Chairman's Statement

Leveraging Wuzhou International abundant brand resources and its own expertise, Wuzhouhui provided one-stop services covering the entire business process from project investment and development consultancy, sales agency planning and commercial operations and management, with full integration of resources in the industry chain, such as storage and logistics, e-commerce, and integrated finance.

Dear Shareholders,

On behalf of the board (the "Board") of directors (the "Directors") of Wuzhou International Holdings Limited ("Wuzhou International" or the "Company"), I hereby present the interim results of the Company and its subsidiaries (the "Group") for the six months ended 30 June 2015.

REVIEW OF RESULTS

Revenue of the Group for the six months ended 30 June 2015 was RMB2,182 million, representing a decrease of 13.0% compared to RMB2,508 million for the same period of 2014. Profit of the Group attributable to equity owners of the Company for the six months ended 30 June 2015 amounted to RMB164 million. To better address requirements of the Group's business development, the Board does not recommend the payment of interim dividend for the six months ended 30 June 2015.

Confronted with complicated situations at home and elsewhere during the first half of 2015, the Chinese economy showed stability amid a slowdown in growth and moved along within a reasonable range. There were improvements in the growth rates for major economic indicators in recent months, underpinned by a positive momentum in new employment figures for cities and townships, further increase in domestic demand and ongoing optimization of the industry mix, as individual income grew in tandem with economic development. Moves by the People's Bank of China to lower interest rates as well as the reserve requirement ratio, reflecting relative easing in the monetary policy, has further improved liquidity in the market for a positive macro-environment in general.

For the period under review, the Group achieved contracted sales of RMB3,278 million, representing an increase of 8.8% over the same period of the previous year and a 47% completion of the annual sales target set by the Group. Benefitting from the strategy to pursue vigorous expansion in other fast-growing cities beyond Jiangsu Province, the Group reported a more balanced regional mix of revenue. As at 30 June 2015, the Group owned 37 projects across 11 provinces/municipalities in China, and its contracted sales involved 33 development projects in 11 provinces/municipalities.

Chairman's Statement

BUSINESS DEVELOPMENT STRATEGIES

The real estate sector has been rapidly changing under the impact of Internet finance. While the market was concerned with how the prospects of traditional commercial properties would be affected, Wuzhou International had commenced moves for transformation into an "asset-light" business model, such as the building of an end-to-end commercial and trade logistics business chain and the introduction of one-stop, comprehensive asset management and operation.

On the one hand, Wuzhou International continued to fortify its business of commercial and trade logistics centres and build integrated commercial and trade logistics centres catering to market demands, with a special emphasis on the development of "manufacturer-oriented" commercial and trade logistics markets and industry parks, which was essentially the construction in industrial manufacturing hubs of efficiently integrated commercial and trade logistics centres which facilitate industrialization and urbanization and serve a full range of functions. The Wuzhou Leqing Project located in Leqing, the largest hub in China for the electrical appliance sector, was one such project resulting from vigorous implementation of the Group's strategy of the "manufacturing-base market." The project provided under one roof a wide array of functions, such as ancillary services, trade fairs, storage and logistics, financial settlement and integrated commercial services, and facilitated intensive integration of commodity flow, information flow, flow of human resources and cash flow, thereby creating added value in the development of industries, booming of trade, generation of tax income and job creation. Centrally planned, leased and operated, the commercial and trade logistics parks developed by Wuzhou are closely catered to market demands, as the implementation of the Wuzhou operating system on modernized hardware assured that markets came into shape quickly in ongoing prosperity.

On the other hand, Wuxi Wuzhouhui Technology Co., Ltd. ("Wuzhouhui"), a wholly-owned subsidiary of Wuzhou International, was making major efforts in the development of the "asset-light" model, seeking to provide smart project operation systems and all-rounded services for a variety of customers on the industry chain through the implementation of one-stop, comprehensive asset management and operation. Its core businesses covered the entire business chain of commercial and trade logistics, comprising the operation and management of commercial properties, management services, storage and logistics management, e-commerce and integrated finance. In effect, it provided integrated solutions in commercial and trade logistics.

