In 2013, fitness wear recorded higher growth rate because we were highly competitive in the market. Swimwear products also recorded relatively strong growth, which was mainly due to its brand and product strengths as well as the launch of "Water Cube" brand swimwear. Of the three major product lines, the competition within the casual sports underwear sector, which represents a major portion of sports underwear, was highly intense and as we are less competitive in the market, the overall growth of sports underwear was relatively insignificant. In terms of the development trend, fitness wear and swimwear will remain as the key growth drivers of the Group in the coming years.

Our overall gross profit margin for the financial year ended 31 December 2013 decreased slightly to 57.8% as compared to that for the financial year ended 31 December 2012, which was mainly due to the low gross profit of the "Water Cube" brand and the decreasing gross profit of casual sports underwear.

與截至2012年12月31日止財政年度相比,本集團的整體毛利率於截至2013年12月31日止財政年度微跌至57.8%。主要由於「水立方」品牌毛利水平較低和運動休閒內衣毛利水平下降所致。

Our other revenue primarily consisted of government grants, interest income from interest-bearing bank deposits and rental income. Government grants were provided by provincial or prefectural government authorities in the form of unconditional subsidies as recognition for our contribution to the local economy through our business operation and our achievements as one of the core enterprises in local industry clustering. Other revenue decreased from RMB27.6 million in 2012 to RMB25.5 million in 2013, representing a slight decrease of 7.7%. Such decrease was mainly due to the changes in the aggregate amount of government grants, which amounted to RMB13.0 million in 2013 (2012: RMB17.8 million).

#### Selling and distribution expenses

Selling and distribution expenses consisted primarily of advertising and promotion expenses, incentive fees for the sales personnel employed by the retail outlets, remuneration and employee benefits for our sales and marketing personnel, rental expenses, packaging and transportation expenses, depreciation and amortization expenses of our properties used for sales and marketing activities and other miscellaneous expenses. Selling and distribution expenses increased from RMB91.5 million in 2012 to RMB104.5 million in 2013, representing an increase of 14.2%. The amount increased mainly because of the increase in subsidies given to the distributors for the purposes of expanding distribution network during 2013. The advertising and promotion expenses and the subsidies to distributors amounted to RMB33.8 million (2012: RMB34.6 million) and RMB41.8 million (2012: RMB30.3 million), respectively. Haosha Industry has the right to terminate the processing agreement at any time before expiration subject to compliance with the Listing Rules.

In order to continue the relevant transactions with Haosha Garments after 31 December 2013, Haosha Industry entered into a new processing agreement ("New Processing Agreement") with Haosha Garments on 19 December 2013, whereby Haosha Industry agreed to purchase from Haosha Garments, and Haosha Garments agreed to supply to Haosha Industry, dyeing and printing services from time to time. #### REPORT OF THE DIRECTORS

董事會報告

Prior to obtaining approval from the independent shareholders of the Company at the EGM, the Company will closely monitor the aggregate value of the transactions under the New Processing Agreement to ensure that the applicable percentage ratios in respect of such transactions fall within 5%. In the event that the independent shareholders of the Company do not approve the New Processing Agreement and the relevant annual cap(s) at the EGM, the Company will ensure that the annual transaction amounts of such transactions fall within the 5% threshold and will make further announcement as and when necessary. Further details of such transaction are set out in the announcements of the Company dated 19 December 2013 and 27 December 2013.

Haosha Garments has been the processing service provider of the Group and the Group expects itself to continue using processing services provided by Haosha Garments in view of their long-term business relationship, which enables Haosha Garments to respond to the order requests of the Group in a more prompt and accurate manner compared with other independent suppliers of similar services available in the market, as well as the proximity between Haosha Garments and Haosha Industry, which helps reduce the transportation costs. The prices at which Haosha Garments provides processing services to the Group are based on terms that are comparable to those offered by independent suppliers of similar services, on arm's length negotiation and on normal commercial terms.

For the year ended 31 December 2013, the Group incurred RMB33.9 million for the processing services provided by Haosha Garments and the amount of processing fees paid/payable to Haosha Garments was within the approved annual cap of RMB38.6 million (excluding value added tax).

