2. 編製基準及會計政策

除以下所述外,編製2013年中期簡明綜合財務報表所採用之會計政策和計算方法與本集團截至2012年12月31日止年度已審核之年度財務報表所採用及所述者一致。

(甲) 本集團更改會計政策之決定

年內,本集團更改行產相關之會計政策。於往年,租賃物業中所包含之土 地及建築物由於缺乏可靠之估量分割 土地及建築物兩者各自的賬面值,因 而整項作融資租賃處理及按公平值減 累計折舊列示。

考慮到市場發展及參考香港銀行同業採納之有關政策,本集團決定由2013年1月1日起將其行產由重估基準改為歷史成本基準作會計處理。本集團並已追溯應用此會計政策之變更。

Note:

1. General information

Dah Sing Banking Group Limited (the "Company") is a bank holding company. Its principal subsidiary is Dah Sing Bank, Limited ("DSB"), which is a licensed bank in Hong Kong. The Company together with its subsidiaries (collectively the "Group") provide banking, financial and other related services.

2. Basis of preparation and accounting policies

Except as described below, the accounting policies and methods of computation used in the preparation of the 2013 interim condensed consolidated financial statements are consistent with those used and described in the Group's annual audited financial statements for the year ended 31 December 2012.

(a) Change in accounting policy elected by the Group

During the year, the Group has elected to change its accounting policy in respect of premises. In the past, leasehold properties comprising land and buildings held on which a reliable estimate was not available on the split of the carrying value attributable to each of the land and building elements were accounted for as finance leases and shown at fair value less subsequent depreciation.

In view of market developments, and a review of the relevant accounting policy adopted by peer banks in Hong Kong, the Group has decided to change from revaluation to historical cost based accounting for its premises with effect from 1 January 2013. The Group has also applied this change in accounting policy retrospectively.

In assessing this change in accounting policy, the Group has considered the requirements set out in HKAS 8 "Accounting Policies, Changes in Accounting Estimates and Errors". HKAS 8 specifies that, amongst other things, for an entity to justify a change in accounting policy that is not mandatorily required by a new accounting standard or amendment to an existing accounting standard issued by the HKICPA, the entity must demonstrate that the change will result in the financial statements providing more reliable and more relevant information about the effects of transactions, other events or conditions on the entity's financial position, financial performance or cash flows. The Group is satisfied that this change in accounting policy is justified by the relevant circumstances and therefore complies with HKAS 8.

(甲) 本集團更改會計政策之決定(續)

此變更對綜合財務狀況表及綜合收益 賬內有關項目之影響如下列示:

- (乙) 以下為於2013年1月1日開始之財政年 度首次必須實行之新準則及準則之修 訂:
 - 香港會計準則第1號《財務報 表呈列》對有關其他全面收益」)作出修可 (「其他全面收益」)作出修可 規定機構呈列於其他全面收 之項目必須按照項目其後是否 有可能重列調整而重新分類至 損益賬為基礎分類。該修訂 未提到哪些項目須呈列在其他 全面收益。該修訂對本集團並 無任何重大影響。

In respect of the Group's financial position as at, and results for the six months ended, 30 June 2013, the impact from this change in accounting policy is a reduction of depreciation charge by HK\$48,222,000 and an increase in deferred tax charge of HK\$4,088,000.

- (b) The following new standards and amendments to standards are mandatory for the first time for the financial year beginning 1 January 2013:
 - Amendments to HKAS 1, "Presentations of Financial Statements", regarding other comprehensive income ("OCI"), require entities to aggregate items presented in OCI on the basis of whether they are potentially reclassifiable to profit or loss subsequently (reclassification adjustments). The amendments do not address which items are presented in OCI. The amendments do not have any material impact on the Group.

- (乙) 以下為於2013年1月1日開始之財政年 度首次必須實行之新準則及準則之修 訂:(續)
 - 香港財務報告準則第7號《披露一金融資產及金融負債的抵銷》之修訂於2011年12月頒佈,規定機構須就金融資產及金融負債的抵銷及有關安排對其財務狀況之影響或潛在影響,作出披露。該修訂對本集團之財務報表並無重大影響。
 - 香港財務報告準則第10號《綜合財務報表》乃於現有原則下制定,根據控制權概念來確定一間機構是否須包括於其母公司之綜合財務報表內。該準則針對難以評估控制權的情況提供額外的指引。本集團已之機構其綜合狀況沒有任何變更。
 - 香港財務報告準則第11號《聯 合協議》制定聯合協議之各方 編製財務報告的原則,且要求 在聯合協議每一方就其於有關 協議下所涉及的權利及義務作 出評估而確定協議之類別。此 準則要求共同營運人根據適用 於特定資產、負債、收入及支 出之相關香港財務報告準則確 認及計量其於協議下應佔之資 產及負債以及有關之收入及支 出。除非有關機構已被豁免應 用香港會計準則第28號《聯營 公司及合資企業投資》之權益 會計法,合資方須根據香港會 計準則第28號之權益會計法確 認及報告此投資。因本集團已 採納權益會計法處理聯營公司 及共同控制實體之投資,該準 則對本集團之財務報表並無影 纏。

2. Basis of preparation and accounting policies (Continued)

- (b) The following new standards and amendments to standards are mandatory for the first time for the financial year beginning 1 January 2013: (Continued)
 - Amendments to HKFRS 7, "Disclosures Offsetting Financial Assets and Financial Liabilities", issued in December 2011 requires disclosures about the effect or potential effects of offsetting financial assets and financial liabilities and related arrangements on an entity's financial position. There is no material impact to the financial statements of the Group as a result of this amendment.
 - HKFRS 10, "Consolidated financial statements", builds on existing principles by identifying the concept of control as the determining factor in whether an entity should be included within the consolidated financial statements of the parent company. The standard provides additional guidance to assist in the determination of control where this is difficult to assess. It has been assessed that there is no change in the consolidation status of entities within the Group.
 - HKFRS 11, "Joint arrangements", establishes principles for financial reporting by parties to a joint arrangement, and requires a party to a joint arrangement to determine the type of joint arrangement in which it is involved by assessing its rights and obligations arising from the arrangement. The standard requires a joint operator to recognise and measure the assets and liabilities (and recognise the related revenues and expenses) in relation to its interest in the arrangement in accordance with relevant HKFRSs applicable to the particular assets, liabilities, revenues and expenses. It requires a joint venturer to recognise an investment and to account for that investment using the equity method in accordance with HKAS 28, "Investments in Associates and Joint Ventures", unless the entity is exempted from applying the equity method as specified in that standard. There is no impact to the financial statements of the Group as a result of this standard as the Group has adopted equity method of accounting to account for the investments in associate and jointly controlled entities.

