CHAIRMAN'S STATEMENT

Dear shareholders,

On behalf of the Board (the "Board") of Directors (the "Directors") of Jilin Qifeng Chemical Fiber Co., Ltd. (the "Company"), I herewith present the financial report and audited consolidated financial statements of the Company and its subsidiary (collectively, the "Group") for the financial year ended 31 December 2013 (the "Year").

ANNUAL RESULTS

During the Year, the Group's revenue amounted to approximately RMB1.5 billion, representing an increase of approximately 6% as compared to RMB1.4 billion in the previous year. Loss attributable to the owners of the Company for the Year amounted to approximately RMB92.5 million, reduced substantially from a loss of approximately RMB186.6 million for the year ended 31 December 2012.

BUSINESS REVIEW

During the Year, the recession in Europe continued and the global market remained stagnated. The continual appreciation of the Renminbi ("RMB") and the increase in production costs in the People's Republic of China (the "PRC") market brought adverse impact to the PRC's textile industry, resulting in a slow growth in the demand in the downstream textile industry and the demand for Group's products. Under this market condition, the Group strengthened its internal organization management and the development of new products in order to expand its market share, and enhanced its production techniques to reduce production costs. The Group also monitored the market closely and strengthened sales-production management to maximize its gross profit margin.

OUTLOOK

Looking forward, the Group will continue to expand its market share by enhancing marketing and sales of acrylic fiber products and carbon fiber precursor, strive to achieve further growth by solidifying its leading position in the PRC's acrylic fiber and carbon fiber precursor industries as well as expand its overseas markets. Meanwhile, the Group is also committed to conducting ongoing product development to meet market demand; stabilising product quality to maintain brand image; and improving profitability through technological innovation and minimising production waste and consumables.

APPRECIATION

Lastly, I would like to take this opportunity to thank the shareholders of the Company ("Shareholders") and business partners of the Group for their support and encouragement over the past year. I would also like to express my gratitude to the Directors and the entire staff of the Group for their hard work and contribution.

REVIEW AND OUTLOOK

Market Review

The continual recession in Europe and the stagnated global market inevitably exerted an adverse impact to the PRC's textile industry. Coupled with the persistent appreciation of the Renminbi ("RMB") and the increasing costs in the PRC market, the demands of the downstream textile industry and the Group's products grew slowly during the Year. During the Year, the Group also strived to avoid contributing to destructive competition in the industry by carefully controlling its production output; expanded its sales channel to promote the Group's differentiated acrylic fiber products such as anti-pilling fibers, fine denier fibers and gel fibers, which also improved the Group's gross profit margins. For the Year under review, the average prices of both of acrylic fiber products and acrylonitrile (the major raw material for the production of the Group's products) in the PRC market decreased slightly. Nevertheless, as a result of a greater magnitude in the decrease in average price of acrylonitrile as compared to that of the decrease in the average price of acrylic products, the price difference between acrylic fiber products and acrylonitrile enlarged, which improved the profitability of acrylic fiber manufacturers. Though the PRC carbon fiber market is still in its primary stage of development, the Group expects that as the production process technology of downstream carbonization plants gradually improves, the development pace of the PRC's carbon fiber market will accelerate.

Sales Review

The Group's revenue was approximately RMB1.5 billion for the Year, representing an increase of approximately 6% as compared to approximately RMB1.4 billion for the previous year. The sales volume of the Group's acrylic fiber and carbon fiber products amounted to 94,705 tons, increased by approximately 7% from 88,187 tons for the previous year. The average unit selling price of acrylic fiber products for the Year was RMB15,421 per ton, decreased slightly by approximately 2% as compared to that of the previous year. The price differential between the average selling prices of the Group's acrylic fiber products and its major raw material, acrylonitrile, was RMB4,591 per ton for the Year, representing an increase of approximately 16% from RMB3,959 per ton in the previous year. The total volume of the acrylic fiber products produced by the Group (together with its joint venture) in the Year was 188,868 tons, accounting for about 23% of the total production volume of the domestic acrylic fiber market in PRC. Sales of the Group's carbon fiber products were 506 tons for the Year (2012: 38 tons), which accounted for an insignificant part of the Group's overall sales volume.

Production Management

The Group's total production output was approximately 94,545 tons for the Year, representing an increase of 3.1% as compared to that for the previous year. Production output of carbon fiber products in 2013 was about 619 tons (2012: 1,000 tons). During the Year, the Group continued to implement stringent cost control measures and adhere to order-based production and inventory level control in order to further enhance operating efficiency. The Group has also conducted continual technical reform, quality improvement and waste reduction projects, which set up a solid foundation to stabilise production process, improve production quality and reduce production cost.

Employees

As at 31 December 2013, the Group had 2,170 employees, representing a increase of 156 employees as compared to 2,014 employees as at 31 December 2012. The Group's staff remuneration packages were determined with reference to the prevailing market practices (including a performance-based incentive bonus). The Group also provided continuous training to employees at all levels. During the Year, the Group provided its employees with numerous training opportunities corresponding to the various functions of their positions including product quality control, production safety and environmental protection. The Group also conducted performance evaluations of all employees.

OUTLOOK

Looking forward, with the development of the PRC economy and textile industry as well as the adjustments to macroeconomic policies of the PRC, the Group expects the following new opportunities and prospects for its business:

1. Development of carbon fiber: The Group has reached a production capacity of 5,000 tons per annum of its carbon fiber precursor. The Group believes that with the development of the carbon fiber market, the carbon fiber products will bring about larger market potential and long-term economic benefits to the Group.

2. Development of differentiated acrylic fiber: Development of differentiated acrylic fiber will become one of the main drives for the future development of the acrylic fiber industry in China. The Group will enhance the marketing and promotion of the anti-pilling acrylic fiber, highlight acrylic fiber and high strength acrylic fiber which will bring about additional economic benefits for the Group. The Group is committed to the development of differentiated acrylic fiber to enhance its competitiveness in the market for differentiated acrylic fiber products in China.

FINANCIAL ANALYSIS

Operating results

The revenue of the Group amounted to approximately RMB1.5 billion for the Year, representing an increase of approximately 6% from approximately RMB1.4 billion for the year ended 31 December 2012. The increase in overall revenue was mainly due to the increase in the sales volume of the Group's products by approximately 7% in 2013. During the Year, the Group's total sales volume was 94,705 tons and total production volume was 94,545 tons, representing a sales-to-production ratio of approximately 100% (2012: 96%). Loss attributable to the owners of the Company for the Year was approximately RMB92.5 million, reduced significantly from a loss of approximately RMB186 million for the year 2012. The substantial decrease in loss of the Group for the Year was mainly attributable to the increase in sales volume of the products of both the Company and its joint venture. During the Year, the gross profit margin of the Group increased to 6.8% from 1.2% in 2012, which was primarily due to the greater price differential between the cost of acrylonitrile and the selling price of the Group's products as compared to that of the previous year. The price differential between the average selling price of the Group's products and the average purchase price of acrylonitrile was RMB4,591 per ton, representing an increase of approximately 16% from RMB3,959 per ton for that of 2012.

Operating expenses (distribution costs and administrative expenses)

Distribution costs increased from approximately RMB35.9 million for the year ended 31 December 2012 to approximately RMB37.6 million for the Year. The increase in distribution costs was primarily resulted from the increase in transportation costs due to the increase in sales volume during the Year. Administrative expenses increased from approximately RMB73.4 million for the year ended 31 December 2012 to approximately RMB116.6 million for the Year due to the increase in salaries and depreciation charge of the carbon fiber business.

Net other gains (the net aggregate amount of other income, other expenses and other (losses)/gains – net)

Net other gains for the Year was approximately RMB123.5 million, as compared to that of approximately RMB65.3 million for the year ended 31 December 2012. The increase in net other gains in the Year was primarily due to the increase in other income from the provision of utilities.

Net finance costs

Net finance costs increased from approximately RMB121.1 million for the year ended 31 December 2012 to approximately RMB137.2 million for the Year. The increase in net finance costs was primarily resulted from the increase in bank borrowings.

Share of loss of a joint venture

The Group's share of 50% of the loss of its joint venture, Jilin Jimont Acrylic Fiber Co., Ltd. ("Jimont"), under the equity method of accounting amounted to approximately RMB14.9 million for the Year (2012: loss of RMB40.2 million). The decrease in the loss of Jimont was primarily resulted from the market conditions as described in this report, which also had a similar impact on the financial performance of Jimont during the Year.

Financial resources, liquidity and liability position

As of 31 December 2013, the Group's total assets and total liabilities were approximately RMB3.05 billion and RMB2.31 billion, respectively. As of 31 December 2013, the Group's net current liabilities amounted to approximately RMB739 million and its current ratio, calculated by dividing its current assets by its current liabilities as of 31 December 2013, was approximately 0.61 (2012: 0.54). The Group had cash in hand and cash at bank and restricted bank deposits of approximately RMB90.8 million and RMB74.0 million, respectively as of 31 December 2013. As of 31 December 2013, the total bank borrowings of the Group amounted to approximately RMB1.78 billion, out of which approximately RMB1.32 billion was short-term bank borrowings, approximately RMB104.9 million was current portion of long-term borrowings and approximately RMB364.1 million was the non-current portion of long term bank borrowings. Approximately 47.8% of the Group's bank borrowings bear floating interest rates. The bank borrowings were mainly used for the expansion of production facilities and the construction of the thermal power plant as well as the development of the carbon fiber precursor project. The net increase in bank borrowings was approximately RMB148.4 million during the Year. All of the Group's bank borrowings are denominated in Renminbi. Therefore, the management believes that the Group is exposed to minimal foreign exchange risks and has not made any foreign currency hedging arrangement. As of 31 December 2013, the Group's gearing ratio, calculated by dividing total liabilities by total assets, was approximately 75.9% (2012: 72.9%).

