 Financial assets

##### 2.9.1 Classification

The Group currently only has financial assets in the category of loans and receivables. This classification depends on the purpose for which the financial assets were acquired. Management determines the classification of its financial assets at initial recognition.

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except for maturities greater than 12 months after the end of the reporting period. These are classified as non-current assets. The loans and receivables comprise 'trade and other receivables' (note 2.12), 'short-term bank deposits with original terms of over three months' and 'cash and cash equivalents' (note 2.13) in the balance sheet.

##### 2.9.2 Recognition and measurement

Regular purchases and sales of financial assets are recognised on the trade-date — the date on which the Group commits to purchase or sell the asset. Investments are initially recognised at fair value plus transaction costs for all financial assets not carried at fair value through profit or loss. Financial assets are derecognised when the rights to receive cash flows from the investments have expired or have been transferred and the Group has transferred substantially all risks and rewards of ownership. Loans and receivables are subsequently carried at amortised cost using the effective interest method.

#### 2.10 Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

### 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### 2.11 Impairment of financial assets

##### *Assets carried at amortised cost*

The Group assesses at the end of each reporting period whether there is objective evidence that a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is impaired and impairment losses are incurred only if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

Evidence of impairment may include indications that the debtors or a group of debtors is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganisation, and where observable data indicate that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

The Group first assesses whether objective evidence of impairment exists.

The amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced and the amount of the loss is recognised in the consolidated income statement. As a practical expedient, the Group may measure impairment on the basis of an instrument's fair value using an observable market price.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised (such as an improvement in the debtor's credit rating), the reversal of the previously recognised impairment loss is recognised in the consolidated income statement.

#### 2.12 Trade and other receivables

Trade receivables are amounts due from customers for services performed in the ordinary course of business. If collection of trade and other receivables is expected in one year or less (or in the normal operating cycle of the business if longer), they are classified as current assets. If not, they are presented as non-current assets.

Trade and other receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment.

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

### 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### 2.13 Cash and cash equivalents

Cash and cash equivalents include cash in hand, deposits held at call with banks, and other short-term highly liquid investments with original maturities of three months or less.

#### 2.14 Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

Where any group company purchases the Company's equity share capital (treasury shares), the consideration paid, including any directly attributable incremental costs (net of income taxes) is deducted from equity attributable to the Company's equity holders until the shares are cancelled or reissued. Where such shares are subsequently reissued, any consideration received, net of any directly attributable incremental transaction costs and the related income tax effects, is included in equity attributable to the Company's equity holders.

#### 2.15 Accruals and other payables

Accruals and other payables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method unless the effect of discounting would be immaterial, in which case they are stated at cost.

#### 2.16 Current and deferred income tax

The tax expense for the period comprises current and deferred tax. Tax is recognised in the consolidated income statement, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case the tax is also recognised in other comprehensive income or directly in equity, respectively.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Company and its subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax is recognised, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, the deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantively enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

### 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### 2.16 Current and deferred income tax (Continued)

Deferred income tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Deferred income tax is provided on temporary differences arising on interests in subsidiaries, except where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income taxes assets and liabilities relate to income taxes levied by the same taxation authority on either the taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

#### 2.17 Employee benefits

##### (a) Pension obligations

The group companies incorporated in the PRC contributes based on certain percentage of the salaries of the employees to a defined contribution retirement benefit plan organised by relevant government authorities in the PRC on a monthly basis. The government authorities undertake to assume the retirement benefit obligations payable to all existing and future retired employees under these plans and the Group has no further obligation for post-retirement benefits beyond the contributions made.

The group companies incorporated in Hong Kong operate a defined contribution plan, the assets of which are generally held in a separate trustee-administered fund. These group companies pay fixed contribution into such defined contribution plan and have no legal or constructive obligations to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to employee services in the current and prior periods.

Contributions to these defined contributions plans are expensed as incurred.

##### (b) Housing benefits

Full-time PRC employees of the Group are entitled to participate in government-sponsored housing funds. The Group contributes to these funds based on certain percentages of the salaries of these employees on a monthly basis. The Group's liability in respect of these funds is limited to the contribution payable in each period. Contributions to the housing funds are expensed as incurred.

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

### 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### 2.18 Share-based payment

The Group operates a number of share-based compensation plans (including share option schemes and share award scheme), under which the Group receives services from employees as consideration for equity instruments (including share options and awarded shares) of the Company. The fair value of the employee services received in exchange for the grant of equity instruments of the Company is recognised as an expense over the vesting period, which is the period over which all of the specified vesting conditions are to be satisfied, and credited to share-based compensation reserve under equity.

