#### 2. CHAIRMAN AND CHIEF EXECUTIVE OFFICER

Under Code provision A.2.1, the roles of the chairman and chief executive should be separate and should not be performed by the same individual. Ms. Jin Cheng Grace ("Ms. Jin") is the chairman of the Company (the "Chairman") and Mr. Lo Wing Sang ("Mr. Lo") is the Chief Executive Officer (the "CEO") of the Company. Mr. Lo as the CEO is responsible for managing and smoothing the business operations of the Group while Ms. Jin as the Chairman is responsible for leading the Board in the overall strategic development of the Group.

The Chairman and the CEO are separate individuals with segregated roles and have no relationship with each other. The Board believes that there was an effective segregation of duties between the Chairman and the CEO. Ms. Jin was appointed as the Chairman and Mr. Lo was redesignated from the chief operating officer of the Company to the CEO with effect from 29 October 2014. Prior to such appointment and redesignation, Mr. Ip Cheng Kuong was the Chairman (who resigned with effect from 15 September 2014) and the Investment and Management Committee (the "IMC") of the Board assumed the functions of the CEO during the period.

The Board considers the above arrangement to be appropriate for the Company as it can preserve the consistent leadership culture of the Company and allow efficient discharge of the functions of the chief executive officer. The Board believes that a balance of power and authority is adequately ensured by the Board which comprises experienced and high caliber individuals, including one non-executive director and three independent non-executive directors (the "INEDs").

### 2. 主席及行政總裁

董事會認為,以上安排可保持本公司 一致之領導文化,並可有效地履行行 政總裁之職能,故對本公司而言為適 當之安排。董事會相信,董事會由 具經驗和卓越才幹之人士(包括一位 非執行董事及三位獨立非執行董事 (「獨立非執行董事」))組成,足以確 保權力與權限之平衡。

### **HKFRS 9 "Financial instruments"**

HKFRS 9 issued in 2009 introduced new requirements for the classification and measurement of financial assets. HKFRS 9 was subsequently amended in 2010 to include requirements for the classification and measurement of financial liabilities and for derecognition, and further amended in 2013 to include the new requirements for general hedge accounting. Another revised version of HKFRS 9 was issued in 2014 mainly to include a) impairment requirements for financial assets and b) limited amendments to the classification and measurement requirements by introducing a 'fair value through other comprehensive income' (FVTOCI) measurement category for certain simple debt instruments.

HKFRS 9 "Financial instruments" (Continued)

Key requirements of HKFRS 9 are described below:

All recognised financial assets that are within the scope of HKAS 39 "Financial instruments: Recognition and measurement" are subsequently measured at amortised cost or fair value. Specifically, debt investments that are held within a business model whose objective is to collect the contractual cash flows, and that have contractual cash flows that are solely payments of principal and interest on the principal outstanding are generally measured at amortised cost at the end of subsequent accounting periods. Debt instruments that are held within a business model whose objective is achieved both by collecting contractual cash flows and selling financial assets, and that have contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding, are measured at FVTOCI. All other debt investments and equity investments are measured at their fair value at the end of subsequent accounting periods. In addition, under HKFRS 9, entities may make an irrevocable election to present subsequent changes in the fair value of an equity investment (that is not held for trading) in other comprehensive income, with only dividend income generally recognised in profit or loss.

2. APPLICATION OF NEW AND REVISED HONG
KONG FINANCIAL REPORTING STANDARDS
("HKFRSs") (Continued)

**HKFRS 9 "Financial instruments"** (Continued)

- With regard to the measurement of financial liabilities designated as at fair value through profit or loss, HKFRS 9 requires that the amount of change in the fair value of the financial liability that is attributable to changes in the credit risk of that liability is presented in other comprehensive income, unless the recognition of the effects of changes in the liability's credit risk in other comprehensive income would create or enlarge an accounting mismatch in profit or loss. Changes in fair value of financial liabilities attributable to changes in the financial liabilities' credit risk are not subsequently reclassified to profit or loss. Under HKAS 39, the entire amount of the change in the fair value of the financial liability designated as fair value through profit or loss was presented in profit or loss.
- In relation to the impairment of financial assets, HKFRS 9 requires an expected credit loss model, as opposed to an incurred credit loss model under HKAS 39. The expected credit loss model requires an entity to account for expected credit losses and changes in those expected credit losses at each reporting date to reflect changes in credit risk since initial recognition. In other words, it is no longer necessary for a credit event to have occurred before credit losses are recognised.