INVESTMENT REVIEW

Joint venture

Our joint venture, Jilin Jimont Acrylic Fiber Co., Ltd., was established on 21 December 2005 with a total registered share capital of RMB450 million. The Group holds 50.00% equity interest in the joint venture, whereas Montefibre S.p.A ("Montefibre") and SIMEST S.p.A hold 39.36% and 10.64% respectively. The total fixed asset investment in phase one of the acrylic fiber project with annual production capacity of 100,000 tons was approximately RMB1.02 billion, which was mainly financed by bank borrowings and capital contribution from the joint venture partners. All joint venture partners had paid up their capital contributions according to their respective share of equity interest in the joint venture prior to 2007. The joint venture is principally engaged in the production and sales of acrylic fiber products. As disclosed in the announcement of the Company dated 18 December 2013, the Company has been notified by Montefibre of its intention to enter into voluntary winding up, and that as part of its proposed voluntary winding up, Montefibre will make its investment in Jilin Jimont Acrylic Fiber Co., Ltd. (吉林吉盟腈綸有限公司) ("Jimont"), a joint venture of the Company, available for sale. The Company and Montefibre are discussing the manner by which Montefibre's equity interests in Jimont will be dealt with, including disposal to independent third parties and/or the Company. As at the date of this annual report announcement, no binding agreement or arrangement has been entered into by the Company or Jimont in respect of any disposal of Montefibre's equity interests in Jimont.

In 2013, the sales volume and production volume of the joint venture reached 94,942 tons and 98,184 tons, respectively, representing a sales-to-production ratio of approximately 97%. The utilisation rate of the joint venture production plant was 98%. The loss of the joint venture was approximately RMB29.9 million in the year ended 31 December 2013 (2012: loss of RMB80.3 million). The improvement in the profitability of the joint venture was mainly due to impact of the market conditions described in the section headed "Market Review" of this report.

Entrusted deposits and matured deposits

As of 31 December 2013, the Group did not hold deposits under trusts in any financial institutions in the PRC. All of the Group's cash was held in commercial banks in the PRC in accordance with applicable laws and regulations. Except for restricted bank deposits of approximately RMB74.0 million, the Group had no bank deposits which cannot be withdrawn upon maturity.

Pledged assets

As of 31 December 2013, certain properties, plants and equipment, land use rights and bills receivables with a net book value of approximately RMB277.1 million, Nil, RMB50.0 million respectively (as of 31 December 2012: RMB112.9 million, Nil and RMB3.0 million, respectively) were pledged as securities for bank borrowings of approximately RMB356 million (as of 31 December 2012: RMB162 million). In addition, bank deposits of approximately RMB30.0 million and RMB0.1 million was pledged for the issue of certain trade bills payables and letters of credit for the Group's purchases of raw materials, plant and machinery from certain overseas suppliers, respectively.

Contingent liabilities

The Group had no material contingent liabilities as of 31 December 2013.

Dividend

The Board does not recommend the declaration of a dividend for the year ended 31 December 2013 (2012: Nil).

INDEPENDENT AUDITOR'S REPORT

TO THE SHAREHOLDERS OF JILIN QIFENG CHEMICAL FIBER CO., LTD.
(a joint stock company incorporated in the People's Republic of China with limited liability)

We have audited the consolidated financial statements of Jilin Qifeng Chemical Fiber Co., Ltd. (the "Company") and its subsidiary (together the "Group") set out on pages 38 to 116, which comprise the consolidated and company statements of financial position as at 31 December 2013, and the consolidated statement of comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information.

DIRECTORS' RESPONSIBILTIY FOR THE CONSOLIDATED FINANCIAL STATEMENTS

The directors of the Company are responsible for the preparation of consolidated financial statements that give a true and fair view in accordance with Hong Kong Financial Reporting Standards issued by the Hong Kong Institute of Certified Public Accountants and the disclosure requirements of the Hong Kong Companies Ordinance, and for such internal control as the directors determine is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

AUDITOR'S RESPONSIBILITY

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. This report is made solely to you, as a body, in accordance with the terms of our engagement, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

We conducted our audit in accordance with Hong Kong Standards on Auditing issued by the Hong Kong Institute of Certified Public Accountants. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation of consolidated financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

OPINION

In our opinion, the consolidated financial statements give a true and fair view of the state of affairs of the Company and of the Group as at 31 December 2013, and of the Group's loss and cash flows for the year then ended in accordance with Hong Kong Financial Reporting Standards and have been properly prepared in accordance with the disclosure requirements of the Hong Kong Companies Ordinance.

EMPHASIS OF MATTER

Going concern basis for preparation of consolidated financial statements

Without qualifying our opinion, we draw attention to note 2.1 to the consolidated financial statements, which indicates that the Group incurred a net loss during the year ended 31 December 2013 and, as of that date, the Company's and the Group's current liabilities exceeded its current assets. These conditions indicate the existence of a material uncertainty which may cast significant doubt about the Company's and the Group's ability to continue as a going concern.

The address of its registered office is Block 4, Zone D, Hengshan West Road, Jilin New and High Technology Development Zone, Jilin City, Jilin Province, the PRC.

In the opinion of the Company's directors, the ultimate parent company of the Company is Jilin Chemical Fiber Group Co., Ltd. ("JCF Groupco"), a limited liability company incorporated in the PRC and a state-owned enterprise controlled by the PRC government.

These consolidated financial statements are presented in Renminbi ("RMB") and all values are rounded to the nearest thousand, unless otherwise stated. These consolidated financial statements have been approved for issue by the Board of Directors (the "Board") of the Company on 28 March 2014.

2. BASIS OF PREPARATION

2.1 Basis of preparation and going concern assumption

During the year ended 31 December 2013, the Group incurred a net loss of RMB92,472,000 and, as of that date, the Company's and the Group's current liabilities exceeded its current assets by RMB681,930,000 and RMB739,117,000 respectively and the bank borrowings as included in the Company's and the Group's current liabilities amounted to RMB1,370,291,000 and RMB1,420,292,000 respectively. This situation indicates the existence of a material uncertainty that may cast significant doubt on the Group's ability to continue as a going concern and therefore, the Group may not be able to realise its assets and discharge its liabilities in the normal course of business.

The Company's directors are of the opinion that the Group will be able to finance its future financing requirements and working capital based on the following considerations:

(a) The Group's profitability and cash flows are expected to be improved in view of the improving business environment of the business operations.

(b) The Group has maintained its good business relationship with its principal bankers and the principal bankers have indicated their willingness to renew their borrowings to the Group upon maturities of borrowings. The Company's directors believe that formal and binding facility letters will be entered into with the respective principal bankers upon the original maturity dates of the related borrowings.

(c) The ultimate parent company, JCF Groupco, a state-owned enterprise, has confirmed and has ability to provide continuing financial support to the Company and the Group so as to enable it to meet its liabilities as and when they fall due and to carry on its business for the foreseeable future.

2. BASIS OF PREPARATION – *continued*

2.1 Basis of preparation and going concern assumption – *continued*

In view of the above, the Company's directors are of the view that there will be sufficient financial resources available to the Company and the Group to enable it to meet its liabilities as and when they fall due and to continue as a going concern. Accordingly, the Company's directors have prepared the consolidated financial statements on a going concern basis.

The consolidated financial statements of the Company have been prepared in accordance with Hong Kong Financial Reporting Standards ("HKFRSs") issued by the Hong Kong Institute of Certified Public Accountants (the "HKICPA"). The consolidated financial statements also include the applicable disclosure requirements of the Hong Kong Company Ordinance and the Rules Governing the Listing of Securities on the Stock Exchange ("Listing Rules"). The consolidated financial statements have been prepared under the historical cost convention, as modified by the revaluation of the derivative financial instrument being categorised as financial assets/liabilities at fair value through profit or loss (Note 22).

The Group has not prepared a separate consolidated income statement because it is identical to the consolidated statement of comprehensive income.

The preparation of consolidated financial statements in conformity with HKFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in note 5.

2.2 Adoption of new/revised HKFRSs – effective on 1 January 2013

The Group has adopted the following amendments to published standards issued by the HKICPA, which are mandatory for the first time for the financial year beginning 1 January 2013:

HKFRSs (Amendments)	Annual Improvements 2010-2012 Cycle
Amendments to HKAS 1 (Revised)	Presentation of Items of Other Comprehensive Income
Amendments to HKFRS 7	Offsetting Financial Assets and Financial Liabilities
HKFRS 10	Consolidated Financial Statements
HKFRS 11	Joint Arrangements
HKFRS 12	Disclosure of Interests in Other Entities
HKFRS 13	Fair Value Measurement
HKAS 28 (2011)	Investments in Associates and Joint Ventures

Except as explained below, the adoption of the abovementioned amendments did not result in any substantial changes to the Group's significant accounting policies and presentation of the consolidated financial statements.