於獲本公司獨立股東於股東特別大會上批准前,本公司將緊密監察新委託加工協議項下之交易之總值,以確保該等交易之適用百分比率低於5%。倘本公司之獨立股東並未於股東特別大會上批准新委託加工協議,本公司將確保該等交易之年度交易金額落入5%之限額,並將於有需要時另行刊發公佈。有關該等交易之進一步計情載列於本公司日期為2013年12月19日及2013年12月27日之公佈。

浩沙製衣為本集團的委託加工服務供應商,而鑒於彼此的長期業務關係,本集團預期其將會繼續使用浩沙製衣提供的委託加工服務,令浩沙製衣能夠較市場上與他類似服務的獨立供應商更迅速準確地應付本集團的訂單要求,而浩沙製衣時與浩沙實業鄰近,亦有助減低運輸成本。告沙製衣向本集團提供委託加工服務的可沒格交流,並按公平磋商及按一般商業條款釐定。

截至2013年12月31日止年度,本集團就浩沙製衣提供的委託加工服務而產生人民幣33.9百萬元,而支付/應付予浩沙製衣的委託加工費用在獲批年度上限人民幣38.6百萬元(不含增值税)以內。

# 1 Significant Accounting Policies

#### (a) Statement of compliance

The Company was incorporated in the Cayman Islands on 2 September 2010. The shares of the Company have been listed on the Main Board of The Stock Exchange of Hong Kong Limited since 16 December 2011.

These consolidated financial statements have been prepared in accordance with applicable International Financial Reporting Standards ("IFRSs"), which collective term includes all applicable individual International Financial Reporting Standards, International Accounting Standards ("IASs") and Interpretations issued by International Accounting Standards Board ("IASB"). These consolidated financial statements also comply with the disclosure requirements of the Hong Kong Companies Ordinance and the applicable disclosure provisions of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the "Stock Exchange"). A summary of the significant accounting policies adopted by the Group is set out below.

The IASB has issued certain new and revised IFRSs that are first effective or available for early adoption for the current accounting period of the Group and the Company. Note 1(c) provides information on any changes in accounting policies resulting from initial application of these developments to the extent that they are relevant to the Group for the current and prior accounting periods reflected in these consolidated financial statements.

# (b) Basis of preparation of the financial statements

The consolidated financial statements for the year ended 31 December 2013 comprise the Company and its subsidiaries.

The measurement basis used in the preparation of these consolidated financial statements is the historical cost basis, except that the derivative financial instruments (see note 1(1)) are stated at their fair value.

#### 1 Significant Accounting Policies (Continued)

# (b) Basis of preparation of the financial statements (Continued)

The functional currency of the Company is Hong Kong Dollars ("HK\$"). These consolidated financial statements are presented in Renminbi ("RMB") as the functional currency of the Group's operating subsidiaries is RMB. These consolidated financial statements presented in RMB have been rounded to the nearest thousand.

The preparation of these consolidated financial statements in conformity with IFRSs requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

Judgements made by management in the application of IFRSs that have significant effect on the consolidated financial statements and major sources of estimation uncertainty are discussed in note 2.

#### (b) 財務報表的編製基準(續)

本公司的功能貨幣為港元(「港元」)。由於本集團經營附屬公司的功能貨幣為人民幣(「人民幣」),故該等綜合財務報表以人民幣呈列。以人民幣呈列的該等綜合財務報表均湊整至最接近的千元。

#### 1 Significant Accounting Policies (Continued)

#### (c) Changes in accounting standards

The IASB has issued several amendments to IFRSs that are first effective for the current accounting period of the Group and the Company. Of these, the following developments are relevant to the group's financial statements:

- IFRS 10, Consolidated financial statements
- IFRS 13. Fair value measurement
- Amendments to IFRS7 Disclosures Offsetting financial assets and financial liabilities

The amendments have no material impact on the Group's consolidated financial statements as the amendments were consistent with policies already adopted by the Group. The Group has not applied any new standard or interpretation that is not yet effective for the current accounting period.

#### (d) Subsidiaries

Subsidiaries are entities controlled by the Group. The Group controls an entity when it is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect these returns through its power over the entity. When assessing whether the Group has power, only substantive rights (held by the group and other parties) are considered.

An investment in a subsidiary is consolidated into the consolidated financial statements from the date that control commences until the date that control ceases. Intra-group balances, transactions, cash flows and any unrealised profits arising from intra-group transactions are eliminated in full in preparing the consolidated financial statements. Unrealised losses resulting from intra-group transactions are eliminated in the same way as unrealised gains but only to the extent that there is no evidence of impairment.