2. APPLICATION OF NEW AND REVISED HONG KONG FINANCIAL REPORTING STANDARDS ("HKFRSs") (Continued)

**HKFRS 9 "Financial instruments"** (Continued)

The new general hedge accounting requirements retain the three types of hedge accounting. However, greater flexibility has been introduced to the types of transactions eligible for hedge accounting, specifically broadening the types of instruments that qualify for hedging instruments and the types of risk components of non-financial items that are eligible for hedge accounting. In addition, the effectiveness test has been overhauled and replaced with the principle of an 'economic relationship'. Retrospective assessment of hedge effectiveness is also no longer required. Enhanced disclosure requirements about an entity's risk management activities have also been introduced.

The directors of the Company anticipate that the adoption of HKFRS 9 in the future will not affect the classification and measurement the Group's financial assets and financial liabilities at 31 December 2014.

The directors of the Company anticipate that the application of the other new and revised HKFRSs will have no material impact on the consolidated financial statements.

#### 3. SIGNIFICANT ACCOUNTING POLICIES

The consolidated financial statements have been prepared in accordance with Hong Kong Financial Reporting Standards issued by the HKICPA. In addition, the consolidated financial statements include applicable disclosures required by the Rules Governing the Listing of Securities on the Stock Exchange and by the Hong Kong Companies Ordinance.

The consolidated financial statements have been prepared under the historical cost basis except for certain derivative financial instruments and investment properties, which are measured at fair values as explained in the accounting policies set out below. Historical cost is generally based on the fair value of the consideration given in exchange for goods or services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Group takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/ or disclosure purposes in these consolidated financial statements is determined on such basis, except for share-based payment transactions that are within the scope of HKFRS 2, leasing transactions that are within the scope of HKAS 17, and measurements that have some similarities to fair value but are not fair value, such as net realisable value in HKAS 2 or value in use in HKAS 36.

#### 主要會計政策 3.

綜合財務報表乃按照香港會計師公會 頒佈之香港財務報告準則編製。此 外,綜合財務報表載有聯交所證券上 市規則及香港公司條例規定之適當披 露資料。

除了若干衍生金融工具及投資物業按 公平值計算外,綜合財務報表乃按照 歷史成本法編製,所採用之會計政策 載列如下。歷史成本一般按交換商品 或服務所提供之代價之公平值計算。

公平值是於計量日期市場參與者於有 序交易中出售資產可收取或轉讓負債 須支付的價格, 而不論該價格是否首 接可觀察或可使用其他估值技術估 計。若市場參與者於計量日期對資產 或負債定價時會考慮資產或負債的特 點,則本集團於估計資產或負債的公 平值時會考慮該等特點。此等綜合財 務報表中作計量及/或披露用途的 公平值乃按此基準釐定,惟屬於香港 財務報告準則第2號範圍的以股份為 基礎之付款交易、屬於香港會計準則 第17號範圍內的租賃交易,以及與 公平值有部份相若地方但並非公平值 的計量,譬如香港會計準則第2號內 的可變現淨額或香港會計準則第36 號的使用價值除外。

#### **SIGNIFICANT ACCOUNTING POLICIES** (Continued) 3.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than guoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

The principal accounting policies are set out below.

#### Basis of consolidation

The consolidated financial statements incorporate the financial statements of the Company and entities controlled by the Company and its subsidiaries. Control is achieved when the Company:

- has power over the investee;
- is exposed, or has rights, to variable returns from its involvement with the investee; and
- has the ability to use its power to affect its returns.

#### 主要會計政策(續) 3.

此外,就財務報告而言,公平值計量 根據公平值計量的輸入數據可觀察程 度及公平值計量的輸入數據對其整體 的重要性分類為第一級、第二級或第 三級,詳情如下:

- 第一級輸入數據是實體於計量 日期可以取得的相同資產或負 債於活躍市場之報價(未經調 整);
- 第二級輸入數據是就資產或負 債直接或間接地可觀察之輸入 數據(第一級內包括的報價除 外);及
- 第三級輸入數據是資產或負債 的不可觀察輸入數據。

主要會計政策載列如下。

#### **SIGNIFICANT ACCOUNTING POLICIES** (Continued) 3. Basis of consolidation (Continued)

The Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.

Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Specifically, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated statement of profit or loss and other comprehensive income from the date the Group gains control until the date when the Group ceases to control the subsidiary.

Profit or loss and each component of other comprehensive income are attributed to the owners of the Company and to the non-controlling interests. Total comprehensive income of subsidiaries is attributed to the owners of the Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

Where necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies.

All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

#### **SIGNIFICANT ACCOUNTING POLICIES** (Continued) 3. **Business combinations**

Acquisitions of businesses are accounted for using the acquisition method. The consideration transferred in a business combination is measured at fair value, which is calculated as the sum of the acquisition-date fair values of the assets transferred by the Group, liabilities incurred by the Group to the former owners of the acquiree and the equity interests issued by the Group in exchange for control of the acquiree. Acquisition-related costs are generally recognised in profit or loss as incurred.

At the acquisition date, the identifiable assets acquired and the liabilities assumed are recognised at their fair value, except that:

- deferred tax assets or liabilities, and assets or liabilities related to employee benefit arrangements are recognised and measured in accordance with HKAS 12 "Income taxes" and HKAS 19 "Employee benefits" respectively;
- liabilities or equity instruments related to share-based payment arrangements of the acquiree or share-based payment arrangements of the Group entered into to replace share-based payment arrangements of the acquiree are measured in accordance with HKFRS 2 "Share-based payment" at the acquisition date (see the accounting policy below): and
- assets (or disposal groups) that are classified as held for sale in accordance with HKFRS 5 "Non-current assets held for sale and discontinued operations" are measured in accordance with that standard.

### 業務合併

收購業務採用收購法入賬。業務合併 之轉撥代價按公平值計量,而計算方 法為本集團所轉讓之資產於收購日之 公平值、本集團向被收購方原擁有人 產生之負債及本集團於交換被收購方 之控制權發行之股權之總額。有關收 購之費用於產生時一般於損益中確 認。

Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer's previously held equity interest in the acquiree (if any) over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed. If, after reassessment, the net of the acquisitiondate amounts of the identifiable assets acquired and liabilities assumed exceeds the sum of the consideration transferred, the amount of any noncontrolling interests in the acquiree and the fair value of the acquirer's previously held interest in the acquiree (if any), the excess is recognised immediately in profit or loss as a bargain purchase gain.

### Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable and represents amount receivable for goods sold in the normal course of business, net of discounts and sales related taxes.

Dividend income from investments is recognised when the shareholder's rights to receive payment have been established.

Interest income from financial assets is recognised when it is probable that the economic benefits will flow to the Group and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

#### **SIGNIFICANT ACCOUNTING POLICIES** (Continued) 3. Property, plant and equipment

Property, plant and equipment held for use in the production or supply of goods or services, or for administrative purposes are stated in the consolidated statement of financial position at cost less subsequent accumulated depreciation and accumulated impairment losses, if any.

Depreciation is recognised so as to write off the cost of items of property, plant and equipment, over their estimated useful lives and after taking into account their estimated residual values, using the straight line method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

#### **Investment properties**

Investment properties are properties held to earn rentals and/or for capital appreciation.

Investment properties are initially measured at cost, including any directly attributable expenditure. Subsequent to initial recognition, investment properties are measured at their fair values. Gains or losses arising from changes in the fair value of investment properties are included in profit or loss for the period in which they arise.

#### **SIGNIFICANT ACCOUNTING POLICIES** (Continued) 3. **Investment properties** (Continued)

An investment property is derecognised upon disposal or when the investment property is permanently withdrawn from use and no future economic benefits are expected from its disposals. Any gain or loss arising on derecognition of the property (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the profit or loss in the period in which the property is derecognised.

### Impairment losses on assets

At the end of the reporting period, the Group reviews the carrying amounts of its assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss, if any. When it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. Where a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pretax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or a cashgenerating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or a cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss.

Where an impairment loss subsequently reverses, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or a cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss.

#### Leasing

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

### The Group as lessee

Operating lease payments are recognised as an expense on a straight line basis over the term of the relevant lease. Benefits received and receivable as an incentive to enter into an operating lease are recognised as a reduction of rental expense over the lease term on a straight line basis.