2. BASIS OF PREPARATION – *continued*

2.2 Adoption of new/revised HKFRSs – effective on 1 January 2013 – *continued*

Amendments to HKFRS 7 – Offsetting Financial Assets and Financial Liabilities

HKFRS 7 is amended to introduce disclosures for all recognised financial instruments that are set off under HKAS 32 and those that are subject to an enforceable master netting agreement or similar arrangement, irrespective of whether they are set off under HKAS 32.

The adoption of the amendments has no impact on these financial statements as the Group has not offset financial instruments, nor has it entered into a master netting agreement or a similar arrangement.

HKFRS 10 – Consolidated Financial Statements

HKFRS 10 introduces a single control model for consolidation of all investee entities. An investor has control when it has power over the investee (whether or not that power is used in practice), exposure or rights to variable returns from the investee and the ability to use the power over the investee to affect those returns. HKFRS 10 contains extensive guidance on the assessment of control. For example, the standard introduces the concept of “de facto” control where an investor can control an investee while holding less than 50% of the investee’s voting rights in circumstances where its voting interest is of sufficiently dominant size relative to the size and dispersion of those of other individual shareholders to give it power over the investee. Potential voting rights are considered in the analysis of control only when these are substantive, i.e. the holder has the practical ability to exercise them.

The standard explicitly requires an assessment of whether an investor with decision making rights is acting as principal or agent and also whether other parties with decision making rights are acting as agents of the investor. An agent is engaged to act on behalf of and for the benefit of another party and therefore does not control the investee when it exercises its decision making authority. The accounting requirements in HKAS 27 (2008) on other consolidation related matters are carried forward unchanged. The Group has changed its accounting policy in determining whether it has control of an investee and therefore is required to consolidate that interest (see note 3.1(a)).

2. BASIS OF PREPARATION – *continued*

2.2 Adoption of new/revised HKFRSs – effective on 1 January 2013 – *continued*

HKFRS 11 – Joint Arrangements

Joint arrangements under HKFRS 11 have the same basic characteristics as joint ventures under HKAS 31. Joint arrangements are classified as either joint operations or joint ventures. Where the Group has rights to the assets and obligations for the liabilities of the joint arrangement, it is regarded as a joint operator and will recognise its interests in the assets, liabilities, income and expenses arising from the joint arrangement. Where the Group has rights to the net assets of the joint arrangement as a whole, it is regarded as having an interest in a joint venture and will apply the equity method of accounting, unless it is classified as held for sale (or included in a disposal group that is classified as held for sale). HKFRS 11 does not allow proportionate consolidation of a joint venture arrangement. In an arrangement structured through a separate vehicle, all relevant facts and circumstances should be considered to determine whether the parties to the arrangement have rights to the net assets of the arrangement. Previously, the existence of a separate legal entity was the key factor in determining the existence of a jointly controlled entity under HKAS 31. The Group has changed its accounting policy for joint arrangements (see note 3.1(b)).

HKFRS 13 – Fair Value Measurement

HKFRS 13 provides a single source of guidance on how to measure fair value when it is required or permitted by other standards. The standard applies to both financial and non-financial items measured at fair value and introduces a fair value measurement hierarchy. The definitions of the three levels in this measurement hierarchy are generally consistent with HKFRS 7 "Financial Instruments: Disclosures". HKFRS 13 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e. an exit price). The standard removes the requirement to use bid and ask prices for financial assets and liabilities quoted in an active market. Rather the price within the bid-ask spread that is most representative of fair value in the circumstances should be used. It also contains extensive disclosure requirements to allow users of the financial statements to assess the methods and inputs used in measuring fair values and the effects of fair value measurements on the financial statements. HKFRS 13 is applied prospectively.

HKFRS 13 did not materially affect any fair value measurements of the Group's assets and liabilities and therefore has no effect on the Group's financial position and performance.

2. BASIS OF PREPARATION – *continued*

2.3 New/revised HKFRSs that have been issued but are not yet effective

The HKICPA has also issued the following new or revised standards, amendments or interpretations which may be applicable to the Group but not yet effective for the financial year beginning 1 January 2013:

		Effective for accounting periods beginning on or after
Amendments to HKAS 32	Offsetting Financial Assets and Financial Liabilities	1 January 2014
HKFRS 9	Financial instruments	Note
HKFRSs (Amendments)	Annual Improvements 2011-2013 Cycle	1 July 2014

		Effective for accounting periods beginning or transactions occuring on or after
HKFRSs (Amendments)	Annual Improvements 2010-2012 Cycle	1 July 2014

Note: No mandatory effective date yet determined but is available for adoption.

The Group has not early adopted the abovementioned new or revised standards and amendments in these consolidated financial statements and will apply these new or revised standards and amendments in accordance with their respective effective dates.

Information on new and revised HKFRSs that are expected to affect the Group are as below:

Amendments to HKAS 32 – Offsetting Financial Assets and Financial Liabilities

The amendments clarify the offsetting requirements by adding appliance guidance to HKAS 32 which clarifies when an entity "currently has a legally enforceable right to set off" and when a gross settlement mechanism is considered equivalent to net settlement.

2. BASIS OF PREPARATION – *continued*

2.3 New/revised HKFRSs that have been issued but are not yet effective – *continued*

HKFRS 9 – Financial Instruments

Under HKFRS 9, financial assets are classified into financial assets measured at fair value or at amortised cost depending on the entity's business model for managing the financial assets and the contractual cash flow characteristics of the financial assets. Fair value gains or losses will be recognised in profit or loss except for those non-trade equity investments, which the entity will have a choice to recognise the gains and losses in other comprehensive income. HKFRS 9 carries forward the recognition, classification and measurement requirements for financial liabilities from HKAS 39, except for financial liabilities that are designated at fair value through profit or loss, where the amount of change in fair value attributable to change in credit risk of that liability is recognised in other comprehensive income unless that would create or enlarge an accounting mismatch. In addition, HKFRS 9 retains the requirements in HKAS 39 for derecognition of financial assets and financial liabilities.

Annual Improvements 2010-2012 Cycle and 2011-2013 Cycle

The amendments issued under the annual improvements process make small, non-urgent charges to a number of standards where they are currently unclear. Among them HKAS 16 Property, Plant and Equipment has been amended to clarify how the gross carrying amount and accumulated depreciation are treated where an entity uses the revaluation model. The carrying amount of the asset is restated to revalued amount. The accumulated depreciation may be eliminated against the gross carrying amount of the asset. Alternatively, the gross carrying amount may be adjusted in a manner consistent with the revaluation of the carrying amount of the asset and the accumulated depreciation is adjusted to equal the difference between the gross carrying amount and the carrying amount after taking into account accumulated impairment losses.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

3.1 Group accounting

The Group is currently comprises of the Company and its subsidiary. The Group also has an investment in a joint venture.

Subsidiary is fully consolidated from the date on which control is transferred to the Group and is de-consolidated from the date that control ceases. Inter-company transactions, balances and unrealised gains/losses on transactions between group companies are eliminated.

Investment in the joint venture is accounted for using the equity method of accounting and is initially recognised at cost. The consolidated statement of comprehensive income includes the Group's share of the results of the jointly venture for the year and the consolidated statement of financial position includes the Group's share of net assets of the joint venture. Unrealised gains on transactions between the Group and its joint venture are eliminated to the extent of the Group's interest in the joint venture. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the assets transferred.

Accounting policies of the subsidiary and the joint venture have been changed where necessary in the consolidated financial statements to ensure consistency with the policies adopted by the Group.

(a) Subsidiary

A subsidiary is an investee over which the Company is able to exercise control. The Company controls an investee if all three of the following elements are present: power over the investee, exposure, or rights, to variable returns from the investee, and the ability to use its power to affect those variable returns. Control is reassessed whenever facts and circumstances indicate that there may be a change in any of these elements of control.

In the Company's statement of financial position, investment in subsidiary is stated at cost less impairment loss, if any. The result of subsidiary is accounted for by the Company on the basis of dividend received and receivable.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – *continued*

3.1 Group accounting – *continued*

(b) Joint arrangements

The group is a party to a joint arrangement where there is a contractual arrangement that confers joint control over the relevant activities of the arrangement to the group and at least one other party. Joint control is assessed under the same principles as control over subsidiaries.

The group classifies its interest in joint arrangement as joint venture where the group has right to only the net assets of the joint arrangement.

In assessing the classification of interests in joint arrangement, the Group considers:

– The structure of the joint arrangement;

– The legal form of joint arrangements structured through a separate vehicle;

– The contractual terms of the joint arrangement agreement; and

– Any other facts and circumstances (including any other contractual arrangements).

In the company's statement of financial position, the investment in the joint venture is stated at cost less provision for impairment losses (if any). The result of the joint venture is accounted by the company on the basis of dividend received and receivable.

3.2 Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-makers. The chief operating decision-makers have been identified as the three executive directors of the Company who are responsible for allocating resources, assessing performance of operating segments and making strategic decisions.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – *continued*

3.3 Foreign currency translation

(a) Functional and presentation currency

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates (the "functional currency"). The consolidated financial statements are presented in RMB which is the Company's functional and the Group's presentation currency. RMB is also the functional currency of the subsidiary and the joint venture of the Company.

(b) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in profit or loss.

Foreign exchange gains and losses that relate to borrowings and cash and cash equivalents are presented in the consolidated statement of comprehensive income within 'finance income or costs'. All other foreign exchange gains and losses are presented in the consolidated statement of comprehensive income within 'other gains/losses – net'.