#### (c) 會計準則的變動

國際會計準則理事會已頒佈多項國際財務報告準則的修訂。這些修訂在本集團及本公司的當前會計期間首次生效。其中,以下修訂與本集團財務報表有關:

- 國際財務報告準則第13號,公 分價值計量
- 國際財務報告準則第7號(修訂本)-披露-抵銷金融資產及金融負債

該等修訂對本集團的綜合財務報表並無重大影響,乃由於該等修訂與本集團已採納之政策一致。本集團並無應用任何在當前會計期間尚未生效的新訂準則或詮釋。

#### (d) 附屬公司

#### 1 Significant Accounting Policies (Continued)

#### (d) Subsidiaries (Continued)

In the Company's statement of financial position, an investment in a subsidiary is stated at cost less impairment losses (see note 1(i)).

#### (e) Property, plant and equipment

Items of property, plant and equipment are stated at cost less accumulated depreciation and impairment losses (see note 1(i)).

The cost of self-constructed items of property, plant and equipment includes the cost of materials, direct labour, the initial estimate, where relevant, of the costs of dismantling and removing the items and restoring the site on which they are located, and an appropriate proportion of production overheads and borrowing costs.

No depreciation is provided in respect of construction in progress.

Gains or losses arising from the retirement or disposal of an item of property, plant and equipment are determined as the difference between the net disposal proceeds and the carrying amount of the item and are recognised in profit or loss on the date of retirement or disposal.

Depreciation is calculated to write off the cost of items of property, plant and equipment, less their estimated residual value, if any, using the straight-line method over their estimated useful lives as follows:

 Buildings situated on leasehold land are depreciated over the shorter of the unexpired term of lease and their estimated useful lives, being no more than 20 years after the date of completion.

• Machinery and equipment 5–10 years

Motor vehicles 2–4 years

• Furniture and fixtures 3–5 years

Both the useful life of an asset and its residual value, if any, are reviewed annually.

物業、廠房及設備項目的折舊按下列估計可用年期,以直線法撇銷其成本減去其估計剩餘價值(如有)計算:

 位於租賃土地上的樓宇按未屆滿的租賃期及其估計可用年期 (以較短者為準,且不超過完成日期後20年)折舊。

· 機器及設備 5至10年

汽車 2至4年

傢俬及裝置 3至5年

資產的可用年期及其剩餘價值(如 有)均每年進行審閱。

#### 1 Significant Accounting Policies (Continued)

#### (f) Intangible assets

Intangible assets represent software and are stated in the consolidated statement of financial position at cost less accumulated amortisation (where the estimated useful life is finite) and impairment losses (see note 1(i)).

Amortisation of intangible assets with finite useful lives is charged to profit and loss on a straight-line basis over the asset's estimate useful lives. Software are amortised from the date they are available for use over a period of three years.

Both the period and method of amortisation are reviewed annually.

#### (g) Lease prepayments

Lease prepayments represent cost of land use rights paid to the People's Republic of China ("PRC") governmental authorities. Land use rights are carried at cost less accumulated amortisation and impairment losses (see note 1(i)). Amortisation is charged to profit or loss on a straight-line basis over the respective periods of the rights.

#### (h) Operating lease charges

Where the Group has the use of assets under operating leases, payments made under the leases are charged to profit or loss in equal instalments over the accounting periods covered by the lease terms, except where an alternative basis is more representative of the pattern of benefits to be derived from the leased assets. Lease incentives received are recognised in profit or loss as an integral part of the aggregate net lease payments made. Contingent rentals are charged to profit or loss in the accounting period in which they are incurred.

#### (f) 無形資產

無形資產指軟件,按成本減去累計 攤銷(當估計可用年期為有限)及減 值損失(見附註1(i))於綜合財務狀況 表列賬。

具有有限可用年期的無形資產攤銷 乃於資產估計可用年期內以直線法 在損益中扣除。軟件由其可供使用 當日起計3年期間內攤銷。

攤銷期間及方法均每年進行審閱。

#### (q) 預付租金

預付租金指向中華人民共和國(「中國」)政府機構支付之土地使用權成本。土地使用權按成本減累計攤銷及減值損失列賬(見附註1(i))。攤銷以直線法於權利的各自期間自損益中扣除。