## 3. SIGNIFICANT ACCOUNTING POLICIES (Continued) Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit before tax as reported in consolidated statement of profit or loss and other comprehensive income because it excludes items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary difference to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised. Such assets and liabilities are not recognised if the temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

Deferred tax liabilities are recognised for taxable temporary differences associated with investments in subsidiaries, except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments are only recognised to the extent that it is probable that there will be sufficient taxable profits against which to utilise the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

#### **SIGNIFICANT ACCOUNTING POLICIES** (Continued) 3.

### **Taxation** (Continued)

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset is realised, based on tax rate (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

For the purposes of measuring deferred tax liabilities or deferred tax assets for investment properties that are measured using the fair value model, the carrying amounts of such properties are presumed to be recovered entirely through sale, unless the presumption is rebutted. The presumption is rebutted when the investment property is depreciable and is held within a business model whose objective is to consume substantially all of the economic benefits embodied in the investment property over time, rather than through sale.

Current and deferred tax is recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

#### **SIGNIFICANT ACCOUNTING POLICIES** (Continued) 3. **Financial instruments**

Financial assets and financial liabilities are recognised on the consolidated statement of financial position when a group entity becomes a party to the contractual provisions of the instrument.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

#### Financial assets

The Group's financial assets are classified into financial assets at fair value through profit or loss ("FVTPL") and loans and receivables. The classification depends on the nature and purpose of the financial assets and is determined at the time of initial recognition. All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

Financial assets (Continued) Effective interest method

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the debt instrument, or, where appropriate, a shorter period to the net carrying amount on initial recognition.

Interest income is recognised on an effective interest basis for debt instruments.

Financial assets at fair value through profit or loss The Group's financial assets at FVTPL represent financial assets that are held-for-trading. A financial asset is classified as held-for-trading if:

- it has been acquired principally for the purpose of selling in the near future; or
- it is part of an identified portfolio of financial instruments that the Group manages together and has a recent actual pattern of short-term profit taking; or
- it is a derivative that is not designated and effective as a hedging instrument.

Financial assets at FVTPL are stated at fair value, with changes in fair value arising from remeasurement recognised directly in profit or loss in the period in which they arise. The net gain or loss recognised in profit or loss excludes any dividends or interest earned on the financial assets and is included in the other gains and losses line item in the consolidated statement of profit or loss and other comprehensive income.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Subsequent to initial recognition, loans and receivables (including other receivables and bank balances) are carried at amortised cost using the effective interest method, less any identified impairment (see accounting policy on impairment loss on financial assets below).

### Impairment of financial assets

Financial assets, other than those at FVPTL, are assessed for indicators of impairment at the end of each reporting period. Financial assets are considered to be impaired where there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the financial assets have been affected.

Objective evidence of impairment could include:

- significant financial difficulty of the issuer or counterparty; or
- breach of contract, such as default or delinquency in interest or principal payments; or
- it becoming probable that the borrower will enter bankruptcy or financial re-organisation.

For financial assets carried at amortised cost, the amount of the impairment loss recognised is the difference between the asset's carrying amount and the present value of the estimated future cash flows discounted at the financial asset's original effective interest rate.

除按公平值計入損益之金融資產以外 之金融資產乃於各報告期結束時被評 估是否有減值跡象。若金融資產於初 次確認後發生一項或多項事件而導致 有客觀證據證明金融資產之估計未來 現金流量受到影響,則視為出現減 值。

#### 減值之客觀證據可包括:

- 發行人或對手方遇到嚴重財務 困難;或
- 違反合約,如逾期或拖欠利息 或本金支付;或
- 借款人有可能破產或進行財務 重組。

For financial assets carried at cost, the amount of impairment loss is measured as the difference between the asset's carrying amount and the present value of the estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment loss will not be reversed in the subsequent periods.

The carrying amount of the financial asset is reduced by the impairment loss directly for all financial assets.

For financial assets measured at amortised cost, if, in a subsequent period, the amount of impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment losses was recognised, the previously recognised impairment loss is reversed through profit or loss to the extent that the carrying amount of the investment at the date the impairment is reversed does not exceed what the amortised cost would have been had the impairment not been recognised.

Convertible notes that contains liability component, conversion option derivative and early redemption option derivatives

Convertible notes issued by the Group that contain both liability and embedded derivatives (conversion option and early redemption option which is not closely related to the host liability component) are classified separately into respective items on initial recognition. Conversion option that will be settled other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of the Company's own equity instruments is a conversion option derivative.

At the date of issue, both the liability and embedded derivatives are recognised at fair value. In subsequent periods, the liability component of the convertible notes is carried at amortised cost using the effective interest method. The embedded derivatives are measured at fair value with changes in fair value recognised in profit or loss.

The embedded derivatives are remeasured at their fair value immediately prior to the date of redemption or conversion of the convertible notes with changes in fair value being recognised in profit or loss. For redemption of convertible notes, the resulting gain or loss (calculated at the difference between the redemption amount paid and the carrying amount of the convertible notes, being the aggregate amount of the liability component, conversion option derivative and early redemption option derivative) is recognised in profit or loss. For conversion of convertible notes, the carrying amount of the convertible notes is transferred to equity with the resulting shares issued being recorded as additional share capital at nominal value of the shares and the excess of the carrying amount of the convertible notes over the nominal value of the shares being recorded in share premium.

In preparing the financial statements of each individual group entity, transactions in currencies other than the functional currency of that entity (foreign currencies) are recorded in its functional currency (i.e. the currency of the primary economic environment in which the entity operates) at the rates of exchanges prevailing on the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Share options granted to consultants

Share options issued in exchange for goods or services are measured at the fair values of the goods or services received, unless that fair value cannot be reliably measured, in which case the goods or services received are measured by reference to the fair value of the share options granted. The fair values of the goods or services received are recognised as expenses, with a corresponding increase in equity (share options reserve), when the Group obtains the goods or when the counterparties render services, unless the goods or services qualify for recognition as assets.

If the equity instruments granted vest immediately, the counterparty is not required to complete a specified period of service before becoming unconditionally entitled to those equity instruments. In the absence of evidence to the contrary, the entity shall presume that services rendered by the counterparty as consideration for the equity instruments have been received. In this case, on grant date the entity shall recognise the services received in full, with a corresponding increase in equity.

#### 4. CAPITAL ACCOUNTING JUDGEMENT AND KEY **SOURCES OF ESTIMATION UNCERTAINTY**

In the application of the Group's accounting policies, which are described in note 3, the directors of the Company are required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an on-going basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

### Critical judgement in applying accounting policies

The following is the critical judgement, apart from those involving estimations (see below), that the directors of the Company have made in the process of applying the Group's accounting policies and that have the most significant effect on the amounts recognised in the consolidated financial statements.

Deferred taxation on investment properties

For the purposes of measuring deferred tax liabilities arising from investment properties that are measured using the fair value model, the directors of the Company have reviewed the Group's investment property portfolio and concluded that the Group's investment properties are not held under a business model whose objective is to consume substantially all of the economic benefits embodied in the investment properties over time, rather than through sale. Therefore, in measuring the Group's deferred taxation on investment properties, the directors of the Company have determined that the presumption that the carrying amounts of investment properties measured using the fair value model are recovered entirely through sale is not rebutted. As a result, the Group shall recognised deferred taxes on changes in fair value of investment properties situated in the People's Republic of China (the "PRC") as these properties are subject to land appreciation taxes and income tax upon disposal of its investment properties. Deferred tax liabilities in respect of land appreciation taxes in the PRC are determined based on valuations of the investment properties performed by independent professional valuers and on the assumption that the values are the actual proceeds to be received from the sale of these properties. No deferred taxation on investment properties was recognised during the year ended 31 December 2014 and 31 December 2013 as there were no significant change in the fair value of the Group's investment properties during those years.

