How does the Issuer calculate the cash settlement amount?

The warrants are in registered form and exercisable only in the relevant board lots.

If on the relevant expiry date the cash settlement amount is greater than zero, the warrants will be deemed to be automatically exercised and you will not be required to deliver any exercise notice.

Each board lot of warrants will entitle you to receive from the Issuer the cash settlement amount (less any exercise expenses) in settlement currency calculated by the Issuer as equal to:

In respect of call warrants:

$$\text{Cash settlement amount per board lot} = \frac{\text{Entitlement} \times (\text{average price} - \text{exercise price}) \times \text{one board lot}}{\text{Number of warrants per entitlement}}$$

In respect of put warrants:

$$\text{Cash settlement amount per board lot} = \frac{\text{Entitlement} \times (\text{exercise price} - \text{average price}) \times \text{one board lot}}{\text{Number of warrants per entitlement}}$$

Average price means the arithmetic mean of the closing price of one unit (as derived from the daily quotation sheet of the stock exchange, subject to any adjustments to such closing price as may be necessary to reflect any capitalisation, rights issue, distribution or the like) in respect of each valuation date.

Where can you obtain further information?