Leveraging Wuzhou International abundant brand resources and its own expertise, Wuzhouhui provided one-stop services covering the entire business process from project investment and development consultancy, sales agency planning and commercial operations and management, with full integration of resources in the industry chain, such as storage and logistics, e-commerce, and integrated finance. The operation of the meticulously created end-to-end industry chain comprising "commerce and trade + logistics + e-commerce + finance" has assured smooth passages in the channels for sales, logistics, information flow and financing, providing a stronger driving force for corporate development and generating benefits for both the industry and the market.

Based on the new standards prevailing in the modern commercial and trade logistics sector, Wuzhouhui introduced the innovative business model of "replicable development," which can be extensively applied to serve the entire commercial and trade logistics sector while helping Wuzhouhui to achieve organic expansion, thereby driving the industry as a whole to a new level. Currently, Wuzhouhui has commenced joint venture projects in core regions for activities in commercial and trade logistics, such as Jiangsu, Zhejiang, Guangdong, Shandong, Henan and Guizhou. With ongoing rapid expansion underway, the service model of Wuzhouhui has become a successful replicable business model for the commercial and trade logistics sector.

Chairman's Statement

DIVERSIFIED FINANCING PLATFORMS

The Group continued to actively explore new financing instruments by fully utilizing its access to the international capital markets. In June 2015, Wuzhou International successfully issued new shares with an amount of HK\$460 million (accounting for 6.6% of its enlarged share capital). As the first share issue of the Company since its listing in 2013, it enjoyed overwhelming response from investors, which included over 10 international institutions renowned for long-term investments. In July 2015, the Group completed another successful issue in the form of 2018 senior notes to raise US\$100 million, which further evidenced the bond market's confidence in the Company. The exploration of various financing means and recognition by the capital markets have allowed the Group to seize market opportunities more effectively, as well as to enhance its financial flexibility.

BROAD RECOGNITION BY THE PUBLIC AND IN THE INDUSTRY

The development of Wuzhou International in adherence to its mission of pursuing "Responsible Real Estate and Healthy Commercial Business" has earned the respect of and commendation from its shareholders, clients, business partners and industry peers. The Group has been named among the "Top 500 Private Enterprises in China," "16th Ranking Property Developer," "2015 Top 10 Hong Kong Listed PRC Real Estate Companies by Investment Value," "2015 Consolidated Commercial Property Developers in China (8th ranking)" and "31st Ranking Commercial Property Developers in China by Value."

We would like to take this opportunity to thank our partners as well as our shareholders and investors for their loyal support. Sincere gratitude also goes to customers who have purchased our products and testified to their value and quality. Gaining the confidence of customers is essential to brand building and shows the genuine value of a company in the market. Last but not least, we must thank our Directors, senior management and employees for their total commitment and dedication, which has provided the driving force for our development and a strong foundation for our soaring growth in future. The people mentioned above have helped to assure ongoing stable development for Wuzhou International in the first half of 2015. Once again, may I express my profound gratitude to our Directors and senior management for their able leadership and to all employees for their relentless hard work.

Management Discussion and Analysis

MARKET REVIEW

In the first half of 2015, the Chinese economy was stable and improved under perplexing economic conditions domestically and globally, and kept operating within a reasonable growth range. Certain key performance indices have picked up in the last few months, rate of urban job creation has become positive, domestic demand has further expanded, industrial structure has continued to optimize and the growth in national income has been in line with the economic development. The economic growth in the past two quarters maintained at 7% which was very close to market anticipation, mirroring a stabilization of Chinese economy with moderate but stable and sound momentum of development.

In addition, a relatively loose monetary policy has been maintained by the People's Bank of China by simultaneously adopting the policy of reduction in both interest rate and reserve requirement ratio. Further release of liquidity and benign macroeconomic conditions in the first half of 2015 significantly narrowed down the decrease in gross floor area ("GFA") sold of commodity properties as compared to the decrease in GFA sold at the beginning of 2015. Progressive reduction in interest rate has been simulating the demand of buyers for house purchase, and demand for properties is expected to rise stronger.

III. Land bank

The Group considers that acquiring ample land bank at reasonable costs is crucial to its long-term development and profitability. It carried out in-depth studies on local urban planning and acquired lands of substantial development potential in order to build new commercial areas and design projects in line with market demand. During the period under review, the Group strived to consolidate its existing land bank and selectively expanded and developed into other areas, including Heilongjiang Province, for more extensive land bank across China.