#### (h) 經營和賃支出

倘本集團可使用經營租賃下的資產,則根據租賃而支付的款項等項 租賃期所涵蓋的會計期間內以與等額 分期於損益中扣除,除非有其他 準更能代表租賃資產所產生的 模式則屬例外。所獲取的租賃優惠 於損益中確認為淨租金總額的組 部份。或有租金於產生的會計期間 在損益中扣除。

## 1 Significant Accounting Policies (Continued)

#### (i) Impairment of assets

- Impairment of investments in subsidiaries, trade and other receivables
  Investments in subsidiaries, trade and other receivables that are stated at cost or amortised cost are reviewed at the end of each reporting period to determine whether there is objective evidence of impairment. Objective evidence of impairment includes observable data that comes to the attention of the Group about one or more of the following loss events:
  - significant financial difficulty of the debtor;
  - a breach of contract, such as a default or delinquency in interest or principal payments;
  - it becoming probable that the debtor will enter bankruptcy or other financial reorganisation; and
  - significant changes in the technological, market, economic or legal environment that have an adverse effect on the debtor

If any such evidence exists, any impairment loss is determined and recognised as follows:

For investments in subsidiaries, the impairment loss is measured by comparing the recoverable amount of the investment with its carrying amount in accordance with note 1(i)(ii). The impairment loss is reversed if there has been a favourable change in the estimates used to determine the recoverable amount in accordance with note 1(i)(ii).

#### (i) 資產減值

- i) 於附屬公司的投資、貿易 及其他應收款的減值 按成本或攤銷成本列賬的於附 屬公司的投資、貿易及其他應 收款會於各報告期末審閱以釐 定是否有客觀的減值證據。客 觀減值證據包括本集團就下列 一項或多項損失事件所注意到 的可觀察數據:
  - 一 債務人出現重大財務困 難;
  - 違約(如拖欠或延遲支付 利息或本金);
  - 一 債務人可能破產或進行 其他財務重組;及
  - 一 科技、市場、經濟或法律 環境出現對債務人有不 利影響的重大變動。

倘存在任何有關證據,減值損 失按以下方式釐定及確認:

一就於附屬公司的投資而言,減值損失乃根據附註 1(i)(ii)對該投資的可以回金額及其賬面值進行較而計量。倘根據附註 1(i)(ii)用於釐定可收回金額的估計出現有利變動,則會撥回減值損失。

#### 財務報表附註

(除另有指明外,均以人民幣列示)

# 1 Significant Accounting Policies (Continued)

#### (i) Impairment of assets (Continued)

- (i) Impairment of investments in subsidiaries, trade and other receivables (Continued)
  - For trade and other receivables, the impairment loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the financial asset's original effective interest rate (i.e. the effective interest rate computed at initial recognition of these assets), where the effect of discounting is material. This assessment is made collectively where financial assets share similar risk characteristics, such as similar past due status, and have not been individually assessed as impaired. Future cash flows for financial assets which are assessed for impairment collectively are based on historical loss experience for assets with credit risk characteristics similar to the collective group.

If in a subsequent period the amount of an impairment loss decreases and the decrease can be linked objectively to an event occurring after the impairment loss was recognised, the impairment loss is reversed through profit or loss. A reversal of an impairment loss shall not result in the asset's carrying amount exceeding that which would have been determined had no impairment loss been recognised in prior years.

Impairment losses recognised in respect of trade debtors are included within trade and other receivables, whose recovery is considered doubtful but not remote. In this case, the impairment losses for doubtful debts are recorded using an allowance account. When the Group is satisfied that recovery is remote, the amount considered irrecoverable is written off against trade debtors directly and any amounts held in the allowance account relating to that debt are reversed. Subsequent recoveries of amounts previously charged to the allowance account are reversed against the allowance account. Other changes in the allowance account and subsequent recoveries of amounts previously written off directly are recognised in profit or loss.

# 1 Significant Accounting Policies (Continued)

# i) Impairment of assets (Continued)

# (ii) Impairment of other assets Internal and external sources of information are reviewed at the end of each reporting period to identify indications that the following assets may be impaired or an impairment loss previously recognised no longer exists or may have

- property, plant and equipment;
- lease prepayments; and
- intangible assets.

decreased:

If any such indication exists, the asset's recoverable amount is estimated.