3.4 Property, plant and equipment

Property, plant and equipment are stated at historical cost less accumulated depreciation and impairment losses (if any). Historical cost includes expenditure that is directly attributable to the acquisition of the items. Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to profit or loss during the financial period in which they are incurred.

Depreciation on property, plant and equipment is calculated using the straight-line method to allocate their costs to their residual values over their estimated useful lives, as follows:

Buildings	22 years
Machinery and equipment	12 - 16 years
Electronic and office equipment	5 years
Motor vehicles	5 years

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – *continued*

3.4 Property, plant and equipment – *continued*

Construction in progress represents buildings, plant and machinery under construction and pending installation and is stated at cost. No depreciation is provided for construction in progress during the construction and installation stage. When the related construction and installation works have been completed and the relevant assets are brought into their intended use, construction in progress will then be transferred to the relevant categories of property, plant and equipment and depreciated in accordance with the policy as stated above.

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period. An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount (Note 3.7).

Gains and losses on disposals are determined by comparing the proceeds with the carrying amount and are recognised in profit or loss and presented in the consolidated statement of comprehensive income within 'other gains/losses – net'.

3.5 Land use rights

All the land in the PRC is state-owned and no individual land ownership right exists. The Group leased several pieces of land and the related prepaid operating lease payments are recognised as land use rights. Land use rights are stated at the prepaid operating lease payments less accumulated amortisation and impairment losses (if any). Amortisation is calculated using the straight-line method to allocate the prepaid operating lease payments for land over the remaining lease terms.

3.6 Intangible assets – Technical know-how and licenses

Separately acquired technical know-how and licenses are shown at historical cost and amortised using the straight-line method over their estimated useful lives of 8 to 15 years. Technical know-how and licenses are stated at cost less accumulated amortisation and impairment losses (if any).

3.7 Impairment of non-financial assets

Assets that have an indefinite useful life are not subject to deprecation or amortisation and are tested annually for impairment. Assets that are subject to depreciation or amortisation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units). Non-financial assets that suffered from impairment are reviewed for possible reversal of the impairment at each reporting date.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – *continued*

3.8 Financial assets

The Group classifies its financial assets in the following categories: at fair value through profit or loss, loans and receivables and available-for-sale. The classification depends on the purpose for which the financial assets were acquired. Management determines the classification of its financial assets at initial recognition.

Regular way purchases and sales of financial assets are recognised on the trade-date – the date on which the Group commits to purchase or sell the asset. Investments are initially recognised at fair value plus transaction costs for all financial assets not carried at fair value through profit or loss. Financial assets carried at fair value through profit or loss are initially recognised at fair value, and transaction costs are expensed in the profit or loss. Financial assets are derecognised when the rights to receive cash flows from the investments have expired or have been transferred and the Group has transferred substantially all risks and rewards of ownership.

As at the end of the reporting period, the Group only has financial assets in the category of loans and receivables. The Group has entered into an interest rate swap contract which is not designated as hedge and therefore has been categorised as financial asset/liability at fair value through profit or loss. The related interest rate swap contract is a financial liability of the Group as at 31 December 2013 (Note 22).

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except for maturities greater than 12 months after the end of the reporting period which will then be classified as non-current assets. The Group's loans and receivables comprise 'trade and other receivables', 'restricted bank deposits' and 'cash and cash equivalents'. Loans and receivables are initially recognised at fair value and subsequently measured at amortised cost using the effective interest method.

Financial assets at fair value through profit or loss are financial assets held for trading. Derivatives are also categorised as held for trading unless they are designated as hedges. Assets in this category are classified as current assets if expected to be settled within 12 months; otherwise, they are classified as non-current. Assets in this category are initially recognised and subsequently measured at their fair values, and transaction costs are expensed in profit or loss. Gains or losses arising from changes in the fair values of financial assets at fair value through profit or loss are recognised in profit or loss in the period in which they arise.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – *continued*

3.9 Derivative financial instruments

Derivatives are initially recognised at fair value on the date a derivative contract is entered into and are subsequently re-measured at their fair value. The method of recognising the resulting gain or loss depends on whether the derivative is designed as a hedging instrument, and if so, the nature of the item being hedged. As mentioned note 3.8 above, the Group has entered into an interest rate swap contract which has been classified as financial asset/liability at fair value through profit or loss and the management considers that this derivative financial instrument do not qualify for hedge accounting. Changes in the fair value of this derivative financial instrument is recognised immediately in profit or loss and presented in the consolidated statement of comprehensive income within 'other gains/losses – net'.

3.10 Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the statement of financial position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

3.11 Impairment of financial assets carried at amortised costs

The Group assesses at the end of each reporting period whether there is objective evidence that a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is impaired and impairment losses are incurred only if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

Evidence of impairment may include indications that the debtors or a group of debtors is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganisation, and where observable data indicate that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

For loans and receivables category, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced and the amount of the loss is recognised in profit or loss. The Group first assesses whether objective evidence of impairment exists.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised (such as an improvement in the debtor's credit rating), the reversal of the previously recognised impairment loss is recognised in profit or loss.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – *continued*

3.12 Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is determined using the weighted average method. The cost of finished goods and work in progress comprises raw materials, direct labour, other direct costs and related production overheads but excludes borrowing costs. Net realisable value is the estimated selling price in the ordinary course of business, less applicable variable selling expenses.

3.13 Trade and other receivables

Trade receivables are amounts due from customers for merchandise sold or services performed in the ordinary course of business. If collection of trade and other receivables is expected in one year or less (or in the normal operating cycle of the business if longer), they are classified as current assets. If not, they are presented as non-current assets.

Trade and other receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment.

3.14 Cash and cash equivalents

Cash and cash equivalents includes cash in hand, deposits held at call with banks, other short-term highly liquid investments with original maturities of three months or less, and bank overdrafts (if any).

3.15 Leases

Leases in which a significant portion of the risks and rewards of ownership of the leased assets are retained by the lessor are classified as operating leases.

(a) Leases – where the Group as the lessee

Payments made under operating leases (net of any incentives received from the lessor) are charged to profit or loss on a straight-line basis over the period of the lease.

(b) Leases – where the Group as the lessor

When the Group leases out assets under operating leases, the assets are included in the statement of financial position according to their nature and where applicable, are depreciated in accordance with the Group's depreciation policies, as set out in note 3.4 above. Rental income arising from assets leased out under operating leases is recognised in accordance with the Group's revenue recognition policy as set out in note 3.23 below.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – *continued*

3.16 Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax, from the proceeds.

3.17 Provisions

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events; it is probable that an outflow of resources will be required to settle the obligation; and the amount has been reliably estimated. Provisions are not recognised for future operating losses. Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

3.18 Trade payables

Trade payables are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Trade payable are classified as current liabilities if payment is due within one year or less (or in the normal operating cycle of the business if longer). If not, they are presented as non-current liabilities.

Trade payables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method.

3.19 Borrowings

Borrowings are recognised initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortised cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognised in profit or loss over the period of the borrowings using the effective interest method.

Fees paid on the establishment of loan facilities are recognised as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw-down occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalised as a prepayment for liquidity services and amortised over the period of the facility to which it relates.

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the end of the reporting period.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – *continued*

3.20 Borrowing costs

General and specific borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

3.21 Current and deferred income tax

Income tax expense for the period comprises current and deferred tax. Income tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case the income tax is also recognised in other comprehensive income or directly in equity, respectively.

Current income tax is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period in the countries where the Group and the joint venture operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax is recognised, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. However, deferred tax liabilities are not recognised if they arise from the initial recognition of goodwill, the deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted at the end of the reporting period date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred income tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Deferred income tax is provided on temporary differences arising on investments in the subsidiary and the joint venture, except where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current income tax assets against current income tax liabilities and when the deferred income tax assets and liabilities relate to income taxes levied by the same taxation authority on either the taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – *continued*

3.22 Employee benefits

(a) *Retirement benefits costs*

The Group contributes on a monthly basis to various defined contribution retirement benefit plans organised by relevant municipal and provincial governments in the PRC. The municipal and provincial governments undertake to assume the retirement benefit obligations payable to all existing and future retired employees under these plans and the Group has no further obligation for post-retirement benefits beyond the contributions made. Contributions to these plans are expensed as incurred.

(b) *Bonus plans*

The Group recognises a liability and an expense for bonuses, based on a formula that takes into consideration the profit attributable to the Company's shareholders after certain adjustments. The Group recognises a provision where contractually obliged or where there is a past practice that has created a constructive obligation.

3.23 Recognition of revenue and income

Revenue is measured at the fair values of the considerations received or receivable for the sales of goods and services in the ordinary course of the Group's activities. Revenue is shown net of value-added tax, returns, rebates and discounts and after eliminating sales within the Group.

The Group recognises revenue and income when the amount of revenue and income can be reliably measured, when it is probable that future economic benefits will flow to the entity and when specific criteria have been met for the Group's activities as described below. The amounts of revenue and income are not considered to be reliably measureable until all contingences associated with the sales and income has been resolved.

(a) *Sales of goods*

Sales of goods are recognised when the Group has delivered products to the customers; the customers have accepted the products and collectability of the related receivables is reasonably assured.

(b) *Operating lease rental income*

Rental income from operating lease is recognised on a straight-line basis over the terms of leases.