As at 30 June 2015, the total planned GFA of land bank amounted to approximately 7,403,000 sq.m., including approximately 1,321,000 sq.m. for completed projects, approximately 2,304,000 sq.m. for projects under development and approximately 3,778,000 sq.m. for projects planned for future development. The land bank is sufficient for the development of the Group in the future three to five years.

Management Discussion and Analysis

As at 30 June 2015, the breakdown of land bank by regions is as follows:

IV. Centralized operation, management and marketing

Most of the purchasers of the Group's retail stores entered into exclusive operation and management agreements with it under which the Group received management service income from the purchasers for managing and controlling the leases of the retail shops, event organization and ancillary service provision. The Group also provided the purchasers with services such as project positioning, planning, design, construction, marketing, leasing and operation so as to ensure the centralized operation of projects. In addition, the Group also provided general property management services for tenants and occupants.

Outlook

China's fixed-asset investment is forecasted to rise approximately 12% this year with a tendency of slower growth in investments in developing manufacturing industries and real estate but a high growth in investments in infrastructure. Thanks to the effects of the policies promoting spending, the total amount of retail and consumer goods is anticipated to steadily grow in the second half of 2015. In addition, as further release of liquidity and benign macroeconomic conditions were bolstered by the policies of reductions in both interest rate and deposit reserve ratio, steady growth in property market is expected in the second half of 2015. Progressive reduction in interest rate has been simulating the demand of buyers for house purchase, and demand for properties is expected to rise.

In such circumstances, property developers have to give up their conventional business model involving development, construction, operation, property leasing and subdivision, and link an openly comprehensive services chain instead, creating a dynamic industrial ecosystem with business innovation, investment and financing services, enterprise and university collaborations and smart technology development, in order to gain competitive edge over rivals. In the great transformation of the property industry, each property developer has its unique characteristics. Wuzhou International has moved in the direction of developing synergy of trading, logistics and e-commerce, laying a concrete foundation for its "asset-light" transformation.

Management Discussion and Analysis

In March 2015, an “Internet Plus” strategy was delivered in the government work report of the People’s Republic of China (the “PRC”), highlighting the vital role of internet in the course of transformation of economic structure. Such strategy will encourage healthy development of e-commerce, industrial networks and internet banking. Wuzhou International will continue to facilitate integration of the operation of e-commerce platform and mortgage financing, forming a chain linking the sectors of trading, logistics and finance. Wuzhou International has strong offline channel and customer resources, providing it more competitive advantages. In 2015, Wuzhou International will continue to make major efforts in the development of the “asset-light” model, seeking to provide smart project operation systems and all-rounded services for a variety of customers on the industry chain through the implementation of one-stop, comprehensive asset management and operation. Its core businesses cover the entire business chain of commercial and trade logistics, comprising the operation and management of commercial properties, management services, storage and logistics management, e-commerce and integrated finance. In effect, it provides integrated solutions in commercial and trade logistics.

Looking forward, the Company will adhere to the values advocated by the Group, “Create value for the customers. Generate wealth for the society”, so as to provide solid guarantee for the sustainable development of the Group and our projects.

FINANCIAL REVIEW

Revenue

Our revenue comprises mainly income from the sale of properties, rental income, commercial and property management service income, property consulting service income and commissions from concessionaire sales after deduction of allowances for returns and trade discounts.

For the six months ended 30 June 2015, turnover of the Group amounted to approximately RMB2,182 million, representing a decrease of 13.0% from approximately RMB2,508 million for the corresponding period in 2014.

Sale of Properties

Revenue from the sale of properties is recognized (i) when the significant risks and rewards of ownership of the properties are transferred to the purchasers; (ii) neither continuing managerial involvement to the degree usually associated with ownership, nor effective control over the properties, are retained; (iii) the amount of revenue can be measured reliably; (iv) it is probable that the economic benefits associated with the transaction will flow to the Group; and (v) the cost incurred or to be incurred in relation to the transaction can be measured reliably. We consider that the significant risks and rewards of ownership are transferred when the construction of relevant properties has been completed and the properties have been delivered to the purchasers.

Revenue from property development represents proceeds from sales of our properties held for sale.

Revenue derived from property development decreased by 14.6% to approximately RMB2,041 million for the six months ended 30 June 2015 from approximately RMB2,389 million for the corresponding period in 2014. This decrease was due primarily to a decrease in the average selling price of properties sold to our customers.