#### Calculation of recoverable amount

The recoverable amount of an asset is the greater of its fair value less cost to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of time value of money and the risks specific to the asset. Where an asset does not generate cash inflows largely independent of those from other assets, the recoverable amount is determined for the smallest group of assets that generates cash inflows independently (i.e. a cash-generating unit).

#### Recognition of impairment losses

An impairment loss is recognised in profit or loss if the carrying amount of an asset, or the cash-generating unit to which it belongs, exceeds its recoverable amount. Impairment losses recognised in respect of cash-generating units are allocated to reduce the carrying amount of the other assets to the cash-generating unit (or group of units) on a pro rata basis, except that the carrying value of an asset will not be reduced below its individual fair value less costs to sell, or value in use, if determinable.

## (i) Impairment of assets (Continued)

- (ii) Impairment of other assets (Continued)
  - Reversals of impairment losses

An impairment loss is reversed if there has been a favourable change in the estimates used to determine the recoverable amount.

A reversal of impairment loss is limited to the asset's carrying amount that would have been determined had no impairment loss been recognised in prior years. Reversals of impairment losses are credited to profit or loss in the year in which the reversals are recognised.

#### (j) Inventories

Inventories are carried at the lower of cost and net realisable value.

Cost is calculated using the weighted average cost formula and comprises all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

When inventories are sold, the carrying amount of those inventories is recognised as an expense in the period in which the related revenue is recognised. The amount of any write-down of inventories to net realisable value and all losses of inventories are recognised as an expense in the period when the write-down or loss occurs. The amount of any reversal of any write-down of inventories is recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

轉回的減值損失以在過往年度並無確認減值損失的情況下原應釐定的資產賬面值為限。轉回的減值損失乃於確認轉回的年度內計入損益。

#### (k) Trade and other receivables

Trade and other receivables are initially recognised at fair value and thereafter stated at amortised cost using the effective interest method, less allowance for impairment of doubtful debts (see note 1(i)), except where the receivables are interest-free loans made to related parties without any fixed repayment terms or the effect of discounting would be immaterial. In such cases, the receivables are stated at cost less allowance for impairment of doubtful debts.

#### (l) Derivative financial instruments

Derivative financial instruments are recognised initially at fair value. At the end of each reporting period, the fair value is remeasured. The gain or loss on remeasurement to fair value is recognised immediately in profit or loss, except where the derivatives qualify for cash flow hedge accounting or hedge the net investment in a foreign operation, in which case recognition of any resultant gain or loss depends on the nature of the item being hedged.

#### (m) Interest-bearing borrowings

Interest-bearing borrowings are recognised initially at fair value less attributable transaction costs. Subsequent to initial recognition, interest-bearing borrowings are stated at amortised cost with any difference between the amount initially recognised and redemption value being recognised in profit or loss over the period of the borrowings, together with any interest and fees payable, using the effective interest method.

#### (n) Trade and other payables

Trade and other payables are initially recognised at fair value and subsequently stated at amortised cost unless the effect of discounting would be immaterial, in which case they are stated at cost.

#### (o) Cash and cash equivalents

Cash and cash equivalents comprise cash at bank and in hand, demand deposits with banks and other financial institutions, and short-term, highly liquid investments that are readily convertible into known amounts of cash and which are subject to an insignificant risk of changes in value, having been within three months of maturity at acquisition.

#### (p) Employee benefits

(i) Short term employee benefits and contributions to defined contribution retirement plans

Salaries, annual bonuses, paid annual leave, contributions to defined contribution retirement plans and the cost of non-monetary benefits are accrued in the year in which the associated services are rendered by employees. Where payment or settlement is deferred and the effect would be material, these amounts are stated at their present values.

Contributions to appropriate local defined contribution retirement schemes pursuant to the relevant labour rules and regulations in the PRC are recognised as an expense in profit or loss as incurred, except to the extent that they are included in the cost of inventories not yet recognised as an expense.

#### (ii) Share-based payments

The fair value of share options granted to directors/employees and distributors is recognised as employee cost and selling expenses respectively with a corresponding increase in the share-based compensation reserve within equity. The fair value is measured at the grant date using the binomial lattice model, taking into accounts the terms and conditions upon which the options were granted. Where the directors/employees and distributors have to meet vesting conditions before becoming unconditionally entitled to the options, the total estimated fair value of the options is spread over the vesting period, taking into account the probability that the options will vest.