For grant of share options, the total amount to be expensed is determined by reference to the fair value of the options granted by using the Binomial valuation model or the Trinomial valuation model, which includes the impact of market performance conditions (such as the Company's share price) but excludes the impact of service condition and non-market performance conditions. For grant of awarded shares, the total amount to be expensed is determined by reference to the market price of the Company's shares at the grant date.

Non-market performance and services conditions are included in assumptions about the number of options that are expected to become vested.

From the perspective of the Company, the Company grants its equity instruments to employees of its subsidiaries to exchange for their services related to the subsidiaries. Accordingly, the share-based compensation expenses, which are recognised in the consolidated financial statements, are treated as part of the "Interests in subsidiaries" in the Company's balance sheet.

When the options are exercised, the proceeds received net of any directly attributable transaction costs are credited to share capital (nominal value) and share premium.

#### 2.19 Revenue recognition

Revenue comprises the fair value of the consideration received or receivable for the provision of services in the ordinary course of the Group's activities. Revenue is shown after eliminating sales within the Group.

The Group recognises revenue when the amount of revenue can be reliably measured, it is probable that future economic benefits will flow to the entity and when specific criteria have been met for each of the Group's activities as described below. The Group bases its estimates on historical results, taking into consideration the type of customer, the type of transaction and the specifics of each arrangement.

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

### 2.19 Revenue recognition (Continued)

#### (a) *Online advertising revenues*

The Group derives its online advertising services revenues from placing online advertisements such as banners, links and logos on the Group's websites in the PRC for its customers.

Revenues from online advertisements are derived from written contracts with customers that include the related fee, payment terms and provide persuasive evidence of the arrangement. The majority of the online advertising contracts are for the provision of online advertisement for a fixed period of time with no guaranteed minimum impression level. Revenues from these contracts are recognised based on the time period the advertisement is displayed. In all contracts, there are no future obligations after the completion of the contract and no rights of refund related to the impression levels.

#### (b) *Interest income*

Interest income is recognised using the effective interest method. When a receivable is impaired, the Group reduces the carrying amount to its recoverable amount, being the estimated future cash flow discounted at the original effective interest rate of the instrument, and continues unwinding the discount as interest income. Interest income on impaired receivable is recognised using the original effective interest rate.

#### (c) *Dividend income*

Dividend income is recognised when the right to receive payment is established.

### 2.20 Product development expenses

Expenditure on product development research is expensed as incurred.

Expenditure on development or from the development phase of an individual project is recognised as an internally generated intangible if, and only if, the Group can demonstrate all of the following:

- the technical feasibility of completing the intangible asset so that it will be available for use or sale;
- its intention to complete the intangible asset and use or sell it;
- its ability to use or sell the intangible asset;
- how the intangible asset will generate probable future economic benefits;

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

### 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### 2.20 Product development expenses (Continued)

- the availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset; and
- its ability to measure reliably the expenditure attributable to the intangible asset during its development.

Other development expenditures that do not meet these criteria are recognised as expense as incurred. Development costs previously recognised as an expense are not recognised as an asset in a subsequent period.

#### 2.21 Operating leases

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are charged to the income statement on a straight-line basis over the period of the lease.

#### 2.22 Dividend distribution

Dividend distribution to the Company's equity holders is recognised as a liability in the Group's and Company's financial statements in the period in which the dividends are approved by the Company's shareholders.

#### 2.23 Government grants

Grants from the government are recognised at their fair value where there is a reasonable assurance that the grant will be received and the Group will comply with all attached conditions.

Government grants relating to costs are deferred and recognised in the income statement over the period necessary to match them with the costs that they are intended to compensate.

Government grants relating to property and equipment are included in non-current liabilities as deferred government grants and are credited to the income statement on a straight-line basis over the expected lives of the related assets.

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## 3. FINANCIAL RISK MANAGEMENT

### (a) Financial risk factors

The Group's activities expose it to a variety of financial risks: foreign exchange risk, credit risk and liquidity risk. The Group's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Group's financial performance.

#### (i) Foreign exchange risk

The Group mainly operates in the PRC and most of the Group's transactions, assets and liabilities are denominated in RMB. Therefore, to maintain the flexibility in the Company and HK subsidiaries' payment of daily operation, the Group holds certain monetary assets denominated in USD or HKD subject to certain thresholds stated in its treasury mandate. This exposes the Group to foreign exchange risk.