Rental Income

Rental income generated from rental of investment properties increased by 50.8% to approximately RMB42 million for the six months ended 30 June 2015 from approximately RMB28 million for the corresponding period in 2014. The increase was due primarily to the continuing growth of the investment properties.

Management Discussion and Analysis

Commercial Management Service Income and Property Management Service Income

We generate commercial management service income from most purchasers of the retail units at our projects pursuant to our exclusive operation and management agreements. Under these agreements, which we enter into with the purchasers at the pre-sale stage, we typically receive commercial management service income equivalent to the entire rental value of the underlying properties for the initial periods ranging from three to five years, which typically commence upon the opening for operation of the building where the property is located, and then 10% of the rental value for the remaining years. In practice, we collect rents directly from the tenants of the underlying properties, retain our commercial management service fees and remit the remainder, if any, to the purchasers. To attract tenants, we may offer selected tenants rent-free periods ranging from two to six months. We typically secure tenants for the vast majority of the purchasers prior to the commencement of the initial period. Since we charge commercial management service fees based on the rental value of the underlying properties, we will not be able to receive any commercial management service fees in the event we are unable to lease out the underlying properties.

Commercial management service income increased by 10.9% to approximately RMB49 million for the six months ended 30 June 2015 from approximately RMB44 million for the corresponding period in 2014. Property management service income decreased by 10.4% to approximately RMB5 million for the six months ended 30 June 2015 from approximately RMB6 million for the corresponding period in 2014. The increase in commercial management service income was due primarily to the increase in the GFA of the properties operated and managed by us, while the decrease in property management service income was due to the gradual transfer of property management business to other third parties for concentrating in the business of commercial management service.

Property Consulting Service Income

Property consulting service income represents the revenue from consulting and advisory service rendered by the Group to third party companies in their development and construction of commercial properties.

Property consulting service income increased by 29.9% to approximately RMB32 million for the six months ended 30 June 2015 from approximately RMB25 million for the corresponding period in 2014. The increase in property consulting service income was due primarily to the increase in business volume of the services provided by us to third party customers.

Commissions from Concessionaire Sales

Revenue derived from the commissions from concessionaire sales decreased by 53.3% to approximately RMB4 million for the six months ended 30 June 2015 from approximately RMB8 million for the corresponding period in 2014, which was resulted from the decrease of the relevant sales.

Gross Profit and Margin

Gross profit decreased by 34.1% to approximately RMB677 million for the six months ended 30 June 2015 from approximately RMB1,027 million for the corresponding period in 2014. Gross profit margin decreased to 31.0% for the six months ended 30 June 2015 from 40.9% for the corresponding period in 2014. The decrease in gross profit was in line with the decrease in the total revenue for the six months ended 30 June 2015 while the decrease in our gross margin was resulted from the change in product mix.

Other Income and Gain

Other income and gains increased by 186.9% to approximately RMB77 million for the six months ended 30 June 2015 from approximately RMB27 million for the corresponding period in 2014. Other income and gains mainly represented by subsidy income and interest income and certain non-recurring income and gains.

Selling and Marketing Expenses

Our selling and marketing expenses decreased by 19.7% to approximately RMB165 million for the six months ended 30 June 2015 from approximately RMB205 million for the corresponding period in 2014. The decrease was due primarily to a decrease in general selling, marketing and advertising activities resulting from fewer number of properties that were pre-sold in the first half of 2015 as compared to that in the same period of 2014.

Management Discussion and Analysis

Administrative Expenses

Our administrative expenses increased by 5.4% to approximately RMB219 million for the six months ended 30 June 2015 from approximately RMB208 million for the corresponding period in 2014. This increase was primarily due to the increase in number of projects of the Group in the first half of 2015.

Finance Costs

Our finance costs decreased by 62.5% to approximately RMB39 million for the six months ended 30 June 2015 from approximately RMB105 million for the corresponding period in 2014. This decrease was due primarily to an increase in numbers of properties under development where the relevant finance costs was capitalized.

Income Tax Expenses

Our income tax expenses decreased by 23.2% to approximately RMB318 million for the six months ended 30 June 2015 from approximately RMB414 million for the corresponding period in 2014. The change was primarily due to the decrease in corporate income tax and decrease in land appreciation tax accrual.