(c) *Income from provision of utilities*

Income from provision of utilities is recognised when the related utilities are provided to the customers or users.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – *continued*

3.23 Recognition of revenue and income – *continued*

(d) Interest income

Interest income is recognised on a time-proportion basis using the effective interest method.

(e) Dividend income

Dividend income is recognised when the right to receive payment is established.

3.24 Government grants

Grants from government are recognised at their fair value when there is a reasonable assurance that the grants will be received and the Group complies with the attached conditions.

Government grants relating to costs are deferred and recognised in profit or loss over the period necessary to match with the costs that the grants are intended to compensate.

Government grants relating to the purchase of property, plant and equipment are included in non-current liabilities as deferred income and are credited to profit or loss on a straight-line basis over the estimated useful lives of the related assets.

3.25 Dividend distribution

Dividend distribution to the Company's shareholders is recognised as a liability in the Group's and Company's financial statements in the period in which the dividends are approved by the Company's shareholders or directors.

3.26 Contingent liabilities and contingent assets

A contingent liability is a possible obligation that arises from past events and whose existence will only be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Group. It can also be a present obligation arising from past events that is not recognised because it is not probable that outflow of economic resources will be required or the amount of obligation cannot be measured reliably.

Contingent liabilities are not recognised but are disclosed in the notes to the consolidated financial statements. When a change in the probability of an outflow occurs so that outflow is probable, it will then be recognised as a provision.

4. FINANCIAL RISK MANAGEMENT

4.1 Financial risk factors

The Group's activities expose it to a variety of financial risks: market risk (including foreign exchange risk and interest rate risk), credit risk and liquidity risk. Management manages and monitors these exposures to ensure appropriate measures are implemented on a timely and effective manner. The Group's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Group's financial performance.

(a) Market risk

Foreign exchange risk

The Group mainly operates in the PRC with most of the transactions settle in RMB, only with approximately 11.6% (2012: 5.7%) of the Group's revenue was denominated in United State dollars ("US dollar"). The net exchange loss for the current year of RMB2,506,000 (2012: RMB9,000) was primarily associated with such US dollar denominated sales.

The conversion of RMB into foreign currencies is subject to the rules and regulation of the foreign exchange control promulgated by the PRC government.

As at 31 December 2013, except for trade receivables of RMB35,154,000 (2012: RMB28,020,000) which are denominated in US dollars, all of the Group's financial assets/liabilities are denominated in RMB.

Management considers that the foreign exchange risk associated with the Group's financial assets and liabilities will not be significant as the Group does not have significant assets or liabilities denominated in currencies other than RMB as at 31 December 2013. Management considers that the possible appreciation of RMB in future periods may have an unfavourable implication on the Group's sales and costs of production but the potential impacts cannot be quantified.

4. FINANCIAL RISK MANAGEMENT – *continued*

4.1 Financial risk factors – *continued*

(a) Market risk – continued

Interest rate risk

As the Group has no significant interest bearing assets (other than cash and cash equivalents and restricted bank deposits), the Group's income and operating cash flows are substantially independent of changes in market interest rates. The Group's interest rate risk primarily arises from bank borrowings and derivative financial instrument.

Borrowings obtained at variable rates expose the Group to cash flow interest rate risk. Borrowings obtained at fixed rates expose the Group to fair value interest rate risk. In general, the Group raises long-term borrowings at floating rates as well as fixed rates, based upon the capital market conditions and the Group's internal requirements. As at 31 December 2013, the Group's fixed rates borrowings and floating rates borrowings amounted to RMB930,689,000 (2012: RMB706,969,000) and RMB853,725,000 (2012: RMB929,000,000) respectively.

With all other variables held constant, the Group's finance costs (net of amounts capitalised in construction in progress) on the floating rates borrowings will increase/decrease by approximately RMB4,268,600 (2012: RMB3,632,500) if the interest rate is 50 basis points higher/lower.

The Group has entered into an interest rate swap contract with a financial institution which is remained in an open position as at 31 December 2013 (Note 22). Pursuant to the terms of the interest rate swap contract, the Group has to pay interests to the financial institution at an interest rate of 6.84% per annum based on the outstanding notional principal amount of RMB93,600,000 (2012: RMB98,800,000), with original notional principal amount of RMB130,000,000, while the Group is entitled to receive interest payments from the financial institution at the rate of 7.84% per annum for the period when the 30-year US dollar Constant Maturity Swap Rate (the "30-year USD CMS Rate") is higher than or equal to 3.85% and at the same time the 6-month US dollar London Inter-bank Offered Rate (the "6-month LIBOR") is lower than or equal to 7.00%. Any interest payments or receipts associated with the interest rate swap contract are settled with the financial institution on a net basis semi-annually.

As at 31 December 2013, the 6-month LIBOR is 0.35%, which is far below the rate of 7.00% as specified in the interest rate swap contract. Therefore, management considers that the Group's interest rate risk associated with the interest rate swap contract should be more dependent on the future trends of the 30-year USD CMS Rate. As at 31 December 2013, the 30-year USD CMS Rate is 3.72%, which is below the rate of 3.85% as specified in the interest rate swap contract. With all other variables held constant, the net loss/gain on fair value change of the interest rate swap contract will not be significant even if the 30-year USD CMS Rate is 10 basis points lower/higher.

4. FINANCIAL RISK MANAGEMENT – *continued*

4.1 Financial risk factors – *continued*

(b) Credit risk

The Group's credit risks are primarily attributable to trade and other receivables (including bills receivables), derivative financial instrument and deposits with banks and financial institutions. The Group's maximum exposure to credit risk is the unimpaired carrying amounts of respective financial assets as mentioned above. Management has credit policy in place and the exposures to these credit risks are monitored on an ongoing basis.

In respect of trade receivables, the Group limits its exposure to credit risk by performing credit reviews and monitoring the financial strength of its major customers. Customers are assessed and rated based on their credit quality, taking into account its financial position, past repayment history and other factors. Individual credit limits are set by the management and utilisation of these credit limits is regularly monitored.

Generally, trade receivables are due within 30 days from the date of billing.

As at 31 December 2013, the Group has certain concentration of credit risk because approximately 58% (2012: 79%) of the total trade receivables (gross amount before any impairment provision) was due from five of the Group's customers (the "Top Five Debtors"). The aging analysis of the balances due from the Top Five Debtors are as below:

	2013 RMB'000	2012 RMB'000
Receivables from the Top Five Debtors:		
Within 30 days	**25,247**	54,577
31 - 90 days	**30,764**	4,512
91 - 365 days	**3,483**	23,875
Over 365 days	**—**	9,331
	59,494	92,295

4. FINANCIAL RISK MANAGEMENT – *continued*

4.1 Financial risk factors – *continued*

(b) Credit risk – continued

As at 31 December 2013, no provision for receivable impairment has been made against the Top Five Debtors and the management does not expect any significant losses from the non-performance by the abovementioned counterparties.

For derivative financial instrument and deposits with banks and financial institutions, the Group has limited its credit exposure by restricting their selection of banks and financial institutions on those reputable commercial banks or state-owned banks.

Bills receivables are all to be settled by reputable commercial banks or state-owned banks and therefore the management considers that they will not expose the Group to any significant credit risk.

At the end of the reporting period, the Group does not provide any financial guarantees to any parties which would expose the Group to credit risk.

(c) Liquidity risk

Liquidity risk is the risk that the Group is unable to meet its liabilities and obligations when they fall due. Prudent liquidity risk management implies maintaining sufficient cash and the ability to close out market positions.

Management monitors regularly rolling cash flow forecasts of the Group's liquidity requirements to ensure it has sufficient cash to meet operational needs while maintaining sufficient headroom on its undrawn committed borrowing facilities or funding from the ultimate parent company at all times. Such forecasting takes into consideration the Group's debt financing plans and compliance with internal ratio targets.

Management also monitors regularly the surplus cash held by the operating entities over and above balance required for working capital management and the Group will invest surplus cash in interest bearing current accounts or deposits, choosing instruments with appropriate maturities or sufficient liquidity, to provide sufficient head-room as determined by the abovementioned forecasts. At 31 December 2013, the Group has interest bearing bank balances of RMB90,806,000 (2012: RMB109,218,000) that are expected to be readily for use in managing liquidity risk.

4. FINANCIAL RISK MANAGEMENT – *continued*

4.1 Financial risk factors – *continued*

(c) Liquidity risk – continued

The table below analyses the Group's non-derivative financial liabilities (with contractual obligations) and net-settled derivative financial liability into relevant maturity groupings based on the remaining period at the end of the reporting period to the contractual maturity date. Derivative financial liability is included in the analysis as its contractual maturity is essential for an understanding of the timing of the expected cash flows. The amounts disclosed in the table are the contractual undiscounted cash flows (including the estimated interest expenses on the related borrowings up to their maturities).

4. FINANCIAL RISK MANAGEMENT – *continued*

4.1 Financial risk factors – *continued*

(c) Liquidity risk – continued

Although the Group has a considerable amount of financial liabilities to be settled or refinanced within the next twelve months from the end of the reporting period, the Company's directors are of the view that the Group can manage the associated liquidity risks in view of the situations as described in note 2.1 to the consolidated financial statements.

4.2 Capital risk management

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to equity holders, return capital to equity holders, issue new shares or sell assets to reduce debt.

The Group monitors capital on the basis of the debt-to-total capital ratio. This ratio is calculated as net debt divided by total capital. Net debt is calculated as total borrowings less cash and cash equivalents. Total capital is calculated as the total equity as shown in the consolidated statement of financial position, plus net debt.