(ii) Share-based payments (Continued) During the vesting period, the number of share options that is expected to vest is reviewed. Any resulting adjustment to the cumulative fair value recognised in prior years is charged/credited to profit or loss for the year of the review with a corresponding adjustment to the capital reserve. On vesting date, the amount recognised as an expense is adjusted to reflect the actual number of options that vest (with a corresponding adjustment to the capital reserve) except where forfeiture is only due to not achieving vesting conditions that relate to the market price of the Company's shares. The equity amount is recognised in the capital reserve until either the option is exercised (when it is transferred to the share premium account) or the option expires (when it is released directly to retained profits).

# (q) Income tax

Income tax for the year comprises current tax and movements in deferred tax assets and liabilities. Current tax and movements in deferred tax assets and liabilities are recognised in profit or loss except to the extent that they relate to items recognised in other comprehensive income or directly in equity, in which case the relevant amounts of tax are recognised in other comprehensive income or directly in equity, respectively.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the end of the reporting period, and any adjustment to tax payable in respect of previous years.

Deferred tax assets and liabilities arise from deductible and taxable temporary differences respectively, being the differences between the carrying amounts of assets and liabilities for financial reporting purposes and their tax bases. Deferred tax assets also arise from unused tax losses and unused tax credits.

## 1 Significant Accounting Policies (Continued)

#### (q) Income tax (Continued)

Apart from certain limited exceptions, all deferred tax liabilities and all deferred tax assets to the extent that it is probable that future taxable profits will be available against which the asset can be utilised, are recognised. Future taxable profits that may support the recognition of deferred tax assets arising from deductible temporary differences include those that will arise from the reversal of existing taxable temporary differences, provided those differences relate to the same taxation authority and the same taxable entity, and are expected to reverse either in the same period as the expected reversal of the deductible temporary difference or in periods into which a tax loss arising from the deferred tax asset can be carried back or forward. The same criteria are adopted when determining whether existing taxable temporary differences support the recognition of deferred tax assets arising from unused tax losses and credits, that is, those differences are taken into account if they relate to the same taxation authority and the same taxable entity, and are expected to reverse in a period, or periods, in which the tax loss or credit can be utilised.

The limited exceptions to recognition of deferred tax assets and liabilities are those temporary differences arising from the initial recognition of assets or liabilities that affect neither accounting nor taxable profit (provided they are not part of a business combination), and temporary differences relating to investments in subsidiaries to the extent that, in the case of taxable differences, the Group controls the timing of the reversal and it is probable that the differences will not reverse in the foreseeable future, or in the case of deductible differences, unless it is probable that they will reverse in the future.

The amount of deferred tax recognised is measured based on the expected manner of realisation or settlement of the carrying amount of the assets and liabilities, using tax rates enacted or substantively enacted at the end of the reporting period. Deferred tax assets and liabilities are not discounted.

#### (q) Income tax (Continued)

The carrying amount of a deferred tax asset is reviewed at the end of each reporting period and is reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow the related tax benefit to be utilised. Any such reduction is reversed to the extent that it becomes probable that sufficient taxable profits will be available.

Current tax balances and deferred tax balances, and movements therein, are presented separately from each other and are not offset. Current tax assets are offset against current tax liabilities, and deferred tax assets against deferred tax liabilities, if the Company or the Group has the legally enforceable right to set off current tax assets against current tax liabilities and the following additional conditions are met:

- in the case of current tax assets and liabilities, the Company or the Group intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously; or
- in the case of deferred tax assets and liabilities, if they relate to income taxes levied by the same taxation authority on either:
  - the same taxable entity; or
  - different taxable entities, which, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered, intend to realise the current tax assets and settle the current tax liabilities on a net basis or realise and settle simultaneously.

#### (r) Provisions and contingent liabilities

Provisions are recognised for liabilities of uncertain timing or amount when the Group or the Company has a legal or constructive obligation arising as a result of a past event, it is probable that an outflow of economic benefits will be required to settle the obligation and a reliable estimate can be made. Where the time value of money is material, provisions are stated at the present value of the expenditure expected to settle the obligation.

Where it is not probable that an outflow of economic benefits will be required, or the amount cannot be estimated reliably, the obligation is disclosed as a contingent liability, unless the probability of outflow of economic benefits is remote. Possible obligations, whose existence will only be confirmed by the occurrence or non-occurrence of one or more future events are also disclosed as contingent liabilities unless the probability of outflow of economic benefits is remote.

#### (s) Revenue recognition

# 2 Accounting Judgement and Estimates (Continued)

## (a) Impairments

If circumstances indicate that the carrying value of an asset may not be recoverable, the asset may be considered "impaired", and an impairment loss may be recognised in profit or loss. The carrying amounts of assets are reviewed periodically in order to assess whether the recoverable amounts have declined below the carrying amounts. These assets are tested for impairment whenever events or changes in circumstances indicate that their recorded carrying amounts may not be recoverable. When such a decline has occurred, the carrying amount is reduced to recoverable amount.

The recoverable amount is the greater of the fair value less costs to sell and the value in use. In determining the value in use, expected cash flows generated by the asset are discounted to their present value, which requires significant judgement relating to level of sales volume, sales revenue and amount of operating costs. The Group uses all readily available information in determining an amount that is a reasonable approximation of recoverable amount, including estimates based on reasonable and supportable assumptions and projections of sales volume, sales revenue and amount of operating costs.

#### (b) Net realisable value of inventories

Net realisable value of inventories is the estimated selling price in the ordinary course of business less estimated costs of completion and the estimated costs necessary to make the sale. These estimates are based on the current market conditions and the historical experience of selling products with similar nature. Any change in the assumptions would increase or decrease the amount of inventories write-down or the related reversals of write-down made in prior years and affect the Group's net assets value. The Group reassesses these estimates at each end of the reporting period.

# 2 Accounting Judgement and Estimates (Continued)

# (c) Impairment of trade and other receivables

The Group estimates the impairment allowances for trade and other receivables by assessing the recoverability based on credit history and prevailing market conditions. This requires the use of estimates and judgements. Allowances are applied to trade and other receivables where events or changes in circumstances indicate that the balances may not be collectible. Where the expectation is different from the original estimate, such difference will affect the carrying amounts of trade and other receivables and thus the impairment loss in the period in which such estimate is changed. The Group reassesses the impairment allowances at each end of the reporting period.

#### (d) Depreciation

Property, plant and equipment are depreciated on a straight-line basis over the estimated useful lives, after taking into account the estimated residual value. The Group reviews the estimated useful lives of the assets regularly in order to determine the amount of depreciation to be recorded during any reporting period. The useful lives are based on the Group's historical experience with similar assets and taking into account anticipated technological changes. The depreciation expenses for future periods are adjusted prospectively if there are significant changes from previous estimates.

# 3 Turnover and Segment Reporting

The principal activities of the Group are design, manufacture and wholesale of swimwear, fitness wear, sports underwear and swim and indoor sports accessories.

Turnover represents the sales value of goods sold less returns and discounts.

Segment information is presented in respect of the Group's business segments. The primary format, business segments, is based on the Group's management and internal reporting structure.     - (ii) (Continued)

Prior to 1 January 2008, Haosha Industry, being a production-oriented foreign investment enterprise, was entitled to a tax holiday of 2-year full exemption followed by 3-year 50% reduction in the income tax rate commencing from its first profitmaking year from a PRC tax perspective ("2+3 tax holiday"). Haosha Industry commenced operations and recorded taxable profits in 2007. Given its operating period was less than 6 months in 2007, it could defer its 2+3 tax holiday commencement to the following year based on the then prevailing tax regulations.

The CIT Law and its relevant regulations grandfather the 2+3 tax holidays and require them to commence on 1 January 2008 should they be not started earlier. Accordingly, Haosha Industry commenced its 2+3 tax holiday on 1 January 2008. It was exempt from income tax for 2008 and 2009 and is subject to income tax at 12.5% from 2010 to 2012 respectively.

企業所得税法及其相關法規規定兩免三減半税務優惠期不在此限,且規定倘其並無獲提早採納,則自2008年1月1日起開始。因此,浩沙實業於2008年1月1日開始其兩免三減半税務優惠期。其獲豁免繳納2008年及2009年的所得税,惟由2010年至2012年按税率12.5%繳納所得税。

In accordance with the CIT Law, its implementation rules and the relevant regulations, Haosha Industry was granted the High and New Technology Enterprise Status in 2013 for a valid period of 3 years from 2013 to 2015 which entitles Haosha Industry to a reduced income tax rate at 15% during the valid periods under the CIT Law and its relevant regulations.

(iii) According to the CIT Law and its implementation rules, dividends receivable by non-PRC corporate residents from PRC enterprises are subject to withholding tax at a rate of 10%, unless reduced by tax treaties or arrangements, for profits earned since 1 January 2008. In addition, under the Sino-Hong Kong Double Tax Arrangement and its relevant regulations, a qualified Hong Kong tax resident will be liable for withholding tax at the rate of 5% for dividend income derived from the PRC if the Hong Kong tax resident is the "beneficial owner" and holds 25% or more of the equity interests of the PRC Company.

# 24 Financial Risk Management and Fair Values

Exposure to credit, liquidity, interest rate and foreign currency risks arises in the normal course of the Group's business. The Group's exposure to these risks and the financial risk management policies and practices used by the Group to manage these risks are described below.

#### (a) Credit risk

The Group's credit risk is primarily attributable to trade and other receivables. Management has a credit policy in place and the exposures to these credit risks are monitored on an ongoing basis.

In respect of trade and other receivables, individual credit evaluations are performed on all customers. These evaluations focus on the customer's past history of making payments when due and current ability to pay, and take into account information specific to the customer as well as pertaining to the economic environment in which the customer operates. Trade receivables are generally due within 90–180 days from the date of billing.

The Group's exposure to credit risk is influenced mainly by the individual characteristics of each customer rather than the industry or country in which the customers operate and therefore significant concentrations of credit risk primarily arise when the Group has significant exposure to individual customers. At the end of the reporting period, 15% (2012: 19%) and 53% (2012: 51%) of the total trade and other receivables were due from the Group's largest customer and the five largest customers respectively.

The maximum exposure to credit risk is represented by the carrying amount of each financial asset in the consolidated statements of financial position after deducting any impairment allowance.

#### 24 財務風險管理及公允價值

本集團所承受的信貸風險主要受各客戶的個別特性所影響而非客戶經營業務所在的行業或國家,因此信貸風險高度集中的情況主要發生於本集團對個別客戶有著重大風險承擔時產生。於報告期末,15%(2012年:19%)及53%(2012年:51%)的貿易及其他應收款總額分別為應收可。

# 24 Financial Risk Management and Fair Values (Continued)

#### (a) Credit risk (Continued)

Further quantitative disclosures in respect of the Group's exposure to credit risk arising from trade and other receivables are set out in note 16.

#### (b) Liquidity risk

Individual operating entities within the Group are responsible for their own cash management, including the short term investment of cash surpluses and the raising of loans to cover expected cash demands, subject to approval by the chairman of the Group when the borrowings exceed certain predetermined levels of authority. The Group's policy is to regularly monitor liquidity requirements and its compliance with lending covenants, to ensure that it maintains sufficient reserves of cash and adequate committed lines of funding from major financial institutions to meet its liquidity requirements in the short and longer term.

#### (c) Interest rate risk

The Group does not have significant exposure to interest rate risk as it does not expect interest rate fluctuation would have any significant impact on the fair value or cash flows of its cash and bank deposits held as at 31 December 2013.

#### (d) Currency risk

As the Group's principal activities are carried out in the PRC, the Group's transactions are mainly denominated in Renminbi, which is not freely convertible into foreign currencies. All foreign exchange transactions involving Renminbi must take place through the People's Bank of China or other institutions authorised to buy and sell foreign exchange. The exchange rates adopted for the foreign exchange transactions are the rates of exchange quoted by the People's Bank of China that are determined largely by supply and demand.

#### (d) 貨幣風險

由於本集團的主要業務在中國進行,本集團的交易主要以人民幣計值。人民幣不可自由兑換為外幣。所有涉及人民幣的外匯交易必須適中國人民銀行或其他授權買賣外匯的機構進行。外匯交易採用的匯率乃中國人民銀行所報的匯率,該匯率主要按供求釐定。

The Group had no significant foreign exchange exposure as at 31 December 2013, as the turnover generated from export sales of the Group was insignificant.

#### (e) Fair values

The fair value of forward foreign exchange contracts is determined by using the forward exchange rates at the end of the reporting period and comparing to the contractual rates, with the resulting value discounted back to the present value.

The carrying amounts of the Group's financial instruments are carried at amounts not materially different from their fair values as at 31 December 2013 and 2012. The carrying values of the Group's financial instruments approximate their fair values because of the short maturities of these instruments.