投資物業之遞延税項

就計量由使用公平值模型計量之投資 物業所產生的遞延税項負債而言,本 公司董事已檢視本集團的投資物業組 合並認為本集團投資物業並非根據旨 在假以時日而非透過出售消耗投資物 業所包含之絕大部分經濟利益之業務 模式持有。因此,在計量本集團投資 物業之遞延税項時,本公司董事認為 以公平值模式計量之投資物業賬面值 可因出售而完全收回之假設不可駁 回。因此,由於本集團須就出售位於 中華人民共和國(「中國」)之投資物 業繳納土地增值税及所得税,本集團 須確認投資物業公平值變動之遞延税 項。有關中國土地增值税的遞延税項 負債乃基於獨立專業估值師對投資物 業的估值並假設估定的價值即銷售該 等物業時收取的實際所得款項釐定。 由於本集團投資物業之公平值截至二 零一四年十二月三十一日及二零一三 年十二月三十一日止年度並無重大變 動,故於該等年度並無確認投資物業 之遞延税項。

### Key sources of estimation uncertainty

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

Fair value of embedded conversion option and early redemption option of convertible notes

The directors of the Company use their judgement in selecting an appropriate valuation technique to determine fair value of embedded conversion option and early redemption option of the convertible notes which are not quoted in an active market. Valuation techniques commonly used by market practitioners are applied. The fair value of the derivative financial liabilities are determined at the conversion date or at the end of the reporting period with movements in fair value recognised in profit or loss. In estimating the fair value of these derivative financial liabilities, the Group uses independent valuation which is based on various inputs and estimates based on quoted market rates and adjusted for specific features of the instrument (see note 21). If the inputs and estimates applied in the model are different, the carrying amount of these derivative financial liabilities at the conversion date or at the end of the reporting period will change.

On 29 January 2014, the Group has filed a legal proceeding to Haikou Municipal Intermediate People's Court (海口市中級人民法院) against Sincerity Shine, Mr. Li Geng and Hainan Jiadexin Foodstuff Company Limited (海南佳德信食品有限 公司) ("Hainan Jiadexin") (a subsidiary of Sincerity Shine) for settlement of the outstanding principal and interest, and to restrict the transfer of the major assets of Hainan Jiadexin. As at the date of this report, the Group has not yet received any judgement from the Haikou Municipal Intermediate People's Court.

During the current year, the Group has received further repayments of HK\$3,000,000. At 31 December 2014, the consideration receivable outstanding amounted to HK\$6,608,000, including interest of HK\$966,000 (2013: HK\$9,214,000, including interest of HK\$572,000). If the judgement from the relevant court is against the Group, the remaining consideration receivable may not be recoverable. At the end of the reporting period, the directors of the Company have assessed the recoverability of this amount and considered that the outstanding balance may not be recoverable, hence, an impairment loss of HK\$6,608,000 has been recognised in profit or loss.

Currency risk (Continued) Sensitivity analysis

> The Group is mainly exposed to exchange rate fluctuations of Hong Kong dollars. The following table details the Group's sensitivity to a 5% (2013: 5%) increase in RMB against the Hong Kong dollars while all other variables are held constant. 5% (2013: 5%) is the sensitivity rate used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the reasonably possible change in foreign exchange rates. The sensitivity analysis includes only outstanding foreign currency denominated monetary items and adjusts their translation at the end of the reporting period for a 5% (2013: 5%) change in foreign currency rates.

> The sensitivity analysis includes monetary items where the denomination of the balances is in a currency other than the functional currency of the respective group entities. A positive number below indicates an increase in profit for the year where RMB strengthen 5% (2013: 5%) against the relevant currency while a negative number represents a decrease in profit for the year. For a 5% (2013: 5%) weakening of RMB against the relevant currency, there would be an equal and opposite impact on the result for the year.

#### (ii) Interest rate risk

At 31 December 2013, the Group is exposed to fair value interest risk in relation to fixed rate convertible notes (2014: N/A). The Group also exposed to cash flow interest rate risk in relation to bank deposits. The Group currently does not have an interest rate hedging policy. However, the management monitors interest rate exposure and will consider hedging significant interest rate exposure should the need arise. The fixed rate short-term bank deposits is subject to cash flow interest rate risk as the fixed deposits are renewed every one to three months.

### Sensitivity analysis

The sensitivity analyses below have been determined based on the exposure to interest rates for bank deposits at the end of the reporting period. For short-term bank deposits, the analysis is prepared assuming the amount of bank deposits at the end of the reporting period was existing for the whole year. A 50 (2013: 50) basis point increase or decrease is used which represents management's assessment of the reasonably possible change in interest rates.