- (乙) 以下為於2013年1月1日開始之財政年 度首次必須實行之新準則及準則之修 訂:(續)
 - 香港財務報告準則第12號《對 其他實體之權益之披露》包括 對其他實體之各種權益的披露 要求,包括聯合協議、聯營公 司、特定目的實體及其他資產 負債表外之實體。因本集團並 無未綜合之結構性實體,該準 則對本集團之財務報表並無影
 - · 香港財務報告準則第13號《公 平值計量》提供公平值精確的 定義,以及對公平值計量看在的 定義,以及對公平值計量看在的 一來源及披露的野務報告。 善者個別所數數。 一致性及減少其複雜性。 則要求並未擴大公平值會計之 應用,但就於香港財務或允準 則內之其他準則已要求或準則 時用公平值提供指引。該準 對本集團之財務報表並無重大 影響。
 - 香港會計準則第19號《僱員福利》於2011年6月作出修訂。其 影響將會是即時確認過往之所 有服務成本,及以應用貼現率 於淨界定福利負債(資產)而計 算之淨利息數額,取代利息成 本和計劃資產之預期回報。此 準則並不適用於本集團。

2. Basis of preparation and accounting policies (Continued)

- (b) The following new standards and amendments to standards are mandatory for the first time for the financial year beginning 1 January 2013: (Continued)
 - HKFRS 12, "Disclosures of interests in other entities", includes the disclosure requirements for all forms of interests in other entities, including joint arrangements, associates, special purpose vehicles and other off balance sheet vehicles. There is no impact to the financial statements of the Group as the Group has no unconsolidated structured entities.
 - HKFRS 13, "Fair value measurement", aims to improve consistency and reduce complexity by providing a precise definition of fair value and a single source of fair value measurement and disclosure requirements for use across HKFRSs. The requirements do not extend the use of fair value accounting but provide guidance on how it should be applied where its use is already required or permitted by other standards within HKFRSs. There is no material impact to the financial statements of the Group as a result of this standard.
 - HKAS 19, "Employee Benefits", was amended in June 2011. The impact will be to immediately recognise all past services costs, and to replace interest cost and expected return on plan assets with a net interest amount that is calculated by applying the discount rate to the net defined benefit liability (asset). This standard is not relevant to the Group.

- (丙) 以下為已頒佈但於2013年1月1日開始 之財政年度仍未生效和本集團未提早 採納之新準則及準則之修訂:
 - 香港財務報告準則第9號《金融 工具》論述金融資產及金融負 債之分類、計量及確認。香港 財務報告準則第9號已於2009 年11月及2010年10月頒佈。 它取代部份由香港會計準則第 39號有關金融工具之分類及計 量。香港財務報告準則第9號 要求金融資產須分類為兩種計 量類別:按公平值計量及按攤 餘成本計量。分類須於首次確 認時確定,其取決於機構管理 其金融工具之業務模式及工具 之合約現金流量特性。就金融 負債而言,準則保留大部份香 港會計準則第39號的要求。主 要之改變為當公平值選擇為金 融負債被揀選後,除非將構成 會計上的錯配,否則就機構本 身之信貸風險引致之公平值改 變部份須於其他全面收益表, 有別於收益賬內記賬。本集團 正在就此引致之影響作出評 估,尚未決定會否提早採納該 準則,而此準則自2015年1月1 日或其後開始之財政年度起生
 - 香港會計準則第32號《對銷金 融資產及負債》之修訂於2011 年12月頒佈,其釐清對銷金 融工具之規定及處理現時應用 香港會計準則第32號《金融工 具一呈列》對銷準則時之不融 調。該修訂自2014年1月1日或 其後開始之年度期間起生效, 但亦可提早採納及必須追溯應 用。該修訂對本集團之財務報 表並無重大影響。

2. Basis of preparation and accounting policies (Continued)

- (c) The following new standards and amendments to standards have been issued but are not effective for the financial year beginning 1 January 2013 and have not been early adopted:
 - HKFRS 9, "Financial instruments", addresses the classification, measurement and recognition of financial assets and financial liabilities. HKFRS 9 was issued in November 2009 and October 2010. It replaces the parts of HKAS 39 that relate to the classification and measurement of financial instruments. HKFRS 9 requires financial assets to be classified into two measurement categories: those measured as at fair value and those measured at amortised cost. The determination is made at initial recognition. The classification depends on the entity's business model for managing its financial instruments and the contractual cash flow characteristics of the instrument. For financial liabilities, the standard retains most of the HKAS 39 requirements. The main change is that, in cases where the fair value option is taken for financial liabilities, the part of a fair value change due to an entity's own credit risk is recorded in other comprehensive income rather than in the income statement, unless this creates an accounting mismatch. The Group is in the process of making an assessment on the impact and so far has not decided to early adopt the standard, which shall be effective for the financial year beginning on or after 1 January 2015.
 - Amendments to HKAS 32, "Offsetting Financial Assets and Financial Liabilities", issued in December 2011 clarified the requirements for offsetting financial instruments and addressed inconsistencies in current practice when applying the offsetting criteria in HKAS 32, "Financial Instruments: Presentation". The amendments are effective for annual periods beginning on or after 1 January 2014 with early adoption permitted and are required to be applied retrospectively. There is no material impact to the financial statements of the Group as a result of this amendment.

20. 金融資產之重新分類

於2012年12月20日,本集團從貸款及應收款項類別重新分類若干符合確認為可供出售類別之金融資產。該等金融資產於重新分類日之公平值及賬面值分別為1,829,247,000港元及1,774,626,000港元。重新分類時產生之公平值收益54,621,000港元已於截至2012年12月31日止年度內,列作其他全面收益。

有關於2008年及2009年從可供出售類別重新分類至貸款及應收款項類別而於2013年6月30日仍然持有之金融資產,此等重新分類之金融資產於2013年6月30日之公平值及賬面值分別為1,515,564,000港元(2012年12月31日:1,487,800,000港元)及1,792,505,000港元(2012年12月31日:1,720,647,000港元)。

倘在過往之年度內並無重新分類以上金融資產從可供出售類別至貸款及應收款項類別,則在權益賬內之重估虧損將會增加276,716,000港元(2012年12月31日:增加340,144,000港元)。

20. Reclassification of financial assets

On 20 December 2012, the Group reclassified certain financial assets that qualified for recognition as available-for-sale out of the loans and receivables category. The fair value and carrying value of these financial assets at the date of reclassification were HK\$1,829,247,000 and HK\$1,774,626,000. The fair value gain of HK\$54,621,000 generated upon the reclassification has been taken to other comprehensive income during the year ended 31 December 2012.

For the financial assets reclassified from the available-for-sale category into the loans and receivables category in 2008 and 2009 that remained outstanding as at 30 June 2013, the fair values and carrying values of these reclassified financial assets as at 30 June 2013 were HK\$1,515,564,000 (31 December 2012: HK\$1,487,800,000) and HK\$1,792,505,000 (31 December 2012: HK\$1,720,647,000) respectively.