There is no other written policy to manage the foreign exchange risk in relation to USD and HKD as management considers that such risk could not be effectively reduced in a low-cost way. Accordingly, the Group did not purchase any forward contract to hedge the foreign exchange risk during 2012.

At 31 December 2012, the exchange rate of RMB to HKD and USD were 0.8108 and 6.2855 respectively. If RMB had strengthened by 0.5% against the HKD/USD with all other variables held constant, post tax profit for the year would have been RMB56,000 (2011: RMB100,000) lower, mainly as a result of net foreign exchange losses in HKD/USD denominated cash at bank and other receivables as at 31 December 2012.

#### (ii) Credit risk

The Group is exposed to credit risk in relation to its cash and cash equivalents, deposits with banks, as well as accounts and other receivables.

To manage this risk, deposits are mainly placed with state-owned financial institutions in the PRC and international financial institutions outside the PRC of high credit quality. There was no recent history of default of cash and cash equivalents and term deposits with original terms of over three months from these financial institutions

For trade receivables, as mentioned in note 2.19(a), a material portion of online advertising services revenues were derived from advertising agents. If they experience financial difficulties in settling the outstanding amount due to the Group, the Group's online advertising services might be adversely affected in terms of recoverability of receivables.

However, in view of the Group's history of cooperation with the advertising agents and the sound collection history of the receivables due from them, management believes that there is no material credit risk inherent in the Group's outstanding balance of trade receivables.

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

### 3. FINANCIAL RISK MANAGEMENT (CONTINUED)

#### (a) Financial risk factors (Continued)

##### (iii) Liquidity risk

The Group aims to finance its operations with its own capital and earnings. It did not have any borrowings or credit facilities committed/utilised during the year ended 31 December 2012. Management considers that the Group does not have significant liquidity risk.

#### (b) Capital risk management

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

#### (c) Fair value estimation

The different levels for fair value valuation have been defined as follows:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1).
- Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (level 2).
- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (level 3).

The carrying amounts of the Group's trade and other receivables and accruals and other payables approximate their fair values due to their short maturities.

### 4. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS

Estimates and judgements are continually evaluated and are based on historical experiences and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The Group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

### 4. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS (CONTINUED)

#### (a) Estimated impairment of receivables

The Group records impairment of receivables based on an assessment made by management on the recoverability of trade and other receivables. Provisions are applied where events or changes in circumstances indicate that the balances may not be collectible. Impairment assessment requires the use of judgment and estimates. Where the expectation is different from the original estimate, such difference will impact both the carrying value of trade and other receivables and the impairment charge in the period in which such estimate has been changed.

#### (b) Recognition of income taxes

The Group is mainly subject to income tax in the PRC. There are transactions (including entitlement to preferential tax treatment and deductibility of expenses) where the ultimate tax determination is uncertain until the final tax position is confirmed by relevant tax authorities. In addition, the Group recognises liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

Deferred tax assets are recognised for all temporary differences, carry forward of unused tax credits and unused tax losses, to the extent that it is probable that taxable profit will be available in the future against which the temporary differences, the carry forward of unused tax credits and unused tax losses could be utilised. Deferred income tax is determined using tax rates and laws that have been enacted or substantially enacted at the balance sheet date and which are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled. The directors consider that there would be adequate taxable profits to be generated in the future in order to utilise these deferred tax assets recognised.

#### (c) Recognition of share-based compensation expense

The Group's employees have participated in share option schemes or share award scheme of the Company. Management of the Group have used the Binomial valuation model or the Trinomial valuation model to determine the fair value of the share options granted, which are based on fair value and various attributes of the underlying shares of the Company. Significant estimates and assumptions are required to be made in determining the parameters for applying the Binomial valuation model and the Trinomial valuation model, including estimates and assumptions regarding the risk-free rate of return, expected dividend yield and volatility of the underlying shares. In addition, the Group is required to estimate the expected percentage of grantees that will remain in employment with the Group. Changes in these estimates and assumptions could have a material effect on the determination of the fair value of share options and the amount of share options and awarded shares expected to become vested, which may in turn significantly impact the determination of the share-based compensation expense.

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## 5. SEGMENT INFORMATION

The Group is principally engaged in the provision of internet advertising services for different commodities. The chief operating decision-makers review the Group's internal reports in order to assess performance and allocate resources. Management has determined the operating segments based on these internal reports.

The chief operating decision-makers consider the internet advertising business from the perspective of the different internet portals which it operates. As all revenues of the Group are generated from customers in the PRC, they are not further evaluated on a geographic basis.