The Group aims to maintain a manageable debt-to-total capital ratio of not exceeding 70% (2012: 65%). The debt-to-total capital ratios at 31 December 2013 and 2012 were as follows:

	2013 RMB'000	2012 RMB'000
Total borrowings (Note 18)	1,784,414	1,635,969
Less: Cash and cash equivalents (Note 15)	(90,813)	(109,228)
Net debt	1,693,601	1,526,741
Total equity	733,968	826,440
Total capital	2,427,569	2,353,181
Debt-to-total capital ratio	70%	65%

The increase in the debt-to-total capital ratio in the current year is primarily resulted from the loss for the year, which leads to the decrease in the Group's total equity.

4. FINANCIAL RISK MANAGEMENT – *continued*

4.3 Fair value estimation

Except for the interest rate swap contract as mentioned in notes 4.1(a) and 22, the Group does not have any financial assets/liabilities which are required to be measured in the statement of financial position at fair value as of the reporting date. This interest rate swap contract has been categorised to the level 2 of the fair value measurement hierarchy as set out in the HKFRS 7 "Financial Instruments: Disclosures" because its fair value can be determined by the use of valuation techniques which maximise the use of non-entity specific market data which is observable. The fair value of the interest rate swap contract is calculated at the present value of the estimated future cash flows based on observable yield curves.

The carrying value less impairment provision of receivable and payable balances are assumed to approximate their fair values. The fair value of financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the Group for similar financial instruments.

5. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

5.1 Critical accounting estimates and assumptions

The Group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are addressed below.

(a) Impairment of non-current key operating assets

Land use rights, property, plant and equipment and intangible assets are the key operating assets for the Group's business operations (collectively the "Key Operating Assets"). Management tests whether the Key Operating Assets have suffered any impairment in accordance with the accounting policy as stated in note 3.7. The management has assessed the recoverable amounts of the Key Operating Assets based on value-in-use calculations which require the use of estimates on the projections of cash inflows from the continual use of the Key Operating Assets and discount rate.

If the projected gross margin had been 5% lower than the management's estimates or the discount rate as applied in the impairment assessment was higher than management's existing estimates by 0.5 percentage point, the recoverable amounts of the Key Operating Assets will be reduced by approximately RMB148,448,000 and RMB58,389,000 respectively. Even the recoverable amounts of the Key Operating Assets are reduced by the abovementioned respective amounts, the adjusted recoverable amounts of those Key Operating Assets are still higher than their carrying amounts as of the end of reporting period.

5. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS – *continued*

5.1 Critical accounting estimates and assumptions – *continued*

(b) Write-down of inventories to net realisable value

In determining the net realisable value of inventories, the management is required to estimate the subsequent selling price of the inventories, the estimated costs to completion for work in progress and selling expenses. The management made the estimates by reference to the latest market condition and the historical experience of manufacturing and sales of similar products in the past.

If the estimated net realisable values of inventories had been 5% lower than the estimates as adopted by the management, the Group is still not required to recognise any provision for impairment on the inventories for its acrylic fiber products segment (representing approximately 78% of the Group's total inventories) whereas the Group would have to recognise an additional provision for impairment on the inventories for its carbon fiber products segment of approximately RMB2,735,000.

(c) Impairment of interest in joint venture

Management tests whether the interest in joint venture has suffered any impairment in accordance with the accounting policy as stated in note 3.7. The management has assessed the recoverable amount of the interest in joint venture based on value-in-use calculations which require the use of estimates on the projections of cash inflows from the operation of the joint venture and discount rate.

If the projected gross margin had been 5% lower than the management's estimates or the discount rate as applied in the impairment assessment was higher than management's existing estimates by 0.5 percentage point, the recoverable amount of the interest in joint venture will be reduced by approximately RMB102,479,000 and RMB49,304,000 respectively. Even the recoverable amount of the interest in joint venture is reduced by the abovementioned respective amounts, the adjusted recoverable amounts of the interest in joint venture are still higher than its carrying amount as of the end of reporting period.

5. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS – *continued*

5.2 Critical judgements in applying the Group's significant accounting policies

(a) Going concern consideration

The assessment of the going concern assumption involves making a judgement by the Company's directors, at a particular point of time, about the future outcome of events or conditions which are inherently uncertain. The Company's directors consider that the Group has the capability to continue as a going concern and the major events or conditions, which may give rise to business risks, that individually or collectively may cast doubt about the going concern assumption are set out in note 2.1 to the consolidated financial statements.

(b) Recoverability of deferred income tax assets

Deferred income tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the recognised temporary differences (including tax losses) can be utilised. The assessment on the probability of whether the recognised deferred income tax assets can be fully recovered involves the use of judgement and estimates. As at 31 December 2013, the Group has recognised deferred income tax assets of RMB72,426,000 (2012: RMB83,780,000) (Note 21). The Company's directors consider that the Group is capable to generate sufficient taxable profit from its future business operations for utilising the recognised temporary differences.

(c) Impairment of receivables

The Group makes provision for impairment of receivables based on an assessment of the recoverability of trade and other receivables. The identification of doubtful debts requires the use of judgement and estimates.

As at 31 December 2013, the Group has trade receivables which are past due but not impaired of RMB51,950,000 (Note 14(b)) and trade receivables of RMB5,554,000 which are being considered as doubtful debts and partially provided for (Note 14(c)). In addition, the Group has also requested a fellow subsidiary to pledge certain of its production equipment as the securities for the repayment of the related trade and other receivables of RMB19,320,000 (Note 14(b)).

As at 31 December 2013, the Group has overdue balance of RMB37,510,000 due from a related company in respect of the provision of utilities as set out in note 14(e). The related company will settle the overdue balance in accordance with the settlement plan as committed by the related company. Based on the progress of the subsequent settlement, the management does not expect a significant loss would be arising from the overdue balance.

Management considers that the provision for impairment of trade and other receivables of RMB5,021,000 as at 31 December 2013 adequately cover any significant losses arising from any non-performance by the independent and related counter parties.

6. SEGMENT INFORMATION

The chief operating decision-makers have been identified as the three executive directors of the Company (collectively the "Decision-Makers"). The Decision-Makers review the Group's internal reporting in order to assess performance and allocate resources. Management has determined the operating segments based on these reports.

The Group is principally engaged in the development, production and sales of chemical fiber products, namely acrylic fiber and carbon fiber products. The operating segment for carbon fiber products has commenced its first phase of operation in August 2009.

All of the Group's operations and assets are located in the PRC except that, a portion of the Group's revenue of RMB170,571,000 (2012: RMB79,358,000) was in connection with sales to overseas customers. Therefore, the Decision-Makers consider the Group's business from a product perspective, rather than from a geographic perspective. The Decision-Makers assess the performance of the operating segments of acrylic fiber products and carbon fiber products on a regular basis.

The Decision-Makers primarily assess the performance of the operating segments based on a measure of adjusted segment results which are earnings before interests, tax, depreciation and amortisation. This measurement basis excludes the effects of non-recurring expenditure from the operating segments (such as legal expenses and impairments when the impairment is the result of an isolated, non-recurring event). Interest income and expenditure are not included in the result for each operating segment that is reviewed by the Decision-Makers.

Turnover for the year ended 31 December 2013 consists of sales from the acrylic fiber products segment and carbon fiber products segment of RMB1,448,851,000 (2012: RMB1,389,649,000) and RMB19,994,000 (2012: RMB2,195,000) respectively.

The Group does not have any inter-segment sales during the years ended 31 December 2013 and 2012.

6. SEGMENT INFORMATION – *continued*

The segment information provided to the Decision-Makers for the years ended 31 December 2013 and 2012 is as follow:

Note:

As disclosed in note 34(a)(i), the Group has managed and operated certain Utility Facilities and Leased Assets primarily to produce electricity and steam for its own production of acrylic fiber and carbon fiber products at the most cost efficient manner and any surplus of utilities as generated from these Utility Facilities and Leased Assets will be provided to fellow subsidiaries, joint venture, Jilin Chemical Fibre Co., Ltd. ("JCFCL"), related parties and third parties at rates to be determined amongst the parties concerned. The adjusted segment results as disclosed above for the acrylic fiber products segment included an amount of RMB163,723,000 (2012: RMB81,107,000), representing the related income net of direct outgoings (other than depreciation charge), which is attributable to the provisions of surplus utilities to fellow subsidiaries, joint venture, JCFCL, related parties and third parties.

Information about major customers

Revenues of approximately RMB519,640,000 (2012: RMB590,255,000) are derived from two (2012: two) customers which individually contributed more than 10% to the Group's revenue. These revenues are all attributable to the acrylic fiber products segment. Details of the revenues from these two customers are as follows:

	2013		2012	
Customer name	Revenue RMB'000	Proportion to the total revenues	Revenue RMB'000	Proportion to the total revenues

7. LAND USE RIGHTS

The Group's interests in land use rights represent prepaid operating lease payments for lands in the PRC which are held on leases of between 10 to 50 years.

Movements in the land use rights are analysed as below:

	Group		Company

8. PROPERTY, PLANT AND EQUIPMENT – *continued*

Notes:

(a) As at 31 December 2013, property, plant and equipment of the Group and the Company with carrying amount of RMB64,637,000 (2012: RMB112,873,000) have been pledged as securities for certain bank borrowings of the Group and the Company (Note 18). One of the pledges has expired during the year ended 31 December 2013.