If reclassification of the above financial assets from the available-for-sale category into the loans and receivables category in prior years had not taken place, the revaluation deficit in equity would have been HK\$276,716,000 higher (31 December 2012: HK\$340,144,000 higher).

31. Fair value hierarchy

The Group measures fair values using the following hierarchy that reflects the significance of the observable and unobservable inputs used in the fair value measurement:

Level Descriptions

- Quoted prices (unadjusted) in active markets for identical assets or liabilities. This level includes equity and debt securities that are listed on exchanges or regularly quoted in the market, and exchange traded derivatives like futures.
- Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices). This level includes the majority of the over-the-counter derivative contracts.
- Inputs for the asset or liability that are not based on observable market data (unobservable inputs). This level includes equity and debt securities with significant unobservable components.

跨境債權資料是在顧及風險的轉移後,根據交易對手的所在地而披露對外地交易對手最終面對的風險。一般而言,若交易對手的債權是由在不同國家的另一方擔保,或履行債權是一間銀行的海外分行,而其總部是處於不同的國家,才會確認風險由一國家轉移至另一國家。

The information of cross-border claims discloses exposures to foreign counterparties on which the ultimate risk lies, and is derived according to the location of the counterparties after taking into account any transfer of risk. In general, transfer of risk from one country to another is recognised if the claims against a counterparty are guaranteed by another party in a different country or if the claims are on an overseas branch of a bank whose head office is located in a different country.

34. Operating segment reporting

Segment reporting by the Group is prepared in accordance with HKFRS 8 "Operating Segments". Information reported to the chief operating decision maker, including the Chief Executive and other Executive Committee members, for the purposes of resource allocation and performance assessment, is determined on the basis of personal banking, commercial banking, treasury and overseas banking business. Operating performances are analysed by business activities for local banking business, and on business entity basis for overseas banking business.

Considering the customer groups, products and services of local businesses, the economic environment, and regulations, the Group splits the operating segments of the Group into the following reportable segments:

- Personal banking business includes the acceptance of deposits from individual customers and the extension of residential mortgage lending, personal loans, overdraft and credit card services, the provision of insurance sales and investment services. Starting from 2013, hire purchase finance and leasing related to vehicle and transport financing are included under personal banking business. Certain comparative amounts have been revised to conform with the current year's presentation.
- Commercial banking business includes the acceptance of deposits from and the advance of loans and working capital finance to commercial, industrial and institutional customers, and the provision of trade financing. Hire purchase finance and leasing related to equipment financing are included.
- Treasury activities are mainly the provision of foreign exchange services and centralised cash management for deposit taking and lending, interest rate risk management, management of investment in securities and the overall funding of the Group.
- Overseas banking businesses include personal banking, commercial banking business activities provided by overseas subsidiaries in Macau and China, and the Group's interest in a commercial bank in China.
- Others include results of operations not directly identified under other reportable segments, corporate investments and debt funding (including subordinated notes).

For the purpose of segment reporting, revenue derived from customers, products and services directly identifiable with individual segments are reported directly under respective segments, while revenue and funding cost arising from intersegment funding operation and funding resources are allocated to segments by way of transfer pricing mechanism with reference to market interest rates. Transactions within segments are priced based on similar terms offered to or transacted with external parties. Inter-segment income or expenses are eliminated on consolidation.

34. 營業分項報告(續)

所有不同分項之直接開支將歸類於有關的分項分類。間接開支及支援部門開支乃依據開支性質,按耗用之時間及工作量和分項營運收入,分配至不同的分項及產品。不能合理地分配至各分項、產品及支援部門之企業活動開支,則作企業開支呈列於「其他」項下。

截至2013年6月30日止6個月

34. Operating segment reporting (Continued)

All direct costs incurred by different segments are grouped under respective segments. Indirect costs and support functions' costs are allocated to various segments and products based on effort and time spent as well as segments' operating income depending on the nature of costs incurred. Costs related to corporate activities that cannot be reasonably allocated to segments, products and support functions are grouped under Others as unallocated corporate expenses.

37. Risk management (Continued)

Interest rate risk means the risk to the Group's financial condition resulting from adverse movements in interest rates.

Liquidity risk is the risk that the Group is unable to meet its payment obligations associated with its financial liabilities when they fall due and to replace funds when they are withdrawn.

Operational risk is the risk of loss (direct or indirect) resulting from inadequate or failed internal processes, people and systems or from external events.

Reputation risk is the risk arising from the potential that negative publicity regarding the Group's business practices, operational errors or operating performance, whether true or not, could cause customer concerns or negative view, decline in the customer base or market share, or lead to costly litigation or revenue reductions.

Strategic risk generally refers to the corporate risk that may bring significant immediate or future negative impact on the financial and market positions of the Group because of poor strategic decisions, unacceptable financial performance, and inappropriate implementation of strategies and lack of effective response to the market changes.

The other risk management aspects are disclosed below.

The Board of Directors has the broad overall responsibility for the management of all types of risk. The responsibilities of the Board in relation to risk control are:

(b) Group risk function

The independent Group Risk function is responsible for ensuring that policies and mandates are established for the Group as a whole. GRD monitors and reports the Group risk positions to the Board via the RMCC and the EC, sets standards for the management of financial risks and data integrity and ensures that the financial risks are fully considered in the product planning and pricing process. GRD reviews and approves all credit and risk exposure policies for the Group including the approval of exposures to new markets, economic sectors, organisations, credit products and financial instruments which expose the Group to different types of risks. In determining risk policies, GRD takes into account the guidelines established by the HKMA, business direction, and risk adjusted performance of each business.

The Group's risk management expertise continues to advance the overall quality of the Group's lending portfolios, and enables the Group to meet the changing regulatory requirements and enter into credit exposures with the confidence that it understands the associated risks and rewards.

The Group is continuing to evolve its risk management capabilities under the aegis of the Head of GRD, increasing the focus of its risk strategy on risk and reward and returns on capital. The Group uses a range of risk measurement and analytical tools in its management of the various risks which it faces in its day-to-day businesses and these are continually being enhanced and upgraded to reflect the ever-changing business needs and the requirements of the regulators. The Risk Management and Control Department ("RMCD") is part of GRD and reports directly to the Head of GRD.

(c) Credit committees

The Credit Management Committee ("CMC") and Treasury and Investment Risk Committee ("TIRC") are the committees responsible for approving and recommending policies, limits and mandates for risk control in loans and treasury business respectively. The credit risk function, while set up to support the business areas, reports solely to the GRD.

本集團亦按信貸風險及市場情況,透過向商業及零售借款人貸款賺取息差,以及向客戶收取合理費用及佣金。此等活動風險不單涉及資產負債表內之貸款及墊款,亦涉及本集團提供擔保及其他承擔,例如信用證及其他承諾。

37. Risk management (Continued)

(d) Strategy in using financial instruments

The Group accepts deposits from customers at both fixed and floating rates, and for various periods, and seeks to earn positive interest margins by investing and lending these funds in a wide range of assets. The Group seeks to increase these margins by consolidating short-term funds and lending for longer periods at higher rates, while maintaining sufficient liquidity to meet all claims that might fall due.

