## **INFORMATION ON THE TARGET GROUP**

As informed by the Vendors, the Target Company is an investment holding company and its principal asset is its holding in the entire issued share capital of China LNG. The Target Group is specialised in domestic equipment sales, modification and maintenance services of liquefied natural gas (the “**LNG**”), remanufacture of gas engines, fuel conversion, vehicle modification for gas application, plantation of LNG facilities, LNG refuelling stations for vessels, ports and vehicle, logistics, earthwork project including strip mining (the “**LNG businesses**”) and is a service provider of the LNG supply chain covering all the upstream, midstream and downstream segments in the industry. Upstream represents the exploration and exploitation of LNG, midstream represents the transmission and supply of LNG via its equipments and production facilities and downstream represents the logistics for gas distribution, after-sale services and other value-added services to end users.

Further, the China LNG Group is the registered owner of “Manufacturing work for conversion from gasoline to gas-fuelled of engine” patent which allow it to be the authorised and qualified corporation to conduct vehicle and truck modification for LNG application as well as the construction and conversion of vessel modification for LNG application in the Liaoning Province, the PRC.

LNG is one of the most recognized clean energy which can be utilised by vehicles and vessels in the transportation industry; it is not only more environmentally friendly with lower carbon emission but also a safer fuel as compared to crude oil or gasoline. As natural gas is currently a cheaper fuel than crude oil or gasoline, there is economic incentive for vehicles owners or consumers to purchase or convert their crude oil-drive vehicles into LNG-driven vehicles.

In addition, the government of the PRC has issued the “Twelfth Five-Year Plan for Development of Energy Conservation and Environmental Protection Industry” (十二五節能環保產業發展規劃), which encouraged the industry of energy conservation and environmental protection. Further, the Ministry of Industry and Information Technology of the PRC has issued a notice (No. 27 of 2014) on 14 April 2014 on the abolishment of Stage-III-compliant diesel vehicles by the year end 31 December 2014. As such, starting from 1 January 2015, no State-III emissions standards-compliant diesel vehicles will be allotted for sale in the PRC, the demand of LNG-driven vehicles will be significantly increased.

## **REASONS FOR AND THE BENEFITS OF THE POSSIBLE ACQUISITION**

The Group is principally engaged in the exploitation and sale of crude oil, sale of chemical products, provision of exploration drilling and painting services, trading of commodities, property investment and money lending business.

The Group is actively exploring for business opportunities in other sectors to diversify its business into industries that provide better returns for the Shareholders.

As disclosed in the 2014 Announcement, the Company has entered into the Previous MOU with China LNG on 23 June 2014 in relation to the possible subscription of new shares in any member of the China LNG Group or possible cooperation with the China LNG Group in certain LNG businesses or a combination of both. However, the aforesaid memorandum of understanding has lapsed on 22 December 2014. After arm's length negotiation and upon a more thorough discussion with the Vendors and the Guarantors, instead of entering into a new memorandum of understanding for the possible cooperation or subscription of shares of the China LNG Group, the Company decided to enter into the MOU for the Possible Acquisition.

The Directors believe that the Possible Acquisition, if successful, would broaden the sources of income of the Group. Further, in view of the increase in environmental awareness and strong demand of natural gas domestically, the Directors considered that the Possible Acquisition are in the line with the business direction of the Group. The Directors also considered that whilst the Group concentrates in trading fuel oil (with less LNG), the Target

Group focuses on trading LNG (with less fuel oil components) and the Possible Acquisition would bring forth synergetic effect to the Group with two different products complement with each other. Hence the Company is desirous to enter into the MOU with the Vendors and the Guarantors to explore the possibility of diversification of the business of the Group and to benefit from the synergy effect. In addition, the Target Group has many projects on hand related to the LNG businesses that will provide great opportunities and values to the Group.

**The Board wishes to emphasize that no binding agreement in relation to the Possible Acquisition has been entered into as at the date of this announcement. As such, the Possible Acquisition may or may not proceed. If the Possible Acquisition materialises, it will constitute a notifiable transaction on the part of the Company. Shareholders and investors are urged to exercise caution when dealing in the securities of the Company. Further announcement in respect of the Possible Acquisition will be made by the Company in the event that any Formal Agreement has been signed.**