The chief operating decision-makers assess the performance of the operating segments based on the revenues generated. The three major reportable operating segments derive their revenues primarily from the three major portals, namely PCauto, PConline and PClady. The Company currently does not allocate cost of revenue, operating costs or assets to its segments, as its chief operating decision-makers do not use this information to allocate resources to or evaluate the performance of the operating segments. Therefore, the Company does not report a measure of profit or total assets for each reportable segment.

Revenues of other segments relate to those generated from other portals, including on-line game, baby and home products, e-commerce and other services.

There were no inter-segment sales for the year ended 31 December 2012 (2011: same). The revenue from external parties reported to the chief operating decision-makers is measured in a manner consistent with that in the consolidated income statement.

	<b>PCauto</b> RMB'000	<b>PConline</b> RMB'000	<b>PClady</b> RMB'000	<b>Others</b> RMB'000	<b>Group</b> RMB'000
<b>For the year ended 31 December 2012</b>

<b>For the year ended 31 December 2011</b>					
Revenue	293,850	257,489	51,799	36,957	640,095

Though the Company is domiciled in the Cayman Islands, for the year ended 31 December 2012, all revenues of the Group were derived from external customers and they were all generated from the PRC (2011: same).

As at 31 December 2012, majority of non-current assets of the Group other than the club membership included in the intangible assets were located in the PRC (2011: same).

For the year ended 31 December 2012, there was no revenue derived from a single external customer accounting for ten percent or more of the Group's revenues (2011: same).

### (a) Pensions scheme—defined contribution plans

The PRC employees of the Group participate in defined contribution retirement schemes based on laws and regulations in the PRC. Each employee covered by these schemes is entitled to, after their retirement from the Group, a monthly pension as determined by these schemes. The local government authorities of the PRC are responsible for the pension liabilities to these retired employees. The Group made monthly contributions to the retirement schemes at rates ranging from 12% to 22% of the basic salaries of employees during the year ended 31 December 2012.

All the Hong Kong employees of the Group participate in a mandatory provident scheme (the “MPF Scheme”). Under the MPF Scheme, each company of the Group in Hong Kong (the employer) and its employees make monthly contributions to the scheme at 5% of the employees’ earnings as defined under the Mandatory Provident Fund legislation. The contributions from each of the employers and employees are subject to a cap of HKD1,000 per month and thereafter contributions are voluntary.

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

### 10. INCOME TAX EXPENSE (CONTINUED)

Current taxation primarily represented the provision for PRC Corporate Income Tax ("CIT") for subsidiaries operating in the PRC. These subsidiaries are subject to CIT on their taxable income as reported in their respective statutory financial statements adjusted in accordance with the relevant tax laws and regulations in the PRC.

Pursuant to the PRC Corporate Income Tax Law ("CIT Law"), the CIT rate for domestic enterprises and foreign invested enterprises is 25%. In addition, the CIT Law provides for, among others, a preferential tax rate of 15% for enterprises qualified as High and New Technology Enterprises ("HNTE"). GZP Computer and GDP Internet, the principal operating subsidiaries of the Company, were formally designated as HNTE for the three years ending 31 December 2013 under the CIT Law. As a result, GZP Computer and GDP Internet are subject to CIT at a rate of 15% from 2011 to 2013. They used 15% in the computation of deferred taxes as of 31 December 2012 and the current income tax charge for the year then ended. All the other PRC entities of the Group are subject to CIT at a rate of 25% (2011: same) in accordance with CIT Law.

The tax on the Group's profit before income tax differs from the theoretical amount that would arise using the statutory tax rate applicable to profits of all the consolidated PRC entities as follows:

	2012 RMB'000	2011 RMB'000

Tax charge	59,958	58,457

- (a) Two of the Group's major principal operating subsidiaries in the PRC were approved by the relevant tax authority to be entitled to the HNTE status in 2012. Accordingly, preferential tax treatments were enjoyed by these two companies for the year ended 31 December 2012 (2011: same).
- (b) Expenses not deductible for tax purposes include primarily share-based compensation expenses, and expenses incurred by the Company and subsidiaries incorporated in Hong Kong.

Profit attributable to equity holders of the Company (RMB'000)	236,471	228,929

### (b) Diluted

Diluted earnings per share is calculated by adjusting the weighted average number of ordinary shares outstanding by the assumption of the conversion of all potential dilutive ordinary shares arising from share options and awarded shares granted by the Company (collectively forming the denominator for computing diluted earnings per share). No adjustment is made to earnings (numerator).