The Group also seeks to apply its interest margins through its lending to commercial and retail borrowers and to charge customers appropriate fees and commission, taking into consideration credit risk and market conditions. Such exposures involve not just on-balance sheet loans and advances, as the Group also enters into guarantees and other commitments such as letters of credit, performance and other bonds.

The Group also trades in financial instruments where it takes positions in exchange-traded and over-the-counter instruments, including derivatives, to take advantage of short-term market movements in equities and bonds and in currency, interest rate and commodity prices. The Board places trading limits on the level of exposures that can be taken in relation to market positions. Apart from specific hedging arrangements, foreign exchange and interest rate exposures are normally offset by entering into counterbalancing positions (including transactions with customers or market counterparties), or by the use of derivatives, thereby controlling the variability in the net cash amounts required to liquidate market positions.

The Group also uses interest rate swap and other interest rate derivatives to mitigate interest rate risk arising from changes in interest rates that will result in decrease in the fair value of fixed rate assets or increase in the fair value of fixed rate liabilities. Part of these financial instruments are designated as fair value hedges, and the terms of hedge including hedged item, amount, interest rates, hedge period and purpose are determined and documented at the inception of each fair value hedge. Hedge effectiveness is assessed at inception on a prospective basis and is reassessed, on an ongoing basis, based on actual experience and valuation. Fair value hedge relationships that do not meet the effectiveness test requirement of hedge accounting are discontinued with effect from the date of ineffectiveness of the fair value hedge.

(戊) 信貸風險

本集團之主要信貸風險為借款人或交易對手未能履行對本集團之償款責任。此等責任乃源自本集團之貸款及投資活動、以及金融工具之買賣(包括衍生工具)。

本集團設有集團信貸委員會負責批核 重大的信貸風險敞口。信貸管理委員 會與財資及投資風險委員會乃是分別 負責制訂貸款及財資業務之信貸政 及監察其組合之委員會,該等委員會 由行政總裁擔任主席並由若干執行董 事及高級業務及信貸人員組成。信貸 風險計量,承保、批核和監測之規定 都詳列於信貸政策內。

本集團以審慎基礎管理各類型的信貸 風險。信貸批核須規限在信貸政策所 設定之參數之內,並且須由各級管 理層人員按既定之指引及授權批核愈 管理層、信貸委員會及集團風險部會 定期監察及控制信貸風險敞口、審核 限額及資產質素。本集團內部審貸 服額及資產質素。核以確保信貸 策,程序及規管指引得以遵從。

(戊)(i) 信貸風險承擔

標準普爾評級服務公司、穆迪投資者 服務公司及惠譽國際信用評級有限公司皆為本集團採用之外部信用評估機構 (「信用評估機構」)以評估對有開 級銀行、主權機構、公營單位及集團 投資計劃之信貸風險承擔,及證券化 類別風險承擔和有評級法團之風險承 擔。本集團亦有一內部評級法則評估 未有評級法團之信貸風險承擔。

本集團遵循《銀行業(資本)規則》第 4部份規定之程序,配對銀行賬內之 風險承擔與信用評估機構之發行人評 級。

37. Risk management (Continued)

(e) Credit risk

The Group's main credit risk is that borrowers or counterparties may default on their payment obligations due to the Group. These obligations arise from the Group's lending and investment activities, and trading of financial instruments (including derivatives).

The Group has a Group Credit Committee for approving major credit exposures. The CMC and TIRC are the committees responsible for credit policy formulation and portfolio monitoring of the loan and treasury businesses respectively. These committees are all chaired by the Chief Executive with certain Executive Directors and senior business and credit officers as members. Credit risk measurement, underwriting, approval and monitoring requirements are detailed in credit policies.

The Group manages all types of credit risk on a prudent basis. Credits are extended within the parameters set out in the credit policies and are approved by different levels of management based upon established guidelines and delegated authorities. Credit exposures, limits and asset quality are regularly monitored and controlled by management, credit committees and GRD. The Group's internal auditors also conduct regular reviews and audits to ensure compliance with credit policies and procedures and regulatory guidelines.

The individual business' credit policies also establish policies and processes for the approval and review of new products and activities, together with details of the loan grading, or credit scoring, processes and impairment policies.

(e)(i) Credit risk exposures

Standard & Poor's Ratings Services, Moody's Investors Services and Fitch Ratings are the external credit assessment institutions ("ECAIs") that the Group uses for the assessment of its credit risk exposures to rated banks, sovereigns, public sector entities, and collective investment schemes as well as securitisation exposures and exposures to rated corporates. The Group also has an internal grading methodology for assessing credit exposures to unrated corporates.

The process used to map ECAI issuer ratings to exposures booked in its banking book follows the process prescribed in Part 4 of the Banking (Capital) Rules.

(戊) 信貸風險(續)

(戊)(ii) 交易對手信貸風險承擔

本集團嚴謹控制其銀行賬或買賣賬內之場外衍生交易、回購形式交易及信貸衍生交易合約等持倉淨額之年期和 素結算餘額的額度。與此等合約有關 之信貸風險承擔主要是其公平值(利於本集團之市場估值正數值),該 信貸風險承擔連同因市場變動之潛 信貸風險承擔被視為授予交易對手的整體 個險承擔被視為授予交易對手的整體 個險承擔一般無抵押品或其他擔保。

結算風險在支付現金或交收證券或股票並預期可收回有關現金或證券或股票時產生。本集團為每個交易對手就一日期結算總額設定每天結算額度以減低結算風險。本集團亦簽訂淨額結算安排,及於適當時按收款交付基準結算。

(戊)(iii) 減低信貸風險

本集團採用之減低信貸風險方式一般 為《銀行業(資本)規則》認可以減少資 本加權值之方式,收取之抵押品類別 普遍為現金存款、不動產物業及的士 和公共小巴經營牌。就某些類別之客 戶貸款,本集團亦信賴政府、公營單 位及配有可接受信貸評級法團等發出 之擔保。

用作抵押品之不動產物業在授出貸款前將被評估。問題客戶之抵押物業, 公開市場價值將最少每6個月估值一次。就已收回之物業抵押品,本集團 之政策為按可行情況下盡快出售。

37. Risk management (Continued)

(e) Credit risk (Continued)

(e)(ii) Counterparty credit risk exposures

The Group exercises strict control limits in tenor and outstanding amounts on net open positions arising from over-the-counter derivative transactions, repo-style transactions and credit derivative contracts booked in its banking book or trading book. The credit risk exposures associated with these contracts are predominantly their fair values (i.e. the positive mark-to-market values favourable to the Group). These credit risk exposures together with potential exposures from market movements are managed as part of the overall lending limits allowed to counterparties. Collateral or other security is generally not obtained for such credit risk exposures.