Profit After Tax and Total Comprehensive Income Attributable to Owners of the Company

Profit after tax and total comprehensive income attributable to owners of the Company decreased by 53.5% to approximately RMB164 million for the six months ended 30 June 2015 from approximately RMB352 million for the corresponding period in 2014. This decrease was due primarily to the decrease in gross profit and revaluation gain on the appreciation of our investment properties in the first half of 2015 as compared to that in the same period of 2014. Our net profit margin was 7.5% for the period under review.

4. OPERATING SEGMENT INFORMATION

For management purposes, the Group is organised into business units based on their products and services and has three reportable operating segments as follows:

- (a) the property development segment engages in the development and sale of properties;
- (b) the property management and investment segment engages in providing commercial management services, property management services and investing in properties for their rental income potential and/or for capital appreciation; and
- (c) the others segment engages in department store operation and providing consulting services.

Management monitors the results of the Group's operating segments separately for the purpose of making decisions about resources allocation and performance assessment. Segment performance is evaluated based on reportable segment profit or loss, which is a measure of adjusted profit before tax from continuing operations.

No geographical information is presented as the Group's revenue from external customers is derived solely from its operation in Mainland China and no non-current assets of the Group are located outside Mainland China.

No information about major customers is presented as no sales to a single customer individually contributed to over 10% of the Group's revenue for the six months ended 30 June 2015 and 2014.

Fair value hierarchy

The following table illustrates the fair value measurement hierarchy of the Group's investment properties:

	Fair value measurement as at 30 June 2015 using			Total RMB'000
	Quoted prices in active markets (Level 1) RMB'000	Significant observable inputs (Level 2) RMB'000	Significant unobservable inputs (Level 3) RMB'000	
Recurring fair value measurement for:				
Completed commercial properties	–	–	6,152,900	6,152,900
Commercial properties under development	–	–	1,403,800	1,403,800
	–	–	7,556,700	7,556,700

Notes to Unaudited Interim Financial Information

12. INVESTMENT PROPERTIES (continued)

Fair value hierarchy (continued)

Below is a summary of the valuation technique used and the key inputs to the valuation of investment properties:

	Valuation techniques	Significant unobservable inputs	Range or weighted average	
			30 June 2015	31 December 2014
Commercial properties	Income capitalisation method	Estimated rental value (per sq.m. and per month)	21 to 262	14 to 261
		Discount rate	4.16%	4.30%
Commercial properties under construction	Income capitalisation method	Estimated rental value (per sq.m. and per month)	24 to 75	22 to 54
		Discount rate	4.82%	4.19%

The fair values of investment properties are determined using the income capitalisation method by capitalising the rental income derived from the existing tenancies with due provisions for the reversionary income potential of the properties. The fair value measurement is positively correlated to the market monthly rental rate, and negatively correlated to the capitalisation rate.

A significant increase/(decrease) in the estimated rental value per annum in isolation would result in a significant increase/(decrease) in the fair value of the investment properties. A significant increase/(decrease) in the capitalisation rate in isolation would result in a significant decrease/(increase) in the fair value of the investment properties.

21. SHARE-BASED PAYMENT TRANSACTIONS

(a) Pre-IPO share award scheme

Pursuant to the board resolution dated 30 September 2012, the Group established a pre-IPO share award scheme (the "Share Award Scheme"). Under the Share Award Scheme, the Shu Brothers, the Controlling Shareholders and directors of the Group, transferred 1% of the Company's shares (representing 34,221,619 shares, the "Awarded Shares") held by them through Boom Win to 7 employees of the Group. The share transfer was completed on 12 October 2012. The objectives of the Share Award Scheme are to recognise the contributions of certain employees of the Group and to provide incentives.

The Awarded Shares, subject to a vesting period, are being held by the trust on behalf of the grantees. The vesting period is five years, from the beginning of each instalment, during which 24%, 24%, 24%, 14% and 14% of the Award Shares granted to employees will vest on each of the five anniversaries of the first vesting date. The first vesting date is 1 January of the year following the successful listing of the Company's shares on The Stock Exchange of Hong Kong Limited.

The fair value of the Awarded Shares granted under the Share Award Scheme on 30 September 2012 was RMB14,246,971, which was determined by Savills Valuation and Professional Services Limited, independent professionally qualified valuers, using the income approach. The significant input under the approach was the estimated fair value of shares at the grant date. The consideration of the above 1% equity interests of the Company was RMB8,411,805.

The Awarded Shares are contingent at the grant date and are subject to the cancellation in the event of resignation of the grantee; and the vesting conditions of the shares successfully listed on The Stock Exchange of Hong Kong Limited and satisfactory performance of such employee based on his or her annual performance appraisal. During the six months ended 30 June 2015, the Group recognised an expense in relation to the Awarded Shares granted to certain employees of the Group amounting to approximately RMB519,000 (six months ended 30 June 2014: RMB827,000) as the vesting condition has been probable since the Listing Date.

21. SHARE-BASED PAYMENT TRANSACTIONS (continued)**(b) Share option scheme**

The Company operates a share option scheme (the "Scheme") for the purpose of providing incentives and rewards to eligible participants who contribute to the success of the Group's operations. Eligible participants of the Scheme include the Company's directors, including independent non-executive directors, other employees of the Group, suppliers of goods or services to the Group, customers of the Group, the Company's shareholders, and any non-controlling shareholder in the Company's subsidiaries.

Pursuant to the board resolution dated 24 September 2014, the Company has granted share options under the Scheme adopted on 27 May 2014 to certain directors (including independent non-executive directors) and the employees of the Company and its subsidiaries (the "Grantee(s)") which, subject to the acceptance of the share options by the Grantees, will enable the Grantees to subscribe for an aggregate of 93,119,611 new shares of US\$0.01 each (the "Share(s)") in the share capital of the Company, representing approximately 2% of the issued share capital of the Company.

The following share options were outstanding under the Scheme during the period:

21. SHARE-BASED PAYMENT TRANSACTIONS (continued)

(b) Share option scheme (continued)

The exercise prices and exercise periods of the share options outstanding as at the end of the reporting period are as follows:

30 June 2015

Number of options '000	Exercise price HK\$ per share	Exercise period
12,018	1.27	13-9-24 to 14-9-23
18,835	1.27	14-9-24 to 15-9-23
25,114	1.27	15-9-24 to 16-9-23
55,967		

The fair value of the share option on the grant date was HK\$33,084,001 (HK\$0.355 each).

The fair value of equity-settled share options granted during the year was estimated as at the date of grant, using a binomial model, taking into account the terms and conditions upon which the options were granted. The following table lists the inputs to the model used:

Dividend yield (%)	–
Expected volatility (%)	35.24
Risk-free interest rate (%)	0.9
Expected life of options (year)	4
Weighted average share price (HK\$ per share)	1.27

The expected life of the options is based on the historical data and is not necessarily indicative of the exercise patterns that may occur. The expected volatility reflects the assumption that the historical volatility is indicative of future trends, which may also not necessarily be the actual outcome.

No other feature of the options granted was incorporated into the measurement of fair value.

The 4,650,000 share options exercised during the year resulted in the issue of 4,650,000 ordinary shares of the Company and new share capital of RMB285,000 (before issue expenses), as further detailed in note 20 to the financial information.

The Group has provided guarantees in respect of mortgage facilities granted by certain banks to the purchasers of the Group's completed properties held for sale. Pursuant to the terms of the guarantee arrangements, in case of default on mortgage payments by the purchasers, the Group is responsible for repaying the outstanding mortgage loans together with any accrued interest and penalty owed by the defaulted purchasers to banks. The Group is then entitled to take over the legal titles of the related properties. The Group's guarantee period commences from the date of grant of the relevant mortgage loan and ends after the execution of the individual purchaser's collateral agreement.

The Group did not incur any material losses during the reporting period in respect of the guarantees provided for mortgage facilities granted to the purchasers of the Group's completed properties held for sale. The directors consider that in case of default on payments, the net realisable value of the related properties can cover the repayment of the outstanding mortgage loans together with any accrued interest and penalty, and therefore no provision has been made in connection with the guarantees.

The Group's finance department headed by the finance manager is responsible for determining the policies and procedures for the fair value measurement of financial instruments. The finance manager reports directly to the chief financial officer. At each reporting date, the finance department analyses the movements in the values of financial instruments and determines the major inputs applied in the valuation. The valuation is reviewed and approved by the chief financial officer. The valuation results are discussed with the audit committee twice a year for interim and annual financial reporting.

The fair values of the financial assets and liabilities are included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.