(b) As at 31 December 2013, the Group is in the process of obtaining the certificates of ownership in respect of certain buildings of the Group and the Company with carrying amount of RMB154,055,000 (2012: RMB179,062,000) and RMB5,791,000 (2012: RMB126,227,000) respectively from the relevant government authorities.

(c) Depreciation expenses of RMB139,247,000 (2012: RMB105,360,000), RMB5,835,000 (2012: RMB7,578,000) and RMB45,601,000 (2012: RMB24,111,000) have been charged in cost of sales, administrative expenses and other expenses respectively.

(d) As the Group's financial performance for the current year is lower than those originally budgeted, management has re-assessed the recoverable amounts of the Group's key operating assets (comprise of land use rights, property, plant and equipment and intangible assets). For the purpose of the impairment assessment, the management had identified two cash generating units ("CGU") namely the Acrylic Fiber Product Segment and the Carbon Fiber Product Segment. The recoverable amounts of the key operating assets of these two CGUs had been determined based on value-in-use calculations which used pre-tax cash flow projections based on financial budgets approved by the management covering a five-year period (the "Projection Period").

The key assumptions as adopted in the impairment assessment are summarised as below:

	Acrylic Fiber Product Segment	Carbon Fiber Product Segment
Gross margin (Note i)	11% to 19%	-7% to 30%
Discount rate	14.0%	12.5%
Growth rate within the Projection Period (Note ii)	1% to 20%	5% to 173%
Growth rate beyond the Projection Period	0%	0%

(i) For the Acrylic Fiber Product Segment, management expects that the gross margin will be increased to 19% from year 2018 onwards. For the Carbon Fiber Product Segment, management assumes that the Group will only be able to achieve the expected gross margin of 30% over the Projection Periods gradually, considering that it may take time for the Group to optimise the efficiency from the operations of this business segment.

(ii) Management expects that the sales of carbon fiber products will significant increase as the new production lines were officially launched in 2013 and the Group was actively negotiating with downstream domestic customers. In view of this, management has projected a relatively high growth rates for the Carbon Fiber Product Segment within the Projection Period.

8. PROPERTY, PLANT AND EQUIPMENT – *continued*

Notes: – *continued*

(d) – *continued*

(iii) The end products of the Group's acrylic fiber products are primarily with respect to warm keeping clothes, blanket and materials which do not have close substitutes or subject to technology changes. Similarly, the end products of the Group's carbon fiber products can be widely used for the production of many carbonised products in different areas which do not have close substitutes or subject to technology changes. Therefore, management believes that the Group's operations in the Acrylic Fiber Product Segment and Carbon Fiber Product Segment can be carried on perpetually on a going concern basis.

In assuming the perpetual operations of the key operating assets for the Acrylic Fiber Product Segment and the Carbon Fiber Product Segment, management has assumed an annual capital expenditure to be incurred for maintenance and replacement at an amount which approximates the estimated annual depreciation charge of the related key operating assets.

(iv) Management has assumed no further growth in the cash flows beyond the Projection Periods.

In determining the budgeted gross margin, management has made reference to the past performance of the Group and also their expectations for the market development in the upcoming few years. The discount rate used is pre-tax and reflects the specific risks relating to the relevant operating segments.

Based on the impairment assessment, management has concluded that the estimated recoverable amounts of the Group's key operating assets are higher than their carrying amounts and hence no provision for impairment is required to be recognised as at 31 December 2013.

(e) During the year ended 31 December 2013, the Group has capitalised borrowing costs of nil (2012: RMB15,459,000) on qualifying assets (Note 27). Borrowing costs were capitalised at the weighted average rate of its specific borrowings of 6.8% during the year ended 31 December 2012.

	Company	
	2013	2012
	RMB'000	RMB'000
Unlisted investment, at cost	385,000	385,000

Notes:

(a) In July 2012, the Company had contributed cash of RMB170,000,000 to the subsidiary as its capital contribution.

(b) Details of the subsidiary are as follows:

Name	Place of incorporation and kind of legal entity	Principal activities and place of operation	Particulars of registered and paid up capital		Interest directly held	
			2013 RMB	2012 RMB	2013	2012
Jilin Tangu Carbon Fiber Co., Ltd ("Tangu")	PRC, limited liability company	Development, production and sales of carbon fiber products in the PRC	360,000,000	360,000,000	100%	100%

(c) The subsidiary's major new production lines commenced production during the year. Its financial performance for the current year is lower than that originally budgeted. Considering the recoverable amounts of the CGU of Carbon Fiber Product Segment as determined based on the management's assessment as described on note 8(d) is higher than the aggregate carrying amounts of the key operating assets of the Carbon Fiber Product Segment and the Company's investment costs in the subsidiary, the management has concluded that no provision for impairment on the Company's investment in the subsidiary is required to be recognised as at 31 December 2013.

(d) Amount due from the subsidiary is unsecured, non-interest bearing and repayable on demand. The amount is included in trade and other receivables.

Notes:

(a) The Group has a 50% equity interest in a joint venture, Jilin Jimont Acrylic Fiber Co., Ltd. ("Jimont"), which was established in the PRC on 21 December 2005 and its principal activity is the production and sales of acrylic fiber products. As at 31 December 2013 and 2012, Jimont has a registered and paid-in capital of RMB450,000,000 and is jointly owned by the Company, Montefiber S.p.A and SIMEST S.p.A as to 50.00%, 39.36% and 10.64% respectively.

(b) As Jimont's financial performance for the current year is lower than that originally budgeted, management has re-assessed the carrying amounts of the interest in a joint venture of the Group and the investment in a joint venture of the Company. The recoverable amounts had been determined based on value-in-use calculations which used pre-tax cash flow projections based on financial budgets approved by the management of Jimont covering a five-year period (the "Projection Period"). The key assumptions as adopted in the impairment assessment are summarised as below:

Gross margin of the joint venture	8% to 14%
Discount rate	14.6%
Growth rate beyond the Projection Period	0%

In determining the budgeted gross margin, management has made reference to the past performance of the joint venture and also their expectations for the market development in the next few years. Management expects that the gross margin of the joint venture will increase to 14% from 2018 onwards. The discount rate used is pre-tax and reflects the specific risks relating to the joint venture.

Based on the impairment assessment, management has concluded that the estimated recoverable amount of the joint venture is higher than its carrying amounts and hence no provision for impairment is required to be recognised as at 31 December 2013 and 2012.

14. TRADE AND OTHER RECEIVABLES – *continued*

Notes:

(a) The Group's sales are normally conducted on the cash on delivery terms or a credit term of 30 days. Aging analysis of trade receivables based on invoice date are as follows:

	Group		Company	
	2013 RMB'000	2012 RMB'000	2013 RMB'000	2012 RMB'000
0 – 30 days	44,604	66,719	43,371	66,591

	102,109	116,210	91,852	110,838

(b) Trade receivables with aging less than 30 days are not considered as past due. As at 31 December 2013, the following trade receivables were past due but not impaired. These balances relate to a number of independent customers for whom there is no recent history of default. The aging analysis of these trade receivables is as follows:

	Group		Company	
	2013 RMB'000	2012 RMB'000	2013 RMB'000	2012 RMB'000
31 – 90 days past due	36,136	7,282	33,839	6,625
91 – 365 days past due	6,908	25,220	3,337	20,657
Over 365 days past due	8,906	9,382	5,749	9,357
	51,950	41,884	42,925	36,639

Included in the trade receivables that were past due but not impaired as set out above, an amount of RMB9,275,000 (2012: RMB13,715,000) were due from a fellow subsidiary. The Group has also provided utilities (such as electricity and steam) to this fellow subsidiary and the receivables in respect of provision of utilities amounted to RMB10,045,000 (2012: RMB10,085,000). Therefore, the total trade and other receivables due from this fellow subsidiary amounted to RMB19,320,000 as at 31 December 2013 (2012: RMB23,800,000). This fellow subsidiary has pledged certain of its production equipment to the Company as securities for its repayment of the amounts due to the Group. The management does not expect any significant loss from the non-performance by this fellow subsidiary and hence no provision for impairment has been made as at 31 December 2013 (2012: Nil).

14. TRADE AND OTHER RECEIVABLES – *continued*

Notes: – *continued*

(c) As at 31 December 2013, trade receivables of RMB5,554,000 (2012: RMB7,775,000) were considered as doubtful debts and were partially provided for. The amount of the provision was RMB5,021,000 (2012: RMB5,021,000) as at 31 December 2013. The individually impaired receivables mainly relate to customers which are in unexpected difficult economic situations. It was assessed that a portion of the receivables is expected to be recovered.

The aging of these partially impaired receivables is as follows:

	Group		Company	
	2013	2012	**2013**	2012
	RMB'000	RMB'000	**RMB'000**	RMB'000
0 – 30 days	—	168	—	168
31 – 90 days	—	418	—	418
91 – 365 days	**2,064**	3,221	**2,064**	3,221
Over 365 days	**3,490**	3,968	**3,490**	3,968
	5,554	7,775	**5,554**	7,775

(d) Included in bills receivables, an amount of RMB50,000,000 (2012: RMB2,969,000) were banker's acceptances, which have been discounted to the financial institutions with recourse. These banker's acceptances are issued to the Group and are due within 3 to 6 months from the date of issuance. Banks issuing the banker's acceptances are the primary obligors for payment on due date of such banker's acceptances. In the event of default, the Group is obliged to pay the financial institutions the amount in default. Late interest would be charged by the financial institutions until the amount has been settled. The Group is therefore exposed to the credit risk and late payment risk in respect of the discounted bills. The proceeds of the discounting transactions are included in borrowings as asset-backed financing (Note 18) until the discounted bills were matured or settled.