Settlement risk arises in situations where a payment in cash or a delivery of securities or equities is made in expectation of a corresponding receipt in cash, securities or equities. To mitigate settlement risk, daily settlement limit is established for each counterparty on the aggregate of all settlements on a day. The Group will also enter into netting arrangements and make settlement on the basis of delivery against payment as appropriate.

(e)(iii) Credit risk mitigation

The credit risk mitigation techniques used by the Group are generally those recognised by the Banking (Capital) Rules for reduced capital weighting. Common types of collateral obtained are cash deposits, real estate properties, as well as taxi and public light bus medallion. For certain types of advances to customers, the Group also places reliance on guarantees issued by governments, public sector entities and corporates with acceptable credit rating.

Real estate properties taken as collateral are evaluated before the loan can be drawn. For property collateral supporting problem accounts, their open market values are appraised at least every six months. For property collateral that has been repossessed, the Group's policy is to arrange for realisation as soon as practicable.

37. Risk management (Continued)

(f) Market risk

Market risk is the risk of losses in assets, liabilities and offbalance sheet positions arising from movements in market rates and prices.

Market risk exposure for different types of transactions is managed within various risk limits and guidelines approved by the Board, the RMCC and the TIRC under the authority delegated from the Board. Risk limits are set at the portfolio level as well as by products and by different types of risks. The risk limits comprise a combination of notional, stop-loss, sensitivity and value-at-risk ("VaR") controls. All trading positions are subject to daily markto-market valuation. The RMCD within the GRD, as an independent risk management and control unit, identifies, measures, monitors and controls the risk exposures against approved limits and initiates specific actions to ensure positions are managed within an acceptable level. Any exceptions have to be reviewed and sanctioned by the appropriate level of management of TIRC, RMCC or the Board as stipulated in the relevant policies and procedures.

Banco Comercial de Macau, S.A. ("BCM") and Dah Sing Bank (China) Limited ("DSB China"), which are subsidiaries of DSB, run their treasury functions locally under their own set of limits and policies and within the overall market risk controls set by DSB. The RMCD of DSB oversees and controls the market risk arising from the treasury operations of BCM and DSB China.

The Group applies different risk management policies and procedures in respect of the market risk arising from its trading and banking books.

(f)(i) Market risk arising from the trading book

The following descriptions relate to DSB and BCM.

In the Group's trading book, market risk is associated with trading positions in foreign exchange, debt securities, equity securities and derivatives.

(1) Market risk measurement technique

In the management of market risk, the Group measures market risks using various techniques commonly used by the industry and control market risk exposures within established risk limits. The major measurement techniques used to measure and control market risk are outlined below.

- (f) Market risk (Continued)
- (f)(i) Market risk arising from the trading book (Continued)
 - (1) Market risk measurement technique (Continued)
 - Value at risk

The Group applies a "value at risk" methodology ("VaR"), which is a statistically based estimate, to measure the potential loss of its trading portfolio from adverse market movements. It expresses as the maximum amount the Group might lose given a certain level of confidence, which for the Group is 99% for a one day holding period. There is therefore a specified statistical probability that actual loss could be greater than the VaR estimate. Hence, the use of VaR does not prevent losses outside the VaR limits in the event of extreme market movements.

The VaR model assumes a certain "holding period" (one-day) until positions can be closed. It is calculated based on the current mark-to-market value of the positions, the historical correlation and volatilities of the market risk factors over an observation period of 250 days (or over one year) using a method known as parametric VaR methodology.

The VaR model is continuously validated by backtesting the VaR results for trading positions. All back-testing exceptions are investigated and backtesting results are reported to senior management.

As VaR constitutes an integral part of the Group's market risk control regime, VaR limits are established and reviewed by the Board and its delegated committees annually for all trading positions and allocated to business units. Actual exposures, including VaR, are monitored against limits daily by GRD. Average daily VaR for the Group for all trading activities during the six months ended 30 June 2013 was HK\$1,178,000 (year ended 31 December 2012: HK\$2,140,000).

(f)(ii) Market risk arising from the banking book

In the Group's banking book, market risk is predominantly associated with positions in debt and equity securities.

Market risk measurement technique (1)

> Within the risk management framework and policies established by the Board and its delegated committees, various limits, guidelines and management action triggers are established to control the exposures of the Group's banking book activities to foreign exchange risk, interest rate risk, and price risk. In particular, position and sensitivity limits and price triggers are in place to control the price risk of the investment securities. In addition, sensitivity analysis and stress testing covering shocks and shifts in interest rates on the Group's on-and off-balance sheet positions are regularly performed to gauge and forecast the market risk inherent in the Group's banking book portfolios against the established control measures.

> VaR methodology is not currently being used to measure and control the market risk of the banking book.

37. Risk management (Continued)

(f) Market risk (Continued)

(f)(ii) Market risk arising from the banking book (Continued)

(2) Foreign exchange risk

The Group has limited net foreign exchange exposure (except for USD, Macau Pataca ("MOP") and Renminbi ("RMB")) as foreign exchange positions and foreign currency balances arising from customer transactions are normally matched against other customer transactions or transactions with the market. Foreign exchange exposure in respect of MOP and RMB arise mainly from the operation of overseas subsidiaries in Macau and Mainland China. The net exposure positions, both by individual currency and in aggregate, are managed by the Treasury Division ("TRD") of the Group on a daily basis within established foreign exchange limits.

Long-term foreign currency funding, to the extent that this is used to fund Hong Kong dollar assets, or vice versa, is normally matched using foreign exchange forward contracts to reduce exposure to foreign exchange risk.

(3) Interest rate risk

From an earnings perspective, interest rate risk is the risk that the net income arising from future cash flows of a financial instrument will fluctuate because of changes in market interest rates. From an economic value perspective, interest rate risk is the risk that the economic value of a financial instrument will fluctuate because of changes in market interest rates. The Group takes on interest rate risk from both perspectives in the banking book. As such, the interest margins or net interest income and the economic value of the capital may increase or decrease as a result of such changes or in the event that unexpected movements arise. The Board and the Asset and Liability Management Committee ("ALCO") set limits on the level of mismatch of interest rate repricing that may be undertaken, which are monitored regularly by RMCD.

(g) Liquidity risk

Liquidity risk is the risk that the Group is unable to meet its payment obligations associated with its financial liabilities when they fall due and to replace funds when they are withdrawn. The consequence may be the failure to meet obligations to repay depositors and fulfill commitments to lend.

(庚) 流動資金風險(續)

37. Risk management (Continued)

(g) Liquidity risk (Continued)

The Group manages its liquidity on a prudent basis with the objective to ensure that there is an adequate liquidity and funding capacity to meet normal business operations and to withstand a prolonged period of liquidity stress of not less than a month. During the period, the Group had maintained a sufficiently high liquidity ratio well above the statutory minimum of 25%.

Moreover, the Group has further enhanced the liquidity risk management framework in accordance with the requirements set forth in the Supervisory Policy Manual ("SPM") LM-2 on "Sound Systems and Controls for Liquidity Risk Management" issued by the HKMA in April 2011. The SPM LM-2 is developed to implement the liquidity sound principles formulated by the Basel Committee on Banking Supervision ("Basel Committee"), in light of the lessons learned from the financial crisis in 2007, and to strengthen the liquidity risk management standards of banks.

Liquidity risk management is governed by the policy and framework approved by the Board, which delegates the Group's ALCO to oversee liquidity risk management. The ALCO regularly reviews the Group's loan and deposit mix and changes, funding requirements and projections, and monitors a set of liquidity risk metrics, including the liquidity ratio and maturity mismatch on an ongoing basis. Appropriate limits or triggers on these risk metrics are set and sufficient liquid assets are held to ensure that the Group can meet all short-term funding requirements. The TRD is responsible for the day-to-day management of funding and liquidity position while the RMCD is responsible for the measurement and monitoring of liquidity risk exposures on a daily basis. The Financial Control Division ("FCD") handles regulatory reporting in relation to liquidity risk.

The Group's funding comprises mainly deposits of customers, certificates of deposit and medium term notes issued. The issuance of certificates of deposit and medium term notes helps lengthen the funding maturity and reduce the maturity mismatch. Short-term interbank deposits are taken on a limited basis and the Group is a net lender in the interbank market.

(庚) 流動資金風險(續)

監控及早報按不同時限之現金流計量 及推測方式實行,時限按流動性管理 之主要區間包括次日、1星期及1個月 來區分。此等推測首先分析該等金融 資產及負債之合約到期日,並且依據 過往觀察預計該等金融資產及負債的 預期到期日。預測現金流亦考慮資產 負債表外項目,包括未提取借貸承擔 及或然負債(例如備用信用證及擔保) 之媧往行為。本集團定期進行壓力測 試,包括與機構特定相關的、一般市 場危機的及併合兩者的不同方案以評 估流動性狀況在受壓之市場情況下的 潛在影響,並已制定緊急應變計劃, 詳列應對流動性問題之策略和於緊急 情況下填補現金流不足之程序(例如 進行回購協議交易或變賣持作流動性 風險管理用途之資產)。

37. Risk management (Continued)

(g) Liquidity risk (Continued)

The monitoring and reporting take the forms of cash flow measurements and projections for different time horizons, including the next day, a week and a month, which are key periods for liquidity management. The starting point for these projections is an analysis of the contractual maturity of the financial assets and liabilities as well as the expected maturity of these assets and liabilities based on historical observations. The cash flow projections also take into account the historical behavior of off-balance sheet items, including undrawn lending commitments and contingent liabilities such as standby letters of credit and quarantees. The Group performs stress testing regularly, which includes both an institution-specific crisis scenario, a general market crisis scenario and a combination of these crisis scenarios in order to assess the potential impact on its liquidity position under stressed market conditions and has formulated a contingency plan that sets out strategies for dealing with liquidity problems and the procedures for making up cash flow deficits (e.g. conducting repo transactions or liquidation of assets held for liquidity risk management purpose) in emergency situations.

(h) Operational risk

The Group manages its operational risk through a management structure comprising members of senior management, an independent risk management team and operational risk officers from each business and support function, and operating through a set of operational risk policies, risk tool-kits, operational risk incident reporting and tracking systems, and control self assessment and key risk indicator tools. Together with a well established internal control systems, operational risk in most situations can be adequately identified, assessed, monitored and mitigated. To allow the operational risk framework to be clearly communicated to all levels within the Group, awareness and training programs are conducted from time to time.

To minimise the impact on the Group's business in the event of system failure or disasters, back-up sites and operational recovery policies and plans have been established and tested for all critical business and operations functions.

Operational risk framework is also supported by periodic independent reviews of internal control systems by external and internal auditors. The Group's RMCC will overall assess the performance and effectiveness of operational risk management.

37. Risk management (Continued)

(i) Reputation risk

The Group manages reputation risk through upholding a high standard of corporate governance and management oversight, maintenance of effective policies and procedures with emphasis on internal control, risk management and compliance; proper staff training and supervision; proper handling of customer complaints or dissatisfaction; and adherence to sound business practices. Standards are set and policies and procedures are established by the Group in all areas, which operate to reduce vulnerability to reputation risk.

(j) Strategic risk

The Board of Directors, assisted by senior management, is directly responsible for the management of strategic risk. Directors formulate the strategic goals and key direction of the Group in line with the Group's corporate mission, ensure business strategies are developed to achieve these goals, oversee the strategic development and implementation to secure compatibility with the Group's strategic goals, review business performance, deploy proper resources to achieve the Group's objectives, and authorise management to take appropriate actions to mitigate risks.

(k) Compliance with the Basel III Capital Standards

Since the revised capital adequacy framework known as Basel II has become effective from January 2007, DSB has adopted the standardised approach for credit risk and market risk, and the basic indicator approach for operational risk. These are the default approaches as specified in the Banking (Capital) Rules. Accordingly, the Group has overhauled its systems and controls in order to meet the standards required for these approaches.

To implement the revised international capital standards commonly referred to as the "Basel III" rules, the HKMA has published in April 2013 the Banking (Capital) (Amendment) Rules 2013 and revised Supervisory Policy Manual ("SPM") CA-G-5 on "Supervisory Review Process" in December 2012. The revised capital standards and related regulatory requirements have come into force for all locally incorporated authorized institutions in Hong Kong starting from January 2013. DSB has enhanced its capital management and reporting framework for meeting the new requirements. Moreover, DSB will also have to comply with the modified disclosure requirements under Basel III set out in the Banking (Disclosure) (Amendment) Rules 2013 published by the HKMA starting the interim disclosure for the period ended 30 June 2013.

(丑) 金融資產及負債之公平值

於活躍市場內買賣之金融工具,其公 平值之釐定乃基於可觀察之市場報 價。

凡金融工具之報價隨時且定期由交易 所、交易商、經紀人、行業組織、定 價服務及監管機構發佈,則被視作為 活躍市場報價之金融工具。於活躍市 場之報價為公平值提供最可靠之證 據,並須於可獲得時使用。倘金融資 產或金融負債有買入價及賣出價,本 集團將採用買賣差價中在該等情況下 最能代表公平值之價格。

本集團使用外間報價及其本身信貸風 險息差,以釐定其衍生負債及已選擇 以公平值計量之其他負債之現值。 倘本集團之信貸息差擴闊,負債之價 值下降,本集團會確認該等負債之收 益。倘本集團之信貸息差收窄,負債 之價值上升,本集團會確認相對該等 負債之虧損。

如有需要,用於計量程序之價格數據 及參數會被仔細覆核及調整才應用, 其中尤其需要考慮當前的市場發展情 況。

37. Risk management (Continued)

(I) Fair value of financial assets and liabilities

The fair value of financial instruments traded in active markets is based on observable market quotations.

