All derivative financial instruments entered by the Group that remained outstanding at 20th November 2014 and 20th February 2014 are for hedging purposes. The credit risk on those derivative financial instruments is limited as the counterparties are banks with high credit-ratings assigned by international credit-rating agencies. The classification of current/non-current for derivative financial instruments is in accordance with the maturity dates of the corresponding bank borrowings and collateralised debt obligation, the designated hedged items.

Cash flow hedges:

Interest rate swaps

The Group uses interest rate swaps to minimise its exposures to cash flow changes of its floating-rate bank borrowings and collateralised debt obligation by swapping certain Hong Kong Dollar ("HKD") floating-rate bank borrowings and collateralised debt obligation from floating rates to fixed rates. The interest rate swaps, the corresponding bank borrowings and the collateralised debt obligation have similar terms, such as principal amounts, interest rate spread, start dates, maturity dates and counterparties, and the Directors consider that the interest rate swaps are highly effective hedging instruments. Interest rate swaps are designated as cash flow hedging instruments from floating interest rates to fixed interest rates.

Cross-currency interest rate swaps

The Group uses cross-currency interest rate swaps designated as highly effective hedging instruments to minimise its exposures to foreign currency and cash flow interest rate risk of its United States Dollars ("USD") bank borrowings by swapping the floating-rate USD bank borrowings to fixed-rate HKD bank borrowings. The cross-currency interest rate swaps and the corresponding bank borrowings have the same terms and the Directors consider that the cross-currency interest rate swaps are highly effective hedging instruments.

11. PLEDGE OF ASSETS

At 20th November 2014, the collateralised debt obligation of the Group was secured by credit card receivables and restricted deposits of **HK\$1,754,231,000** and **HK\$109,833,000** respectively (20th February 2014: HK\$1,858,759,000 and HK\$68,000,000).

On the other hand, instalment loan sales slowed down due to keen competition. There was also an increase in operating lease rental expenses following the renewal of leases. The running costs of microfinance subsidiaries in China also contributed to an increase in the overall operating expenses. As a result, operating expenses increased by 5.7% from HK\$382.2 million in 2013/14 to HK\$403.9 million for the first nine months in 2014/15.
- 5. At the operating level before impairment allowances, the Group recorded an operating profit of HK\$480.1 million for the nine months ended 20th November 2014, representing an increase of 18.3% from HK\$405.8 million in the previous corresponding period.

- 9. The Group relies principally on its internally generated capital, bank borrowings and structured finance to fund its business.
- 10. During the period under review, the existing collateralised debt obligation programme has been rearranged whereby the Group secured an additional tranche of HK\$150.0 million with the revolving period ending in July 2020 and the revolving periods of the existing two tranches of HK\$550.0 million each have been extended to August 2019. With the new arrangement, the Company has improved its liquidity and cash flow management and also reduced its short-term borrowings. At 20th November 2014, 43.7% of its funding was derived from total equity, 33.3% from bank borrowings and 23.0% from structured finance.
- 11. Including the collateralised debt obligation, 11.6% of the indebtedness will mature within one year, 38.2% between one and two years, 41.2% between two and five years and 9.0% over five years.