(e) The aging analysis of the amounts due from the related parties is as follows:

	Group		Company	
	2013	2012	**2013**	2012
	RMB'000	RMB'000	**RMB'000**	RMB'000
0 – 30 days	**62,531**	16,224	**192,795**	16,387
31 – 90 days	**53,299**	16,027	**52,917**	19,583
91 – 365 days	**64,590**	2,374	**64,590**	10,033
Over 365 days	**7,677**	25,415	**8,517**	25,415
	188,097	60,040	**318,819**	71,418

The amounts due from related parties primarily comprise of receivables in respect of the provision of utilities. Included in these amounts, an amount of RMB37,510,000 (2012: RMB37,459,000) has already been past due. According to a settlement plan entered into between the Group and this related company, the amount will be fully repaid by 31 December 2014. The management does not expect any significant loss from the non-performance by these related companies and hence no provision for impairment has been made as at 31 December 2013 (2012: Nil).

(f) The amount due from a joint venture bore interests at the one-year basic call rate as pronounced by the People's Bank of China. The amounts due from other related parties are unsecured and interest-bearing at the one-year basic call rate as announced by the People's Bank of China.

14. TRADE AND OTHER RECEIVABLES – *continued*

Notes: – *continued*

(g) There are no movements in the provision for impairment of trade and other receivables for the years ended 31 December 2013 and 2012.

(h) The other classes within trade and other receivables do not contain impaired assets.

(i) The carrying amounts of trade and other receivables are all denominated in RMB except that, trade receivables of RMB35,154,000 (2012: RMB28,020,000) are denominated in US dollars.

(j) The carrying amounts of trade and other receivables approximate their fair values.

17. RESERVES – *continued*

Notes:

(a) Reserve fund and enterprise expansion fund

In accordance with the relevant laws and regulations in the PRC and the requirements of the Articles of Associations of the Company and its subsidiary, appropriations from net profit should be made to the reserve fund and the enterprise expansion fund, after offsetting accumulated losses from prior years, and before profit distributions to the investors. The percentages to be appropriated to the reserve fund and the enterprise expansion fund are determined by the board of directors. Upon approval, the reserve fund can be used to offset accumulated losses or be converted into capital and the enterprise expansion fund can be converted into capital.

(b) Statutory reserve fund

In accordance with the relevant laws and regulations in the PRC and the Articles of Associations of the Company and its subsidiary, it is required to appropriate 10% of the annual statutory net profit, after offsetting any prior years' losses to the statutory reserve fund before distributing the net profit. When the respective balance of the statutory reserve fund reaches 50% of the share capital of the Company and its subsidiary, any further appropriation is at the discretion of shareholders of the Company and its subsidiary. The statutory reserve fund can be used to offset prior years' losses, if any, and may be converted into share capital by issuing new shares to shareholders in proportion to their existing shareholding or by increasing the par value of the shares currently held by them, provided that the respective remaining balance of the statutory reserve fund after such issue is not less than 25% of registered capital of the Company and its subsidiary.

(c) The board of directors of the Company and the subsidiary have determined not to make any appropriations to the reserve fund, enterprise expansion fund and statutory reserve fund for the years ended 31 December 2013 and 2012.

	1,784,414	1,635,969	**1,614,413**	1,426,469

During the year ended 31 December 2013, the Group did not meet certain key performance indicators specified by banks (including operating cash flow ratio, current ratio and net profit ratio). The lenders have not taken any action and have subsequently renewed the matured bank loans during the year. Accordingly, the full amounts of the bank loans with an aggregate carrying amount of RMB514,689,000 as at 31 December 2013, which are repayable within one year, are presented as "on demand" time band in the above analysis.

(d) The effective interest rate of the bank borrowings as at the end of the reporting period was 6.80% (2012: 7.06%) per annum.

(e) The exposure of bank borrowings to interest-rate changes and the contractual repricing dates are as follows:

	Group		Company	
	2013	2012	**2013**	2012
	RMB'000	RMB'000	**RMB'000**	RMB'000

34. SIGNIFICANT RELATED PARTY TRANSACTIONS

The Group is controlled by JCF Groupco, the ultimate parent company, which owns 50.01% of the Company's shares. The remaining 49.99% of the shares are held by public shareholders and several strategic investors. JCF Groupco itself is a state-owned enterprise controlled by the PRC government. In accordance with HKAS 24 (Revised) "Related Party Disclosures", government related entities (e.g. state-owned enterprises) and their subsidiaries directly or indirectly controlled, jointly controlled or significantly influenced by the PRC government are also defined as related parties of the Group. A portion of the Group's business activities is conducted with other government related entities in the PRC (primarily with respect to sales of finished products, purchases of raw materials/utilities and transactions with state-owned banks). The Group believes that these transactions are carried out on terms that are similarly and consistently applied to all other customers or suppliers.

For the purpose of related party transaction disclosures, the Group has identified, to the extent practicable, its customers and suppliers as to whether they are government related entities. The Company's directors believe that it is meaningful to disclose any significant related party transactions with these government related entities for the interests of the financial statements users, although these transactions are exempted from the disclosure requirements as set out in the HKAS 24 (Revised). The Company's directors believe that the information in respect of related party transactions has been adequately disclosed in these consolidated financial statements.

In addition to those disclosed elsewhere in the consolidated financial statements, the following is a summary of significant related party transactions entered into in the ordinary course of business between the Group and its related parties during the year.

During the year, for the purpose of this report, the directors are of the view that the following group entities under JCF Groupco are related parties of the group:

Name of related parties	Relationships
Tuopu Textile	A subsidiary of JCF Groupco
Jianan	A subsidiary of JCF Groupco
Huidong	A subsidiary of JCF Groupco
Aika	A subsidiary of JCF Groupco

34. SIGNIFICANT RELATED PARTY TRANSACTIONS – *continued*

(a) Related party transactions – *continued*

Notes:

(i) On 26 August 2008, the Group has entered into a lease agreement with JCFCL, pursuant to which, the Group leases certain utility production facilities (the "Leased Assets") from JCFCL for the period from 4 November 2008 to 31 December 2010. The lease agreement has been renewed for another three years until 31 December 2013. The original Leased Assets comprise of two water treatment plants and thermal power plant. The Company has purchased one of the water treatment plants in relation to transmission and provision of water treatment services and thermal power plant in relation to utilities generation during the year ended 31 December 2012 as mentioned in Note 34(a)(ii). The lease agreement has been renewed for another three years until 31 December 2016 for the lease of the remaining water treatment plant. Together with certain utility production facilities (including a thermal power plant (the "Utility Facilities")) owned by the Group, the Company's directors believe that the Group can produce electricity and steam for its own production in a more cost efficient manner and any surplus of utilities generated from the Utility Facilities and the Leased Assets will be provided to the Group's fellow subsidiaries, joint venture, other related companies and third parties at the rates to be determined amongst the parties concerned.

(ii) As mentioned in the announcement of the Company dated 10 October 2012, the Company has entered into a conditional assets purchase agreement with JCFCL, pursuant to which the Company agreed to purchase and JCFCL agreed to sell the Leased Assets in relation to utilities generation and transmission and provision of water treatment services (the "Assets Acquisition"). The Assets Acquisition was approved by the shareholders on an extraordinary general meeting and duly completed on 28 December 2012. The original lease agreement regarding the Leased Assets has been terminated on the same date.

JCFCL was treated as a connected person for the purpose of the Assets Acquisition and this transaction also constituted a non-exempt connected transaction under Chapter 14A of the Listing Rules. The disclosures required by Chapter 14A of the Listing Rules are provided in the paragraph "Connected transactions" in the report of the directors.

(iii) JCF Groupco allowed the Group to the use of the trademark of "白山" (Baishan) at nil consideration during the years ended 31 December 2013 and 2012.

(iv) The Group permitted JCF Groupco to use the Group's premises free of rent to operate its staff canteen. The Group is not required to bear the operating costs of the canteen.

34. SIGNIFICANT RELATED PARTY TRANSACTIONS – *continued*

(c) Transactions/balances with other state-owned entities in the PRC

The Group operates in an economic environment currently predominated by enterprises directly or indirectly owned, jointly controlled or significantly influenced by the PRC government (collectively the "state-owned entities"). The Company's directors consider that state-owned entities are independent third parties so far as the Group's business transactions with them are concerned.

During the year, the Group had transactions with other state-owned entities including, but not limited to, the sales of finished goods, purchases of raw materials/utilities and transactions with state-owned banks.

The sales of finished goods to these state-owned entities are individually not significant. The individually significant purchases transactions with these state-controlled entities primarily includes the purchases of the raw materials/utilities from these state-owned entities of RMB760,373,000 (2012: RMB940,089,000).

In addition, approximately 62% and 82% (2012: 72% and 77% respectively) of the Group's bank balances (including restricted bank deposits) and borrowings are deposited/arranged with state-owned banks as at 31 December 2013.

(d) Key management compensation

Key management includes the executive and non-executive directors, supervisors and secretaries to the board of directors of the Company. The compensation paid or payable to these key management is shown as below:
