CORPORATE PROFILE

NATURAL GAS BUSINESS

In recent years, the demand for energy grows as the PRC economy continues to develop. In order to rely less on conventional energy resources such as coal and petroleum, the PRC government has adopted a series of measures to promote development and utilisation of new energy; whereas natural gas, as a form of clean energy, is particularly well-received by the industry.

We have dedicated ourselves to promote the integrated utilisation of natural gas as the strategic focus. Our natural gas business encompasses (i) construction and operation of compressed natural gas (“**CNG**”) and liquefied natural gas (“**LNG**”) refueling stations for vehicles; and (ii) construction of natural gas connection pipelines and supply of piped gas to industrial parks, commercial complex and residential communities. These facilities benefit from proximity to sources of gas supply, conformance to national policies, and the significant business opportunities arising from the process of gradually replacing conventional energy with eco-friendly clean energy.

With the support of favourable government policies, we will be able to acquire sources of gas and business opportunities by fully leveraging the established cooperative partnerships with other large-scale energy enterprises including China National Petroleum Corporation. We will endeavour to expand into markets with low utilisation of natural gas, seek out projects with high return on equity and high return on assets, and attain long-term growth making use of diversified technologies.

PRINTING BUSINESS

We are a leading books and specialised products printing group serving the international market. We specialise in the printing of books, as well as the design and manufacturing of quality specialised products such as leather and fabric-bound diaries, journals and greeting cards. Our integrated services include pre-press, printing to finishing/ binding services. We are able to combine special printing skills with leather manufacturing technologies to produce high-value added composite products for our customers. Through our full suite of integrated services at our 74,398 sqm production facilities in He Yuan, Guangdong Province, PRC, we are a convenient one-stop shop for customers sourcing for unique products that require a high-level of customisation.

Today we serve a blue-chip base of customers that includes major international publishers and retail stores across Europe, North America and Asia, such as Barnes & Noble Distribution in the US, Parragon Books Ltd. in the UK, as well as Phoenix Offset Productions and World Print Limited in Hong Kong.

NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

1. GENERAL INFORMATION

The Company was incorporated and domiciled in Bermuda as an exempted company with limited liability. The address of its registered office is Clarendon House, 2 Church Street, Hamilton HM 11, Bermuda and the principal place of business is Room 1411, 14/F., New World Tower I, 16-18 Queen's Road Central, Hong Kong. The Company's shares are primary listed on The Stock Exchange of Hong Kong Limited ("**SEHK**") and secondary listed on the Singapore Exchange Securities Trading Limited ("**SGX-ST**").

The principal activity of the Company is investment holding. The Company's subsidiaries are principally engaged in (i) sales and distribution of natural gas and other related products; and (ii) sales of book products and sales of specialised products.

The unaudited condensed consolidated financial statements are presented in Hong Kong dollars ("**HK\$**"), which is also the functional currency of the Company and all values are rounded to the nearest thousands ("**HK\$'000**") except when otherwise indicated.

2. BASIS OF PREPARATION

These condensed consolidated financial statements have been prepared in accordance with Hong Kong Accounting Standard ("**HKAS**") 34 – Interim Financial Reporting issued by the Hong Kong Institute of Certified Public Accountants (the "**HKICPA**") and the applicable disclosures requirements of Appendix 16 to the Rules Governing the Listing of Securities on SEHK ("**Listing Rules**").

3. ACCOUNTING POLICIES

The accounting policies used in the preparation of these condensed consolidated financial statements are consistent with those used in the preparation of the financial statements for the year ended 31 December 2014, except for the adoption of the new or amended Hong Kong Financial Reporting Standards ("**new HKFRSs**") issued by the HKICPA, which are relevant to and effective for the Group's financial statements for the annual period beginning on 1 January 2015, and HKFRS 11 Joint arrangements.

Investment in joint venture

A joint venture is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint arrangement. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control.

The results and assets and liabilities of joint venture is incorporated in these consolidated financial statements using the equity method of accounting. Under the equity method, an investment in a joint venture is initially recognised in the condensed consolidated statement of financial position at cost and adjusted thereafter to recognise the Group's share of the profit or loss and other comprehensive income of the joint venture. When the Group's share of losses of a joint venture exceeds the Group's interest in that joint venture (which includes any long-term interests that, in substance, form part of the Group's net investment in the joint venture), the Group discontinues recognising its share of further losses. Additional losses are recognised only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the joint venture.

NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

3. ACCOUNTING POLICIES (Continued)

Investment in joint venture (Continued)

An investment in a joint venture is accounted for using the equity method from the date on which the investee becomes a joint venture. On acquisition of the investment in a joint venture, any excess of the cost of the investment over the Group's share of the net fair value of the identifiable assets and liabilities of the investee is recognised as goodwill, which is included within the carrying amount of the investment. Any excess of the Group's share of the net fair value of the identifiable assets and liabilities over the cost of the investment, after reassessment, is recognised immediately in profit or loss in the period in which the investment is acquired.

The requirements of HKAS 39 are applied to determine whether it is necessary to recognise any impairment loss with respect to the Group's investment in a joint venture. When necessary, the entire carrying amount of the investment (including goodwill) is tested for impairment in accordance with HKAS 36 Impairment of Assets as a single asset by comparing its recoverable amount (higher of value in use and fair value less costs to sell) with its carrying amount. Any impairment loss recognised forms part of the carrying amount of the investment. Any reversal of that impairment loss is recognised in accordance with HKAS 36 to the extent that the recoverable amount of the investment subsequently increases.

When the Group reduces its ownership interest in a joint venture but the Group continues to use the equity method, the Group reclassifies to profit or loss the proportion of the gain or loss that had previously been recognised in other comprehensive income relating to that reduction in ownership interest if that gain or loss would be reclassified to profit or loss on the disposal of the related assets or liabilities.

When a group entity transacts with a joint venture of the Group (such as a sale or contribution of assets), profits and losses resulting from the transactions with the joint venture are recognised in the Group's consolidated financial statements only to the extent of interests in the joint venture that are not related to the Group.

At the date of authorisation of this report, certain new and amended HKFRSs have been issued but are not yet effective, and have not been adopted early by the Group.

4. SEASONALITY OF OPERATIONS

Seasonal fluctuation exists in our natural gas business. The demand is generally higher in the second half of the year due to the winter heating consumption. There is no material impact on the unaudited condensed consolidated interim financial statements as the natural gas business is still in the start-up stage.

Seasonal fluctuation exists in our sales of book and specialised products and in the overall printing industry. The demand is generally higher in the second half of the year when our customers will normally place more orders to us so as to meet their greater sales demand during Christmas and New Year holidays.

Our interim results for the first half of the year may not serve as an indication of our results of operations for the entire financial year.

NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

5. SEGMENT REPORTING

Information reported to the executive Directors of the Company, being the chief operating decision makers (“**CODM**”), for the purpose of resources allocation and assessment of segment performance focuses on nature of the goods being sold. These revenue streams and the basis of the internal reports about components of the Group are regularly reviewed by the CODM in order to allocate resources to segments and to assess their performance. No operating segments identified by the CODM have been aggregated in arriving at the reportable segments of the Group.

The above reportable and operating segments were based on the product type. During the year ended 31 December 2014, CODM’s focus has been changed after the Group acquired subsidiaries which are mainly engaged in the sales and distribution of natural gas and other related products. As a result, the Group is now organised into the following operating and reportable segments:

1. Sales and distribution of natural gas and other related products – This segment derives its revenue from operations of compressed natural gas (“**CNG**”) or liquefied natural gas (“**LNG**”) refuelling stations, construction of natural gas connection pipelines and supply of piped gas in the People’s Republic of China (the “**PRC**”).
2. Sales of book and specialised products – Provision of full suite of services from pre-press to printing to finishing/binding services and production of custom-made and value-added printing products.

Segment revenue below represents revenue from external customers. There were no inter-segment sales for the six months ended 30 June 2015 and 2014.

12. DIVIDEND

The Board did not recommend a payment of interim dividend for the six months ended 30 June 2015 (six months ended 30 June 2014: Nil).

13. LOSS PER SHARE

The calculation of basic loss per share is based on the loss attributable to owners of the Company of HK\$3,457,000 (six months ended 30 June 2014: HK\$13,607,000) and on the weighted average number of 4,907,041,297 (six months ended 30 June 2014: 2,429,107,580 after adjusted for share subdivision effective in October 2014) ordinary shares in issue during the period.

The weighted average number of ordinary shares for the purposes of basic and diluted loss per share for the period ended 30 June 2014 have been adjusted to reflect the impact of the share subdivision effected on 15 October 2014.

The computation of diluted loss per share does not assume the exercise of the Company's outstanding share options and the conversion of the Company's outstanding convertible bonds and convertible notes as their exercise would result in a decrease in loss per share.

As at 31 December 2014, the trade receivables of HK\$15,655,000 have been pledged to secure bank borrowings utilised by the Group.

22. ACQUISITION OF SUBSIDIARIES

(a) Acquisitions accounted for business combinations

During the six months ended 30 June 2015, the Group acquired Shine Great Investments Limited (“**Shine Great**”) which is principally engaged in the sales and distribution of natural gas and other related products in the PRC. The primary reason for the acquisition was for the expansion of the Group’s business and to increase returns to its shareholders.

	Date of acquisition	Percentage of registered capital acquired	Purchase consideration HK\$'000
Business combination:			
Shine Great	February 2015	51%	134,863

The acquisition-related costs of HK\$1,271,000 were recognised as expenses in the current period, within other operating expenses.

NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

22. ACQUISITION OF SUBSIDIARIES (Continued)

(a) Acquisitions accounted for business combinations (Continued)

The fair values of the assets and liabilities acquired and goodwill have been determined on a provisional basis, awaiting the completion of the identification of separable intangible assets and valuation of the identifiable assets and liabilities.

Net cash outflow arising on acquisitions:

	Shine Great
	<i>HK\$'000</i>
Purchase cash consideration	54,800
Bank balances and cash acquired	(3,097)
	51,703

Goodwill arose from the above acquisition because the cost of the combination included a control premium. In addition, the consideration paid for the combination effectively included amounts in relation to the benefit of expected synergies, revenue growth, future market development and the assembled workforce of the business.

None of the goodwill arising on these acquisition is expected to be deductible for tax purposes.

During the period, acquired subsidiary contributed HK\$4,280,000 to the Group's turnover and incurred loss of HK\$3,876,000 for the period between the respective dates of acquisition and the end of the reporting period.

Had the above acquisition been effected at the beginning of the reporting period, the total amount of revenue of the Group for the six months ended 30 June 2015 would have been approximately HK\$92,096,000 and the amount of the loss for the period would have been approximately HK\$15,025,000. The pro forma information is for illustrative purposes only and is not necessarily an indication of revenue and results of operations of the Group that actually would have been achieved had the acquisition been completed at the beginning of the reporting period, nor is it intended to be a projection of future results.

(b) Acquisition of assets through acquisition of subsidiaries

During the six months ended 30 June 2015, the Group acquired Well Organising Group Limited ("**Well Organising**") which are holdings operating rights for the sales and distribution of natural gas and other related products in the PRC. The Directors of the Company are of the opinion that the subsidiary acquired does not constitute a business as defined in HKFRS 3, therefore, the acquisitions have been accounted for as acquisitions of assets rather than business combination. The primary reason for the below acquisition was for the expansion of the Group's business and to increase returns to its shareholders.

Under the terms of the Convertible Bond Subscription Agreement, the Company granted a subscription option (the "**Subscription Option**") to the Subscriber to subscribe in cash for additional convertible bond at the issue price of up to HK\$116,000,000, which is the price equivalent to 100% of the principal amount of such additional convertible bond. The Subscription Option is exercisable by the Subscriber or a special purpose vehicle of the Subscriber (the "**Subscriber's SPV**"). The conversion price of such additional convertible bond shall be the same as the conversion price under the Convertible Bond Subscription Agreement. At the date hereof, the issue of the Convertible Bond has not been completed yet.

MANAGEMENT DISCUSSION AND ANALYSIS

The Group is an integrated natural gas provider and distributor that offers innovative and diversified clean energy solution in the PRC. The Group focuses on the downstream natural gas distribution business which encompasses (i) construction and operation of compressed natural gas (“CNG”) and liquefied natural gas (“LNG”) refueling stations for vehicles; and (ii) construction of natural gas connection pipelines and supply of piped gas to industrial parks, commercial complex and residential communities.