A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service or regulatory agency. A quoted price in an active market provides the most reliable evidence of fair value and shall be used whenever available. If a financial asset or a financial liability has a bid price and an ask price, the price within the bid-ask spread that is most representative of fair value in the circumstances is used by the Group.

Where observable market quotation of financial instruments is not directly available, the Group estimates the fair value of such financial instruments by using appropriate valuation techniques that are widely recognised including present value techniques and standard option pricing models. In applying valuation techniques for these financial instruments, the Group maximizes the use of relevant observable inputs (for examples, interest rates, FX rates, volatilities, credit spreads) and minimizes the use of unobservable inputs. The fair value of interest-rate swaps is calculated as the present value of the estimated future cash flows. The fair value of foreign exchange forward contracts is generally based on current forward rates while other derivatives are valued using appropriate pricing models, such as Black-Scholes option pricing model.

The Group uses external price quotes and its own credit risk spreads in determining the current value of its derivative liabilities and other liabilities for which it has elected the fair value option. When the Group's credit spreads widen, the Group recognises a gain on these liabilities because the value of the liabilities has decreased. When the Group's credit spreads narrow, the Group recognises a loss on these liabilities because the value of the liabilities has increased.

Price data and parameters used in the measurement process are reviewed carefully and adjusted, if necessary, to take consideration of the current market developments.

(m) Capital management

The Group's objectives when managing capital are:

- To comply with the capital requirements set by the banking regulators in the markets where the entities within the Group operate;
- To safeguard the Group's ability to continue its business as a going concern;
- To maximise returns to shareholders and optimize the benefits to other stakeholders; and
- To maintain a strong capital base to support the development of its business.

Capital adequacy of and the use of regulatory capital by the Group's Hong Kong banking subsidiary is monitored regularly by the Group's management, employing techniques based on the guidelines developed by the Basel Committee, as implemented by the HKMA, for supervisory purposes. The required information is filed with the HKMA on a quarterly basis.

As the first phase of Basel III has become effective from January 2013, DSB is required to meet three ratios, namely, the Common Equity Tier 1 capital, Tier 1 capital and Total capital respectively against risk-weighted assets. The internationally agreed minimum of these three ratios as of 1 January 2013 are set at 3.5%, 4.5% and 8.0% respectively and are adopted by the HKMA. In addition, the capital conservation and countercyclical capital buffers newly introduced under Basel III will be implemented from 1 January 2016 in Hong Kong. In line with the international standards, the HKMA also adopts the phase-in arrangements for new capital requirements in relation to the Common Equity Tier 1 capital ratio, Tier 1 capital ratio and capital buffers as proposed by the Basel Committee and will achieve full implementation by 1 January 2019.

Investment in subsidiaries, significant investments in non-subsidiary companies and shares, exposures to connected companies and investments in other banks' equity are deducted from core capital and supplementary capital to arrive at the regulatory capital.

(m) Capital management (Continued)

Risk-weighted amount is the aggregate of the risk-weighted amounts for credit risk, market risk and operational risk, and covers both on-balance sheet and off-balance sheet exposures. On-balance sheet exposures are classified according to the obligor or the nature of each exposure and risk-weighted based on the credit assessment rating assigned by an external credit assessment institution recognised by the HKMA or other principles as set out in the Banking (Capital) Rules, taking into account the capital effects of credit risk mitigation. Off-balance sheet exposures are converted into credit-equivalent amounts by applying relevant credit conversion factors to each exposure, before being classified and risk-weighted as if they were on-balance sheet exposures.

Capital adequacy of and the use of regulatory capital by the Group's Macau banking subsidiary, BCM, and banking subsidiary in China, DSB China, are monitored regularly by the Group's management, employing techniques based on the guidelines provided by the Autoridade Monetária de Macau ("AMCM") and the China Banking Regulatory Commission ("CBRC") respectively for supervisory purposes.

The required information is filed by BCM with the AMCM and by DSB China with the CBRC on a quarterly basis. The AMCM requires BCM and the CBRC requires DSB China to maintain a ratio of own funds or capital base to total risk-weighted exposures (i.e. the capital adequacy ratio) at or above the agreed regulatory minimum of 8%.

The liquidity ratio is calculated as the simple average of each calendar month's average liquidity ratio of the Group's banking subsidiaries for the six/twelve months of the financial year. The liquidity ratio is computed with reference to the methods set out in the Fourth Schedule of the Hong Kong Banking Ordinance.

Only the locally incorporated banking subsidiaries within the Group are subject to the minimum liquidity ratio requirement under the Hong Kong Banking Ordinance. The above ratios of the Group are calculated for reference only.

集團及業務概覽

概要

因顧慮到中國內地經濟放緩而影響到香港之市場氣氛,本年度上半年本地市場狀況較為淡靜。年中,本集團亦注意到市場因美國聯儲局有可能會縮減量化寬鬆措施,以及其退市可能對美國中期利率(及牽引香港利率)造成之影響,顯著波動。雖然整體市況略為低沉,本集團欣然呈報本公司股東應佔溢利較去年同期增長35.1%至8億1千3百萬港元。

期內,主要趨勢包括淨息差顯著改善,本集 團銀行業務錄得雙位數字之貸款增長,服務 費及佣金收入大幅改善及支出增長取得有效 控制。本集團於重慶銀行之投資再次表現強 勁,雖然相對本集團全資擁有之銀行業務錄 得較為溫和溢利增長。

業務及財務回顧

本集團業務所有主要項目均錄得強勁增長。 淨利息收入在有所改善之淨息差(今年上半年為1.77%,相對去年同期之1.47%)以及業務量增加帶動下,由10億2千2百萬港元上升31.5%至13億4千4百萬港元。雖然新貸款,尤其本集團之商業銀行業務較佳孳息的貸款亦有助淨息差擴闊,淨息差增加30個基點,主要為持續嚴謹管理存款成本所致。

淨服務費及佣金收入由2億4千6百萬港元增加41.2%至3億4千8百萬港元,主要由於與財富管理業務、商業銀行業務之財資相關費用收入、證券經紀及貿易融資業務增加所致。淨買賣收入由8千1百萬港元增加至1億4百萬港元。本集團成功於有關領域取得大幅改善差之業績,主要由於本集團按業務策略,高度專注不同業務部門及分行之管理,改善跨部門合作所致。

CORPORATE AND BUSINESS OVERVIEW

HIGHLIGHTS

Local market conditions in the first half of the year were somewhat subdued, with concerns over a slowing in the Mainland China economy affecting sentiment in Hong Kong. Towards the middle of the year, we also saw significant market volatility due to the US Federal Reserve's potential tapering down of quantitative easing measures, and the effect that this could have on medium term US (and by implication Hong Kong) interest rates. Whilst market conditions were somewhat subdued, we are pleased to report that our profit attributable to shareholders increased by 35.1% over the prior period to HK\$813 million.