If the interest rates had been 50 (2013: 50) basis points higher and all other variables were held constant, the Group's profit for the year ended 31 December 2014 would increase by HK\$1,272,000 (2013: increase by HK\$139,000). For interest rates 50 (2013: 50) basis points lower, the changes to the Group's profit for the year ended 31 December 2014 would be insignificant assuming bank balances are carrying interest rate at 0.01% per annum drops to zero.

#### (ii) 利率風險

於二零一三年十二月三十一 日,本集團面對與定息可換股 票據有關之公平值利率風險 (二零一四年:不適用)。本 集團亦面對與銀行存款有關之 現金流量利率風險。本集團現 時並無利率對沖政策。然而, 管理層會監察利率風險,並將 於必要時考慮對沖重大利率風 險。因固定存款每一至三個月 續新一次,故固定利率短期銀 行存款受現金流利率風險影 響。

### 敏感度分析

以下敏感度分析根據於報告期 結束時銀行存款之利率風險釐 定。就短期銀行存款而言,該 分析乃假設於報告期結束時之 銀行存款金額於整個年度一直 存在。使用上升或下降50(二 零一三年:50) 個基點代表管 理層對利率之合理可能變動之 評估。

倘利率上升50(二零一三年: 50) 個基點,而所有其他變數 維持不變,則本集團截至二零 一四年十二月三十一日止年度 之溢利將增加1,272,000港元 (二零一三年:增加139,000港 元)。假設按年息0.01%計息 的銀行結餘減至零,則倘利率 下降50(二零一三年:50)個 基點,則本集團截至二零一四 年十二月三十一日止年度之溢 利變動甚微。

#### (iii) Other price risk

At 31 December 2013, the Group was exposed to equity price risk arising from the conversion option derivative and early redemption option (derivative components) of the convertible notes. The fair values of the conversion option derivative and early redemption option were calculated using the binomial option pricing model. Details of the derivative financial instrument is set out in note 21.

The Group is also exposed to equity security price risk through its held-for-trading investments. The management of the Group manages this exposure by maintaining a portfolio of investments with different risk. At 31 December 2014, the Group's equity price risk is mainly concentrated on equity instruments operating in apparel industry and other support services industry sector (2013: manufacturing and investment sector) listed on the Stock Exchange. The directors of the Company will monitor the price risk and will consider hedging the risk exposure should the need arises. If the market prices of the heldfor-trading investments had been 10% higher/ lower, the Group's profit for the year would increase/decrease by HK\$17,711,000 (2013: HK\$4,149,000).

於二零一三年十二月三十一 日,本集團承受因可換股票據 之可換股期權衍生工具及提早 贖回期權(衍生工具部分)所 產生之股本價格風險。可換股 期權衍生工具及提早贖回期權 之公平值乃採用二項式期權定 價模式計算。衍生金融工具之 詳情載列於附註21。

本集團亦因其持作買賣投資而 承受股本證券價格風險。本集 團之管理層藉持有不同風險範 圍之投資組合而管理此類風 險。於二零一四年十二月三十 一日,本集團之股本價格風險 主要集中於進入在聯交所上市 之服裝行業及其他配套服務行 業(二零一三年:製造及投資 領域) 內之股本工具。本公司 董事將監察價格風險及將於有 需要時考慮對沖風險。倘持作 買賣投資之市場價格上升/下 跌10%,則本集團之年內溢利 將增加/減少17,711,000港 元(二零一三年:4,149,000 港元)。

#### **CONVERTIBLE NOTES** (Continued)

### **2012 CN Convertible Note** (Continued)

The 2012 CN Convertible Notes contain three components, the liability component, conversion option and issuer's early redemption option. The conversion option gives the holder's right at any time to convert the 2012 CN Convertible Notes into ordinary shares of the Company. However, since the 2012 CN Convertible Notes are denominated in HK\$ and the functional currency of the Company is RMB, the conversion option will be settled other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of the Company's own equity instruments, the conversion option is accounted for as a derivative liability. The early redemption option gives the issuer the right to redeem the note at par at any time before maturity. Both conversion option derivative and early redemption option are measured at fair value with changes in fair value recognised profit and loss.

The fair value of the liability component upon the issuance of the note was calculated at the present value of the principal amount. The 2012 CN Convertible Notes can only be redeemed at par at the discretion of the issuer in whole or in part anytime before the maturity date.

All tranches of the 2012 CN Convertible Notes will mature on 28 November 2015.