BUSINESS REVIEW

The Group continued its swift expansion of the natural gas business sector. The scale of operations for our projects in Liaoning Province, Sichuan Province and Jinan, Shandong Province started to ramp up gradually during the period ended 30 June 2015. During the period ended 30 June 2015, the Group recorded a total revenue of approximately HK\$42.2 million from the natural gas business, arising from the contribution of the projects in Liaoning Province, Shandong Province, Sichuan Province and Guizhou Province. It represented an increase of 99.5% from the last corresponding period, which recorded a revenue of HK\$21.2 million only from the natural gas business and mainly contributed from one project in Shandong Province.

During the period, the Group also completed a number of acquisitions:

- (1) the acquisition of 48% interest in the natural gas project in Hainan Province (the “**Hainan Project**”) in January 2015, which owned 17 natural gas refueling stations in Hainan Province and is believed to be the largest operator of natural gas refueling stations for vehicles in Haikou in terms of the number of gas stations; and
- (2) the acquisition of 51% interest in the natural gas project in Guizhou Province (the “**Guizhou Project**”) in February 2015, which consisted of a number of piped gas and gas stations projects and two gas refueling stations are in operation currently.

Following the completion of the acquisitions, the footprints for the Group’s natural gas business were further enhanced.

As part of the natural gas price reforms, the National Development and Reform Committee (“**NDRC**”) has announced effective from 1 April 2015, the wholesale ceiling prices charged by pipeline enterprises to gas distributors on “base” volumes of gas would be raised by RMB0.04 per cubic meter, and that “incremental” volumes would be decreased by RMB0.44 per cubic meter. It is expected that the spirit of the natural gas price reforms is to adjust the natural gas price in the PRC stage by stage and to achieve full adjustment for the purpose of allowing natural gas price to be completely determined by market mechanism. Such price adjustment, to a certain extent, helped promote the natural gas utilization in certain areas in the PRC where our projects are located during the period ended 30 June 2015. Following the trimming in international crude oil prices from the second half of 2014, the Group believes that further downward gas price adjustment will be announced in 2015 and the policy will lower the cost of gas purchase of the Group and beneficial to our future development of the natural gas business in the PRC.

MANAGEMENT DISCUSSION AND ANALYSIS

FINANCIAL REVIEW

CONDENSED CONSOLIDATED STATEMENT OF COMPREHENSIVE INCOME

Revenue

Revenue increased by 17.5% from HK\$77.3 million for HY2014 to HK\$90.7 million for HY2015 which was mainly due to the expansion of natural gas business and recorded an increase of revenue from natural gas business of HK\$21.1 million for HY2015, offset by the decrease in revenue of the printing business by HK\$7.6 million due to the increased competition in the market.

Gross Profit/Loss and Segment Profit/Loss

The Group turned from the gross profit of HK\$10.9 million for HY2014 to the gross loss of HK\$4.2 million for HY2015 which was mainly due to (i) the amortisation expense of intangible assets of natural gas projects of HK\$9.7 million; (ii) the natural gas projects were in the ramp-up stage in HY2015; and (iii) the decreasing gross profit margin of the printing business, including the increased labour costs in the PRC.

The natural gas business of the Group recorded a segment profit of HK\$40.8 million during HY2015, which increased significantly from HK\$3.2 million for HY2014, owing to the scale of operations of our natural gas projects starting to ramp up during HY2015 and the gain recognised on disposal of subsidiaries in HY2015. On the other hand, the printing business of the Group recorded a segment loss of HK\$9.2 million during HY2015, as compared to a segment profit of HK\$7.7 million during HY2014, due to the intense competition of the printing market during HY2015.

Other Gains and Losses and Other Income

Other gains and losses and other income decreased by 45.6% from HK\$3.0 million for HY2014 to HK\$1.6 million for HY2015, which is mainly due to the decrease in net exchange gains by HK\$1.1 million and there is no reversals of impairment losses on trade receivables during HY2015.

Operating Expenses

(a) Selling and distribution costs

Selling and distribution costs decreased by 34.7% from HK\$3.3 million for HY2014 to HK\$2.1 million for HY2015. This was mainly due to the decrease in (i) transportation and freight charges; (ii) business trip expenses; and (iii) certificate and declaration expenses of the printing business during HY2015.

(b) Administrative expenses

The significant increase in administrative expenses by 139.9% from HK\$21.1 million for HY2014 to HK\$50.7 million for HY2015 was mainly due to the increase in staff costs by HK\$20.8 million and transportation and travelling fee by HK\$6.9 million.

(c) Other operating expenses

Other operating expenses increased by 76.7% from HK\$2.0 million for HY2014 to HK\$3.6 million for HY2015 which was mainly due to the increased legal and professional fee of HK\$1.6 million.

(d) Finance costs

Finance costs increased from HK\$0.4 million for HY2014 to HK\$11.9 million for HY2015 which was due to the addition of (i) interest on convertible bonds of HK\$1.4 million, (ii) interest on corporate bonds of HK\$2.7 million and (iii) imputed interest from convertible notes of HK\$7.0 million and increase in interest on bank and other borrowing of HK\$0.4 million during HY2015.

MANAGEMENT DISCUSSION AND ANALYSIS

(e) Gain recognised on disposal of subsidiaries

Gain recognised on disposal of subsidiaries of HK\$59,913,000 represented the gain arising from disposal of 15% equity interests of Brightjet Global Limited at a consideration of HK\$12,000,000 to an independent third party and loss of control on Brightjet Global Limited as a result of a joint venture agreement entered into between the company and two independent parties.

(f) Income tax credit/(expense)

Income tax credit/(expense) was calculated at 25% and 16.5% of the estimated assessable profits of its PRC subsidiaries and Hong Kong subsidiaries for both periods, respectively.

During the period, the income tax credit of HK\$2.4 million for HY2015 represented the reversal of deferred tax provision arising from fair value adjustments of intangible assets from acquisition of various natural gas projects.

(g) Loss attributable to owners of the Company

As a result of the foregoing, the Group's loss for the period attributable to owners of the Company was arrived at HK\$3.5 million, representing an decrease by HK\$10.1 million from HK\$13.6 from HY2014.

FUTURE PROSPECTS AND DEVELOPMENT

The Group is optimistic about the long term economic development in the PRC. There are a number favorable policies launched by the PRC government which will enhance the development of natural gas industry in the PRC, including but not limited to (i) urbanization plan; (ii) the proposal for energy conservation and environmental protection; and (iii) action plans for eliminating highly polluting coal-fired boilers and replacing with natural gas-fired boilers among high energy consumption industries. Therefore, it is expected that there will be escalating demand for natural gas in the PRC for industrial, transportation and residential uses and the Group will continue to benefit from the development of the natural gas industry in the PRC.

Looking ahead, the Group will continue to expand its footprints for the natural gas business in the PRC. Amid the recent crackdown on corruption and shake-up of the energy sector in the PRC and trimming of international oil prices, it creates a window of opportunities to acquire natural gas projects with more rooms for negotiation on deal pricing. The Group will spare no efforts to explore potential merger and acquisition opportunities, which can enhance the market presence and financial return of the Group.

The Group also always strives to identify more potential low-cost natural gas sources. Recently, overseas LNG is on the downward price trend. In the PRC market, the imports of LNG has improved because the supply capacity and infrastructure of importing LNG is getting more available and up to date a total of 12 LNG terminals have been completed and launched for operation. Therefore, it is expected that utilizing imported LNG will be an important evolving trend in the natural gas market, especially the cities along the coastal areas. The Group is exploring the opportunities to invest in LNG receiving terminals in PRC and identify certain overseas LNG sources with competitive pricing to import low-cost LNG and tap into the business of LNG trading in the PRC and/or to supply the Group's own LNG refueling stations. On 16 July 2015, the Company entered into an acquisition agreement to acquire Smart Rainbow Investments Limited, which will hold the 10% interest in a LNG receiving terminal in Haikou and will engage in the LNG trading business in the PRC. The Board believes that the abovementioned acquisition can facilitate the Group to tap into the LNG trading business in the PRC and also secure available overseas low-cost gas sources to be utilized in our own natural gas projects, which can further improve the profit margin.