Key trends during the period included a significant improvement in net interest margin ("NIM"), double digit percentage loan growth, much improved fee and commission income, and well-controlled expense growth. Our investment in Bank of Chongqing ("BOCQ"), again delivered strong performance, although with more moderate profit growth relative to our wholly owned banking business.

BUSINESS AND FINANCIAL REVIEW

All key areas of our business reported significant growth. Net interest income was up by 31.5% from HK\$1,022 million to HK\$1,344 million, driven both by improved NIM of 1.77% for the first half of the year, compared with 1.47% in the same period last year, as well as by business volume increase. The 30bp increase in NIM was driven in large part through the continued sharp focus on deposit cost management, although booking of new loans, particularly by our commercial banking division at respectable yields, also helped.

Net fee and commission income increased by 41.2% from HK\$246 million to HK\$348 million, driven largely by increases in our wealth management business, treasury related fee income derived from commercial banking business, securities brokerage and trade finance business. Net trading income increased from HK\$81 million to HK\$104 million. Our success in delivering much improved results in these areas was driven largely by a high level of focus by our divisional and branch management, and better cross-divisional cooperation, both in line with our business strategy.

業務及財務回顧(續)

淨利息收入、服務費及佣金收入和淨買賣收入之改善,導致營運收入總額由13億7千3百萬港元增長32.4%至18億1千8百萬港元。儘管業務量大增,惟營運支出仍然受控,上升9.5%至9億8百萬港元。收入增幅較成本為高,令本集團之成本對收入比率較2012年上半年之60.4%大幅改善至50.0%。

貸款減值虧損及其他信貸撥備由前期一個非常低的基礎3千萬港元,上升至1億3千8百萬港元。雖然撥備增加因受低基礎影響極為顯著,壞賬撥備支出仍處於低水平,年中之減值貸款比率為0.40%。

本集團於重慶銀行之投資繼續表現卓越,期 內為本集團貢獻2億2千8百萬港元,較去年 上半年增長29%。

前瞻

全球經濟增長整體上仍然疲弱。雖然有跡象顯示美國經濟有所改善,倘經濟有驚喜的增長,亦須注意同時會有利率上升的風險。儘管歐元區經濟可能已經見底,增長仍然非常疲弱。此外,內地經濟增長逐漸放緩,與香港有重大關係。香港經濟目前保持相對穩定,但經濟預測正在逐步下調,反映內地較緩和的經濟前景。

BUSINESS AND FINANCIAL REVIEW (Continued)

Improved net interest income, fee and commission income and net trading income, resulted in an increase of 32.4% in total operating income, from HK\$1,373 million to HK\$1,818 million. Operating expenses remained well under control, despite the high level of business growth, increasing by 9.5% to HK\$908 million. The much faster revenue growth than cost increase led to a significant improvement in our cost to income ratio to come down to 50.0%, compared with 60.4% in the first half of 2012.

Loan impairment losses and other credit provisions increased to HK\$138 million from a very low base of HK\$30 million in the prior period. Whilst the increase was notable due to the low base effect, the absolute level of bad debts remained low, with the impaired loan ratio standing at 0.40% at the mid-year.

Our investment in Bank of Chongqing continued to perform well with a contribution of HK\$228 million for the period, an increase of 29% over the first half of the prior year.

Due principally to the higher level of business growth during the period, Dah Sing Bank's consolidated capital adequacy ratio ("CAR") dropped modestly compared with the prior year end from 14.9% (Basel II basis) to 14.2%, reported on a Basel III basis, whilst our overall capital base continued to increase from HK\$15.1 billion to HK\$16.0 billion. During the period, we changed our accounting policy relating to our holding of ownuse premises from the revaluation model to the cost model, and the results of the first half of 2012 are restated to reflect this change. This is a more conservative treatment from a capital perspective (reducing our overall CAR by 49bp), but results in higher earnings (by HK\$44 million in the period), due to the absence of a need to depreciate the premises revaluation surplus over the remaining period of the property leases (typically up to mid-2047), which reduces the overall depreciation and amortization charge of the Group.

PROSPECTS

Overall global growth remains subdued. Whilst there are some signs of improvement in the US, this is to be balanced against the risk of interest rate increases if the economy surprises on the upside. Although the Eurozone may have bottomed out, growth remains very subdued. Furthermore, and of significant relevance to Hong Kong, the Mainland economic growth is slowing down. Hong Kong remains relatively stable at present, but economic forecasts are gradually being reduced to reflect the softer outlook for the Mainland economy.

前瞻(續)

於此狀況下,今年下半年業務增長極可能放緩。信貸質素或會持續惡化,雖然在現階段本集團並不預期出現非常急劇惡化。因此,在管理本集團業務時須採取謹慎態度,本集團將繼續以審慎態度經營業務,注重盈利能力及資產負債管理、信貸風險管理、成本控制及整體效率。

本集團的業務策略初見成效,此等策略包括 高度專注於核心業務及市場,嚴格管理業務 表現及風險管理,並以逐步改善股東回報為 主要目標。本集團認為,繼續此等策略為集 團於中期可持續達致理想表現之關鍵。

雖然本集團於短期內持謹慎態度,惟本集團相信,香港銀行體系及保險市場之穩健基礎和實力,及內地之中期前景較大部分其他經濟體系更為正面的帶動下,將有助香港及澳門進一步發展,並在日後為本集團核心業務增長提供良好的平台。

董事及行政總裁權益

於2013年6月30日,根據《證券及期貨條例》第XV部,本公司之董事及行政總裁所持有本公司或其任何相聯法團(定義見《證券及期貨條例》第XV部)而須向本公司及香港聯合交易所有限公司(「香港交易所」)申報之股份、期股份及債券的權益(包括按照《證券及期货條例》之規定而擁有或視作擁有之權益及及條例》之規定而擁有或視作擁有之權益及沒倉),或按《證券及期貨條例》規定而董事進行證券交易的標準守則》及本公司所採納之董事證券交易守則(合稱「該等守則」)而須知會本公司及香港交易所之權益及淡倉如下:

PROSPECTS (Continued)

Against this background, it is likely that business growth will slow in the second half of the year. Credit quality may continue to deteriorate, although at this stage we do not expect a very sharp deterioration. Therefore, a cautious approach in managing our businesses is called for, and we will continue to operate our businesses prudently, with attention to profitability and balance sheet management, credit risk management, cost control and overall efficiency.

We have started to see the benefits of our business strategy which calls for a high level of focus on our core businesses and markets, with strict management of business deliverables and risk, and with the key objective of improving shareholder returns over time. We see the continuation of this strategy as key to achieving sustainable performance in the medium term.

Although we are cautious in the near term, we believe that the underlying strength of the Hong Kong banking system and insurance market, and the better medium term prospects for the Mainland than most other economies, with the positive impact this will bring to Hong Kong and Macau, provides a good platform for further growth in our core businesses over time.
